

Shiverick's Fire Sale

\$100,000 Furniture, Carpets, Draperies.

After the fire we separated our stock and moved about half to our warehouse. These goods are being "gone over" and refinished as rapidly as possible, and will from day to day be placed on our floors and all must be sold this month. if price will do it.

Tomorrow morning we bring over about one hundred \$10.00 fancy rockers which are practically as good as before the fire that will be closed out at \$5.00 and \$6.00.

Goods that do not sell freely will be reduced in price accordingly, as the end of the month draws near, and people who expect to purchase furniture or carpets this fall cannot afford to pass this sale.

We have purchased four new furniture wagons and hope hereafter to make delivery within reasonable time.

Our entire stock is included in the sale.

Charles Shiverick & Co.,

1204, 1206, 1208, 1210 Farnam St.

CHOLERA AND CHOLERA GERMS

Omaha Citizens Discuss the Best Way to Keep Them Out of the City.

SOURCES OF THE GREATEST DANGER

Dr. Somers Tells of Them and Advises How They Should Be Guarded Against—Various Citizens Make Suggestions—The City's Need.

Cholera germs will be likely to experience considerable difficulty in making a raid upon the people of Omaha. There are indications that the citizens of this metropolis will soon be "wide awake and starting," as Billy Bagstock would say, upon the subject of preventing this dread contagion from securing a foothold among our people.

The citizens' meeting called yesterday afternoon at the mayor's office was largely attended and deep interest was manifested in the discussion of the various ways and means of placing the city in a good sanitary condition.

Some of the prominent gentlemen present were Mayor Bemis, Councilmen Steel, McLeary, Prince and Jacobson, Rev. J. T. Mackay, Rev. Charles W. Savidge, Mr. Thomas Swobe, Mr. J. M. Woolworth, St. A. D. Bacon, W. A. L. Gibson, W. H. Alexander, City Attorney Connell, Judge Ambrose, W. H. Russell.

Dr. Somers' Remarks.

"I am not an alarmist, but the fact that cholera has made its way through quarantine and is in New York city now is conclusive evidence that it may have the same in Omaha within a year from today. Cholera may break out in Omaha any day. It may reach Omaha just as soon as an immigrant can come from New York.

"Cholera may be brought from Europe to this country and break out at interior points without having been noticed on the way from Europe to this country. The germs may be carried in the clothing or baggage of the immigrant. We may just as well meet the facts as they are. Cholera is liable to appear in Omaha. I think it will appear here within a year. What will we do with it when it comes? The difficulty that has met the Board of Health is the lack of funds."

Dr. Somers then went on to give a statement of the financial resources and expenditures of the Board of Health. He thought the council should appropriate \$5,000 at least for the purpose of cleaning up. He said that the people had not been thoroughly aroused. Police officers had found a great many people unwilling to put forth even the slightest effort to clean their yards and alleys. Many had to be threatened with police court prosecution before they would turn a hand.

"The only way to clean the city and do it right," said the doctor, "is to have it done at public expense."

Councilman Steel asked Dr. Somers if Chief Sawyer could not detail a number of police officers to take hold of the work and notify the people that they must clean up. The doctor replied that Chief Sawyer was out of the city, and even if he was in town the police officers would hardly do the work so well as some officers specially employed for that purpose.

Speaking of the conditions in what is known as "Bohemian town," over on the south side, Dr. Somers said that Mr. Frank Kasper had lent very effective assistance in getting the Bohemians to clean up their part of the town. That district, he said, had been placed in a pretty good condition.

Sources of the greatest danger. With regard to foul wells Dr. Somers said that the Board of Health had always ordered wells filled up where cases of typhoid fever and other contagious diseases had resulted from the use of the water, but the board realized that as a matter of fact it would be impossible to compel people to fill wells unless the water

had been found by chemical analysis to contain germs of disease. The greatest danger lay, the doctor said, in the milk and water which the people drank. He thought there was great need of having more stringent laws with regard to the inspection of milk. There was more danger, he believed, from the milk supply than from the meat that the people were eating, and yet the city had several meat inspectors and no milk inspector at all.

There was some discussion as to the possibility of having water mains extended so as to provide many of the residences now without city water with water service. Councilman Steel stated that it would be difficult to make any considerable extensions in the water mains because, in the first place, the water works company was in the hands of a receiver, and in the second place the water fund would be exhausted when the mains already contracted for had been paid for.

A Move in the Right Direction. Mr. G. M. Hitchcock moved that the Board of Health be requested to employ fifteen special inspectors at once and set them to work notifying the people that they must clean their premises, and that the board also be instructed to prosecute all parties who refused or failed to obey.

The motion was heartily seconded and was carried. Mr. Connell said he would give more for a few good, vigorous prosecutions and the publication of the same in the newspapers than he would for the work of a dozen inspectors. He believed that the people would be awakened to activity by a few prosecutions and the full publication of the same. He favored the idea of having the police force enlisted in the work of a careful inspection of the entire city.

Mr. Jacobson, for the finance committee of the council, stated that he hoped to get an arrangement made by which \$12,000 could be taken from the road fund and placed in the general fund, and if that could be done the Board of Health could be provided with \$3,000 for the special purpose of cleaning the city and preparing to ward off cholera.

Councilman Steel asked Mayor Bemis to give his opinion of the situation, particularly with regard to the inspection of the alleys and of private premises by the police force. The mayor read a short piece from a Chicago paper in which it was stated that a Chicago police force had been instructed to make a thorough inspection of the city. He believed if that was a good plan for Chicago it would be a good plan for Omaha.

Mr. W. H. Alexander made a few appropriate remarks, stating that the citizens of Omaha should not be lulled to sleep simply by the statement that the city is in a long way from New York. The unwelcome visitor might appear in Omaha at any time. He favored the idea of having a number of specially detailed officers for the work of inspection.

Councilman Prince suggested the plan of having citizens notified that on certain days in the week the garbage wagons would take up all garbage and refuse from their alleys if it was placed where the garbage hauler could get to it. He wanted to see the city given one good cleaning and then let the Board of Health prosecute everybody who maintained a nuisance or harbored any form of garbage about their places after that.

Need of More Sewers. Mr. W. H. Russell made a vigorous talk in which he said that one great need of the city was more lateral sewers so that a whole lot of cesspools would be filled up. He thought that the cesspools were a vicious and dangerous nuisance.

Councilman Steel moved that the chief of police be requested to co-operate with the Board of Health and place as many officers as at the disposal of the board as might be found necessary. The motion was carried.

Dr. Somers was asked a number of questions about the propagation of disease germs. He said that disease germs flourished rapidly in horse manure, poultry yards and in all sorts of decaying vegetable and animal matter. Poultry manure, he said, was especially favorable to the propagation of disease germs.

Dr. Somers said in some instances the city would be obliged to clean and abate nuisances, for the parties who maintained them were so utterly devoid of common decency that they would go to jail before obeying the order of the court.

On an Excursion to Denver. About a hundred of the telegraphers and their wives left on the evening trains yesterday for an excursion to Denver, the majority by the Burlington and the rest by the Union Pacific. They will all be in Denver by 3 o'clock this morning and will spend the day seeing the sights of that city. Tomorrow they will enjoy an excursion over the Union Pacific "loop" to Georgetown, and at 5:30 tomorrow night they will leave Denver for Omaha and home.

Keep Your Eye on Godey's. There is every indication that Godey's Magazine for October, ready September 13, will mark an era in periodical literature. This will no longer be known as Godey's Lady's Book, but Godey's America's First Magazine, established 1830. In the first place the magnificent work of art, "Godey's Idea of the World's Fair," which is to be presented to every purchaser of this number, is said to be so beautiful and artistic in design and coloring that every one will want it. First in the contents comes John Habberton's complete novel, "Honey and Gail," a companion to "Helen's Babies," fully illustrated by Albert B. Wenzell. This is an idea first conceived by Godey's and now produced with brilliant success. Godey's fashions will be a most conspicuous and beautiful feature of the publication, there being, in addition to carefully edited descriptions and fashion articles, four exquisite plates produced in ten colors, and representing four of the latest Paris costumes. Mrs. Henry Ward Beecher's "Home" department will be read by the women of America, and all the magazine's old admirers will read with interest Albert H. Hardy's carefully written article on "Godey's Past and Present." John Habberton reviews all the books, and the whole forms such a rich literary feast that to examine a number of the new Godey's will mean to irresistibly desire it.

REPUBLICANS

Republican primaries this (Friday) afternoon. Dr. and Mrs. Paul Grossman and son leave for the east today.

Miss Louisa Hadfield of the county clerk's office has returned from Clara, where she went to attend the wedding of one of her former schoolmates.

Robert H. Bloss, a druggist living at 1312 North Sixteenth street, has been arrested on complaint of Dr. W. Ross for the embezzlement of \$1,000 from the stock of Dr. Schenck's Mandrake Pills.

Andrew Murphy, the blacksmith on the corner of Fourteenth and Howard streets, desires it to be understood that he is not the Andrew Murphy who was assaulted by a colored porter in a saloon on Tuesday.

The fire department was called out to extinguish a blaze on the roof of the Denver chop house, 1514 Dodge street. No damage was done and the genius of the house who were eating dinner did not know that there had been a fire.

Mr. Frank Kretschmer of the interstate commerce commission, was in Omaha yesterday. He declared that his visit had no special significance, but that it is a habit that Mr. Kretschmer has fallen into of visiting the city pretty sure that there is something brewing in railroad circles when Frank Kretschmer puts in an appearance.

Republican county, city and congressional primaries this (Friday) afternoon. Clara Lipp was arrested yesterday charged with incorrigibility by her father. Clara is not quite 16 years old and has led her parents a merry dance for the past two years. Wednesday she was sent to a meat market to buy meat and failed to return. Her father says she was in the company of a young fellow named Tyler.

FACING THE CHOLERA

Keep cool! The plague can't reach you if you do the right thing at the right time.

LOOK AT THE SECRETS!

See that they are healthy and perfect. Put the liver to natural work. The causes digestion and nutrition. Avoid unripe fruits, use light wholesome meals. Cook everything, even water, clear of the membranes of starch and bowels at once, with

Dr. Schenck's Mandrake Pills.

They carry away all disease germs and all poisonous matter. They assure perfect health and natural secretions. They turn the liver to the account of digestion and nutrition, quickly and safely. Keep your head, feet warm, skin clean and clear.

SCHENCK'S MANDRAKE PILLS.

have been tested in many a Cholera epidemic. They do for the

STOMACH, LIVER AND BOWELS

just what sanitary science says should be done with these organs, during and after an epidemic. They clean and purify the large, small and the alimentary channels in perfect order.

Avoid stimulants. Clear their effects out of the system at once with the MANDRAKE PILLS. Put the alimentary channels in order and all diseases will be cured.

In cholera epidemics, and all others involving the stomach and bowels, more cases of prevention and cure are effected by the use of Schenck's Mandrake Pills than by any other remedy or remedy.

TAKE A PILL

Hobb's Are the Best on Earth.

Act promptly yet gently on the LIVER, BILIOUSNESS, HEADACHE, NEURALGIA, RHEUMATISM, BRUISES, SWELLINGS, PAINFUL MENSTRUATION, CONSTIPATION, COLIC, AND ALL AFFECTIONS OF THE DIGESTIVE SYSTEM.

They are sugar coated, do not grip, very small, easy to take, and purely vegetable.

Perfectly digestible, follow their use. They are sold by all druggists, or sent by mail, 25 cts. a trial. Address HOBBS' MEDICINE CO., Prop., San Francisco or Chicago.

FOR SALE IN OMAHA, N.B.: BY J. A. Fuller & Co., Cor. 14th & Douglas Sts. J. A. Fuller & Co., Cor. 14th & Douglas Sts.
