

HE HIMSELF TO RULE

Alexander of Servia Has Now Taken Charge of Affairs.

DISMISSED THE REGENTS AND MINISTRY

He Tired of Their Rule and Planned a Little Surprise Party for Them—His Parents Responsible for the King's Move.

BRISBANE, April 14.—The young King Alexander I., who has heretofore ruled Servia through a regency pending the attainment of his majority, last night executed a bloodless coup d'etat and today rules in his own person.

For many months affairs in Servia have been in a critical situation owing to the abuse of their power by the regents and state officials. Young Alexander determined to put an end to it and accordingly made all arrangements secretly. Last night he invited the regents and others to a banquet. While it was in progress detachments of soldiers and policemen took possession of the government buildings and the ministers' houses. Though still more than a year short of his majority, Alexander at midnight rose, declared that he had become of age and had assumed the government of the country.

The deposed regents and ministers were dunned. The soldiers in waiting at once placed them under arrest and took them to rooms prepared for them in the houses, where they are under guard. The army is loyal to the young king and received his accession with joyous acclamations. The king has appointed a new ministry.

The king this morning issued a decree dissolving the Skuptchina and issued writs for a new election. He attended the Te Deum in honor of his accession to the throne, and was loudly cheered by the populace on the way home.

IT WAS VERY SIMPLE

The details of the coup d'etat were wired out with remarkable swiftness and simplicity. The regents and cabinet ministers responded to an invitation to dine in the old palace last evening. Eight were seated at dinner, the king presiding. After the third course the king rose and said to the regents: "Gentlemen: For four years you, in my name, have administered the kingdom. I thank you heartily for your services. I have been able to administer the kingdom myself, and will exercise it from this moment. I beg you, therefore, immediately to resign your offices. You will not resist, will you?"

M. Ristic replied that he could not and would not comply with the king's request which was contrary to the constitution. The king thereupon left the room and sent an aide-de-camp to demand the resignations of the ministers. As they all remained obdurate, he ordered them to leave the palace and go to the army barracks. In the morning they were conveyed to their residences under guard. Tonight the king's assumption of power was celebrated with a torchlight procession and general illuminations.

The course taken by the young King Alexander will go down in history as the influence of his father and mother, ex-King Milan and Queen Natalie, who have been reconciled after many years of discord. The coup d'etat is simple, the king's action is a triumph of the young man's will over the regency which had been first weakened by the separation of Milan and Natalie and finally by the death of the latter. Milan and the subsequent troubles in which the country was plunged largely as a result of the weakness of the crown.

WILL HAVE NO BAD EFFECT

The Neue Freie Presse expresses confidence that the Serbian coup d'etat will have no serious consequences. Austria, it says, has no cause to disapprove the action of the young king, who was probably influenced by his parents and not by his ministers. A dispatch from Belgrade says: "When King Alexander announced the dismissal of the regents and ministers, the king's action was marked by the king's action. Colonel Tchirich, the king's aide, interposed a violent protest against the king's action and the regent and the officer."

ALHWAARD BACKS OUT

He Failed to Present His Charges to the Reichstag.

ALHWAARD BACKS OUT

He Failed to Present His Charges to the Reichstag.

BERLIN, April 14.—Alhwaard failed to present in the Reichstag, as he promised, documents implicating high German officials in fraud against the government.

Subsequently Alhwaard offered to present the documents if a special committee be appointed to examine them. The president replied that Alhwaard must bring the matter before the house either by motion or petition.

Alhwaard then went around among the socialist members, endeavoring to secure their support to a motion for the appointment of a special committee to examine his alleged incriminating documents.

It is the general opinion among the members of the house that the documents Alhwaard says will prove his charges will contain as little proof as did those recently presented, and it is highly probable that he will fail to get the house to waste time looking over them.
