

THE DAILY BEE.

E. ROSKOPF, Editor. PUBLISHED EVERY MORNING. TERMS OF SUBSCRIPTION: Daily, \$1.00 per week, \$3.00 per month, \$10.00 per quarter, \$35.00 per year in advance.

SWORN STATEMENT OF CIRCULATION. For the week ending April 18, 1893, the circulation of this paper was as follows: Monday, 28,000; Tuesday, 28,000; Wednesday, 28,000; Thursday, 28,000; Friday, 28,000; Saturday, 28,000.

PERHAPS Herr Krupp presented the biggest gun in the world to Chicago because he thought the city needed something that could not be stolen.

SOME of the county jails in Kansas have lately been provided with a formidable supply of Winchester's. The banks of Kansas ought to follow this example.

WHILE the seals of Bering sea are occupying the attention of the world it is interesting to learn that the Newfoundland seal fisheries have this season yielded only one-quarter of the normal catch.

IT WILL have to be admitted that New York City, though it belongs to the effects east and is located a long way from the Columbian exposition, is still of some importance.

THE Minneapolis Journal, referring to the terrible blizzard that visited that state the other day, says that it resulted from putting a man with Nebraska weather ideas at the head of the weather bureau.

THE proportion of divorcees to population and to the number of marriages is larger in the United States than in any other country.

THE unsatisfactory condition of the "Darkest England" funds, as shown by the twenty-sixth annual statement of the accounts of the Salvation Army for the year ending September 30, 1892, affords a matter of serious consideration.

THERE is a young woman in Columbia S. C., who is in a position to sympathize with Dr. Briggs and other distinguished people whose orthodoxy is in question.

UNDER the school law of 1888 in Wyoming the five years' term for which the school books in the state were adopted is about to expire.

THE socialists are actively arranging for their national congress which is to assemble in Chicago during the week beginning July 1.

OMAHA'S COMING QUESTS.

The two weeks from May 22 to June 3, inclusive, will be a period of great activity in Omaha. Within that time three of the most important events of the year in this city will take place, namely, the Manufacturers' exposition, the convention of the Nebraska State National Men's association and the national convention of railway surgeons.

It had not been the intention of the State Business Men's association to hold a convention this year, but the Manufacturers' association, recognizing the importance of the relations which exist between the manufacturers and the retailers of the state, has taken steps which will result in the largest convention of the business men of Nebraska ever held in this city.

THE two weeks during which the Manufacturers' exposition will be open will witness unvaried activity in Omaha. Many thousands of people will visit the city and it will naturally follow that the pulse of business will be stimulated.

An interesting description of the war vessels composing the various fleets which will participate in the grand naval pageant in New York harbor on the 27th inst. shows that although the important nations of Europe will be represented by some of the best war ships ever turned out of a foreign shipyard, there will be vessels flying the American flag that will surpass any of them in design, strength and workman-ship.

THE first decision in the United States court of claims in the suits for damages growing out of Indian depredations in 1865-6 has greatly encouraged the attorneys who are prosecuting a large number of claims for like resulting damages filed in Utah.

THE trial of Dr. Buchanan in New York, charged with causing the death of his wife by poison, has attracted almost unparalleled interest by reason of the extraordinary test to which the value of that class of evidence known as expert testimony has been subjected.

THE trial of Dr. Buchanan in New York, charged with causing the death of his wife by poison, has attracted almost unparalleled interest by reason of the extraordinary test to which the value of that class of evidence known as expert testimony has been subjected.

THE capital city of Minnesota is setting a worthy example for other cities to follow. The wires of the two electric light companies of St. Paul will soon be under ground, though the telephone company are mostly down, an ordinance to dispose of the lines of the Western Union Telegraphy company has passed the assembly, which will insure the gradual disappearance of the wire network of this great corporation.

of equal reputation with those summoned by the prosecution maintained, and indeed demonstrated that there are no poison developed in the decomposing bodies of human beings, more particularly after death from diseases of the liver, which exactly simulate in their chemical reactions the reactions of morphia and sometimes even of atropia, the drugs claimed to have been administered by Dr. Buchanan to his wife.

THE effect upon the minds of the jury of this conflicting and contradictory expert testimony must be extremely confusing, but whatever may be the result of this remarkable trial it is inevitable that popular confidence in this class of evidence must be greatly weakened.

IT IS patent that the theoretical temperance advocates of South Dakota are determined to learn nothing by experience. Otherwise they would have long since realized how futile must be any attempt to enforce the prohibitory law at that state. The law, however, affords opportunity for cunning leaders of the agitation to earn a livelihood, and some of them make a good thing out of the attempts to enforce the law.

THE method adopted by the two murderers who have made their escape from Sing Sing prison was an improvement upon that of the assassin who recently shook the dust of the Michigan penitentiary from his feet. The latter murdered a guard, but the two former only found it necessary to throw a little pepper into the guard's eyes.

It was satisfactory. Such being the case there is little likelihood that the president will do anything to save the country from the reproach of having entered into such a treaty with the Russian despot, even if he has the power to do so.

FOR nine years Brigadier General David G. Swain, judge advocate general of the army, has been serving out the sentence of a court martial, suspending him from rank and placing him on half pay for twelve years. During all this time the duties of his office have been performed by an acting officer.

AND now a clean-cut fight is progressing between R. J. Colos and S. A. Stephenson for the York postoffice. True the term of H. M. Dalrick has not yet expired, and numerous leading democrats, remembering that the last postmaster was allowed to serve out his time, after change of administration, have declined to sign a petition for his removal. It is further true that the present postmaster has administered the affairs of the office to the general satisfaction of the people of the community, and that no graver offense can be alleged against him than that he is an "offensive partisan."

SECTULAR SUITS AT THE PULPIT.

St. Paul Globe: The Chicago church people propose to make the Chicago Sabbath during the World's fair as dry as possible. They are now engaging in a movement to close the saloons Sunday. This is ungrateful, since the saloons helped them to close the fair Sunday.

St. Paul Pioneer-Press: There is little trouble in selecting a successor. Bishop Phillips Brooks of Massachusetts. The clergyman who might come nearest to equaling Brooks declined to take the position, and the gentlemen who would decline are very carefully omitted from the invitation list.

New York Sun: If Rev. Morgan Dix meant to withdraw himself from consideration as the successor of the late Phillips Brooks by the request to "stop the use of my name in this connection," his desire should certainly be respected. A clergyman who can write such English is scarcely fitted to be a bishop.

Kansas City Times: Rev. Dr. Briggs and his friends rejoice over securing a majority of the New York delegates to the general assembly which is to try his case, such unregenerate politicians congratulate themselves on carrying primaries, and the victory seems to have been secured by methods not altogether dissimilar.

New York Herald: So long as theology occupies first place in the church the words of Christ will be of no avail, but when a pure heart, a noble life, high aspirations, love of one's neighbor are proclaimed to be primary requisites, the clergy will cease their quarrels with the laity. The millennium will begin to ring.

St. Louis Republic: There is no such commandment as "Thou shalt not dance!" but it is said "Thou shalt not kill!" Yet here is a fight in a Missouri town in which the churches are trying to stop dancing on a military academy, though they have no objection whatever to his work of training boys into fanatics, with the idea of becoming professional killers. Some things—in fact, a good many things—are curious.

Kansas City Star: The followers of Mohammedanism, who claim to be very fair, must either have left their Korans at home or have concluded to interpret them literally so as to permit of unlimited indulgence in beer. Certain it is, unless some check be put on their consumption of the foaming amber, they will have to undergo a course at the Keeley institute before they will dare to return to "Arabia the best."

Chicago Herald: Rev. Morgan Dix, D. D., rector of Trinity church in New York City, has declined the office of the Episcopal bishop of Massachusetts, to succeed the lamented Phillips Brooks. He says that "there are insuperable objections" to his acceptance "of a bishopric anywhere in the world." This great divine, preacher and man of business is the son of the late John A. Dix, United States senator, governor of the state army, author of the sentiment "Shoot him on the spot," and governor of New York. Morgan Dix is not only Trinity's preacher, but the manager of its choir, estimate at \$10,000 a year, or nearly equal to that of the Astors. His pulpit salary is \$50,000 a year, and his pay for the business management of the Trinity estate is probably \$50,000 a year.

Hon. Sam Joseph, author of that stirring song known as "Crover," has been selected to be the first an ancestor in the southern district of Pennsylvania.

M. Turpin, whom President Carnot has released from prison, named the explosive he invented melinite, partly in honor of M. Meline and partly because he didn't care to call it Turpinite.

Emm Pasha has scarcely been again re-elected for that off-keel celebrity, Osman Digma turns up once more—ridding in Upper Egypt. These two men have staid down a shorter time than any other who have been the subjects of periodical obituary sketches.

Senator Morrill of Vermont has just celebrated his birthday. Mr. Morrill has been in congress continually since 1855, twelve years in the house and twenty-six in the senate. Should he live to the close of his present term, he will be able like Thomas H. Benton, to write his "Thirty Years in the United States Senate." Mr. Morrill is in vigorous health.

CHEERY CRATER.

Rochester Democrat: Some people's eyes are a regular pair of staves. Binghamton Leader: The man who was dissatisfied with the manager said it was a beastly affair. Troy Press: It wasn't until woman started to improve her mathematics that she began to count for much.

New York Herald: Willie Witt—Aw, really, Miss Pette, I'm not such a fool as I look. Buffalo Courier: "How old are you, my little man?" asked a gentleman of a tot who was less than 4 years of age. "I'm not old," was the indignant reply. "I'm almost new."

A man without any get-up in him can't expect to make much of a success as a horse carrier. He: I've bought you a pet monkey to amuse you, I'm sorry. She: Oh, how kind of you! Now I shall miss you when you're away.

Texas Strife: A lady says that she could always know when her husband's jokes began to seem funny. Philadelphia Times: The process of trying to get an office is very simple. First the applicant files his application, then the party in authority polishes them off.

Washington Star: The American is inevitably predisposed to slant. Even the infant in its cradle discovers that he feels "rocky." Philadelphia Record: "I was crossing the plains once," began the storyteller, "when highwaymen forced the car and I was made to throw up my hand. I was crossing the ocean once," interrupted the punster, "when I was made to throw up my foot."

Out in the wood a knowing old owl sat on the bow of a venerable yew. With never a snail and never a screw. (Contented) he homed? "To-who!" "To-who!"

But a Boston maid, who was passing through the wood at twilight, "I don't see you, Mister Owl, don't say 'To-who!' say 'To whom!'"

HER ATTRACTIONS. Chambers' Journal. She has no dazzling charms, no classic grace. Nothing, you think, to win men's hearts about her face.

She has no wish in the great world to shine; For work outside a woman's sphere, no yearning;

But on the altar of home's sacred shrine She keeps the fire of pure affection burning.

We tell our griefs into her patient ear; She whispers "Hush!" when wails are dark and dreary.

HER ATTRACTIONS. Chambers' Journal. She has no wish in the great world to shine; For work outside a woman's sphere, no yearning;

SEEN AT THE CONCERTS HIPPIQUE. The above stylish walking toilet was sketched at the horse show. It was worn by a well known mondaine, and consisted of a prune colored cloth skirt, with a white cloth jacket and prune colored satin collar, and a white velvet cap.

BROWNING, KING & CO. Largest Manufacturers and Retailers of Clothing in the World. This blew in. Did you hear the husky howling of the wind along the street? Did you see the prancing people as they tried to keep their feet? How it whistled round the corners! how it galloped through the doors! It climbed into the attics, and it burrowed 'neath the floors; But of all its beastly antics there was one that beat them all. 'Twas the fendish way it frolicked through that hole that's in the wall.
