well, but fruits are practically a failure, ber-ries scarce and many grape vines killed. On the whole the prospects for farmers are good for the autumn, and in consequence mer-chants look forward hopefully. Some com-plaint is made of difficulty in collecting, but little more than usual at this time of year. Banks are not lending, but are calling loans. Gosper County.

fall trade is good. Lancaster County.

good harvest are predicted.

Lincoln County.

proved wonderfully. There will be very little oats. Cattle and hogs are doing well. Collections fairly good and trade improved over a year ago. Demand for money normal and supply ample. Farmers are getting well

stocked up with hogs and cattle and with corn to feed them money will be plenty.

Logan County.

acreage increased about one-third.

this section is well supplied.

Wheat and corn are the principal crops,

diversified about the same, except that there has been considerable flax sown. Prospects excellent for wheat, oats, flax and corn. Rye about one-third to one-half a crop. Have had excellent rains this month and every

thing is looking first class. Collections fair on account of good price for hogs, with which

Loup County.

The principal crop this year and last, corn and wheat, and the acreage of each is about

10 per cent greater than heretofore and prospects good.

Madison County.

The principal crop is corn, though a great

deal of wheat and oats are, raised. Acreage of all grain increased 10 per cent. All forms of small grain show a rapid growth

and in consequence a little weak, but warm weather is raising it finely. Corn, the best ever seen here. Sugar beets very fine. Generally speaking, this is the most favor-able season ever known. Trade is in a healthy condition; collections fair, but more wordt, is before select for her the forming data

than has been the case for the farming class than has been the case for the past two years, and this credit must be of a rather extended nature, yet merchants, as a rule, are able to extend the favors asked.

Merrick County. The principal crops, corn, oats, wheat and

rye. Considerable small grain was sown,

but owing to hail, wheat and rye will be al-

most a failure in parts of the county, while in other parts not affected. In the central

portion farmers plowed up the ground and planted same to corn, which crop bids fair to be good. The recent sand storms have been

a detriment, as corn has been blown out worse than has been known for years, but farmers are confident that there will be

namers' are confident that there will be good crops generally. Farmers seem to have plenty of money and collections are very good. The past year has been the best for the merchants that there has been for years and another such will fix the farmers in shape that all the old debts will be squared up and there will be good times for because generally

there will be good times for peoplegenerally. People are taking to the raising of stock,

especially sheep and cattle, and most of the grain will be taken to supply feeders at home. The price of land has materially in-

creased during the past year and times are changing for the better right along.

Nance County.

Corn, wheat, oats and rye are the princi-

Crops

Knox County.

The principal crop is corn ; increased acre Corn continues the principal crop, al-though wheat has grown in favor rapidly for several years past, particularly in the southern half. The backward weather dam-aged this year's wheat crop so seriously that the set of it was ployed on and year and to be age this year, and prospects good. Wheat, oats and rye almost a failure; will not aver-age one-third of a crop, owing to dry weather. Collections are good, but business is dull. Farmers seem to be prosperous. aged this year's wheat crop so seriously that most of it was plowed up and replanted to corn. This will increase the acreage in corn as much as 25 per cent. Weather has been favorable and there is a better stand of corn than for many years. Farmers seem in good shape financially, but trade condi-tions do not seem so satisfactory. Lincoin jobbers report sales ahead of the same per-iod last year and are making no serious com-plaints of collections but the retail trade of Grant County. This county is only engaged in cattle raising, but range is in excellent condition, and in about one month the shipment of fat cattle will begin. Collections are fair and prospects for trade are good. Greeley County.

The principal crops are corn and wheat, with some cats, barley and flax. Acreage this year is increased from 15 to 20 per cent, this year is increased from 15 to 20 per cent, and all crops are now in fine condition, promising good results. This section has had copious rains; corn is an admirable stand and grawing rapidly. The high price of hogs has relieved the financial distress of farmers, many of whom have paid off their indebtedness. The county has acquired 200 new farmors this spring, most of whom have paid cash for their hada and more new paid cash for their lands, and more new prairie is being opened up than in any pre-vious year. Merchants are generally pros-perous and jubilant over the outlook for fall trade. Collections are good.

Hall County.

There appears a general feeling of coaff dence here in both commercial and agricul-tural districts. Corn is the leading crop of the county and prospects reported good. Winter wheat good, rye fair and oats will yield about two-thirds of a crop. The beet crop is believed likely to make a much bet-ter showing this year than last, owing to the fact that farmers are becoming more familiar with beet culture, and many experts are now handling their cultivation. At Grand Island the jobbers report an excellent and increasing business and general collections fair. On the whole, despite the tightness of the money market, this year promises thus far to be a prosperous one for both farmers and merchants.

Hamilton County.

Corn is the principal crop, the acreage of which is one-third larger than a year ago on account of the drouth killing a large area of fall wheat and damaging oats, necessitating plowing up and planting to corn. The pros-pects for wheat are good with the exception of the south side of the county, which was retarded by hail. Wheat and rye will not make over one-half a crop. No complaints make over one-half a crop. No complaints are heard on account of collections; trade is fair and future prospects promising.

Harlan County.

The principal crop is corn, acreage this year increased 25 per cent and with contin-ued favorable weather the crop will be larger than ever before. Owing to the continued drouth in early spring, considerable wheat was replowed and planted to corn, All small grain will not yield more than half a crop, and probably as little as one-fourth. There has been a small decrease in trade, but collections have been fairly good. Banks have suspended loaning money.

Hayes County.

Winter wheat and rye will be about a total failure. Spring grain about one-half a crop. Corn is doing well and with favorable weather will make a full crop. The acreage is about the same as heretofore, corn lead-ing. Merchants report a good trade; collections slow.

Hitchcock County.

The principal crop last year was wheat, The principal crop last year was wheat, but there is 25 per cent less this year. Pros-pects for all kinds of small grain are poor. Fall wheat may make one-fourth of a crop. There is a considerable corn acreage, about the same as last year, if anything, alittle in-crease. Quite a number of new farmers came in Collections and does not index and the in. Collections are slow and trade generally dull, being confined to the necessaries. Mer-chants depend entirely on success of farmers and prespects of both are rather blue.

Holt County.

In the southern part of this county the crop last year was diversified, consisting of corn, oats, wheat and hay, all of which had a fair yield. In the northern part the land is only adapted for grazing. The corn acre-age is increased over last year and the crop further advanced than at this time. Con-

this portion of Nebraska. The acreage is larger than in former years, but suffering from the drouth.

wheat, oats and broom corn. The crop last year was very good, and the outlook for this year is favorable. About the same products are being grown this year with a probable increase in acreage. Small grain will aver-age a fair crop, having been cut short by rea-son of dry weather. Corn has a good start and is coming up nicely. Have had plenty of rain lately, business in general is good, and collections fairly good. The principal crop is corn, wheat and cats and the acreage is increased at least 25 per cont over last year. All kinds of grain are in fine condition and prospects are fully as promising for a full crop as they have been at any time in fifteen years. Trade only fair, collections slow. Many accounts and notes due being extended to dates later than

Pierce County.

Wheat, oats, corn and some flax are the principal crops. With the exception of flax the coming harvest. The outlook for a brisk the acceage is 20 per cent greater this year, and the prespect for all crops is excellent at the present time, though a little late. A acres of sugar beets and about acres of broom corn have been few 300 sown. Ont crops were somewhat injured by reason of high winds, and some of the oat fields were plowed up and planted to corn. Last year there was a partial failure of crops, caused by drouth. The outlook has scarcely ever been better in this section at this season of the year. Collections are this season of the year. Collections are miserable; trade not very good. There is a stringency of money, owing to failure of crops last season, and an immense amount of money is tied up in the defunct Yankton & Northeast realward plaints of collections, but the retail trade of the city has suffered in many departments Northern railroad.

Platte County.

Polk County.

Red Willow County.

Principal crop corn, acreage increased 15 per cent. There will be less diversity, owing to wheat being plowed up and planted to corn. Wheat and oat crop will be very light. Winter wheat virtually a failure and spring wheat, with favorable weather, will be about helf a gran frequency is read.

about half a crop. Corn prospect is good, but late. Trade quiet and collections slow,

but farmers and merchants are in better shape than usual; they are very litle in debt and most of the farmers have enough grain left to tide them over for another year.

Richardson County.

Rock County.

Saline County.

Many more acres planted to corn this year

Prospects reasonably good.

industry is again reviving.

first hands.

and there has been a marked decrease in the Corn, oats and wheat are the principal amount of improvements and new building, both public and private. Better times and a crops, the acreage of each being increased. Corn is two weeks late, but an extra good stand, clean and doing well. Oats and spring wheat late but in good condition. Whiter wheat injured by drouth last fall, will be about one-half a crop. Collections slow and trade dull, but look for better times if pres-ent crop prospects continue. Merchants are Corn, which is the principal crop, has an Corn, which is the principal crop, has an increased acreage of 25 per cent over last year. Considerable wheat is raised, acreage about the same. Prospects good for one-fourth to one-half crop of wheat. Corn is a good stand and prospects never better. Small grain that was not plowed up has im-

in good shape financially.

broken.

Wayne County. Principal crops corn, wheat and oats, with an increased acreage over last year, approx-imately 10 per cent. Flax acreage is smaller than usual. Prospects for crops are very favorable. Corn is a good stand and doing well. Collections are very poor owing to last year's short crop, but it is believed that this fall will show a marked improvement. Principal crops, oats, corn and wheat in order named. Corn acreage is increased on account of failure of fail wheat. Considera-ble broom corn and flax are being raised. Ground is in excellent condition. Oats is doing well; crops, however, will be short. Collections slow, trade fair. Everybody Webster County. cautious and money hard to get excepting on first-class securities. Future prospects good.

the farming class.

The principal crop is corn, oats second and wheat third. The acreage of corn is about the same as last year, there is more ground under cultivation than heretofore, mo sown to winter wheat, acreage of whic greatly increased. However, it is very s and will not exceed one-half crop. I pects for corn are very good, much be than they were at this time last year. T will be a short small grain crop cause dry weather. Corn, though small, is thrifty and growing nicely and soil is in cellent condition. Collections are slo and harder to make than usual; not m merchants are hard up.

Wheeler County.

Principal crop last year was corn. acreage this year is increased 10 per cent. Crops are not more diversified; the outlook is not very favorable, having been damaged by wind and drouth. Collections are slow; than ever before and prospects are now good for an immense crop. Full wheat was al-most a complete failure. Oats looks well, fruits short. Hogs brought good prices, but farmers had comparatively few to sell and trade dull.

York County.

are generally hard up, with no prospects of being in a better condition until after har-vest. Trade quiet and collections very slow. Principal crop last year was corn, next wheat, oats, rye and flax in the order named. The acreage of corn is greater than last According to present conditions the coming season will prove a hard one for merchants with small capital and some will have to year, there being no greater diversity than usual. Prospects for a full crop of corn are excellent at this time. Wheat has a larger excellent at this time. Wheat has a larger acreage than last year, but owing to bad weather early in the spring about 20 per cent was plowed up and planted to other grains; balance will not make more than half a crop, with a decreased acreage over what was originally intended. Oats is backward, but promise at present a fair-crop. The hay crop will be short on account of the clover head winters billed strain every point in order to pull through. Principal crop is grass for hay. There is some corn, and wheat acreage this year about the same; all bidding fair for a good crop; more oats sown and looking fine. The dairy crop. The ha Corn, wheat and oats are the principal Rye will not crops. Corn is now in a promising condition, but fall wheat is very light, considerable having been plowed out and planted with corn, acreage of which is much larger and prospects better than last year at this time. almost unher this year wh lections have month. Tra

Se

Cattle and hogs are raised and fattened in large numbers. Oats in acreage is about an average and in fine condition. The ground STOCKVILLI THE BEE.]this place las is in excellent condition, never better and plenty of rain. Clover is killed and grass poor. Collections and trade fair; rather infund has already been raised for that pur fund has already been raised for that pur-pose. Similar action was taken at Curtis, Moorefield and Maywood yesterday. The four villages are to act together in this mat-ter. The people of this section are thoroughly alarmed at the prolonged dry weather. It has been very hot during the entire week with no indication of rain. Small grain is now conceded to be practic-ally a failure. Most of the core is not inclined to be slow, but farmers and merchants seem satisfied with prospects, the only com-plaint is the unusual low price for corn and wheat, much of last year's crop being in Corn is the principal crop, comprising about 70 per cent of the whole; balance prinally a failure. Most of the corn is not in-jured as yet, but cannot withstand this kind cipally oats. Not much wheat or other small gram raised. Acreage is increased over last year, as winter wheat sown last

The pleasant effect and perfect safety with

Collections and teade are fair, and with good COMMERCIAL AND FINANCIAL rops farmers will do quite we Valley County. Corn and wheat are the principal crops.

Corn and wheat are the principal crops. More winter wheat was sown last fall than ever before and the prospect is good, in some instances the finest ever seen in the county. Oats is simply a pleasure to be-hold but rye is a little thin. Corn is a little backward, not bad, and the best stand ever known in the county. Prospect is most flattering. The only failure ever had was Horse Talk on 'Change Caused Business to Be Neglected.

PROVISIONS WERE AT A STANDSTILL

Many Operators in This Line Failed to Even Fut in an Appearance-Transactions in Cora Were Confined to Room Trading.

Principal crop is corn, wheat and outs with ryc, barley and buckwheat in the rear. Con-siderable winter wheat is raised in the western part of the county and the acreage is increasing yearly. Corn seems to be the principal crop with acreage about the same CHICAGO, June 24 .- There was more horse talk than business on 'change today. Prices averaged a little lower, but the closing shows scarcely any change from last night's figures. Wheat opened from he to be lower and then principal crop with acreage about the same as last year and prospects are very good for an abundant yield. Small grain is looking fine. Peas are getting to be quite a crop, being sown broadcast, harvested and thrashed the same as wheat. Corn is being now plowed the second time in most parts; all un and a good stand Broand brian and prices advanced about Mc, but eased off, declining from Mc to Mc, ruled steady, closing he lower for September than the yesterday. There was nothing particularly encouraging received in the way of news ill up and a good stand. Rye and barley are to induce buying, except that reports were rean up and a good stand. Kye and barley are headed out with prospects of a good crop, heads well filled. Collections among farmers are either very good or very poor, among merchants they are very good. Trade has been tolerable. Merchants feel quite con-fident and the outlook is encouraging. Mort-rage inductadeas is being decreased a mong celved noting damage to the spring wheat. All news generally favored the selling side, but prices are so low that operators do not feel like selling. In corn operators were confined largely to

In corn operators were confined largely to room trading. The market opened with $\frac{1}{3}c$ loss, advanced $\frac{1}{3}c$, and closed with no change. Trade in onts was chiefly in the way of changing from July to September, closing at $\frac{1}{3}c$ decline, $\frac{1}{3}c$ or July. Provisions were at a standistill. Many oper-ators failed to even put in an appearance. Three was no trading in pork, buyers and sellers being apart at a difference of 10c. The market closed 15c for July. Lard and ribs ruled weak on larger receipts of hogs, closing respectively loc and 7 $\frac{1}{3}c$ lower. Estimated receipts for Monday: Wheat, 85 (25,000 head.

iderable chicory is also raised. Collections aave been fair.

Hooker County.

Principal crops corn, wheat and potatoes, his year more corn; wheat about the same also onts and rye, and an increase of pota-toes. Small grain has been affected by dry weather and winds and will not yield over one-half a crop, but corn looks better that but little beyond the necessities.

Howard County.

All kinds of crops are in fine condition. Early winter wheat will be a little short on account of dry weather in May, but corn is in good condition. a large acreage and gener-ally a good stand. Farming has paid in this county in past years and a larger acreage of prairie is being broken than for many years. About one-third of the wheat in this county is winter wheat and the acreage about twice hat of last year. Winter wheat and rye have proved a success. The acreage of corr is about 20 per cent larger than last; all kinds of fruits are abundant; have had no hail in the county and plenty of rain the pas month. Collections are easy and merchants doing a good business. Howard county has no cause to complain in any way.

Jefferson County.

Corn, wheat and oats were the principal crops last year. Wheat and oats will be almost a failure this year. Most of the winter wheat fields have been put into corn and millet, also the majority of the oats. This makes the corn acreage larger than ever before and it is now looking fine, with good prospects for more than an average crop. he average crop of wheat last year was 30 bushels, average price 50 cents; corn, 35 bushels, price 25 cents. Collections have been remarkably good in certain portions, though at present said to be somewhat slose.

Johnson County.

Corn was the principal crop last year, probably 50 per cent of cultivated land bearng the same and wheat about 35 per cent. This year 65 to 70 per cent is in corn, as most of the wheat was plowed up and corn put in its place and, while a little late, it is doing fairly well and present prospects are good. For three or four years last past winter wheat has been an important item of agricultural products and last year the crop was the largest and finest ever raised in this county. For the past two or three weeks county. For the past two or three weeks have had copious rains, vegetation is boom-ing and peaches and small fruits are very promising, but apples will be practically a failure. Prices of live stock, cattle and hogs are encouraging and this part of the state furnishes that kind of produce liberally. The future looks bright, but there is a feelamong business men and farmers that future of financial affairs is uncertain and there is a lack of confidence in the financial policy of the government. However, every indication now is that nature is pro-pared to do her full share in a productive year except in the wheat yield. Collections rather slow; trade about an average for this season of year.

Kearney County.

r Principal crop corn. acreage this year about the same, there being 197,267 acres in cultivation, about 70.000 of which is planted to corn which is looking fine and everything so far is favorable for an abundant yield. Winter wheat will not yield over one-third of a crop. Spring wheat, oats and bariey will fall short of a full crop. Collections and trade fair. trade fair.

Keith County.

Small grains are improved wonderfully in the last week or two. The ground is well soaked, corn is growing well and will make a good stand. Winter grain suffered from drouth. Potatoes never looked better. There is about the same acreage of wheat and rye and one-third more corn.

Keya Paha County.

Wheat and corn are the principal crops, the acceage of wheat is somewhat less and corn a little increased. Prospects are good for at least an average yield.

Kimball County.

Unless rain comes crops will be a failure in

Corn, wheat, oats and rye are the princi-pal crops. Acreage of corn is about one-third greater than last year. Acreage of winter wheat is increased and it looks fine, and there is a prospect of a bountful yield. The late warm weather is bringing corn on in good shape and prospects are very good. Collections rather slow, but prospects good after harvest.

Nemaha County. Wheat crops will be light this year in regard

to acceage on account of it being winter killed. The yield will be light on account of the stand on the ground being thin, but the quality will be good. Corn is always the principal crop in this county and the acreage is somewhat larger than last year. Corn is about two weeks later than last year, but nothing but a protracted drouth will prevent a large crop. Oats, barley and rye are good, but excepting oats acreage in those is small. Fruit crops small but good. There will be a large crop of apples, small crop of peaches, vegetables good. Crops this year will doubtless compare favorably with other years. Never had a complete failure. Collections are slow, but in amount not large. However, the farmers are all able to meet their obligations and prospects for the merchants are good. There is still a large amount of corn and wheat held by the farmers for better prices.

Nuckolls County.

Corn has always been the principal crop of this county, although there was a very or this county, although there was a very large acreage of wheat last year. This year the acreage of wheat is much less and corn greater. Many wheat fields are plowed under by reason of drouths prevailing during the early spring. What is left will make half a crop, from ten to fifteen bushels per acre. Oats will not make more than one-third of a crop. Corn is in better condition and more advanced than last year, although isted corn was badly washed out and had to be replanted, however, it is looking well and acreage large. Recent rains have materially close and collections slow. Merchants not much business but carrying the farmers for about all their capital will permit.

Otoe County.

Principal crop last year was corn. Quite a large acreage of winter wheat was sown last year, but much of it winter killed and probably one-third of ground plowed up and planted to corn, which increases the acreage of corn over last year. Fall wheat will be one-third of a crop or less. Corn is a good stand and prospects good-never better. Merchants are having a fair trade, but complain some of collections; farmers are in good circumstances generally and money comparatively easy, there being little demand and banks have no trouble in supply-ing it, claiming to have double in sight compared with a year ago.

l'awnee County.

Corn and wheat was the principal cron last year. There is much less wheat this year, and of that which is in there will The corn prospect was never better and the stand in fields is hitle above the average, making a fine prospect for an abundant crop. The rains have been sufficient to keep corn in fine growing condition. There was a par-tial failure of wheat sown early in the fail. caused principally by too warm weather in the winter, followed by cold dry periods. The oat crop is a little greater in acreage and there is a better outlook for a finer crop. Collections are fair to good and farmers are making many improvements. Mer-chants are beginning to feel easy on outstanding accounts and trade is good, es-pecially in implements. Pastures not over-taxed are furnishing abundant pasturage and all stock is in good order. Money is easier to obtain and the general confidence

felt seems to assure an excellent trade for the coming fall.

Perkins County.

Wheat and corn was the principal farm crop in '92. The same are the predominating crops this season. Fall wheat and rye are more extensively grown. The acreage this year is about 20 percent greater. Fall grain will make a fair crop without further rains. though it is very short. All other crops are in fair condition, though late. Collections are fairly good; trade nominal. The banks are not loaning any at the present, and this cripples business for the time.

Pheips County. The principal crop last year was corn,

fall did not start and was mostly plowed under and planted to corn. Farmers have broken all the wild land and commenced to sow timothy and clover. Prospects were never better than at this time. Collections are slow, merchants complain of trade and small profits. Farmers have all made money the past few years.

Sarpy County.

Saunders County.

Crop prospect was never better at this time of year than now. Grasses are in the very finest condition, and corn is excellent and well forward for the time. The princi-pal crop is corn, with a fair acreage of wheat, rye, oats and some flax, hemp and barley. Wheat is not so promising, as it did not do well during the winter. All other crops, as to proportion and variety, are the same as last year. In some portions corn had to be replanted, and some fields o small grain were plowed under and planted to corn. Trade is good for this time of year, but collections are slow; generally speaking, slower than usual.

Scotts Bluff County.

The principal crop last year was wheat and oats, with some corn. The acreage this year above irrigation is not nearly as large, and, owing to the protracted dry weather will probably be a failure. Under irrigation the acreage is about the same, and prospects are good for an average crop. Trade is fair and collections good. Seward County.

Principal crops corn, oats, rye and wheat. The acreage of corn, oats and rye about the same, wheat 10 per cent greater. Corn never looked better at this time of the year. prospects of winter wheat not quite as good, spring wheat and oats somewhat better, although oats is a little backward. Grasses look promising. The soaking rains have done much to overcome the threatened iniury to all kinds of crops. Fruits of all kinds promise well and vegetables are good. Collections slow. Banks have an abundance of money and are seeing borrowers at from 7 to 8 per cent interest. Trade fair. Farm lands enhanced in value at from \$5 to \$5 per acre in the last twelve months. Upon the whôle this country was never more prosperous than it is today.

Sheridan County.

Wheat was the principal crop of 1892. Larger acreage of all crops this year, but not more diversified, and crops are excellent. Collections and trade slow; money very scarce; merchants refusing farmers credit;

prospects good for improvement. Sherman County.

Principal crops, wheat, corn, oats and rye, acreage remains the same and prospects for all kinds of grain better. Trade and collec-tions fair; farmers jubilant over crop prospects. Sloux County.

Principal crop wheat and oats, acreage in-creased probably one-third. Thus far crops have done very well, though rather back-ward. Some complaints of dry weather are beginning to be heard. Collections are as good as could be expected and trade, if anyhing, better. This is more of a stock than a farming country, and prices of cattle, etc. effect more than the amount of grain raised. Stanton County.

The principal crop is corn, of which there

will be an increased acreage over last year. The stand is perfect, looking fine and the prospect could not be better. Of wheat and outs there will be a decreased acreage. Winter wheat, except on new rands, was plowed up and planted to corn. This county has never had a failure. Have had plenty of rain since early spring; collections are easy and trade brisk and trade brisk.

Theyer County.

Theyer County. Wheat and corn was the principal crop last year. There are probably one-third more acres of corn and one-third less of-wheat this year as compared with last. Fx-pect about one-half crop of wheat; three-fourths of oats and a full crop of corn and potatoes. Many acres of millet are being raised. Collections are fair. Farmers were never better pleased for a dry year and can stand it without effort. Value of land has not depreciated; future outlook good. not depreciated; future outlook good.

Thomas County.

Principal crop last year was corn, the acreage this year being about the same. Prospects are good now, but somewhat late.

DANGEROUS WAVES.

Huge Combers Encountered on Atlantic.

The daily papers recorded the facts that the steamship Majestic, on a recent eastern trip, caught a sea that demolished her crow's nest lookout, and that the Teutonic, which caught the same gale coming west, had one sea which combed over the crow's nest and carried away her forward port lifeboat as it went over the rail. But none of the daily papers took the trouble to mention just how the crow's nest on these ships s situated, and consequently how high

that sea was. Inquiry by a Marine Journal representative discovered Journal representative discovered that while in men-of-war and many other ships the cus-tom is to have the crow's nest in the foretop or a trifle above, the White Star ships have it at an altitude of twentyfive feet above the main deck on the

foremast, reached by an iron ladder from the forward hurricane deck. In such a ship as the Majestic or Teutonic the height of the main deck at the forerigging is about forty feet above the level of the sea, which would make the height of the wave that carried away the crow's nest in this instance about about seventy feet. This is a pretty big roller for the north Atlantic, but in other parts of the ocean such waves are often encountered in a storm. Supposing the ship to have been in the trough of the sea at the time this wave swept her, the mean height of the wave might be calculated at not greater than forty feet, but it was certainly a body of water nearly seventy feet high from

where the ship floated.

Busy people have no time, and sensible people have no incilnation to use pills that make them sick a day for every dose they take. They have learned that the use of take. They have learned that the use of De Witt's Little Early Risers does not in-terfore with their health by causing nausea pain or griping. These little pills are per, fect in action and resulte, regulating the stomach and bowels so that headaches, disziness and lassifiide are prevented. They cleanse the blood, clear the complexion and one up the system. Lots of health is these bittleforms littlefellows,

She Fooled the Conductor.

New York Herald: "You can't bring that dog on this car with you," said a conductor of the Eighth avenue line the other afternoon to a middle-aged woman. "And why, pray? I suppose I can't bring him on the car Decause I'm not young and pretty. But I'll fool you." With this remark the woman, sputtering with anger, fastened the dog's chain to the

rear platform of the car and then went in-The dog trotted along behind the car, the

conductor looked bored and the woman was supremely happy.

There are three things worth saving-Time, Trouble and money- and De Witt's Little Early Risers will save them for you. These little pills will save you time, as they act promptly. They will save you trouble as they cause no pain. They will save you money as they economize doctor's bills.

up firm. Cow stuff was scarce, the offerings being Cow stuff was scarce, the offerings being largely in small bunches. The market was quotably steady. Common to funcy stock sold at from \$1.50 to \$4, the bulk of the fair to good cows and heifers solling at from \$2.50 to \$3.50. The market was active and firm on yeal calves, common to choice yeals selling at from \$3 to \$5. Good to choice yeals selling at from \$3 to \$5. Good to choice bulk and stags were firmer at from \$3 to \$3.70, common rough stock easier at from \$2 to \$2.75. There was hardly snything going on in the stocker and feeder line. Fresh receipts were light, but regular dealers all have a liberal supply on hand which they are anxious to dis-pose of even at present very low quotations. There was no country demand, however, and the trade was flat with prices mominally un-changed.

There was no considered and non-store and the trade was flat with prices nonlinally un-changed. Hoas-During the early part of the week, with heavy receipts, prices continued on the down grade, dropping about 10c a day on an average. Mlacty-five per cent of the hoss this week have sold at under the \$6 mark, and prices are now but 75c higher than a year ago. Four months ago the difference between '92 and '93 prices was nearly \$4. Receipts for the week show an increase of 16,500 compared with the week provious, and are nearly 1,000 heavier than for the same week a year ago. So far this month com-pared with June. 1892, there is a short-age of about 50,000 head. Prevailing low prices and fiberal offerings have brought buyers from far and mar, and the shipping demand was never better than at present for good hogs of all weights. The result has been active markets and the past day or two, stronger prices. The trade today was lively from the

active markets and the past day or two, stronger prices. The trade today was lively from the start. Early prices were a shade bet-ter than Friday and the market firm-ing up closed fully be higher on all grades. All classes of buyers were want-ing liberal supplies and before 1 o'clock nearly everything was out of first hands. Shippers took over 5,600 hogs, or nearly 60 per cent of the entire receipts, the hogs going to New York, New Haven, Detroit, Chicaso, Cedar Rapids, Marshalltown and Nebraska City. The demand being good for all classes of hogs and the quality is usual of late markedly
