GOES EVERYWHERE

Johann Hoff's Malt Extract goes everywhere. All civilized nations want it, and, indeed, a nation would not be civilized that did not. Europe, Asia, Africa, America, and Australia are all loud in its praise. It would be difficult to say which of these five divisions of the world appreciate it most: of course in business all testimony is more or less collective. Individual gratitude is most pleasing, after all, to a philanthropic mind; and the most enduring approval of all is that which comes from the heart's fulness of a convalescent who is not only relieved of misery, but regards Johann Hoff's Malt Extract as the only sure prophylactic against the possibilities of the future. The number of grateful patrons is legion, and Johann Hoff bows his respectful acknowledgments. Beware of imitations. The genuine Johann Hoff's Malt Extract has the signature of "Johann Hoff" on the neck of every bottle. Eisner & Mendelson Co., sole agents, New York.

SUCCESS LEADS TO FAILURE Suspension of the Mines Which Led to the Coeur d'Alene Strike.

The Bunker Hill and Sullivan mines, two of the largest producers in the Cour d'Alene district, were closed down for an indefinite period on the 1st of March. Three causes are assigned for the suspension: Low price of silver, excessive freight rates and high wages. The question of wages can hardly be considered a factor, for the reason that wages were reduced ten months ago, resulting in a strike memorable in the annals of labor struggles. The battle began about the 1st of May, the chief purpose being the disruption of the Miners union. It was a prolonged fight and a bloody one. There was considerable gun play, several explosions and sitigation in the courts. Federal troops were called in and the aid of the federal courts was invoked. The state authorities virtually abdicated their powers. The strikers were routed and five of their convicted of various offcuses and sent to the penitentiary. Miners were imported from Wisconsin and Michigan at great expense and in many in-stances paid higher wages than the strikers demanded. Tremendous expenses were incurred, mainly to disrupt the miners union, but the success achieved was not a profitable investment. The money wasted in the bat-tle with organized labor explains the present straightened condition of the mine owners and the closing of the mines.

ACTIVITY IN OTHER MINING DISTRICTS

Pushing Operations in New and Old Leads

-A Herd of Elk Snow Bound-

Natural Gas and Other West-

ern Phenomena.

A sequel to the strike is to be found in the opinion of the United States supreme court rendered on the 6th inst. in the case of George A. Pettibone and other Cour a'Alene miners against the United States. The court decided in favor of the miners and directed that the indictment against them be quashed. These cases grew out of the riots at the Wardner mines. The court at that time had granted injunctions restraining the strikers from interfering with the nen, and it was alleged that Pettibone and others conspired to violate the laws of the United States. The court holds that the indictment under which they were convicted of this charge is defective in that it was not shown that the men had knowledge of the order of the court.

Idaho Mines.

The country around Ketchum, Idaho, is well covered with snow, it being all of five feet deep in the town and much deeper in the hills. But little mining is being done here this winter outside of the Philadelphia-Idaho Mining and Smelting company. They are keeping the North Star mine running with a force of thirty men. They extract five tons of first-class ore daily and thirty tons of second-class, which is concentrated to fifteen tons. Both the first-class and concontrates run about 10 per cent lead, 20 ounces silver and \$20 in gold. The second-class ore runs about 25 per cent zinc, which is nearly all taken out in concentrating, but there is enough left to make it difficult to There is an immense amount of this ore in the mine and the company anticipate increasing the capacity of the concentrator some two or threefold.

Holly Oakes and Joseph Poncia are still at work developing their pioneer ledge four or five miles north of Contreville. It is a very large ledge of galena and carbonates, carry-ing from seventy-five to 100 ounces silver and \$35 gold per ton. They will be obliged to ship the ores, as there is no smelter in this county. There is quite a revival of mining interests at Silver City and De Lamar. The larger

properties are turning out good dividends, and the smaller ones are paying. As soon as spring opens, so that the ore can be hauled, the few mills that are now idle will start up.

A letter from Atlanta says that the Last Chance and Big Lode mines are yielding large quantities of ore, which will be sent to the mill as soon as the roads open in the spring. Atlanta has some of the best gold and silver mines in the state, and it is expected that a good deal of work will be done there this year. The ledges are large and traceable for several miles.

The firm price of copper will do much to-ward the opening up of the copper mines of the Seven Devils and Salmon river districts. The ledges are monsters in size and very rich

in copper, with both gold and silver.
As Idaho is to construct a system of wagon roads that will make the central portion of the state accessible, there will be a large in-flux of prospectors as soon as the snow disappears. There are very many rich mines in that section that are now inaccessible. They are galena, copper, gold and silver. The firmness of the copper market is very encouraging for the opening up of this portion of our great mineral belt. The chances are very good for the consummation of some very important sales of mines at Bear Valley, Sheep Mountain, Seafoam and Johnson camp as soon as the snow disappears, so that they can be examined by representa-

tives of mining companies.

One of the most singular occurrences ever noted in Colorado took place near Sagamore last week as the result of the storm which has been raging in the mountains for days. The fierce war of the elements drove a band of elk, numbering over 1,000, down from the hills onto a high mesa, thickly timbered, about twelve miles south of Sagamore. They attempted to move farther in order to gain the valley, but in so doing were caught in the deep, crusted snow, where they floundered around, powerless to advance or re-treat. Word of the event was soon passed and ranchmen from all quarters flocked to

ONE ENJOYS

Both the method and results when Syrup of Figs is taken; it is pleasant and refreshing to the taste, and acts gently yet promptly on the Kidneys, Liver and Bowels, cleanses the system effectually, dispels colds, headaches and fevers and cures habitual constipation. Syrup of Figs is the only remedy of its kind ever produced, pleasing to the taste and acceptable to the stomach, prompt in its action and truly beneficial in its effects, prepared only from the most healthy and agreeable substances, its many excellent qualities commend it to all and have made it the most popular remedy known. ...

Syrup of Figs is for sale in 50e and \$1 bottles by all leading druggists. Any reliable druggist who may not have it on hand will procure it promptly for any one who wishes to try it. Do not accept any substitute.

CALIFORNIA FIG SYRUP CO. LOUISVILLE, RY. NEW Y

to save the lives of the men attacking them A man would select a large bull cik, and, walking toward it on the crust, which would

sustain his weight, with a chib cut from a neighboring timber, would hattle with the beast until a well-directed blow just below the antiers would stretch the creature dead. Many narrow escapes from the maddened animals are recorded. When enough game had been secured to supply the domestic wants of the ranchmen a load of hay was skidded to the half-starved survivors of the band, which they are ravenously.

land, which they are ravenously.

The climax, however, came a day later, when a ranchman (W. B. Moore) was called from his bed by the furious bellowing of his cattle. The clk had forced themselves from their temperary prison, and had attacked the haystacks in the valley, taking entire possession of the ranches of Messrs, Moore, Holman, Brewn, Nichols, Helm & Co. and the Pleasant Valley Live Stock company, and stampesling the cattle. After a consultation had been held the ranchmen decided that to drive them off would man starvation. that to drive them off would mean starvation for the entire band, so the clk were rounded up by the firing of rifles and gans and driven into Jay Sea park, where two companies of stockmen own hay, which they generously gave for the use of the animals and the future benefit of sportsmen.

Mining Operations in Butte.

Work on the Anaconda mines in Butte began, according to announcement, on the 5th inst. When in full operation the mines will furnish employment to not less than 900 men, which added to the large number almen, which added to the large number al-ready at work in other mines of the camp will make some difference to bearding house keepers and a few merchants. As is well known, says the Miner, Butte is not a one-mine or one-company town, and while the suspension of work at one mine or set of mines in Butte usually attracts a little mities in Butte usually attracts a little notice, no great calamity has ever resulted from a suspension of work by one company. At the Boston & Montana mines and smelters 800 men are employed, at the Butte & Boston 500, at the Colorado 300, at the Parrot 200, at the Moulton mine and mill, Butte reduction works, Original mine, Black Rock mine, Colusa Parrot mine, Black Chief and half a dozen otners owned and operated by W. A. Clark 900 men are employed, at the Lexington 250, Alice mine and mill 300, at the fifty other smaller properties being worked under lease and by their owners 2,500

Salt Lake Gas.

Another natural gas well is spouting in the vicinity of Salt Lake City. The piping in this well is four inches in diameter, while that in the "Tuscarora" is only two inches, The volume of gas, while it could not be esti-mated at the time, is entirely satisfactory to the company and it promises to be one of the

best holes yet sunk.

The boring of gas wells, or more correctly the drilling of them, is an interesting operation and semetimes decidedly exciting, especially when the fluid is reached suddenly. Tools, drills and other apparatus are some-times blown sky high by the escaping gas. This was the case with one of the wells sunk in these fields. There are, however, genre-ally sufficient indications of approaching to the fluid to prevent danger.

Silver Production in Colorado. The silver output of Colorado was increased

last year by 3,000,000 ounces, in spite of the low price of the metal, owing to the discovery of new mines in which large quantities of sliver are produced at a very low cost, The most profitable of these mines are at Creede. Recent reports from the Creede district show that the shipments of ore from these mines are larger than ever. The value of the ore shipped from Creede in February is estimated to have been \$800,00. If production shall continue at this rate the output of this camp will be very much larger this year than it was in 1892.

Portland's Water Works The city council of Portland has let contracts for the construction of a steel pipe line to carry water from Bull Run to Port-

land, a distance of thirty miles. The contract for supplying 11,442,000 pounds of steel plates was let to the Risdon Iron works of San Francisco for \$340,971.60. contract for east iron pipes was awarded to the Oregon Iron and Steel company for \$39 per ton. The construction of headworks and bridges and the manufacturing and laying of steel pipe were let to local bidders, the whole amounting to \$1,000,000. Con-tracts for two large reservoirs will be let

Bear Story. A big bear chased Peter Hanes, an old man county Washington, the other day, and was close at his coat tails when he ran into the clearing of a neighbor named McCoy. both neared the house the door opened and Mrs. McCoy appeared with a rifle in her hands, promptly let drive at the bear and bowled him over dead. Then the ungrateful Peter claimed the hide, as the finder of the

bear, and insisted on his demand until as a compromise it was agreed that he and his rescuer divide the proceeds of its sale. You cannot deny facts, and it is a fact that

Salvation Oil is the greatest pain-cure. 25c. BROKE DOWN UNDER HIS BURDEN.

Alfred Crill a Wealthy Chicago Business Man Adjudged Insane. CHICAGO, Ill., March 9.-Alfred Crill. a wealthy cattle dealer at the stock yards, was today adjudged insane and given into the custody of his son, Howard Crill, to be placed in some private institution. Crill owns considerable property in Chicago, and was for some time a member of the firm of Alexander, Rogers & Crill, doing business in this city and Omaha. The weight of business cares and a spell of sickness, caused by

exposure while buying cattle in the west during the blizzards of last winter, preyed upon his mind until it gave away. Dr. Archibald Church, an expert on insan-cy, testified that he had been treating Crill for three weeks, and while he is in the full possession of his faculties, he is troubled with sudden fits of excitement, which rendered him dangerous. Crill was then examined. He addressed the jury in a straightforward, business-like manner, telling of his trip to the west, when he was taken sick and answering all questions intelligently. A large number of friends and acquaintances and business men gathered in the hall, and when Crill passed them on the way to his

arriage, many hunds were extended to him n sympathy.

Busy people have no time, and sensible peo ple have no inclination to use pills that make them sick a day for every dose they take. They have learned that the use of Do Witt's Little Early Risers does not interfere with theirhealth by causing nausea, pain or grip-ing. These little pills are perfect in action and results, regulating the stomach and bowers so that headaches, dizziness and lassitude are prevented. They cleanse the blood, clear the complexion and tone up the system. Lots of health in these little fel
