COMMERCIAL AND FINANCIAL

Cash Price of Wheat Advanced Three Cents Per Bushel.

PROVISIONS WERE RATHER DEPRESSED

Reports of Showers Throughout the West Caused Corn to Be Sold Eafly, but an Advance Was Scored

at the Close, CHICAGO, Aug. 11.-The best wheat market in months developed today. The cash price

is up to Scabu. For the special option there was an advance of 214c and the closing was steady within 16c of the opening figures. The low estimates of crop, light receipts and better financial outlook were the main reasons. Corn broke on the rains over the west, but later scored a net gain of lec. Provisions were depressed by large receipts of hogs, leaving off 20c down for pork and 1234c for lard and ribs.

Wheat at the opening was about %c higher than yesterday's closing, reacted from %e to %c, advanced 1%c, eased off 14c, held steady and then advanced Mc again and the closing was about 2%c higher for September and 214c higher for December than the closing figures of yesterday. The government report was "bullish" and English cables higher. Continental cables showed an advance all around and there was a gradual and increasing confidence. New York exchange at from 5c to 10c discount was a prime factor in the market, as show-ing the tendency of the financial situation. There was more disposition to buy for in-

vestment and covering of shorts. Cash wheat was also in better demand and a little more business was transacted for export, the fact that exchange is much more salable helping this branch of the There were rumors of possible frost in the northwest.

There was a good deal of corn sold at the start on the showers reported throughout the Mississippi valley and westward and were said to be extending eastward with in-dications of becoming general through the central states. Opening general through the central states. Opening trades were all from 14c to 14c lower and after selling down 14c more rallied 14c on good buying by parties who construed the government report as "quite bullish," changed some, ruled steady and closed with a trifle gain.

Trade in oats was liberal and a stronger feeling, due chiefly to the advance in wheat and also to the government crop report re-ducing the condition over 10 points last month. The market opened unsettled and prices advanced from %c to %c, but yielded %c, rallied and closed steady with a net

gain of from %c to 3/c.

There were 18,000 hogs at the yards, 8,000 over yesterday's estimates. The provision market started weak, and aithough it received some support at the lower prices which prevailed, the tendency was easier. Lard was the article principally offered. The Anglo-American was the chief seller, and Hatleys the buyers. The Chicago Pack-ing company was a seller of ribs.

The demand for vessel room was slow and rates unchanged at \$4c for wheat and 1c for corn to Buffalo and 254c for corn to Kingston. The inquiry for rates on hay for export has fallen off and freight brokers say that there is nothing doing. Estimated receipts for tomorrow: Wheat,

140 cars; corn, 230 cars; oats, 157 cars; hoes 10 000 head The leading futures ranged as follows:

EGGS-The market is practically steady and there is not nuch life to the trade. The receipts are not large, but they are sufficient to supply the trade. The bulk of the sales are reported at 104@11c.

Live Poultany-The receipts for a few days back have not been so large and the market has been well cleaned up most of the time. Prices have not advanced but stocks move more readily than they did and the market is upon the whole, in a more satisfactory condition. Some choice young ducks were received and brought 10c; choice old hens, 74@5 Sc; old roosters, 4@5c; spring chickens, 10@11c.

Downward These is your little delay in pate.

POTATOES—There is very little doing in potatoes and very few find their way into the hands of the commission men at the present time. The local growers do not appear to be bringing in as many as they were, but still there are enough to supply the local retail trade. On orders from the country they are worth at least 65% 70c.

trade. On orders from the country they are worth at least 65,270c.

CALLFORNIA FRUITS—A good many cling stone peaches are coming from California at this season and there is also a good supply of early Crawfords. Early Crawford peaches, per box, \$1,25%,1.35; Bartlett pears, per box, \$2,10,22,25; plums, per box, \$1,50%,2.00; nectarines, per box, \$1,50.

GRAPES—So far this season there have not been very many grapes in from California. A car of Southern Illinois grapes has been received from the section of the country where it is said the crop is very short. California, per case, \$2; Illinois, per 9-lb basket, 40,550c.

MELONS—The supply of watermelons is larger than it was a few days ago, but still there are not enough to reduce prices very much. Good watermelons are selling all the way from \$18 to \$25 per 100. Jem cantaloupes, baskets, \$1.50; short crates, \$1.50\(\pi\)1.75; long crates, \$2.00\(\pi\)2.25.

BERRIES—There are still a few blackberries

crates, \$2.00@2.25.

Berries—There are still a few blackberries coming and some blueberries. Blackberries per 24-qt case, \$3.00@3.25; blueberries, per 5-qt. case. \$1.

APPLES—No apples to amount to anything are being shipped in, but the supply of home grown stock is liberal. Choice Duchess, per bbl., \$3.00@3.25; common varieties, \$2.00@2.50.

2.50.

CABBAGE—The business in shipping cabbage to the country appears to be about over. Occasional orders are received and filled at 19601 ac.

CELEMY—Stray shipments are arriving and the quality of the stock is pronounced good for this season of the year. Celery, per dozbunches. 35c.

ONIONS—Home grown stock is plenty at 14 62c per 1b, on orders from the country. 62c per lb. on orders from the country. TOMATORS—Illinois stock, per 4-basket crate,

TROFICAL FRUITS. LEMONS—The steady warm weather produces a very fair demand for lemons and all houses are doing a good steady business in them. Messinas, extra fancy, \$6.00\foxup{1}6.50; Messinas, per box, choice to fancy, \$5.00\foxup{2}6.50. ORANGES—There are only a few oranges arriving. Riverside Mediterranean sweets, \$3.75. BANANS—Prices remain about steady. Per RANANS—Prices remain about steady. Bananas—Prices remain about steady. Per bunch, large, \$2.25\(\pi_2.75\); per bunch, small to medium, \$2.00\(\pi_2.25\).

Wool Market. Boston, Aug. 11.—There has been no important change in the wool situation here. The depression is as pronounced as ever and there has been little or nothing doing. There is a general feeling of uncertainty, and both buyers and sellers are very careful in their movements. There is still no confidence and no feeling of security about the fufure. movements. There is still no confidence and no feeling of security about the future. As a rule, the message of the president to congress met with the approval of the wool trade, as far as its summing up of the financial distress and its recommendations for relief are concerned. It was felt that with the repeal of the objectionable clauses of the Sherman silver act there would be some return of confidence and an easier money market, but it is also felt that prospective tariff phanges would be detrimental, and there could be no full recovery of normal business conditions in the country until it was fully known what, if anything, was to be done with the tariff.

A local that be paper says: This latter uncertainty has done about as much as the financial stringency to depress the business situation. Manufacturers do not know which way to move. It would have been well if the president had enlightened them and the country at large as to when he desired that contracts should take me the tariff. try at large as to when he desired that congress should take up the tariff question. There has been some inquiry for No. 1 and medium washed fleeces.

Securities Displayed Unusual Strongth as the Result of Heavy Receipts of Gold. New York. Aug. 11 .- Under the influence of heavy receipts of gold from Europe, advices from London and Paris of further engagements for shipment to this side, the material reductions in the premiums on currency, the drop in sterling exchange and a favorable turn in the rates of domestic exchange in the west, the stock market displayed unusual strength today. At intervals the bears were aggressive and managed to bring about sharp declines in some of the speculative shares, but whenever the pressure was lifted, rallies promptly ensued and in a majornty of instances prices closed above last night's final equotations. The transactions were only 157,452 shares including 39,548 unlisted. The one fact above all others which inspired confidence and contributed most to the strength of the market was the offering of money on time in round amounts for the first time in several weeks. There was a feeling of genuine relief at this new phase of the monetary situation. Speculation

closed strong in tone. The following are the closing quotations on the leading stocks on the New York

OMAHA LIVE STOCK MARKETS. Cattle Trade Still Fairly Active-Hogs

Break Under Heavy Supplies. FRIDAY, Aug. 11. The cattle supply continues within the limited demand and owing to this fact the offerings today sold readily at strong figures, a clearance being effected early in the day. Local houses were the only buyers, there being no speculative inquiry whatever. Handy beef steers weighing from 1,150 to 1,350 lbs. sold at \$4.15 to \$4.40, fair to good 950 to 1,150-lb, steers at \$3.75 to \$4.15 and common grades at \$3.75*down.

Trading in cows, heifers, etc., was not marked by any special change from yesterday's prices. The supply was not large, but there was no disposition among buyers to strengthen values materially, though the receipts changed hands early in the day. Common to choice cows and heifers sold at \$1.25 to \$2.50, calves at \$2 to \$4 and rough stock at \$1.25 to \$2.50, calves at \$2 to \$4 and rough stock at \$1.25 to \$2.50. Light supplies the past few days have caused a firmer demand for desirable feeders and stockers and those offered today sold readily to the trade. Good to choice feeders

WYOMING CATTLE.

head, were far above general expectations, and as the strength in prices the past few days has certainly been due to small sup-plies, the run today caused a set back of anywhere from 15c to 40c according to weights and quality. Heavy packers fared the worst, light and medium weights selling early at from \$4.90 to \$5.10, and at the close mainly at from \$4.70 to \$4.80. Heavy hogs sold 25c lower early, and the market closed from 30c to 40c lower on these, with a score of loads unsold. Sales were largely at from \$4.65 to \$4.75, and extreme range from \$4.55 to \$5.10, against from \$5 to \$5.10 yesterday, and from \$4.75 to \$4.85 a week ago. Representative sales: No. Av. Sh. Pr. Chicago. Aug. 11.—[Special Telegram to This BEE.]—There was a continued good de-mand for cattle, and with a supply of less than 7,000 head of all kinds holders were in a

position to get pretty full prices, but in anticipation of largely increased supplies for next week buyers were believed to confine their purchases to the smallest number consistent with the actual necessities of the trade. As a consequence there was no appearance of activity in that branch of the trade. Between shippers and local buyers the small supply was all bought up, the bulk of it at from \$1.75 to \$2.75 for cows, helfers and bulk, at from \$3.00 to \$4.75 for steers and at from \$1.65 to \$3 for Texas cattle. There was an unusual uneveness in hog values. There were sales that did not go more than 5c lower than yesterday and others that showed a decline of from 15c to 20c. The early market was the weakest, owing to the fact that the first estimates of the receipts made them some 2,000 head greater than subsequent investigation proved them to be. There were about 16,000 head. This is a very moderate run, but it is an increase on the recent average, and anticipating full receipts for Monday buyers were bearishly inclined. All the stuff changed hands and the close was fairly firm. From \$5.25 to \$5.60 bought the bulk of the medium and heavy weights and from \$5.50 to \$5.75 took most of the light. Quite a decided reduction has occurred in the movement of hogs. Packing returns for the week, compared with 200,000 hegs for the week and 205,000 for the corresponding time last year. From March I the total is 4,400,000, against 5,500,000 a year ago.

The last half dozen days have seen compara-

The last half dozen days have seen comparatively little change in the market value of sheep. The smallness of the supply has had a strengthening effect, but no radical advance has followed. Nor is a radical advance looked for in the near future, for there is practically no demand outside of supplying local slaughterers. This week's receipts, although the lightest of the year, were quite equal to the requirements of the trade. The range of quotations is from \$1.50 to \$4 per 100 lbs. Natives sold principally at from \$3 to \$3.75, and from \$2.50 to \$3.25 took the built of the Texans and westerns. The lamb market has preserved a steady tone, closing quiet at from \$3 to \$5.25, according to quality.

Receipts: Cattle, 6,500 head; calves, 500 head; loogs, 16,000 head; sheep, 8,000 head.

The Evening Journal reports:

CATTLE—Receipts, 6,700 head; shipments, 2,300 head; natives steady; Texans 15c higher; westerns strong; best steers, \$4.8002, 5.00; good to choice, \$4.2504, 75; others, \$3.0004, 4.20; Texans, \$2.5003, 40; westerns, \$3.2506, 3.90; cows, \$1.350, 3.25.

Hogs—Receipts, 17,000 head; shipments, 5,000 head; market opened 10015c lower, closed 20030c lower; \$4.8505, 5.25 for mixed and packers, \$5.2505, 35 for shipping and heavy, \$5.2505, 45 for butchers weights and \$5.5505, 500 for light.

SHEEP—Receipts, 8,000 head; shipments, 1,100 head; top natives and lambs strong; others steady; westerns weak; fancy wethers, \$4.2504, 50; mixed natives, \$3.0003, 35; lambs \$3.0005, 75. The last half dozen days have seen compara-

Hogs—Market steady at \$5.50.

NATURE'S LOVE MAKING.

Birds and Insects Must Do Their Prettiest When Courting. The wooing of birds is most refined and graceful. Love tunes their respective pipes, and they seek to captivate their mates by their sweetest notes and

most varied warblings, says the Boston The wood pigeon charms his lady love by a series of aerial evolutions and a curious flapping of his strong wing

feathers, putting his breast and tenderly cooing. At mating time the plurage of male birds is more handsome than at any other period—indeed, some birds assume different colors in the spring. Yellow hammers charm their mates by displaying their tail feathers in the form of a fan; starlings chatter in the sunshine to show the metallic beauty of their breast feathers, and swallows circle and double in graceful flight

before their lady loves. Bright shells, flowers, feathers and grasses are laid by the bower bird at the entrance of his partner's retreat; and tiny humming birds woo most assiduously, showing off their lovely hues and engaging in fierce combat with a possible rival; even bringing nectar from choice flowers for the delectation

of their fairy brides. Hen birds exhibit all the vagaries of their sex and pretend to be indifferent to the exertions of their admirers. Frogs have an original way of love making and as soon as evening shades fall commence to croak loudly to their

mates, sometimes great numbers of them combining in one unmusical chorus. Courting among insects is often a very elaborate affair. A male spider will ap-proach a female and amuse her for some time with his antics. It is said that he twirls around and around, crosses his legs, erects his body and executes a sort of mazy dance to excite her admiration. She is a very vicious lady and not al-ways pleased with his love making; sometimes he finds himself obliged to ward her off, for she has a painful mode of showing her displeasure, and if she entirely disapproves of his attentions will fall upon him and rend him to

pieces. One species of spider is said to have a novel wa/ of making love, the sexes communicating by means of strands of web stretching from one retreat to the other-a sort of telephone, so to speak. Glow worms, according to some naturalists, use their luminaries as love signals. The females of one species seat themselves among the grass, while the males, attracted by the light, dance attendance round them.

Concerning fishes—the sticklebacks

occasionally resort to harsh treatment, attacking the females with open mouths and erected spines. As husbands their behavior is certainly eccentric, for after the female has deposited her eggs within the nest that he has prepared for her her lord and master drives her away and proceeds to hatch them him-

A Japanese Novelty.

In some villages in Japan robbers are tried and convicted by ballot. Whenever a robbery is committed the ruler of the hamlet summons the entire male population and requests them to write on a slip of paper the name of the person they suspect as having committed the crime. The one receiving the largest number of ballots is declared duly 'elected," and is accordingly hanged This system, like all others, has its pe culiar advantages. It insures the punishment of somebody for every robber committed, whereas under the system in vogue in most civilized countries in nine cases out of ten no punishment is in-flicted on anybody for the crime. Of course, they may not "elect" the guilty person, but dispose of some other char-acter equally as bad. There is much in the system to commend it to other na-

AN ELECTRIC LOCOMOTIVE.

Completion of a Thirty-Ton High Speed

Motor.

steam roads has finally become an ac-

complished fact, and in a few days a

thirty-ton high speed motor of this kind

will be exhibited at the World's fair

It was constructed in the Lynn shops of

the General Electric company and will

go out to Chicago in tow of a regular

train. It is built to the standard steam

railroad gauge and its dimensions are

somewhat similar to the steam motors now in use on our elevated roads

161 feet long, 111 feet high and 8 feet 4

The motors are supported on springs

resting upon the frame of the machine,

and the armatures are mounted upon

hollow shafts through which the axles

of the wheels pass, and to which they

are connected by special couplings. The

cab is of sheet iron and is built upon the

frame of the locomotive directly over

the moving pacts. It is symmetrical in

appearance, and it is so curved as to

offer receding surfaces to the atmos-

incandescent lamps. Inside this cab are

the electric air compressors for operat

the controlling switch. Above the frame

of the cab at each end are placed the

tions. The trolley may be, under cer-

while under others the current will be

taken from conductors running parallel

places comparatively near each other

adapted. It will probably first be used

lute rapid transit. The electric locomo

tive is susceptible of a higher speed than

that already obtained by our most mag-

nificent steam locomotives, for while

there is always a limit to steam produc

tion and utilization dependent upon the

structural and operating conditions of

the locomotive, the limit of speed of a

revolving armature is as yet unknown.

The electricity will be taken up by the

electric headlights.

animal, from want of strength in the person throwing, if it falls short of the mark it will come back toward the thrower of its own accord, so remarkable are the properties of that tree."
It is altogether probable that the learned Pliny did not consider the shape of the "staff," and referred its peculiarities to the nature of the wood of which it was made.

END OF A GALLANT LIFE. Sketch of the Late Lieutenant Clarke of

pheric pressure. The windows allow an the Tenth Cavalry. Lieutenant Powhatan H. Clarke of The interior of the cab is finished in the Tenth cavalry was drowned ten hard wood and is lighted by a cluster of days ago in the Little Big Horn river, near the fateful spot where Custer and his command were massacred in 1876. ing the air brakes and the whistie and Lieutenant Clarke, one of the most gallant and distinguished of the young officers of the army, was introduced to the readers of Harper's Weekly three years ago by Frederic Remington, who motors according to prevailing condiwas on terms of intimate friendship with the young cavalryman. tain circumstances, the method adopted. Clarke was also known to the readers of the Weekly by reason of the several valuable articles that he contributed to with the service rails by means of a runit on the German army. He was noted ning wheel or a sliding shoe contact, as in the cavalry as a hard rider, a hard in the case of the intramural railway at fighter, and a most zealous officer. In the fair or the overhead railway at the campaign of 1886 against the Apaches he distinguished himself by his The locomotive is expected to attain a gallantry, and was awarded with the medal of honor. Mr. Remington, in the normal speed of thirty miles an hour. It is primarily intended for elevated work and for light freight traffic and article alluded to, thus speaks of the gallant action which won the medal for Lieutenant Clarke: "He once pulled a passenger service.

The adoption of the electric locomowounded corporal under cover from tive will, of course, be gradual, but for Apache bullets at some little personal risk, since they fired some fifty shots at and where traffic is dense, it is peculiarly him, and replied to some admiring friends concerning it, 'Well, what else could I do?' Of course it is readily seen in elevated railroad service, and in cities like New York, Brooklyn and Chicago that he could do nothing else, although should be hailed with delight, doing most other men would be fertile enough in expedients to devise a way for not doing the thing at all." This was charaway, as it will, with the present evils of noise, coal, smoke, dust, cinders and acteristic of the young soldier, who never missed an opportunity to risk his own flying sparks that attend the motors now This invention is the first practical life and safety in the interst of any ene step toward the adoption of electricity altogether as a means of securing abso-

in danger. Lieutenant Clarke was born in Virginia, but was Louisiana French in his blood. He was graduated from West Point in 1884, well toward the head of his class. He entered the Second cayalry as second lieutenant, and was immediately assigned to duty on the frontier. He remained there until 1886 during which year he won the medal for gallantry. He was then assigned as military attache to the legation in Ber-lin, where he entered a crack Prussian regiment and took a year's service. His soldierly qualities won for him the regard of the German officers with whom he served. His papers about the German army are considered by military men to be very valuable. Mr. Clarke was promoted to be first lieutenant in 1891, and assigned to the Ninth cavalry. As soon, however, as he could arrange it, he was transferred back to his old regiment. He was married about a year ago, and his young wife survives him.

Balloon tonight, Courtland beach. The Boomerang.

The boomerang, the Australian native's weapon of offense and defense referred to in all reference works as an instrument unknown until after the discovery of Australia, was doubtless known before the time of Christ. Pliny the elder, a contemporary of our Savior writes as follows his 'Natural History" respecting an instrument made of the wood of the aquifolia: "If a staff made of this wood, when thrown at an
