PLACES WHERE ONE WOULD BE USEFUL

Poorly Constructed Buildings Being Ecceted-The New School Building Affords Opportunity for Fault Finding -Other Cases of Public Interest.

Work is progressing rapidly on the new school building at the corner of Madison street and Kapell avenue. Considerable dissatisfaction is being expressed by persons who have watched the work, on account of the narrowness of the foundation. A twelveinch wall is expected to sustain the weight of a two story brick building, the cost of which is to be in the neighborhood of \$12,000. and the question is being asked, whether it would not have been better to spend a little more money and had a foundation put in that would have done sway with all uncer-tainty as to its being able to stand the strain. A twelve-inch foundation was put in at the Second avenue school house, which is of about the same size as that on Madison street, and now the walls have cracked, and will the house how here wills have cracked and intil they have been braced it is feared that

the whole building will collapse. The question of naving a building inspecor appointed is receiving considerable attention from those who are juters ted in the sufety of new buildings, and especially those of public buildings. Nearly every city of any size in the country has an official whose business it is to look after new buildings, and if they do not meet all the require ments to condomn them. It is probable that the matter will be brought before the city council in the near future. There have been a number of instances in the past year or wo where an officer with power to condemn insafe buildings would have been able to save the a ; ount of his salary and more, and with the large amount of building that is bound to be done within the next few months such an officer will be almost a necessity.

Forgery by a School Boy.

Yesterday afternoon a deaf and dumb boy presented at E. E. Hart's bank a clumsily executed school board warrant for \$50, the blank used being such as are common in all districts. The order was signed by J. D. Edmundson as chairman and W. H. Thomas as clerk. Mr. Lougee, the cashier, asked the find where he got the order, the instrument being on its face a clumsy forgery, to say nothing of the fact that Mr. Edmundson oc-cupies no such position. The lad, after writing out one or two answers, darted out of the door, soon followed by Mr. Lougee, The lad quickened his pace into a run, and was not overtaken before reaching Broad-After a tussel he consented to return vay. to the bank and explain.

The lad's name is Brick Moore. He said that while at his home in Nishnabotna he found some of these blanks, and a young man, a former friend of his, explained to him how they were filled out for the purpose of getting money. He thought he would try it. Mr. Edmundson's name was suggested to him by seeing it on the window of Hart's bank, where Mr. Edmundson has an office. He accordingly used it, and ignorantly pre-sented the order. Mr. Edmundson himself being right there at the time. After a severe scare the lad was let go, with evidently somewhat more of an appreciation of the normity of the officase than he had when he first entered the bank.

S. B. Prowell, watchmaker, 749 B'way.

Don't forget to attend the third annunl ball and suppor given by the Grand hotel bell boys at Masonie temple, Novmber 22 that it was to be fair and tull. Buy five or ten acres there while water that went into the boiler was it is cheap. measured during the month. commencement of the trial the demands

viving visiting relatives. Mrs. Laura C. Kirby is at Mt. Picasant. where she was called by the illness of her sister.

Misses Clara Evans and Lon Porterfield are home from Jacksonville, Iii., where they have been attending school.

Dr. O. L. McCartney, who has been with Dr. West for some time, left last week for St. Paul where he will open up a dental office and make his permanent tome. Two of Council Bluffs' most prominent indies are still suffering from the effects of

injuries received in a runaway accident-Mrs. J. W. Squire and Mrs. H. C. Cary They are both improving and are able to be out, but are far from being fully resvered. A wedding is announced to take blace in

the near future, in which the people of Council Biaffs and Omana and the vicinity will be greatly interested. The contracting parties are Judge Joseph R. Reed of the United States court of private land claims and Miss Evans, a prominent and wealthy lady of Malvern, In.

William F. Hennessey of the motor line was quietly married to Miss Hattie Kilner of Plattsmouth, Neb., on Wednesday even-ing, Rev. Mr. Brower of the Fifth Avenue Methodist church officiating and the ceremony taking place at the pastoral residence. Mr. and Mrs. Hennessey will be found at home, 2616 Avenue A.

Cards are out for the marriage of Mr. L. Knot's and Miss Estella Coons, which ill take place in Broadway Methodist church Thanksgiving eve. Mr. Knott is one of the best known of the young business men of Council Bluffs, and the bride is a most estimable young lady, the daughter of Mrs. Elia Roberts. They will take up their residence at 555 Washington avenue.

Gave Away a Steam Engine.

A new steam engine worth \$1,000 would be a very nice present for anybody to give or receive, and only a very liberal and prosperous business man could afford to make such a present. But that is just exactly what the Odgen Iron works of Council Bluffs has done. They built a beautiful new engine and gave it to the Evans laundry people in this city, and it is at the present time, and has been for several months, running that big plant. In connection with this magnificent

gift there is an interesting history, showing the confidence a bright man has in his own judgment, and how that confidence can bring him large rewards for the products of his own genius. For several years the handry company has been using an Atlas automatic highspeed engine. It needed some repuirs. and Mr. Ogden was called into consultation. An examination convinced him that it would be to the interest of the laundry people to put in a new engine. began urging them to do and ho The price asked for the new machine was \$900, or nearly twice what a new Atlas would cost. The laundry

people thought the price was extrava-gant, and they told Mr. Ogden that while they were willing to patronize home industries they didn't want to pay a premium for the privilege of doing so. Finally Mr. Ogden made them a novel proposition that appeared to be so altogether in their favor that they at once accepted it. The proposition was to take out the old engine and replace it with the new and take the saving in coal for two years in full payment. The contracts were drawn upon this basis, and the new engine was built at the works on Teuth avenue. As a basis for computation of of the coal consumption the lightest month in the laundry's coal bills was selected, the amount consumed being 55 The old engine was disconnected lons. and the new put in its place between one Saturday night and Monday morning, and without ever being tested or run to a bearing was required to run the plant for 16 nours without stopping. It accomplished the job without making any fuss about it, and has never been the cause of the loss of a minute since. After running a short time the

coal test was begun that was to decide whether Mr. Ogden was to get something for his engine or get left. Mr. Anderson, the regular engineer who ran the old engine for more than a year, conducted the test, with the instructions

At the

the

nefault of which no will stay in the county / Charles Howard, the young man who was arrested on suspreion of beiog implicated in the robbery, was Eucharged. Officer Mur-phy, who arrested higs, had been unable to find any evidence diminst him and so had

ordered him charged with drunkenness. When Howard was arraigned Murphy stock to his assertion that he was drunk, and Dep-uty Marshal Cousies protested just as vigor-ously that Howard was not drunk when he was arrested. The misunderstanding be-tween the officers resulted in some warm words being spoken on both sides, and Howard was finally discharged by the court.

Bricks vs. Sole Leather.

The question of the durability bricks for paving, sidewalks, etc., is continually being discussed. The specimen bricks which have been on Brondway, around the mouth of a manhole near Main street, have been examined with interest by many who have watched the wear and tear which the years have brought to them. Now another phenomenal feature is dis-The brick in the sidecovered. walk in front of the real estate office of G conshields, Nicholson & Co., No. 621 Breadway, is being worn in a very peculiar manner. Various theories have been advanced, and the brick men vary in their opinions. It is claimed by many that sole leather is really more durable than brick, for the bricks here, especially in front of the door sill, are worn almost through, apparently by the footsteps of the crowds which daily throng the office to get some of the numerous real estate bargains. Whatever the cause, the bricks are a curlosity worth looking at.

Holiday photos, cut prices, \$1.50 for cabinets, for 30 days. Cottage gallery, Riley's old stand.

CANDIDATES FOR STATEHOOD. Frediction That Arizona, Utab and New

Mexico Will Be Admitted. COUNCIL BLUTTS, Ia., Nov. 19,--To the Editor of THE BEE: You are undoubtedly correct in your prediction that Arizona, New Mexico and Utah will be admitted into the union in the near future. Bills for the admission of the first two territories named were passed by the house of representatives in June last, and if the sepate shall not act favorably upon them during the approaching winter the Fifty-third congress may be depended upon to admit them.

It may or it may not be true that Dr. Miller has arranged with the Mormon authorities at Salt Lake City for the admission of Utab, but as a go-between in a deal between the first presidency of the church and the the democratic party no better leaders of man could be selected. The doctor been a warm church for many friend has years, and he has earned the lasting gratitude of the saints oy vigorous use of his tongue and his pen in their behalf. He is always warmly welcomed in Sait Lake by the Mormon chiefs, and should he locate there his chances for a seat in the United States senate would be first class; it would be allogother unneces-sary for him to put on endowment underwear to make him cligible as an appointee of the prophets, seers and revelators who may run the church machine.

It is not at all improbable that a bill for the admission of Utah will pass the house of representatives during the coming session of congress, and it is not unlikely that it will pass the senate also. The only democratic entertainment. To lecture and social opponent of the measure in the senate will be Jones of Arkansas, but Teller of Colorado, Carey of Wyoming, Felton of California and probably Dubois and Shoup of Idaho may be depended upon to turn the scale. Teller has always held the Mormon vote solid in southwestern Colorado and Caroy has invariably recoved the support of the saints in southwestern Colorado. The Idaho senators have in the past been strong opponents of the Mormon theorracy in their state, but both the republican and democratic parties of the new commonwealth have pledged themselves to repeal the law which disfranchises the saints there and the centiles of Utah vote the senators as against them. The 3,000 disfranchised Mormons will hold the balance of power in the state and both of the political parties there are anxious for

able to hasten the admission of Utuh.

will doubtless admit the territory as soon as

The Utah saints have fairly earned state

hood at the hands of the democratic party

Since the receipt of the revelation suspend-ing the practice of polygamy and the divi-

sion of the church on national party lines the

democracy has twice carried the territory

by large pluralities, beginning in August

1891 and ending last week. Free wool and free lead have received the endorsement of

the church in Utab, notwithstanding the

fact that the wool product of the territory exceeds 10,000,000 pounds annually and the

sliver mines there nearly all contain a large

percentage of load. Such a remarkable instance of self-abnegation should not be per-

mitted to go unrewarded by the democratic

party and doubtless it will not be. As regards matters of population and weath, Utah is estilled to admission. By

the census of 1890 the territory contained a population of 207,000 and the governor in his

annual report this year estimated the same at 223,000. Sait Lake City alone has an as-

sessed valuation of more than \$50,000,000,

while Ogden, the second city in the territory, foots up nearly \$12,000,000. But the fact that

nearly three-fourths of the people of the ter-ritory are blind followers of a leadership which assumes to be a law unto itself, which

maintains that no law is legal or binding

that does not emanate from the chief priest-hood of the church through alloged revela-

tion from time to time or that con-flicts with alleged revelation, justly warrants the protest of the gen-tiles of Uiah against statehood. They

placed that protest in form last week by voting to the number of 6,590 for the liberal

party's candidate for congress and they will doubtless continue to fight admission of the territory at Washington. Upon the

democratic party will rest the responsibility of the cvil consequences of the premature admission of Utab, but that party will doubt-

less assume it. In that, as in many other in-stances in its history, it will ignore the lessons of the pust; it will not consider the

A subonette Social.

The ladies of the Congregational church of Council Bluffs gave a povel entertainment Friday night at the residence of J. C. Bixby, on Magison street, it being a silhouette social. The refreshments were delicately and temptingly served and the other social details of the occasion were unusually enjoyable, but the striking feature was the sil-houette. About the walls of the different rooms were hung silbouettes and the company was kept amusingly busy endeavoring to guess the names of the originals. One im was used as a gallery, where those who desired could get this style of portrait. Sli-houette taking is becoming quite a popular form of evening amuse-ment in Council Bluffs homes. The process is simple and the result most interesting and unusing. A sheet of white paper is planed on the wail, the subject sits close to it, so that the shadow of the head and profile of the face is distinct, the artist with a pencil outlines this shadow, and this shadow is cut out. A sheet of black tissue paper is then pasted on the back of the white sheet so that the head and face are brought out in such bold contrast as to form very lifelike

O. W. Wirt has gone to Minnesota for a month's business trip. Mrs. Wirt will join

upon the laundry required the addition of the tenth large washer, and all the requi ments upon the new engine amounted to ten horse power more than the old. When computations were made at the end of the month they showed a state of things that made the laundry people open their eyes. But 31 tons of coal had been consumed, making a saving of 24 tons, which, by terms of the contract, had to be computed at \$2 per ton, or \$48 a month for two years. After an agreed porcentage for increased power

been allowed, the grand total to be paid for the engine was raised to a little over \$1,200. This result astonishod and delighted all concerned. It showed the laundry people that they had been wastng a sum greater than the value of their old engine every year, and that while they had paid a greater sum for the muchine than they would have been obliged to if they had not entered into the peculiar contract, they were able to do so, and would get the engine

in the end without any cost. A technical description of the engine that accomplished such extraordinary results would be uninteresting to th general reader, but the result is of immense interest to every man who uses power. It is the product of years of patient study on the part of Mr. Ogden, and is of a type that is far in advance of the times

the times. "It is the best engine I ever had any-thing to do with," said Engineer Auderson to THE BEE. "It is simple and durable and away above all others in economy. I say this advisedly, having had experience with all the Corliss brands and numerous automatics, beats them all, and most of them as high as 50 per cent.

The Ogden Iron works built a 149horse power engine for the electric lights in this city, and in competition with the Westinghouse, it saved 40 per cent fuel. They are now building a similar one for the electric light company in Plattsmouth, which has been sold on the same terms as the laundry engine, J. A. Murphy of the Murphy Manufacturing company adds a testimonial that beings out the economical features

of this engine in still bolder light. He has been running his plant with one for the nast four years. "Mine is a forty-horse power engine," said he, "and I will put against the world for economy and everything else. For fitty-four days of continuous running the average coal consumption was 709 pounds of slack per My power costs me less than \$1 day. per day.
