# WANT TO RESUME.

Two Months Time for Reorganization. An earnest effort is being made by a large number of the creditors and stockholders of the American National bank to get the affairs of the institution in shape to resume business on the first of September. Telegrams to this effect have been forwarded to the comptroller at Washington, and in all probability a delegation of influential shareholders will visit the capital city soon to lay the whole situation before Comptroller Eckels. The comptroller has expressed himself as being desirous of seeing the bank again placed on its feet, of seeing the bank again placed on its feet, yet he has not consented to give the men at the helm until September 1 to make a suitable showing unless they can give him posttive assurance that the bank will be in proper shape to resume at that time.

One of the officers of the American National said yesterday morning to a reporter that while he could not say that the comproller had given them any definite encouragement in the undertaking to resume on September 1, yet the situation was indeed very satisfactory and he hoped for a satison September 1, yet the situation was indeed very satisfactory and he hoped for a satisfactory adjustment of the matter within a short time. He believed that the gentlemen who intend to visit Washington in the interest of the bank would succeed in convincing the comptroller that the bank could resume with safety on September 1. resume with safety on September 1.

Miners Wild Over a Wonderfully Rich Discovery at Tilford, Colo.

GOLD QUARTZ ONE-FOURTH PURE GOLD

Prospecting in the Pitkin Gold Belt-Alma Placer Mines Forest Fires Balirond Projects Jots of General Interest.

The miners at Tilford, Colo., are wild ever the discovery of gold quartz yielding 3,950 ounces of gold to the ton. The report is undoubtedly authentic, and prospectors are overrunning the country, taking up claims. The discovery was made by two old prosectors about five miles out of town, and has been kept quiet for some days. Many of the men who are now looking for claims are miners who have been thrown out of employment by the recent suspension of silver mine operations.

Great Prospecting Field.

Pitkin's gold belt centinues to forge to the

front with rapid strides, says the Pitkin

Miner. During early days this famous section was the sole attraction of mining men to the Quartz creek district, and for several years it was alive with operating companies. The sole grawback, however, was the inability to secure a process to save the gold. ability to secure a process to save the gold. Thus the extreme excitement died away until recent years, when wonderful inventions of the gold saving process was discovered. This caused a revival of mining in that section, which, has continued with renewed vigor. Tests have been made on the gold belt ores with startling results. In six months it will be the scene of a veritable excitement. The immensity of the exposed gold ore bodies in the different properties of that section has no equal in the state of Colorado. It is surprising to state of Colorado. It is surprising to note that such a valuable gold territory is not operated more than it is, but this is accountable, for the lime belt has been the course of Pitkin's attraction of recent 500 years. The mining world should carefully watch the progress of development in this famous gold belt, as surprising results will

That human expectations are seldom That human expectations are seldom realized has become a proverb, but when Charles Wahl, of Tin Cup, and William Alkire of Denver took a bond on the Gilt Edge, on Forrest hill they took a contract to disprove the old saying. Float running hundreds of dollars in gold had inspired them to effort and the work of tracing it was rewarded this week by striking the vein. This consists of a true fissure in the porphyry, four feet between walls, with two feet of mineral, which will average over \$100 in gold. The float extends over a large territory and it is proble that ere many days territory and it is proble that ere many days it will be covered with prospectors. The gold belt, which extends from Pitkin to the head of Taylor river, is the rienest in the

Yellow Metal Worth \$50,000,000.

A gold prospector and miner who lives in A gold prospector and miner who lives in Denver, but who, for business reasons, will not permit at this time the use of his name, has made a valuable discovery on some new placer ground located near Alma, Park county. With the assistance of one man, part of the time, this miner has taken out over \$1,000 in gold in nine weeks. He proover \$1,000 in gold in nine weeks. He proposes now to put in sluice boxes and to work the territory in a systematic manner.

The ground is easily reached from the South Park branch of the Union Pacific; is

well supplied with water and convenient to market, so that supplies will not be expensive. English engineers who examined territory at different times within the past five years estimate that the placer grounds between Montgomery and Fairplay contain over \$50,000,000 of the yellow metal. The working of the new placer will have the effect of starting up others in the vi-

cinity.
Hill and his partners of Fairplay, who have been working between Fairplay, who have been working between Fairplay and Alma the past two weeks, have cleaned up in excess of \$3 per day to the man, For lack of appliances, which they are now putting in, they did not work full time.

This is the year for gold placers. Flerce Forest Fires.

Three mountain fires, the smoke of each of which can be seen from Laramie, Wyo., have been raging several days. One is at the head of the Big Laramie, the second is on Fox creek and the third in the Centennial.

The most serious fire, so far as information goes, is that on Fox creek.

goes, is that on Fox creek. It has burned over hundreds of acres and has destroyed an immense amount of fine timber. The fire is supposed to have been started in Bear Gulch by a couple of men who had been camping out and neglected to put out their fire com pletely upon leaving. The high wind soon took the flames to the tall timber and they

have been raging ever since.

A quarter of a mile of corduroy road in the gulch has been burned out as well as all the bridges on the road between Laramie and North park. The stage is now compelled to travel by way of Boswell's ranch, going a distance of at least ten miles out of its usual

The stage driver said that the fire was so near on his trip to the park that it almost scorched him, and was "running like a race horse." A great deal of fine game was seen, particularly elk and deer, the fire having driven them from the timber.

Transcontinental Line. Advises from Coffs, on the Atlant'c & Pacific, state that contractors who are lay-Ing track for the Neveda Southern from that point to Good Springs are rushing matters. The road is now running within five miles of Vandarbilt.

Vanderbilt.

The latest and most important information concerning the new road is that a contract for building fifty-one miles between Vanderbilt and Good Springs will be let on the 20th inst. This indicates that the line is not to be a branch of the Santa Fe system, but an inedependent transcontinental line, connecting Denver with [southern California by way of San Bernardino. Some hold the opinion, however, that the road is to con-nect at Clover Valley junction, south of Pioche. Nev., to which point a road from Sait Lake now runs. The gap is less than 150 miles, and the grade is easy to construct. Promising Copper Field.

The recent find of copper deposits four miles from McCammon, Idaho, is beginning intes from McCammon, idano, is beginning to create a ripple of excitement, but nothing like what its importance would seem to deserve. An assay of the ore has been made, showing this report—25 per cent copper, seven ounces aliver with traces of gold. Were such a discovery made in Colorado another Creede mining boom would immediately follow, but in Idaho, for some unaccountable roason, the discovery of any kind countable roason, the discovery of any kind of rich mineral deposits creates but little interest, excitement or discussion. The ore from the McCammon field has not a single refractory element in it and the arrest refractory element in it and the amount of silver it carries would pay all the expenses of mining, refining and marketing. The fol-lowing named Pocatello citizens have located claims. Supertendent Caivin, George Robe-than, Thomas Ball, O. Malvany, Ed Clayton and William Barnhart. These gentlemen will continue development operation for a few weeks, and should the find increase in richness, as is confidently expected, they will put in a working plant that will be a credit to southern Idaho. The McCammon copper field promises to startle the outside world with genuine merit.

Rich Strike in Oregon.

Rich Strike in Oregon.

Fresh fuel was added to the gold ferer in southern, Oregon recently by a rich strike made by the Doney brothers. They were prospecting on an old placer field in the Aulthouse district in Josephine county, when they discovered a rich pocket from which they took one nugget weighing twenty-one ounces (\$365). Other smaller nuggets and a large amount of coarse gold dust were also taken out. The formation upon which the lucky prospectors have staked their claims is a rich placer bed containing many large chunks of paying quartz. By digging a shallow ditch a few hundred feet in length a steady flow of 1,000 miner's inches of water can be obtained. The strangest part of the find is that it is in the center of a placer bed that was famous for its release. digging a shallow ditch a few hundred feet in length a steady flow of 1,000 miner's inches of water can be obtained. The strangest part of the find is that it is in the center of a placer bed that was famous for its richness thirty years ago. It was worked for many years and it is estimated that \$1,500,000 worth of gold dust was taken from it. The present owners will form a stock company at once and proceed to work their property for all it will yield. Dr. J. M. Taylor, a well known mining man of southern in the standard of the escaped unburt, but a few inches more would have made mincement of him.

BUDGET OF WESTERN NEWS | Oregon, vouches for the above statements, and asserts that it is the richest find made | SCHEMES OF SILVER MEN in that section for some time.

Washington. Anneortes is now shipping Bering sea codfish to Boston. At Mill Plain, near Vancouver, the weight of the prunes on a +year-old tree broke it down. On the broken branch were 8,887

The Hopgrowers association of Yakima are pursled to know how to secure 8,000 pickers for this year, where 2,000 have heretofore been required.

The measuring worm is playing havour in the great forests of fir. spruce and Alaska pine on the Hoquiam river. In some places there is not a living tree left. The old town, Yakima City, is assuming new life. It has lately secured the building of a woolen mill by raising a bonus of \$5,000. A depot, that has long been deferred, is now in course of construction.

The Fourth was celebrated at Lapwai by a gathering of 2,000 Indians and 1,000 whites The Indians came from different reservations and participated in war parades, dances, etc. Chief Joseph was on a visit to his people and was the here of the day. was the hero of the day. Two sea otters, dead, but with fur in fine

condition, came ashore on the beach between North Cove and Westport last week. The stage driver secured one and a member of the life saving crew the other. The skins are worth \$100 or more apiece. Dudley Tribble, who is known all over the Palouse country, has struck a rich gold mine. The ledge is about eighteen miles east of Farmington and assays \$1,500 to the ton. Mr. Tribble and his partner have already been offered \$300,000 for their claim, but have refused.

have refused.

The preliminery survey for Seattle's cutoff for the Great Northern has been completed. According to the engineer's report,
a grade of thirty feet to the mile can be secured over the hill from Snohomish valley
to Lake Washington. The preliminary line
leaves the main line at Monroe, runs thence
down the Snohomish river, crosses the Snohomish near the forks and parallels the
Lake Shore road from a point near Redmond.

A pet canary bird in Fairbaven has always had an aversion to his natural dress, and has industriously pulled out every feather he could reach. The result is that he has now a smooth, shiny skin, which looks like polished parchment, two or three lonely tail feathers and a trifle of plumage on the head and neck. In summer he is all right, but the cold of winter bothers him. As soon as frost comes he is clad in a warm figured frost comes he is clad in a warm fiannel jacket, which he admires immensely. At night he lies down on a bed of cotton batting, submits quietly to be covered up and sleeps there contentedly till morning.

Colorado. Colorado gold properties continue to pay dividends. The Little Lalla, Yankee Hill district, has

free milling gold ore worth \$90 per ton. Some of the mines in the Ouray district will resume operations and store the ore, Ore yielding fifty-three ounces in gold per

ton has been discovered in the Buena mine,
Boulder county.

Cook's circus played in Leadville to about
300 people. The proprietor is clear on the
silver question. The Western Glass company of Colorado Springs will incorporate with a capital stock of \$250,000 in a few days.

The limestone shipments at Morrison have decreased from eighteen to five cars a day, on account of the reduced amount of smelt-The Mabel Mining and Milling company

has been incorporated with a capital stock of \$500,000 to operate in El Paso and Fremont counties. The railways of Colorado have been as sessed about \$2,000,000 more than they were last year, while in Kansas they have been assessed \$9,000,000 more than last year.

According to the report of the director of the mint, Colorado produces 26.5 per cent of the gold and silver produced in the United States and 11.9 per cent of the gold and silver product of the world.

A batch of 20,000 brook trout was shipped from the Denver hatchery for distribution in the waters of Eagle river. Nearly the same number was sent to Twin lakes. The Den-ver hatchery has about 100,000 trout remain-The big Seven Rivers reservoir, now near-Suppose by some superhuman power this amount of water could be frozen into separate cubic feet of ice, and if it was possible to place these blocks end to end

one direction around the earth, they would reach nearly forty-five and one-ha'f times around, or more exactly, 1,136,364 miles. Dan Soward has a very peculiar specimen, found on one of their claims—the Jambo. It is a round, flat piece of brownish rock about the size of an ordinary dinner pail and about two inches thick, through the middle of which is a layer of brilliant amethyst quartz and crystals. In the center of the flat part is a regular handle as perfect as though chiseled out with instruments. Were it not for the streak of amethyst quartz running through it would readily be mistaken for some Indian or Artice relic

some Indian or Aztec relic. Oregon, There is a good crop of pears and apples, and taken all round, it is not a bad year for fruit in Oregon.

Coyotes have killed nearly all the lambs in the vicinity of Kelloggs, Douglas county, and stockmen have been forced to take their sheep off the ranges. sheep off the ranges. The First National bank of Baker City has received from John France 160 cances, or \$2,560, the cleanup of Mr. France's placer claims near Malheur City or Eldorado.

Jesse Steiwer of Jefferson lost a dozen head of extra Jersey dairy cows. Some old white lead cans, which had been lying about for several years, were thrown out where the cattle had access to them, and it is believed they were poisoned from licking the

A boy in Polk county found a nest of that most beautiful of domesticated American birds, the golden-winged woodpecker, or "flicker," in an old apple tree. He has taken out an egg every day for thirty-six days, the bird faithfully laying a new one each time the nest is robbed.

Some of the prominent prune growers of the country had been doubtful about the prune crop for some time, but an examina-tion of the orchards now shows the trees well laden and the prospects are much better. It is estimated that there will be three-fourths of a crop, which will make a large yield of

John Aborn of Oswego set fire to some old rubbish in which there happened to be a number of cartridges filled with fine bird shot. He soon was made aware of the fact and received in all parts of the body over 130 grains of shot. A doctor succeeded in finding about thirty of the shot, but the remaining 190 are buried too deeply in various parts of his anatomy. of his anatomy. There was weighed at Dufur last week by Mr. Haines, sr. of Nansene a span of colts that are hard to beat in any country. One,

that are hard to beat in any country. One, a Belfounder filly, 2 years old, weighing 1,160, and the other, a three-fourths bred English draft colt, 13 months old, sired by "Sprotsboro Dandy," owned by R. Sigman, weighing 1,130, measuring six feet five inches around the heart and nearly sixteen hands high the heart and nearly sixteen hands high. The Dakotas. There is still considerable snow on the

Champions of Free Coinage Are Now Forming Their Coming Campaign.

THEY HAVE A VARIED LOT OF THEM

When Congress Convenes the White Metal Advocates Will Try to Get Together and Agree on Some Concession from the Other Side.

Washington, July 11.—Treasury officials are speculating on the probable character of the concession which the free sliver men will demand for the withdrawal of their opposition to the repeal of the Sherman law. They have noticed with considerable amusement that every prominent free silver man who has expressed his views on the subject declares that the free silver forces will not permit the repeal of the Sher-man law until they have secured legis-lation of a favorable nature. But no one of the free silver men has yet stated clearly just what concession will be acceptable. A review of the probable concessions demanded shows that they range from an out-and-out free coinage bill to the coinage of the silver bullion now in the treasury. The idea that a free coinage bill can pass is absurd. The coinage of the bullion in the treasury will, it is believed by some officials, be

the concession agreed upon.

There are 128,000,000 ounces of silver bullion now in the treasury. This cost the government a little over \$117,000,-000. If coined it would amount, by reason of siegnorage, to about \$166,000, 000, thus increasing the circulating medium about \$49,000,000. It is the fact of the increase of the circulating medium that leads to the belief that a sufficient number of the conservative silver men will come into the administration ranks to secure the passage of the repeal. To coin this amount of bullion would require about five years.

Among the other concessions proposed is one suggested by Representative Outhwaite of Ohio, who believes that the most satisfactory solution would be the passage of the bill providing for the coinage of \$100,000,000 in subsidiary coin. This proposition, it is claimed by its advocates, would meet with great favor among the farmers and the workngmen in the south and west, where the free silver sentiment is strong. Moreover, it would have the advantage of being an exceedingly good financial speculation on the part of the government to work up some of its vast store of pig silver into half dollars, quarters and dimes.

Another proposition is that of Senator Vest of Missouri, who has announced that he will introduce a bill providing for the free coinage of silver at the ratio of twenty to one. The present ratio is sixteen to one, and when Senator Vest made this arnouncement he calculated that the increase proposed would make the value of the silver dollar equal to that of gold. Since then, however, the price of silver has so much depreciated as to make it necessary to increase the ratio twenty-eight and seven-tenths to one in order to make the silver coin equal the gold. This would go far toward making the silver dollar a de-

cidedly unwieldy coin to carry around. It is believed that there will be a great many bills introduced immediately gress is ready for business by individuals who will imagine that they have discovered the panacea for the present finan-cial ills. Should this be so, a caucus of the free silver men will be called and an ing completion, will hold 6,000,000 cubic feet | effort made to determine on some single bill upon which they can exert their

strength. Balloon tonight and tomorrow night.

### NEW BRIDGE.

Trains Will Be Crossing at East Omaha in Two Months. Nothwithstanding the financial stress which obtains throughout the country the

Omaha Bridge & Terminal company goes serenely along completing the structure across the Big Muddy at East Omaha. The iron work on the pivotal pier is being put up and by the middle of September it is thought by President Potter, trains will be running over the new bridge. A letter was received yesterday morning by

President Potter stating that two switching engines, Nos. 1 and 2, had been shipped via the Eric Despatch from an eastern locomotive works on July 3, and would arrive in Omaha within a day or two in charge of a machinist who would put them in active service. In the meantime an expert is arranging plans for the yards of the Terminal company and after their completion, which will be within a fortnight, another submission to

the eastern capitalists interested in the enterprise, bids will be invited for grading the yards and putting them in shape for the tracks.

Mr. Potter, intalking of this matter to a
BEs reporter said: "It is very imperative that
we have good terminal facilities and therefor we are making haste slowly. One of the best yard experts in the country has inves-tigated our grounds on several occasions and is about ready to submit his plans for ap-proval. But as there should be no mistakes proval. But as there should be no mistakes made in this matter we will submit the perfected plans to our eastern representatives to pass upon before bids are asked for. I think it will be about a month yet before we are in a position to ask for bids to grade and shape the yards. This, however, will be in ample time, as I believe we will not get trains over the bridge before September 15, and maybe a September 15, and maybe a little later. After the bridge is completed we have two approaches to build on the east and west side, but the fill is not over ten feet at any point so that we are really in good shape today. Our tracks are laid along the leveo on the Coun-cil Bluffs side touching all the Iowa lines

# and 100 feet or more will only have to be laid to connect up the whole system."

NO FUNDS FOR SEWERS Officials Decide that Money Cannot Be Transferred from Other Funds.
The conference yesterday forenoon between the city officials and the sewer contractors was attended by City Attorney Connell, Treas urer Bolln, Comptroller Olsen and Council-

man Wheeler for the city, and Contractors

C. V. Gallagher, John F. Dailey, J. L. Black,

Samuel Katz. George Tilison and Attorney John D. Howe, the latter representing Mc-Donald & Penfield. The meeting was for the purpose outlined in The Bee, and terminated with the result that no funds can be provided other than those derived from the sale of the bonds. The contractors urged that the officials take

The contractors arged that the officials take steps to provide funds until the bonds are disposed of.

Dr. Connell gave it as his opinion that money from other funds could not be diverted for the purpose of investing in warrants that might be issued against the sewer fund, to be taken up when the bonds are sold. After discussing the matter pretty thoroughly the conference was brought to a close with the understanding that if the contractors are able to negotiate the bonds contractors are able to negotiate the bonds with the banks the council will make them of the 5 per cent issue and the contractors can take them and proceed with the With the work under way there will indebtedness of \$28,000, with but \$19,000 in the sewer fund to meet it. In case the con-tractors are unable to negotiate the bonds

tractors are unable to negotiate the bonds and accept them in payment for the work, they will be called off, and the contracts will not be carried out until the bonds are sold. Mr. Connell, Mr. Cornish, Mr. Bolla and nearly all of the gentlemen present expressed the belief that there will be picuty of takers for bonds after the first of September and that Omaha's issue can be floated at a good premium.
