Sudden Advance in Wheat Was the Feature in Yesterday's Trading.

MUCH EXCITEMENT PREVAILED IN THE PIT.

That Cereal Opened Quiet, But Free Selling Followed, and on Rumors of Approaching Trouble in Paris Traders Went Wild.

Cnucsco, Ill., Dec. 22 .- For about two minates today the wheat plt on the Board of Trade displayed more animation than it has at any time since "Old Hutch" carried through his big corner a few years ago. Brokers yelled and struggled to get into the jam, hats were smashed and coats nearly tora off in the frenzy that animated the crowd, while the roar that went up effectually stopped all business in the other pits. All the turmoil resulted from the fact that a number of shorts in wheat

were caught napping. There was talk of an outbreak in Paris and a feeling that the complications might involve other countries. There was no confirmation of these reports, but they served to increase the nervous feeling among shorts and in the ex-citement the price went up 1%c. The price at

mervers feeling among shorts and in the excitement the price went up 14c. The price at the close was 14c higher, oats is 3c up, but provisions show declines of about 29c in port, from 5c to 15c in lard and from 24c to 5c. The price at the close was present than it left off yesterday. Corn is 9c billion and from 24c to 5c. The present of the transmitter of the transmitt

There was quite a little excitement in rye but there was more shouting than business in it. A big crowd collected around McDermond, seemingly all anxious to buy, but not more than 20,000 bu, changed hands for May at %c ad-vance over yesterday's price. The excitement enfmed down as rapidly as it had come up. The longs did not appear anxious to sell out at the advance. The provision market opened weak and so continued. Further lightdation by the longs was the feature. Estimated receipts for tomorrow: Wheat, 206 cars: com, 304 cars; oats, 194 cars; hogs, 25,000

of American Sugar, Canada Southern, Read-ing, Distilling & Cathefreeding and Chicago Gas, which yielded 15 to 25 per ceut. Chicago Gas led the downward movement, the special weakness in the stock being due to the fact that the holdings of the pool which were dis-tributed have not yet found a resting place. Reading was depressed by the reports that the company would be forced to raise money on bonds, or on the coal above ground to meet the interest on the preference income bonds. Burlington & Quincy declined 1 per cent and the other leading shares 4 to 3 per cent. The renewed strength of sterling exchange led to taik of go ld exports and some of the traders were frightened into selling. Prices moved up and down frequently within a narrow range until late in the afternoon, when a brisk demand set in for both the long and short account. The result was a recovery all around. Reading taken from 514 up to 52%. American Sugar, Missouri Pacific, Rock Island and Distilling and Cathefreeding inproved 1 per cent or nore.

and Cattlefeeding improved 1 per cent or more. The buying of the last named was stimulated by statements made by James R. Keene, in which he stated that he had made a thorough investigation of the property, that the com-pany at no time had carned less than 6 per cent dividends and was now carning at the rate of about 15 per cent on its stock. Mr. Keene backed up his views in regard to the property by offering by per cent for the quarterly dividends on any part of the capital stock for two years to come. The bears having been unable to dis-took steps to reduce their short lines after de-livery hour and their purchases stimulated the upward movement in prices. the upward movement in prices. The street was flooded with runnors about a probable issue of bonds by the general govern-ment for the purpose of strengthening its gold reserve. These runnors lack confirmation, but they nevertheless had a certain effort on spec-ulation in the afternoon trading. Among the specialties, Mauhattan was strong and gained 1 per cent. Tennessee Codi & Iron fell off % per cent, and subsequently recovered on re-ports of fortheoming developments of a favor-able character in regard to the property. Ohio southern junaped 2 per cent to 50. The mar-ket closed firmer in tone. The Post says: The news that a concerted effort was at last being made at Washington to force consideration of a silver purchase reneal bill was not perhaps, generally known in Wall street. If it was, its reception was marked by a good deal of skeptleism. Yet it would be difficult to overstate the importance of such possible action to all the financial markets. It is easy to dismiss the gold export problem, as a few financial critics are disposed to do, with the offland comment that the current mer-chardise movement explains it all. This it most docidedly does not. A clicklid might com-vastly larger than they are, or our merchan-dise imports much smaller, gold exports would be an impossibility. But why exchange can hold at present fig-ures in the face both of heavy steriling lonns and a decided turn in the balance of merchan-dise interface both of heavy steriling lonns and a decided turn in the balance of merchan-dise interface both of heavy steriling lonns and a decided turn in the balance of merchan-dise interface both of heavy steriling lonns and a decided turn in the balance of merchan-dise trade, not even experts in the business have satisfactorily explained. In spite of the complications of factors at work on the mar-ket, no intelligent observer can doubt that the complications of factors at work on the mar-ket no intelligent observer can doubt that the prob

foreign scare over our sliver dichama is at the root of the trouble. The sharp recovery in sterling from the last week's decline, was a plain suggestion of a renewed outflow of gold, unless this disordered market for exchange returns to normal conditions. Equivalent to 331 per cent on the entire capital of the company of \$2,000,000 The officers of the World's Fair estimate that the daily admissions to the Fair will rise above 200,006 people. Our capacity for carrying pissengars in our Elec-tric Cars in making ascensions and descentions of the TOWER is 12,000 people per bour, and we confidently count on 10,000 per hour. This will be found a moderate estimate when due regard is had to the attractiveness ; of the TOWER and the

RARE experience afforded by a trip to the top. The TOWER is located opposite the WOMAN'S BUILDING, at the Eastern Entrance of he MIDWAY PLAISANCE in the WORLD'S FAIR GROUNDS. Each person, in making the ascent and descent of the TOWER, gains a view of the entire EXPOSITION BUILDINGS.

The TOWFIL is over 563 feet high and 210 fest in diameter. It requires nine complete turns to reach the top, the grade being eight per cent, a ride of two miles in making the ascent and descent; consequently, nine different pictures are observed of the WORLD'S FAIR GROUNDS as the ascent is made. A view from the OBSERVATORY FLOOR not only gives the vast Panorama at your feet, but also gives the geographical position of the WORLD'S FAIR BUILDINGS, so that after making the ascent of the TOWER any person can go unguided from building to building.

It is the intention to have two FULL BANDS on the OBSERVATORY FLOOR-A BRASS BAND and a COMPLETE STRING ORCHESTRA-which will play alternately from the opening of the FAIR in the morning until the close An ORCHESTRA will also be located in the center of the great TOWER RESTAURANT at the bottom.
