Heaviness in Grain and Buoyancy in Pro-

Corn Was Weak and Lower as a Result of the Big Receipts of the Past

Three Days-Oats Were Quiet.

CRICAGO, Iil., Oct. 22.-Heaviness in grain and buoyancy in provisions tell the tale of today's market. Wheat is from %c to le lower and corn from the to be. The wheat receipts were a depressing weight, the arrivals here for three days footing up 1,026 cars and there were nearly 3,000 cars in the northwest.

A reported failure of a large concern in Paris with a branch house in Antwerp made the trade here nervous and helped to weaken prices, although it ald not appear to have much effect on the market which would actually be most affected if the fallwas very little demand and holders were generally disposed to sell, so that the feeling was easy during almost the entire session. The exports from the seaboard for the past two days were fair but the move-ments from both coasts for the week were smaller, being only 3,273.00 but of wheat and flour against 2.625,000 but for the week preweek last year. The opening was from be to Me lower than closing figures of Wednesday and prices for her declined from hie to he. held steady and the closing from he to he Corn was weak and lower, duliness in trade.

Corn was weak and lower, diffines in trace, big receipts for three days, and sympathy with the weakness in wheat. There was not much domand and the offerings were free. The tendency to decline was slightly counteracted by the firmness of provisions. Initial trades were at about the final figures of Wednesday, butgradually sagged off from to be.

to \( \frac{1}{2} \).
Onto were quiet and lower on the big arrivals for three days and the weakness in the other pits. The c ose was at from \( \frac{1}{2} \) to \( \frac{1}{2} \) under Wednesday under Us firmness.
The leading futures \( r = n \) ged as follows:

[Copyrighted 1892 by James Gordon Bennett.]

London, Oct. 22.—[New York Herald Cable—Special to The Ree.]—Absence of business has been very marked in the Stock oxchange for the short time it was open today. Funds are unchanged, while Indian cance Daper has given way is per cent. Foreign government securities have been more or less depressed from the opening to the close. Argentine issues have given way from it to is per cent, owing to the premium on gold advancing to 214 per cent, although very quiet. Owing to the absence of New York prices, Americans fall to show considerable firaness, and close at their best. Wabash debenture mark an advance of is per cent, Norfolk & Western preference is per cent, and most others is to is per cent. Capadian lines were inclined to be dull at the opening, but later became stronger and close quiet. Grand Trank preferences guaranteed showing an advance of it to is percent, and Canadian Pacific is per cent. Money has been little wanted. With the excessive supply of floating capital rates for short loans have fallen away to is per cent. The discount market continued firm, two and three months' bills being quoted at 2% per cent. Copyrighted 1892 by James Gordon Bennett.

LIVE STOCK MARKETS.

Prime Cattle Still Scarce-Last Week's Record-Hogs Steady. OMAHA. Oct. 22.—Receipts the past week, the week previous and the corresponding week last year are shown in the following table:

Cattle. Hogs. Sheep.
Receipts the past week... 16,610 28,335 1,372
Receipts week previous. 23,775 23,536 2,274
Same week last year... 22,111 24,077 4,921
During the past week there has been little change worthy of note in the general cattle trade. There has been a falling off compared with last week of over 7,000 cattle. with last week of over 7,000 cattle, but the offerings continue to include more common and inferior cattle than there is any call for. On the other hand, bare, y enough ripe beef steers have been received to give a fail idea of the big demand there is for this class of stock. Prices have shown an upward tendency all week on good to choice beef grades, and the same has been true of butchers' stock. Comfed steers have sold as high as \$5.35, and cows as high as \$5.35. These figures merely show how urgent the demand is for strictly prime stock. The general run of cattle, however, both stoers and cows. has been very ordinary as to quality, and prices are little, if any, different from last week. In fact, there has really been very little change in the market during the past month.

The same monotony that characterizes the tade in beef and buteners' cattle prevails in the stocker and feeder trade. Supplies of fair fleshod feeders have not been excessive and with an excellent general demand prices have been well maintained. The market is still glutted with common light stock cattle and yearings and these are selling at prices as low as ever prevailed on this market. Sales to the country have been large and in gener a fair volume of business has been transacted. The week closes with rather a light run of cattle. The supply was nearly 1,000 head lighter than last Satorday and the week's rewith last week of over 7,000 obut the offerings continue to include

low as ever prevailed on this market. Sales to the country have been large and in gener a fair volume of business has been transacted. The week closes with rather a light run of cattle. The supply was nearly 1,000 head lighter than last Saturiay and the week's receipts 7,000 lighter than a week ago and 5,500 lighter than a year ago. While the offerings were limited, they included some very choice cattle. There was the usual good local demand and with some competition from shippers the market ruled active and stronger on good to choice grades. A couple of bunches of 1,462 and 1,530-lb. confeed beeves sold for \$2.25 and \$1.55. Ordinary grassers and haif fat westerns sold at from \$1.00 to \$1.00. Fair to good rangers sold at full strong prices from \$4.00 to \$1.00. It was a fairly satisfactory market throughout and a very good and reasonably early clearance affected.

On coss and mixed stock the market was steady to strong, the bunk of the fair to good stuff selling at from \$1.00 to \$2.50. Bulls, oxen and stars were fail strong at from \$1.25 to \$2.50. Common yearlings to choice veals sold at from \$1.50 to \$2.50. The trade in stockers and feeders was unusually lively for the last day of the week, but there was no particular change in prices. Fair to good stoff weighing an increase in receipts the past week compared with the week previous there has been a very respectable and rather unexpected advance in prices for all grades. The character of the receipts and of the shipping and fresh meat demand has changed but little, the principal bullish features being the strength in provisions and the free buying by packers. How long this state of affairs will continue is a matter of conjecture, but while it does there is comparatively little danger of a break in prices.

For a Saturday the run of hogs was quite liberal, 1,500 heavier than last. Shipping orders were limited and this with the liberal offerings gave buyers the best of the situation. Eastern markets were also lower and prices here ruled weak to a nickel lower than

Chicago Live Stock Market.
CHICAGO. III., Oct. 22.—(Special Telegram to THE BER.)—The receipts of cattle amounted to about 4.000 head, but 2.000 of that number went to local dressed beef shippers and therefore were not on the market. The few hundred head offered were taken at full prices, the tone of the market being firm. Quotations run from \$1.00 to \$1.20 for scalinway cows to from \$5.00 to \$0.20 for extra steers. Western range cattle were quoted at from \$1.50 to \$4.50 and Texans at from \$1.75 to \$4.00.

Hoz products were easy early, but soon turned strong and sold higher. The receipts of hogs were light and prices at the yards higher and the manipulators again got in their work. The gain at heat figures over the close Wednesday was 15c for pork and 10c for

lard, while ribs were pushed up 35e for Octo-ber and from 10e to 30s for other months.

There were plenty of boats offered, but the demand was light. Rates held steady at 25e for wheat and 2 for corn to Buffalo.

Estimated receipts for Monday: Wheat, 370 cars; corn, 350 cars; oats, 190 cars; hogs 28,000 head.

hend.

Sales of hogs made around the opening of business were at strong prices, but allowidence of firmness soon vanished and the closing sales were at a reduction of from 5ct of to. Quotations were firm, 5t to to 55.5 for light and from 53.00 to \$5.75 for heavy and mealum scights. There was not much trading at better than \$5.60. ter than \$5.6).
The sheep market was quiet and nominally steady. From \$3.51 to \$3.25 for commen to choice. Lambs were in demand at from \$1.75 to \$3.75.
Receipts: Cattle, 4,030; nogs, 12,030; sheep, in nog.

INTEREST TO THE FARMER

Dry cornstalks have perhaps nearly as much fertilizing value as dry straw. Compared with their bulk, there is not a great deal of plant food in them. If they can be plowed under thoroughly and conveniently, it is probably the best and most economical way of disposing of them.

Do not leave the corn which you intend for seed in the crib through winter. Humid weather, followed by low temperature, will render its germinating power very uncertain.

In sending potatoes to market do not mix varieties, and sort as evenly to one size as you can. Dealers like to handle goods that show some care and judgment on the part of the shipper. Exclusive grain farming may pay well

for a few years, but in the end the steady depletion of the soil will cause a collapse. Good live stock should be an adjunct of the grain farm with every man who is in the business to

In order to be successful in general irming, it is necessary, above all things that we obtain a good stand of grass in our rotation of crops (whatever the may be), which should not be more than three or four years; that is, we should have a good sod to turn under every

three or four years, Nature rotates crops. When the forest oaks and hickory have been removed a thick growth of overgreens ap pears. In New England, where white been removed, the pine forests have maple, chestnut, and oak have sprung up. A similar rotation is found in timothy meadows, followed by blue

A commercial fertilizer is valued by farmers according to the number of pounds of nitrogen, phosphoric acid and potash contained in it. If these three elements of plain food are in available form and do not cost in the fertilizer any more a pound than the current prices of these minerals, the fortilizer is supposed to be a good investment. Clover have has been analyzed and its manurial value estimated by the same method. and it is found that one ton contains \$9 worth of these three elements of plant food: 1. Sixty-five tons of Indian corn, silced last fall 10.3 per cent of dry matter, and 12.5 per cent of protein during the siloing period. 2. In shocking and curing a similar quantity of fodder and leaving the shocks in the field during the greater portion of the winter, 28.3 per cent of dry matter and 34.8 per cent of protein were lost 3. The average losses in siloing and in field-curing Indian corn, as determined during the last four years' experiments, amount to 15.6 per cent, and 16.8 per cent, for dry matter and protein, respectively, for the siloing system, and 23.8 per cent. for dry matter and for protein, respectively, for the field-curing system.

The steam plow on the Manhattan farm, Gallatin valley, has traction wheels 24 inches broad, and will, therefore, work on ground that is a little soft without miring down. It draws 12 12-inch plows and moves at a speed of from three to six miles an hour, will draw the plows at most any depth they may be set, and is operated by thre men, plowing forty acres a day.

Cattle.

Early maturity, quick growth and high quality are developed in the improved breeds, and stock does not pay now unless these characteristics are well represented, so as to command the highest market price, because there are millions of scrubs sacrificed to the cheap markets; better raise good stock or none.

Many farmers sell their calves at two or three weeks old to get rid of them and save the milk they cat, although it pays to further develop the calf and make the meat proper food. government report on food adultera-tions says veal should not be eaten when under a month old. The practice of killing and selling younger calves is reprehensible; there is little nutriment in the meat, it is not easily digested, and should be condemned.

When you want to buy a really good animal, whether for beef, the dairy or for breeding, you find that you must pay a good price. Does not this furnish the

SONDS TOTAL SALES OF CITIES, SCHOOL COMPANIES, ST.R. R. COMPANIES, ST.R. R. COMPANIES, St. M.W. HARRIS & COMPANY, Bankers, 163-166 Dearborn Street, CHICACO. 15 Wall Street, NEW YORK. 70 State St., BOSTOM.

very best indication of the sort that it

will pay you to grow?

All along the line comes the cry for better cattle, well fed, well rounded and well matured-cattle fit to make beef which decent people can eat and enjoy and which they are willing to pay for. It is the poorest ill fed, bony sinewy, juiceless and tasteless trash that is flooding the market and weaning the people from all desire for beef.

When both the solid and the liquid manure is saved from stock it contains four-fifths of all the plant food that was originally in the feed. The per cent varies with the character of the stock, whether matured or growing, etc.

The whole matter of successful breeding may be summed up in the two words "culture" and "heredity," and in the selection of breeding stock it is desirable that all ancestors should have had the required form of culture or training in order to procure uniformity in heredity.

Three things must be observed in feeding calves: Feeding at stated times, feeding the milk sweet and have it warmed. Overfeeding is, of course, injurious, but giving the milk cold is worse,

Sheep and Swine.

A good shepherd will improve his fleck-will have some ideal and will endeavor to reach it. He will use thoroughbred bucks, and will soon have a flock that will show he understands his business, and will be to him not only a source of profit, but also of pleasure.

One of the most profitable items in the management of sheep on the farm is lambs for market. Reasonable early in the spring, lambs that are in good marketable condition seliat high prices, and if care is taken a good profit may be readily made in raising them. Good thrifty ewes must be selected at the start. This is always important, and they must be bred to vigorous rams in order to procure vigorous lambs, that with good treatment can be made to make a thrifty growth. The ewes should be bred early in August, so that the lambs will come early in January.
If swine breeders would give more at-

tention to high class quality than to quantity they would make pork more popular and greatly increase the home and foreign consumption. Everybody wants small hams and lean breakfast bacon, but when farmers raise only coarse, over-fat hogs-the hams weighing lifteen to twenty pounds-they must be sold for less money than the lighter hams.

At the best, whey as a food, fed against wheat middlings at \$12 a ton, has a feeding value of only \$2 a ton, and this can only be procured by feeding the whey sweet. As soon as whey begins to sour the sugar, the only really valuable part, turns to lactic acid, leaving only about one pound of food in each 100 pounds of the whey. If the whey is fed sweet and in combination with mixed meal it has its feeding value more than doubled.

Horses. The Maryland legislature enacted a law punishable by a fine of \$1,000 or imprisonment for one year of any person who shall advertise or offer the services of a stallion to the public without first having the animal recorded with the county recorder and taking out a license to do business. The law requires the owner to give the name, age pedigree and record, if any; also, de-

scription, terms and conditions upon which the stallion will stand for service. Several correspondents have inquired as to the best method of preparing cow's milk for foals. To all such we may say that cow's milk, in its natural state, is too rich for colts. Dilute with one-third water and sweeten with sugar of milk, dram to every quart. Very young colts require about a pint every four hours, and as they grow older need more and can go a longer time between feeds

Streaked butter is the fault of the maker every time, The butter is churned out too dry at the start, and the salt cannot be worked in so as to reach every particle of the mass, and so the butter is salted unevenly. The salt should be churned in while the butter is very wet. After a thorough washing let the butter drain out fairly well, and then distribute the salt over the mass slowly, gently rocking the churn so that the salt is evenly mixed all through. Then with a small tined wooden fork pass it through the butter with an upward movement, trying not to lump it. Then let the butter stand for an hour. when it can be half gathered in the churn and then put upon the worker,

"Remarkable how well mamma looks, and how she has gained in flesh. You

should do the same. "The loss of flesh is a trifle. You think you need not mind it, but you are gradually running down. Do like mamma. Use the Carlsbad Sprudel Salt every morning before breakfast. It will increase your appetite and cure you of that dyspepsia and billiousness from which you are suffering. But be sure to get the genuine imported article. No subterfuge.

made at the large creamery, still impossibility of such a thing until there is a great change in the existing circumstances makes a sudden reform out

and the surplus moisture pressed out

The largest part of the butter today is the product of the small farm. While

it would be the means of improving the

great mass of this butter to have it

and the butter packed at once

Running the Gauntlet. The common supposition that running the gauntlet was a torture peculiar to the American Indians is not founded on fact, this form of cruel punishment being known in Europe ages before the discovery of America. The Romans had a military punishment identical with it, the oftender being competled to walk between two lines, the men of his century or company being drawn up on either hand, each armed with a rod, which he was required to use on the culprit's back. The word gauntlet is said to be a corruption of gauntelope, derived from Gaunt or Ghent, and a Dutch word signifying to run, this torture being common among the Flanders troops.

Prescription brings relief and cure. It is a powerful, invigo-rating, restora-tive tonic and nervine. It imparts strength to the whole system in general, and to the uterine organ and appendages in particular. "Run-down," debilitated and delicate women need it. It's a legitimate medicine—purely vegetable, per fectly harmless. It's guaranteed to give satisfaction in every case, or money refunded. Nothing else does as much. You only pay for the good you get.

The turning

Can you ask more! As a regulator and promoter of functional action, at that critical period of change from girlhood to womanhood, "Favorite Pre-scription" is a perfectly safe remedial agent, and can produce only good results. It is equally efficacious and valuable in its effects when taken for those disorders and derange ments incident to that later and most critical period, known as "The Change of Life."
