JUDGE DOANE'S ERMINE.

He Will Put it Aside to Go to Congress of Resume His Law Practice. Elected to congress or not elected to con-

gress, it is now certain that Judge George W. Doane will put aside the robes of the judiciary and step down from the position on the bench, which he has occupied for a number of years. If not elected he will resume the practice of law in this city.

Judge Doane did not decide until yesterday that he would positively leave the bench. Now, however, he has given his word that the dealing out of justice, so far as ne is concerned, will be turned over to When this will be the judge cannot others. positively state. It may be about the middle of the present month and it may not be until the middle of December.

In speaking of the matter vesterday, the judge said that his nomination had nothing to do with his intention to resign. That he would leave the bench was something that he decided upon some months ago, though he had not made it public. The duties of the court would prevent his resignation being handed to the governor for some days, as he did not propose to do anything that would prevent or delay the administration of jus-

If he resigned this month he said that he might take some interest in politics, but if the resignation was not handed in until-December he would not take any part in the campaign, as he did not think that politics and the judiciary went hand in hand. Although this information has not been made public until now, it has been known, or rather guessed at by a few parties who have had an idea that they were on the inside, and a quiet but lively hustle has been made by

the parties who are acklous to step into the shees which Judge Doane has worn for years and is now about to throw away. That the appointee will be a democrat goes without saying, and for that reason the hustling is all with the members of the demo-George W. Shields, John Schomp and F. A

SOUTH DAKOTA CROPS.

Last Bulletin of the Season Indicates a Very Good Yield. Hunon, S. D., Oct. 1.-Below is bulletin

No. 27, giving crop conditions in South Dakota up to date. No more crop bulletins will be issued from the United States weather bureau here the present season. Threshing is progressing slowly, present indications being that it will continue late into the fall months. Wheat is reported as yielding on an average of twelve to eighteen bushels per acre. The favorable weather conditions of the past two weeks throughout every section of the state have securely sealed the condition of the corn cron.

The entire cron with the exception of a small portion planted very late, is secured beyond all probable doubt. In the central and west portions of the state there has not been an instance of a killing frost this season. In the eastern and southeastern portions, where core is the farthest ad-vanced, a killing frost occurred, but at that time most of the corn was in a condition to be little harmed by its effect.

Reports relative to the crops of millet and flax continue flattering. A great abundance of hay has been cut and put in stack. Run is now needed badly to place the soil it good condition for fal i plowing.

Abner Wright and one Jenkins, and it is for these men that the contractor who was cut-ting the ditch said that he was working when interrogated by the sheriff on that point, and tnese are the individual whom the interested property owners on this side of the river propose to make sweat before they get through with the case.

The one man who was instrumental more than any other in securing the injunction and stopping the work was Charles P. Benjamin, the real estate man of this city. told the whole story of the plot yesterday. His indignation had hardly cooled even in

the thirty-six hours that had elapsed since leaving the scene of operation, and he began by characterizing the attempted steal as the most unparalleled piece of gall and rind that had ever come to his notice. "Why," he said, "they had gone about it.

They Were Working in Earnest.

"Oh, I tell you the whole scheme had been mapped out, and it was only by the merest chance that their plan was upset. If the water had been turned into that ditch there would be no such thing as undoing the work. Over 600 acres would have been lifted to the lowa side at the first pop and the lay of the land is such that over 2,000 acres more would have followed suit just as soon as the channel got fairly to work in its new location. It would have cut off land owned by Charles Childs, Lininger & Metcilf, the B. & M., H. T. Clarke, George Lilly, Wm. McCague, the Presbyterian mission of Bos-ton, myself and I don't know how many others. There would have been 2,800 acres of it alter where the acres fill access of it altogether, which is over 630 acres more than was thrown over to this side by the big change at East Omaba in 1876 and would have inflicted a damage that \$100,000 wouldn't begin to cover. The first work was done in June and it was then that the shorter ditch was dug. That was necessary to connect the longer one that was to be dug

later with the low land between a draw that later with the low land between a draw that they intended to utilize and the river. They dug that and then stopped work, in order to throw everybody off the track. That ditch was out in the open, where it could be seen, and they knew that it wouldn't do to try to dig it after the other was done, as that would tip off the whole thing before they would be able to make connections. Later they began and his hands consequently weat up with ease. Three men were arrested on suspicion able to make connections. Later they began work on the big ditch, which runs through the underbrush, and affords concealment for but they could not be identified. those who were to do the digging. For a time they worked nights and Sundays, but a A. J. When he discovered what was up he of course took steps to put a stop to it, and tele-graphed the constable at Papillon, and that officer at once notlifed us what was going on. We had supposed that the whole scheme had been abandoned months ago, but on receiving this notification realized that something must be done at once and secured the restraining

order, having of course to put up a bond be-fore we could get it. "When I wont down there with the officer to serve the order I found the contractor. whose name is Wright, and twelve men hard at work in the ditch. 1 asked him what he was doing, and he frankly admitted that he was turning the course of the river. I told him that he had herve to say that he was changing the channel of a navigable stream, when it meant the peniton tiary abead for him, and then he said that he was only a contractor and was working for someboly else.
