Tried Outside of the Bluffs-They Say the People Are Prejudiced Against the Company.

The motor company filed a motion for a change of venue in three cases which are now pending in the district court against it. The plaintiffs in the suits referred to are Mary White, Anna Zirschling and I. N. Wilkins, and each is an action for damages There are other suits of a similar nature pending, and it is supposed that other motions of a like nature will be filed, as it is evident that the company now takes it that war is declared by the citizens. The motion does not say what court it prefers to be brought before, but leaves it to the decision of Judge Thornell, before whom the case will be argued probably this week.

Says the People Are Prejudiced.

The motion is accompanied by a lengthy affidavit from John N. Baldwin, one of the attorneys for the company, and it alleges that the citizens are so prejudiced against it that it cannot expect to receive justice at the hands of any jury that can be selected. 'All the papers in Council Bluffs." it says, in substance, "have been filted with articles written by different people in the city, as well as editorials and local items, all of which have been directed against the motor company and its management. The papers of Omaha, which have large circulations in Council Bluffs, are also filled with these articles, all of which are of the most violent and inflammatory nature their tone and expression. Many articles are these anonymous. these articles are anonymous. In them the company and its management are charged with the grossest misconduct, the terms fraud, robber, cheat, defraud, have been used in speaking of the company, it has been charged with trying to defeat the collection of taxes and using unlawful and im-proper influence with the mayor and city overnment. It has been charged with rob ery, corruption and oppression. At present the public is wrought up to the greatest de-gree of excitement, and the matter is dis-cussed everywhere on the streets and in ublic places. Almost every opprobrious pithet that could be thought of in the Engmblic

It bears the signature of John N Baldwin. It is accompanied by two other affidavits, one of which is signed by John T. Stewart and George F. Wright, the president and secretary of the company, which states that they believe the statements to be true.

Tuesday evening the Cooking club gave its last tea of the season, and so. Dame Rumor says, the last of its life. The last of the sea-son because Lenten festivities are now in order, and the last of its life, because Cupid has managed his game of hearts with such dexterity that one wedding is announced for this week, and unless the worst fears are not realized, two or three more of the mem-bers will step off before autumn. The outlook for the club to remain on earth is con-sequently not very flattering. The last party, if such it proves to be, was at the home of Miss Brown on South Seventh street, and Miss Brown was assisted in entertaining by Miss Jessie Farnsworth. A series of nineteen conundrums, written off and bound in decorated covers, was dis-tributed among the guests. The answer to each conundrum was the name of a flower and the knowledge of botany was taxed to the utmost. At the close J. M. Fenlon was awarded the prize for answering the great-est number correctly. High five followed, prizes being awarded L. Zurmuchlen and Miss Martyn. The following were present Misses Martyn, Farnsworth, Lutz, Dodge Key, Moore, Rockwell, Ruth, Babcock, Rob erts, Reynolds, Brown; and Messrs. Zur-muchlen, Metcalf, Mayne, Fenlon, Dawson, Wright, Shepard, Bowman, E. Bowman, Everett and McMahon of Omaha.

Old Times Recalled.

Mrs. N. P. Dodge entertained a large party of her friends last Monday evening at supper at her beautiful home on South Sixth street Many of the guests were old settlers, and the evening was agreeably spent in talking over the days when Council Bluffs was several years younger than she is now. Democratic Candidates.

The democrats of the Third, Fourth and Sixth wards met last night and placed in nomination candidates for the office of ward aldermen. The elections were carried on by the primary system and there was no excitement whatever. In the Sixth ward C. R. Nicholson was the only candidate and he secured the prize by eighty-three ballots. In the Fourth U. H. White was almost as acky, there being forty-nine votes cast and he receiving all but two of them, which went to J. B. Atkins. In the Third the at-tendance was small, there being only twentytwo votes cast. J. J. Hathaway received eighteen of them and the rest were divided between F. W. Spelman and W. H. Thomas.

Fitz Hugh Lee's Strategy. Edmund Randall, who was all through he war of the rebellion as a Pennsyl vania volunteer officer, tells an interesting story of how successfully a game of bluff was played by the conjederate Fitz Hugh Lee upon a regimental commander from Philadelphia, now dead. The southerners were in sore straits, sur-rounded upon all sides, it seems, and unrounded upon all suces, it escape, just able to find an avenue of escape, just after the battle of Gettysburg. their lines was an orderly who had been raised at a fort surrounded by perpendieular cliffs near the Pennsylvania border. He told the rebel general that if they could strike that particular place there would be a fair chance of escape, providing there were none of the enemy near by. A reconnoitering party re-turned with the report that the coast was clear, but that the men would have to pass through in single file. The confederates prepared for the movement and were soon on the march. As they reached the ford they were astonished to see on the cliffs above them a regiment of union soldiers with arms stacked and bayonets glistening in the sunlight. Lee was in a trap unless he could resort to bluff. Reining in his horse he summoned a corporal to bear a flag of truce to those above him. It read: "I demand your surrender in fifteen min utes." Then taking out his watch he waited with bated breath after the return of the truce bearer, fearing every minute that the union forces would open fire. Ten minutes went and then twelve when suddenly the drums began to beat upon the cliffs and the northern men marched away. The rebels could scarcely realize that they were saved. In con-federate accounts of the war the statement is made that not a man could have escaped had the Philadelphia com mander opened fire. In the report of the latter particular mention is made of the masterly retreat of the union regi ment, whereby it escaped complete anni

DOWN ON THE SUWANEE RIVER. Characteristics of a River Made Famous by a Song.

After leaving Macon, in central Georgia, by way of the "Suwanee River Route," the traveler soon enters the level region in the southern part of the state known as "Wire Grass Georgia." Here the tall, long-leaf pines stand in myriads, monopolizing the land, except where small lakes and streams encourage other growth, and the wire-grass, long,

trailing, billowy, is everywhere. The geological formation of the coun-try, says a writer in the New York Post, s much the same as that of northern Florida-a land reclaimed from the sea in but a comparatively recent period: One may almost hear an echo of that departed sea in the suggestive murmur which sounds from the treetops as the pine needles sway and flash in the breeze. This murmur is never hushed. In the storm it is a hearse roar, not unlike ocean's own; in the harmless breeze it is the soft blending of a thousand whispering voices; in the stillness of a calm it is still there as a faint, sad moan. The last days of November found two convalescing invalids on the way to a locally renowned resort on the Suwanee iver. some thirty miles south of the Georgia and Florida line. The ride was through one interminable pine forest, which, however, is being fast thinned; the turpentine farmer's "blaze" may be seen on almost every tree, and the sawmill, with its burning slab-pit, is a frequent object in the landscape. King

Cotton has been deposed here. White Springs-the resort-is not ple beianly new, whatever may be said of it otherwise. A part of the rambling old hotel dates back to the year 1820, and the giant sycamores and live oaks are not the creatures of a few years. In the swamps, the scrub oak thickets, on the live oaks, the sycamores, everywhere, the mournful Spanish moss swings great gray drifts. The visitor thinks that it is well enough for the general funereal aspect of the place to be enlivened by the voice of youth. There is a large and prosperous school for so small a town, and its fame appears to have extended even as far as Juba. Several brown and bright-eyed little boys from that island were said to have learned to speak English in two

months. Some 200 yards from the hotel, in a low glen or ravine in Suwance's high banks. s the spring. The greenish water gushes up turbulently into a basin of about thirty to forty feet, emptying im-mediately into the river. Everything it touches has a tinge of green; the sul-phur is in the very air. There is much and vehement certification of the water' extraordinary healing virtues, taken either externally within the precincts of the primitive and uncomfortable bath house, or as a beverage. One enthus-iastic native urged the drinking regularly of a gallon and a half a day when

well and a double dose when ill? "But the chief object of interest at White Springs is the river made famous by a patnetic little song. Beginning in the very heart of that mystery, the elevated Okeefenokee swamp in southeastern Georgia, the river secures a southwestern trend and, after devious windings, enters the Gulf of Mexico in Florida. It is never a great river. A schoolboy can "skeet" a rock across it anywhere. In many places he can wade it. and in some he can almost leap it. 'In some places it flows between broad savannahs, in others it winds through the vastness of the swamp; in others still, as at White Springs, it flows darkly between precipitous banks. It has its shallows and its rapids, where the dark waters break into a myriad facets. And it has its deep, cool recesses, where the long gray moss hangs thirty feet to touch its mirror, and the inverted palmetto gleams prettily up from its depths. But everywhere it has picturesque-ness and mystery, and there are the charms of the Suwance. No man has ever seen its source. No man will ever clear its growth and leave it naked. A hundred years from today the dark river will flow on under its overlapping trees and the kingfisher hurl himself into its placid flood." This description is a comprehensive one, though not without a perceptible flavor of the enthusiastic that he was more correct in speech than guide book whence it is taken. It only many of his full-white neighbors, and it remains to be added that the waters of was apprehended that his interest in the river appear to be as red as wine in grammar might have interfered with the shallows and as black as ink in the deeps-a peculiarity of the streams in ing; but such fears proved groundless, this pine country. I pick and mode the start before wonders for me, I am in spiendid heatth and can see to see won buttons without glasses—something I could not do for years before. My eyes are as well and clear as a child's. My catarthal troubles are all results I have found. My heating, which before treat-ment was very dull, is also restored. My life have been prolonged and made worth the liv-ing by these physicians, and they richly de-serve all the praise I can give them and more too." MRS. JULIA JOHNSON, PHELPS, MO., mail, read Rev. Flook's statement above. The case was diagnosed from symptom blank and

revolver in the hands of Adolph Burmeister, but did not make any recommendation as to whether Burmeister should be held. His preliminary hearing will probably take pla tomorrow, and there is but little doubt that he will be bound over to the grand jury.

Secretary Trimble of the Merchants and Manufacturers association has had some envelopes printed which he is anxious to have the merchants of the city use in thei outside correspondence for the purpose o advertising the advantages of the city. The following representative business firms have already agreed to use them, and it is hoped that the rest will follow: Citizens State bank, Peregoy & Moore, Grand hotel, Nonparell, W. F. Baker, Cole & Cole, Emp-kie Hardware Co., H. H. Van Brunt, Ogden House, Kiel's hotel, Neumayr's hotel.

Houses in Demand.

It is not rulable to call attention to advertisements, but one which was handed in yesterday by Alderman Mayne of the well known real estate firm of Greenshields, Nicholson & Co, was of so significant a nature as to warrant an exception to the rule. It is a little "special" announcing the demand for more houses. "Yes, sir," said Mr. Mayne, "houses are scarce in Council Bluffs, especially five and six-room ones, up town. We have chances every day to rent such houses to good tenants, but we can't get houses enough. If you know of any-body who has a house to rent send him around. We can find a tenant for him. This speaks pretty well for Council Bluffs.

Reception of Mesdames Sherman and Evans Last Tuesday afternoon Mrs. W. W. Sher man and Mrs. F. H. Evans gave a large reception to their lady friends at the home of Mrs. Evans on Sixth avenue. The rooms were beautifully decorated with palms, smilax and flowers, the windows were darkened, and the gas jets and lighted candles cast their rays over a scene that was charming in the extreme. Mrs. Evans, gowned in heavy pink silk, and Mrs. Sherman, in cream silk with lace and ribbon garniture, received their guests in the front **p**irlor, and were assisted in the second par-lor by Mrs. E. E. Hart and Miss Anna Bowman, the one in mahogany and green brocade empire dress and the other in Nile green silk with satin stripes. The serving of coffee and ice cream was superintended in the dining room by Mrs. Oscar Keeline, Mrs. E. W. Hart, Mrs. H. P. Barrett and Miss Addie Sherman The Sutorius Mandolin club of Omaha fur aished delightful music from the library throughout the afternoon. Sensational Report.

A report has just been received from Harlan which has caused quite a sensation in that town. J. E. Camberland, who was con victed of murdering two men "named Robin son and was sentenced to be hanged on the 10th of last month, it is now stated, has be innocent, and a sisbeen proven to Cumberland, who resides nt Mexico. Mo., claims to have fastened the guilt upon two men named Davidson and Invistianson, the former a brother-in-law of lumberland. The report is that Davidson has confessed to having murdered the two nen, and that he and Christianson were burying the bodies when Cumberland hap pened along. They made him help them by threatening to kill him unless he did so. The story is not believed by the Harlan people as it is not generally thought that Cumber hand would consent to so narrow an escape from the gallows, when by confessing he could save his neck.

Ireland's True National Color.

New York Sun: An interesting dis ussion has been going on in the Sun in regard to Ireland's true national color This subject was very fully threshed out Dublin newspapers about ten in the ears ago, and it was then conceded that he national color of Ireland was light olue. Green as an Irish national color seems to have come into vogue at the United Irishmen movement toward the close of the last century. It has been suggested with some show of plausibility that green was a vived at by the mixture of orange and blue, thus typifying the union between the united Irishmen Presbyterians of the north and the Catholics of the south. The color of the ribbon of the Knights of St. Patrick, an order instituted about 1782, is light blue. All this, however, has nothing to do with the place which Ireland has in the A correspondent in the anion jack. Sun of today erroneously says that the blue in the union jack represents Ire-land's part in the flag. The original England was the St. George's flag of cross, which was white on a red ground. To this was added at the union between Scotland and England the saltire known as the cross of St. Andrew, which was white on a blue ground. As the St. George's cross still kept its place on the outside of the united flag, it was agreed as a compensation to Scotland that the ground of the first union jack should be blue. In 1800, when the cross of St. Patrick, which is a red saltire on a white ground, was added,

very little change was apparently made in the appearance of the flag. If those who a e interested in the subject will look at a properly made union jack they will see that the white and red stripe which run diagonally across the flag are of different widths in different parts of the flag. It would take too long to ex-plain how the three crosses are blended This one was evidently desirous to show
