Prof. DeMotte's remarks were illustrated by a stereopticon, the views being largely of a scientific nature. He also performed several interesting plat-form experiments. That the charge of burgiary will be made to stick is pretty certain, however, for half a dozen or more neighbors have been summoned for this morning, when he will have a hearing, and the evidence seems to be strongly against him. BEE NEWS FROM COUNCIL BLUFFS

Salaries of Officials Raised by the New City Council.

TWO VERY FASTIDIOUS OFFICE SEEKER

Aspleants for Deputy City Clerkships Stat: the Terms Upon Which They Will Ac. cept Office-Their Demands Will Probably Be Granted,

One of the first things the new council did last Monday evening was to raise the salary of the chief of the fire department. One of the next, according to the statement of a democrat who knows what he is talking about, will be the raising of a number of

other salaries. There is a violent turmoli going on among the faithful over the appointment of the two deputies for City Clerk Zurmuehlen. It is carefully concealed from the public gaze, but it is there all the same. G. M. Wilson and S. Lobhart are to be the two deputies. Wilson was destined by the party leaders for the deputyship at the city building because he could read better than Lobhart, and Lobbart was to be deputy at the superior court because he could keep books better than Wilson. Two thicars turned up to prevent this arrangement from being carried out. Wilson didn't want to be at the city building because there was a difference of \$10 per month in the salaries in favor of the other place. On the other hand, Lobhart, ne reason or other not known to any body but guessed by nearly everybody, was distasteful to Judge MeGee of the superior court, whose right bower he would naturally be in case of his appointment. Judge McGee did not hesitate to make this fact known by the men who crowded Lobburt forward. Judge McGee has had ruptures with the faithful before, and has always come out of them none the worse for wear. There is a prospect of his having another chance to show the stiffness of his spinal column be-fore the present difficulty is gotten through

We can't help whether Judge McGee likes it or not," was the way a well known democrat spoke yesterday, whose word will have a good doal to do with the final decision; "if we give him Lobhart i don't see but he'll have to take him. As for Wilson's inwillingness to take the deputyship at the date holding the protection." city building, the probability is that we shall raise the salary so as to make it equal to that at the court house, and then I think Wilson will take it."

Spring Announcement.

We are now fully prepared to show you one of the most carefully selected tocks of spring dress goods ever shown in Council Bluffs. If possible we have taken more care than ever before, especially with our exclusive patterns, which are composed of all the leading novelties of England, France and Germany.

Among other other specialties show: s our large line of plain goods in all the latest weaves, also an endless assort-ment of medium priced domestic goods in mixtures, plaids and checks.

Silks of all the latest makes, including kai-ki, habatai, china, bengaline, phosphorus, taffetta, in plain, figures

The indications are that this is going to be one of the largest silk seasons ever experienced in this country. We took advantage of the same and placed a large importation order, the last of which has just arrived.

At Dohany's Theater. "Fatherland," which is to be presented this evening, is a romantic and picturesque drama of Tyrolean life, in which Charles A. Gardner (Karl) appears with his wonderfully sweet songs, graceful dances and dialect mirthfulness. The Tyroican quartet, in their quaint yodelings, is one of the most attractive of the promised features. Altogether, there is a great treat in store for those who love music and mirth, and who does not? The engagement is for one night only.

"THE DANGER SIGNAL," This wonderfully realistic play will be pre-sented Sunday night at Donany's. It abounds in strong scenes and thrilling climaxes, and introduces as a most novel fea-ture a monster locomotive, made of iron and steel, from which real steam issues, a freight train, the cannon ball express, etc. Miss Morrison's fame began with her appearance as Marguerite in 'Faust.' in her father's (Lewis Morrison's) magnificent production, and has steadily gained until her name is now one of national familiarity. Interesting Side Light. The divorce proceedings which were recently started in the district court by Mrs. Ella Clark against her husband, William G. Clark of Neola, has set the tongues of the gossips of that little bucg running at a Nancy Hanks gait. Riley Clark, the attorney for the plaintiff, is mayor of Neola. He was jus-tice of the peace when his son, the defendant in the present case, was unarried, and in that capacity he performed the ceremony that united them for the space of two months for better or worse. Nearing the End. The case of Mitchell Vincent against the city of Council Bluffs, in which the plaintiff is suing for \$18,000 damages for the city's failure to fulfill the terms of an alleged contract, is nearing the end, and it may be expected to go to the jury, so the attorneys say, about tomorrow or next day. It was just two weeks ago today that the trial was begun. The defense of the city is that in the first place there was no contract, and that even if there had been and Vincent had been compelled to perform his share of it it would have been a dead loss financially to him. The court room resembles an apothecary shop, for samples of the soil taken from various places where Vincent would have to dig in case the sewer had been put in where he claims it was to have been, have been dug up and put into bottles for the inspection of the jury. The faces of the jurymen have been steadily growing more and more blank, and it is to be feared that by the time all the evidence is in and the attorneys have completed their arguments they will know less about the merits of the case than when they started out. After this case is disposed of the tria of cases on the criminal calendar will be commenced at once. This will leave only one week to fluish all the work in that line,

It is finished at last and for some days has been on exhibition to Mrs. Gorham's friends at her home. Itsis a magnificent effort, a rustic scene in which most striking feature is several bovine beauties, painted with such delicacy of percep-tion and accuracy of detail as to look more like an actual view out of a window than a lifeless representation on can-vas. He Married the Girl.

Judge Berka had occasion yesterday aftersoon to marry another couple in order to settle a seduction case. This was the third time the Judge has performed the ceremony n similar cases during his present term. The parties interested were Vininzo Chrisdo and May Crooks. The girl had sworn to a complaint alleging seduction and assuit, and when the case came up the young man signified his willingness to settle the matter by marrying the girl.

Allegase was progregated and in the presence.

A license was procured and in the presence of about 190 Italians who had dropped in to bear the trial the marriage took place. The girl is only about 16 years old and the groom is a tailor living on South Phirteenth street. A Delightful Business-Pleasure Trip.

Vining struck Dynamite Bill' with a billiard cue, when the latter drew a butcher knife and stabbed his assailant.

The wounded man was at once taken to Dr. Berwick's office, and as usual in such cases, the man who wielded the knife slipped away unnoticed. An examination by the physcian showed that the knife entered the left side, between the fourth and fifth ribs, ranging upward, the back of the knife striking the shoulder blade and deflicting its course. following: To THE CITY CLERK, South Omaha: Dear Sir In pursuance of a resolution adopted by the Board of Education of school district of South Omaha at an adjourned meeting of said neard held on the 20th day of March, 1863, you are hereby requested to prepare bal-lots for the qualified voters of South Omaha to vote on school house proclamation at the municipal election to be held on the 4th day of Aveil 1869, as follows:

Education has filed with the city clerk the

of April, 1803, as follows: Shall consent and authority be given to the Board of Education of school, district of South Omaha, in the county of Douglas and state of Nebraska to creet a four-room brick school house at an estimate I cost of \$10,000 on lots 7, 8 and 9, block 34, near F and I wenty-seventh streets, in said city. "Shall consent and authority be given to the Board of Education of school district of South Omaha in the county of Douglas and

state of Nebraska to erect a four-room brick school house at an estimated cost of \$7,500 on a site in the vicinity of Missouri avenue and Nineteenth street in said city." The board finds that with a reasonable evy, which is now assured, enough addi-ional rooms and buildings to accommodate all the children of school age can be erected

and the current expenses can be paid without taking a census and raising the saloon out taking a census and raising the saloon license fee. It is necessary, however sub-mit the building question to the voters, as under the law only a limited amount can be expended for buildings in any one year, hence the proclamation. It is the general opinion that there will be little or no opposition to the proposition, as every good citizen is in favor of providing for the education of the children and all are aware that at present children, and all are aware that at present but little more that half the pupils can be seated.

Board of Education Committee Testing the Leavenworth School.

The committee composed of Dr. Duryea, Colonel Akin and Architect Latenser of the Board of Education, made a test of the ventilation in the Leavenworth school yesterday afternoon. The anemometer was placed against every supply and exhaust air cham-ber in the entire building and a careful record made of the result.

The janitor had not fired the heating stacks until the committee reached the building, so the first test was a cold air test. When the heaters began to furnish air a warm air test was also made, but it was not considered conclusive, for the reason that the fire had not been burning long enough to create the required amount of

While the anemometer test disclosed the fact that the air was not being moved through the rooms at the rate required in the contract, which provides for 1,800 cubic feet of fresh air per pupil every hour, yet the atmosphere seemed to be very good, and the principal and teachers say that they are highly pleased with the system of ventila-tion now in use at that school.
