Frof. Barnard of Lick Observatory Sights a Fifth Satellite to Jupiter.

## ONE MORE ADDITION TO SOLAR SYSTEM

Something That Will Cause the World of Science to Ring-Considered the Great-

est Astronomical Achievement of the Century.

CHICAGO, Ill., Sept. 12 .- "Prof. Barnard has arranged a niche for nimself beside Galileo, Herschell and other men of that kind, and his fame is as secure as it can be." S. W. Burnham, the well known astronomor who recently resigned at the Lick observatory to accept the position of clerk of the United States circuit court in this city, made the remark today and showed this telegrain : "Mount Hamilton Observatory, September 11, 1892.- E. E. Barnard sends greet ng to S. W. Burnham with a fifth satellite of Jupiter, of the thirteenth magni-

tude; period seventeen hours and thirty-six minutes; distance from center 113,400 miles. "The discovery of this satellite, which was made by Barnard Satarday," continued Mr. Burnham, "is the greatest astronomical achievement of the century and will cause the world of science to ring. It simply means the addition of another body to the solar system, which is in these days a most stu-pendous discovery. It is far greater than the finding of the satellites of Mars, for these two bodies were more or less easy of observation. Baronard's work made an addition to the solar family in a field that was well worn out and that was thought to have been so thoroughly sifted that astrono-mers gave up the task of looking for fresh facts. I can tell you that this will be grand news for the astronomers of Europe.

"Barnard is an able man and observer. This is the first good work of any moment that has been done with the great Lick tele scope, and if such observation as this is continued the big glass will serve to bring up startling discoveries in the most unexported paces. Barnard is an outhusiast, whose heart and soul are In his work. He works for the pure love of the occupation and of the science and does not de it for pay. It is men like this that bring to humanity such an immortal discov-ery as this. In my opinion it is the astrono-mical achievement of the century, and it will be so acknowledged."

How the Dictators of the Disturbed Republic Assert Their Authority--Venezueia's Revolutionary Calef Will Finally Prevail-schemes of British Subjects.

WASHINGTON BUREAU OF THE BEE, ) 513 FOURTEENTII STREET, WASHINGTON, D. C., Sept. 12. Another phase of the Venezuelan controversy developed this afternoon when Acting Secretary of State Adee was called upon by Francis Gonzalez and Captain Smith of Venezuela and their New York attorney, Mr. L. C. Raegener. Captain Smith is the com mander of the steamer Portland, which was detained in New York harbor last week be-

cause she was about to sail for a Venczueian port with a large cargo of ammunition ou board, presumably for the use of the revolutionists. As the United States government did not care to get into another tangle such as that following the shipment of arms to Chill in the steamer Itata it was decided to hold the steamer Portland.

Captain Smith was here to urge the immediate release of the Portland. He made no secreey of the fact that his ship was loaded with arms, and was even ready to show the manifest, which gave her cargo as 17,000 stands of rifles, several hundred boxes of cartridges, a Gatling gun and the necessary cartridges.

Mr. Gonzalez is the merchant who consigned the guns. It was urged to Socretary Adee that the shipment was entirely of a. mercantile character and that the guos were taken down south for sale to anybody who would buy them, just as provisions might be carried on speculation. The point was made that as the arms were not intended for any particular faction or against any special party the United States ought not to hold them. Mr. Adee took the subject under advisement, but it is safe to say that the Portland will not sail with her warnike cargo. Captain Smith said to Tue Bee corres-pondent: "I left Venezuela about the middie of just month and at that time there was complete demoralization of government, busi-ness, and even family relations. Those who were temporarily acting as dictators at the capital were plundering the bauks and wringing money from the people. I had ex-pected on arriving in the United States to near that the dictators had been driven out and that the people had inaugurated a constitutional government. But the same reign of terror continues, although General Crespo will ultimately succeed in deposing the did tators and in re-establishing the rule of the

people. "My purpose was to carry arms where they might be bought by General Crespo's party, although they would be for sale to any one who wanted them. I have not tried to hide the fact that I was carrying guns, for I deal in guns just as other merchants deal in other commodities." The State department officials are inclined

to look with suspicion upon Captain Smith's statement. They say his destination was Trinidad, at the mouth of the Orinoco river. which is a British possession. This gives color to the belief that the British interests at that point are beining to arm some of the Venezuelan factions. It is this British inter-ference that the Washington officials most ob-ject to, so that Captain Smith's British des-tination is likely to be the main cause for not letting him sail with his ammunition. The State department is not yet quite reaay to assist the British even indirectly in their plans of aggression on South American soil.

County and Congressional Tickets. The time for filling opposition tickets for delegates to the county and congressional conventions expired at noon yesterday, and it is therefore settled in what wards there will be coutests.

The voters of the First and Second wards are appar, nily satisfied with both the tickets named at the cancuses.

Some of the Third warders want a few other names than those selected Friday night, though they are satisfied with som at them. The new ones they want are: County-H. F. Watson, A. D. White, J. F. Омана, Sept. 12 .-- To the Editor of THE

BEE: On Saturday evening THE BEE stated

that the Seventh ward county delegates

were personally pledged to Mr. Brecken-

ridge for county attorney. I am also aware

of the fact that within an hour after they

were chosen he openly made such claim.

The facts are that the Seventh ward has

three candidates for county attorney, Mr.

Breckenridge, Mr. Adams and myself, and as

each claimed that he would receive some support outside his ward it was explicitly

agreed by all that a committee should select

n'ue representative republicans as delegates,

who were to be unpledged and uninstructed.

The delogates chosen Fr day night are the ones selected by the committee, and I am

much mistaken in their character if they have already done what was expressly un-derstood was not to be done in other

words, while we were proud of the number of statesmen living in that ward we also

realized that all could not be nom-inated, and it was therefore agreed that neither caudidate was to be

deem it my duty to my friends as well as myself that the real fact should be fully known so that they will not be deceived nor

#### Interested in the Masses.

There is a great deal of comment in Washington tonight upon President Harrison's work during the threatened invasion of the cholera. It is equal to the services he ren-dered his country two years ago in thwart-ing a most disastrous financial panic. The president's last dispatch to Secretary Foster of the Treasury department, in which he condemus the steamship com-panies for their inordinate avarice in persisting in carrying passengers from cholerainfected ports to this country after a warning not to do so, and in the face of the fact that it is at the peril of American life and property, is commented upon on every hand. President Harrison has told these steamship companies that if they do not cease this work we will turn them back with their in fected cargoes and their cholera-ridden pas sengers. The president believes, too, that the traffic in rays from abroad should be stopped as it spreads all sorts of disease Nover before has a president taken so much interest in or acted so intelligently, so promptly or efficiently where the interests of the common people were at stake.
