Monday's Deluge, Supplemented by Yesterday's Drenching, Stopped Tennis Playing.

MAY START THE MATCHES TOMORROW

If There is Supshine Enough Today the Grounds Can Be Gotten Into Condition-Visiting Players Disappointed at the Postponment.

There was no play in the state tennis tournament yesterday, and as far as present appearances go none will be possible today.

Yesterday morning the courts on Harney street were so soft from Monday's rain that It was at once seen that it would need a hot sun to get them into good condition even by today; but the rain of yesterday afternoon and the dampness that still pervaded the air after the rain stopped makes it next to impossible that the courts will have dried sufficiently for play even by tonight.

The committee is exceedingly disappointed at the turn events have taken, but is determined to make a start just as soon as it becomes practical. Every preparation had been made for yesterday, the players were all on hand, some of them having come from towns in distant parts of the state. It is hoped that all of these will be able to remain in Omaha until the event is concluded. though it is quite likely now that that may not be until the middle of next week.

RACING RESULTS.

Ramapo Wins the Omnibus Stake at Monmouth with Ease.

MONMOUTH PARK, Aug. 15 .- A big crowd saw the Omnibus stake run today. The conditions were all favorable for a good race. The stake was gathered in by Ramapo with amazing ease. The fagged looking chestnut had matters entirely her own way at the finish. Sir Walter got shut out just as vic-tory seemed in his grasp. The gallant little hay made a fine struggle, but was too late.

SATOLIA SAYS MASS.

St. Patrick's Cathedral, New York, Filled to Overflowing on the Occasion.

New York, Aug. 15 .- Pontifical mass was seleprated at 10 o'clock this morning in St. Patrick's cathedral by Archbishop Satolli, the papal representative in this country. In the Catholic church the day was the feast of the Assumption of the Virgin Mary. Above all the presence of the apostolic delegate brought to the cathedral one of the largest crowds ever gathered within it.
After pushing, shoving, elbowing and surg-

ing to and fro in the aisles for half an hour the crowd decided to take possession of the pews. Men and women alike discarded all propriety. Men vaulted into the seats whose oors were locked and pulled their female friends after them.

Archbishop Satolli sat upon the throne at left of the sanctuary. On either side of the papal delegate stood a priest, who waited upon him, removing and replacing his hat at prescribed moments in the mass and handing to him the vessels used in the celebra-tion of the mass and the book from which he intoned.

The mass was elaborate, long and impres sive. The address of Archbishop Corrigan was the event of the morning. His words were listened to with almost breathless

silence by the great throng.

Archbishop Corrigan said that every bishop took a solemn oath to be faithful and obedient to Peter, the apostic, and the Roman church, to the sovereign pontiff of the time being, and to his legitimate successors. then sketched the decrees of the different ecumenical councils which enforced obedi ence by the prelates of the church to the holy see, and said he re-called these fundamental principles of church government so that all might more fully appreciate the honor conferred by the resence of the most reverend representa-ives of the holy father. He commented upon the loyalty of the church in America to the holy see and said it was humiliating that it should be necessary for him to deny the charge that he had been disloyal. He he the attacks which had been made upon him had been inspired by ignorance rather than by malice. He could say, at any rate, with his Divine Master: "Father, forgive them, for they know not what they do.' he extended a welcome to the apostolic delegate. -

CENTRAL LABOR UNION.

New Quarters at City Hall Occupied for the First Time Last Evening.

The members of Central Labor union congregated last night in the large room on the ifth floor of the city hall, which was put at he disposal of that organization by the city ouncil two weeks ago after repeated ef orts by labor representatives to obtain this

The arguments used were that 12,000 workingmen in the city, a large proportion of whom were taxpayers, ought to be accorded what was termed this right, and so the city fathers yielded to the request.

The meeting called for last night appeared o be more for the purpose of making the

members acquainted with the new location and show them the advantages of the new quarters rather than to consider grave ques-ions affecting labor incrests. No speeches were made or work performed beyong the election of several chairmen and secretaries for four or five different commit-

ees. To this end the members of the latter gathered in little groups, and in fifteen min-utes or more the whole matter of baptizing the new hall was consummated.

The committees of the union, as elected about a month ago, consist of the following

ITS REPEAL IS IMPROBABLE

Difficulties in the Way of the Anti-Silver Men Growing Greater.

WHAT MAY BE EXPECTED OF THE SENATE

Chances for the Unconditional Repeal of the Sherman Law Growing Fewer Every Day-Review of the Situation by a Correspondent.

CHICAGO, Aug. 15 .- A Washington special to the Evening News says: "The conviction is growing stronger with congressmen that the efforts to settle the silver question will be futile. The anti-silver men are very nervous about the vote on the provisions of the free coinage of silver at a ratio of 20 to 1. The silver men base their strongest hopes on that amendment. They have no fear of a repeal bill becoming a law without some condition advantageous to silver being at-tached by the senate. It is the expression of old heads today that it will be absolutely impossible for unconditional repeal to go through the senate. The silver men are counting on a very close vote in the house on the 20 to 1 amendment. Without quite venturing the hope that this amendment will carry at once, they express the opinion that if it should fail the popularity of the proposition will be sufficiently demonstrated to lead the senate to accept that as the strongest measure in connection with the repeal bill, and that the silver senators will secure that provision in any bill which may pass that body. If the two houses agree on a bill with a free coinage provision it is be lieved that the president will veto it, so the situation appears to be unfavorable to the accomplishment of anything.

"There is no doubt that as soon as the committee on banking and currency has organized in the house it will get to work at once on some general measure, in which silver will not figure, providing for an increase in the volume of currency to meet all de-mands of trade. They see that there is more chance of accomplishing something in this line than in the line on which they are already working on. But the whole situa-tion is terribly mixed, and the wisest do not yet see their way clear.'

SILVER MEN TO ASSEMBLE.

President Fisk of the Bimetallie League Issues a Lengthy Call. DENVER, Aug. 15 .- The executive commit-

mittee of the Pan-American Bimetallic association met today and issued the following

HEADQUARTERS OF THE PAN-AMRAICAN BI-METALLIC Association—A convention is hereby called of representatives from old Mexico and all the states thereof, of all the countries of South and Central America and of the states of Alabama, Arizona, Arkansas, California, Colorado, Florida, Georgia, Idano lowa, Kausas, Kentucky, Louisiana, Missouri, Minnesota, Mississippi, Montana, Nebraska, Nevada, New Mexico, North Carolina, North Dakota, Oklahoma, Oregon, South Carolina, South Dakota, Tennessee, Texas, Utah, West Virginia, Virginia, Washington and Wyoming, to meet in St. Louis, Mo., on Tuesday, October 3, 1893. This association was organized at El Paso, Tex., at the southwest silver convention held in that city on the 5th, 6th, 7th and 8th of December, 1892, and at which many of the leading and wealthiest citizens of the states of old Mexico aud the countries of South and Central America were in attendance. It was there ordered that a convention, representing all the states be held in Denver in October, 1893. The extraordinary condition of the business and industries of the United States, the danger which threatens the money of Mexico and the countries of South and Central America, as well as that South and Central America, as well as that of the United States, the necessity for broader remedies than the association can apply under the literal construction of its constitution, have induced the executive committee to change the place of meeting and to suggest other subjects for consideration than that alone of himetallism

It is very evident that the center of the conspiracy in this country to utterly demon tize silver and thrust the United State upon a single metallic standard-that of gold-for its currency, is in New York, Bos-ton, Philadelphia and Baltimore. The press of these cities has become thoroughly subservient to the end of the conspirators and has so imbued the minds of the people of the states in which these cities are and the surrounding states that they have all become hostile to the welfare and advancement of the west and south whose interests are in separably blended with a fair and full vol ume of money, which cannot be secured and maintained unless silver has restored its functions of primary money upon which, in company with gold, the credit money of the coustry may rest. In the name of these states are parties to the spoilation of our sections, and the cities named are the prime instigators of the

It has seemed to us that we should no fatten and strengthen such cities with the vast trade and commerce of our sections. Not only does self-respect and self-preservation require that we should deal with friends, but the geographical position of the states, the facilities for ports on the Gulf and its tributaries and upon the Pacific coast, the proximity of Mexico and Central and South America to the Gulf and California lines of the United States, the shorter distances from them to many European and Asiatic ports, and the better railroad and Asiatic ports, and the better railroad and interwaterway facilities from them to nearly every quarter of the west and south, all combine to render practicable and readily feasible the building up of ports along the Gulf, its river tributaries and the Pacific coast line, through which the great bulk of our grain, ore, meats, raw material and manufactured goods may reach Mexico South and Central America, European and Asiatic ports and the wares and products of ther climes be returned to us with recipro

cal profits. We, therefore, urge upon the government of Mexico, South and Central America and upon the American states interested in the work and upon all the commercial and manu facturing bodies within them, to send dele gates to the convention, and we further re quest all railroad and steamship lines of this and the South American continent and of Europe and Asia interested in establishing new ports and lines of communication upon the lines suggested, to send representatives for consultation and suggestions. Let us proceed in this work with delibera-

tion, but firmness. It is a great and patriotic task, as well as of mutual profit and advantage. order of the executive committee of the Pan-American Bimetallic Association.

A. C. Fisk, President. SILVER IN AUSTRALIA.

Influence Which that Country Exerts or

the Present Question. CHICAGO, Aug. 15 .- "Speaking from a brief experience here, it seems to me that business forget the important influence that Australia exerts on the silver question, said Thomas P. McCartny of Wellington, New Zealand, today, as he sat in the Grand Pacific hotel. In that country he is chairman of the board of directors of the Well-ington & Manawatu Rallway company and s largely interested in commercial and banking investments.

"Australia produces more silver than the "Australia produces more silver than the United States, though, of course, during the last three months most of the mines have shut down owing to the prevailing depression. Take the Broken Hill property in south Australia, for instance, and it will show a bigger return than the famous Comstock mines. I have not yet had time or opportunity to investigate the time or opportunity to investigate the trouble here, but I think now that it is largely due to the stoppage of free coinage in India. In Australia we have passed through the worst. Out of seventeen joint stock banks in the colony, fourteen had suspended payment up to the time I left, in the middle of July. Most of these had large amounts of gold on hand. Knowing they could not meet all obligations, they preferre to suspend and reorganize with little ulti mate loss to shareholders or depositors. of :£70,000,000 owed the public by these banks, £13,000,000 in gold was locked up in their vaults. Californian Proposes Buying British Columbia with Our Silver. San Francisco, Aug. 15,-The Call will publish an article tomorrow to the effect

that Horace S. Cutter, a political economist, has prepared a bill to meet the present monetary emergency. Sponsors stand ready at Washington to introduce the measure It reads as follows: Whereas, That portion of the coast of North

Whereas, That portion of the coast of North America bordering on the Pacific ocean and extending from latitude 49 degrees to latitude 54 degrees, 40 minutes, now called British Columbia, should by its physical position naturally belong to the United States:

Therefore, be it enacted, etc., that the president of the United States be and is hereby authorized and empowered to enter into negotiations with the British government for the purpose of acquiring by purchase for the United States ownership entirely of British America, and that the sum of \$100,000,000 or such sum as may be necessary be placed at his disposal to effect said proposal. The sum agreed upon to be paid either in gold, in ten annual payments without interest, or at once in silver bars at actual average, over the same as marchased by without interest, or at once in silver bars a actual average cost of same as purchased by the United States government.

One hundred millions of dollars pay able in silver bars at, say, an average of 89 cents per ounce, would give Eng-land an opportunity of converting this amount into coin, which might be made to correspond exactly in value to our own dollar. By international agreement a similar amount of \$140,000,000 could be coined by the United States, both giving \$280,000,-000 of silver coin, to be interchangeable be-tween the people of both countries, thus taking an immense step in the direction of the 'coin union.

In the Hands of a Receiver. SAN FRANCISCO, Aug. 15 .- Sheriff McDade today was appointed receiver of the wrecked Pacific bank. The bank suspended a few weeks ago and though the attorney general recommended that it be allowed to resume business, disputes among the creditors re-sulted in the appointment of a receiver.

Kausas Bank President Fied. MOUND CITY, Kan., Aug 15.-Robert Kincaid, president of the defunct Citizens bank, has fled the country. In addition to the loss to the bank, the people of Linn county hold his personal notes for about \$200,000, which will probably be a total loss.

Industrials Very Infirm. New York, Aug. 15 .- On Wall street this morning there was an increased pressure to sell industrial railroads. Decreased earnings was the cause. The loss in the weakest extended from 1 to 1½ per cent. The fall was followed by a partial recovery.

It Will Pay in Full. PORTLAND, Ore., Aug. 15 .- The inventory of the suspended Portland Savings bank shows total assets of \$3,014,000; liabilities, The receiver states that if the bank is not crowded it will pay in full.

NORTHERN PACIFIC TROUBLES

Receivers for the Road Appointed by the United States Courts.

WHY SUCH ACTION HAS BEEN TAKEN

Vice President Williams Tells the Story of the Company's Embarrasament-Hard Times and the Monetary Strin-

gency Some of the Causes.

New York, Aug. 15 .- Thomas F. Oakes of New York, H. C. Payne of Milwaukee, and Henry Crouse, president of the Missouri, Kapsas & Texas Railroad company, were this afternoon appointed receivers for the Northern Pacific railroad in the United States court of this city. Vice President Williams' Story.

Vice President Williams of the Northern Pacific says: "In consequence of the extraordinary depression of business and the stoppage of shipments along the line of the Northern Pacific railroad, the company has been forced to acquiesce in an applica-tion for receivers. No company could long stand such severe pres-sure. The falling off in earnings is owing to several causes. The money stringenby prevents the marketing of crops cattle and products of all kinds; conse quently the road is not getting the traffic usual to this season of the year. The failure of banks tied up money upon which we depended for eash. The depression prevailing over the whole country is exceptionally sequre in the younger states, so general business along our main and branch lines is practically at a stankstill. The re-ceivership means the preservation of the property and the conservation of all interests until better times. The road has demonstrated in the past what its earning capacity really is. and when prosperous times return the revenues of the company will again more than exceed the expectations of those interested in the property. The original bill was filed by the Farmers Loan and Trust company and other creditors and stockholders in the district court of the United States for Wisconsin, and the appointments were made there to day. Auxiliary bills were filed in New York, Illinois, Minnesota, Dakota, Montana, Idaho, Washington and Oregon and the same persons appointed receivers in each separate

jurisdiction. Another Explanation.

From an official source it is learned that the main cause for the appointment of the receiver, is that the guarantee syndicate, or certain members of it, failed to make good their subscriptions, alleging that they had been misled as to the actual condition of the property. Since the completion of the Manitoba road to the Pacific coast, the company has had a hard struggle. For instance, its earnings in July were only \$2,019,425, a decrease for the month of \$88,860, as compared with the same month in 1892. Henry Crouse, who was appointed one of the receivers, it is understood, represents the Standard Oil party which has the largest interest in the property. The North American company has not sacrificed its Northern Pacific holdings and expects to

Western Roads Considering the Advisability of Trying an Experiment. CHICAGO, Aug. 15 .- At Thursday's meeting

of the Western Passenger association will be considered the plan of trying a week of onefare rates for the round trip. The managers of the World's fair have been trying for some time to get the roads to make the experiment for one week only, and the western roads will talk over the plan and make the trial. The points affected will be these: Wisconsin, Michigan, Illinois, Iowa and In-

Nearly all the eastern lines are taking liberties with the prevailing World's fair rates, and the reason why no specific complaint has been made is that nearly all the lines are in their competitors.

The agreement of the Ohlo river lines to raise rates on August 21 is likely to be at-tended with some trouble. "The Lake Eric & Western was, in the original agreement, a \$2.50 differential between Chicago and Indianapolis. Now it declares it will make the differential \$4.05. This will knock the proposed agreement into splinters. The Chicago & West Michigan road today decided to pass a dividend for the present.

Earnings of the Chicago & Northwestern for the year ending May 31 show a decrease in the net earnings of \$670,000.

No Reason for the Rumor. DENVER, Aug. 15.-It has been learned here that a certain New York paper has circulated a report purporting to come from an ex-president of the Denver & Rio Grande railroad, to the effect that that company would be in the hands of a receiver inside o two weeks. The prophecy is based upon the comparison of the August, 1892, earnings with this year's receipts, which show a decrease of several hundred thousand dollars was seen tonight and emphatically denied that there was any probability of a receiver being appointed. There has, of course, been a decrease this year in the earnings, but when the fact that the conclave of last year swelled the receipts enormously is considered, it will be seen that the discrepancy is not as great as supposed. The road has no bond interest to pay until November. It is

in good condition and there is no reason for the rumor.

Will Restore flates. New York, *Aug. 15.—The Northern Pacific and the Great Northern companies have decided to restore freight and passen ger rates to the basis prevailing last Feb ruary, to go into effect as soon as practicable. panies mentioned. Wages Reduced. Louisville, Aug. 15.—The wages of the trainmen and trackmen of the Louisville &

"THE CHINESE MUST GO." Unemployed Whites of California Rise

Against Mongolian Laborers. SAN FRANCISCO, Aug. 15,-The crusade against Chinese laborers has been started in

the San Joaquin valley and seems to be spreading over the state. Owing to the financial troubles a large number of white men are out of work, while many Chinese are employed steadily on the ranches and in the vineyards. In several places the white men have held meetings and notified the Chinese that they must make room for white laborers. Many of the ranch owners have decided to discharge their Chinese help and employ whites. Serious riots have been narrowly averted in several places. At Selma, a small town near Fresno, white men notified the Chinese that they must leave town and make room for white laborers. At Fresno yesterday unemployed men to the number of over 500 held a meeting and paraded through the streets de-nouncing the Chinese. The crowd started toward Chinatown where 2,000 Chinese re side, but were diverted from their purpose by cool headed citizens.

The merchants and vineyardists of Fresno held a meeting and many of them announced that they would discharge their Chinese help and employ white labor. One man took thirty white men on the spot and marched them off to his vineyard. Another announced that he, in a few days, would have work for 200 men. Thus far there has been no violence and it looks as if the unemployed white men in the San Joaquin valley would displace Chinese labor.

CHICAGO, Aug. 15.—Between 7,000 and ,000 unemployed men met on Lake Front park this afternoon and listened to speeches from their fellow toilers. The meeting closed with the adoption or resolutions calling upon congress to do away with the present evils of the financial world. The meet-

ing also demanded that the Haymarket monument erected in memory of the policemen killed during the anarchist riots of 1886 be torn down.

Mr. Hall spoke in favor of a greater volume of currency and of the free coinage of silver.

Mr. Suodgrass could not vote for the Wilson bill. It did not carry out the in-tention of the Chicago platform. The cry of the people was for more money and the

best way to secure that end was to provide for the free coinage of silver.

He criticised the stand taken by his colleague (Mr. Patterson) against free-coinage and contrasted his speech of yesterday with those made by him during the last congress. He (Mr. Snodgrass) would not change his convictions. Not even a letter from Mr. Whitney could drive him from the support of the people on this floor. He (Mr. Patterson) would have great trouble in satisfying his people as to his change of front, even if he are two dinners and smoked two cigars every evening. [Laughter.] The present fight was between the debtor and creditor classes. The shylocks were demanding the pound of flesh, while the people were asking congress for relief, and the men who refused to grant this relief would be branded as traitors to the people.

The house then adjourned.

SENATE FINANCE COMMITTEE.

How Its Members Stand on the Silver Question. Washington, Aug. 15.—The committee on finance of the senate held a meeting today, at which for an hour and a half the silver question was discussed. The only result of the meeting was that authorizing Mr. Voorhees to favorably report the bill increasing the circulating notes of national banks to the

In the committee room there was some very persistent opposition to the reporting of this measure by Vance and Jones of Ar-Kansas. The discussion only tended to show that the finance committee was as far removed as ever from common ground on the question of general legislation on the financial situation and the repeal of the purchasing clause of the Sherman law in particular It was agreed that the committee should, be ginning with Saturday next, hold daily The members of the committee are as

par value of the bonds deposited.

The members of the committee are as firm and unyielding as the first day they met. The anti-silver men on the committee are Senators Sherman, McPherson, Morrill, Allison and Aldrich. The silver men are Senators Harris, Vance, Vest, Jones of Arkausas, and Jones of Nevada, with Mr. Voorhees, the chairman, holding the balance of power. How he will year may decide the of power. How he will vote may decide the action of the committee. He has said that he is in favor of the repeal of the Sherman law, either with conditions or without; that he will vote for it without conditions, but by so doing does not give up his alle giance to silver as a money metal. He has said that the vote on the repeal will not indicate the standing of the senate on the question of bimetallism at all and for that ceason is willing to go on record in that way. On the other hand should the ultra silve men agree upon some measure not too radical in its character, it is said that possibly Mr. Voorhees might go with them. the committee is divided on lines that show the extremes of the proposition. The silver men insist they will submit to nothing but free coinage at the present-ratio, and the other side, with equal emphasis, assert that the only thing they will endorse will be the unconditional repeal of the purchasing

SAFE BLOWERS AT WORK.

Two Jobs Transacted in This Line During Monttay Night. In spite of the increased vigilance on the part of the police force, there seems to be an increased number of suspicious characters coming to Omaha. The frequent "holdups" have caused people to become ex-tremely cautious when compelled to go home at a late hour, but another and more dan-gerous class of crooks made their presence Tuesday night. These people are Tuesday night. These people are "gophers" or safe blowers, and night before last two safes were blown open in the north

part of the city.

The doors of the strong boxes were drilled into and then blown off with explosives.

The work was that of skilled professionals, and last night the police kept 1 sharp look-out for any jobs which might be done during the Egyptian darkness which prevailed. The work of the "gophers" on the two North Omana jobs were not very lucrative. as they secured only a few dollars. The police were very reticent about the affair and would vouchsafe no further information han to acknowledge that two safes had been broken open.

WAR HAS BROKEN OUT IN LA PLATA

Several Provinces of the Republic on the Verge of a Revolution Against Federal Authority-Bloody Result of a Recent Collision.

[Copyrighted 1893 by James Gordon Bennett,] VALPARAISO, Chili (via Galveston, Tex.), Aug. 15. - By Mexican Cable to the New York Herald - Special to THE BEL | Buenos Ayres, Argentine, is under martial law. The Herald's correspondent in that city telegraphs that government forces have been stationed at all advantageous points, and that the president is being bitterly denounced by his opponents. The situation is extremely bad and is constantly growing worse. General trouble in the country is feared.

In La Plata, the capital of the province of Buenos Ayres, war has practically broken out again, and this time it is between the revolutionary forces who drove out General Costa, and the federal army. Notwithstanding the fact that 2,200 revolutionary soldiers were disarmed in that city yesterday without making the slightest resistance, there was hard fighting last night. A large body of radical revolutionists refused to obey the order to surrender their arms when ordered to do so by General Basch, who is commander-in-chief of the federal forces in La Plata, when an effort was made, which

developed into a bloody battle. Carlos Tejedor, whose appointment as interventor in the settlement of the La Plata affair caused the latest upheaval in the cabinet, has resigned. Edwards Olivera has

been appointed to act in his place. There is great excitement in Corrientes. The rebel troops have been attacked by the government forces. All the women and children and noncombatants have fled to the hills and the city is practically deserted by all except the soldiers. General Pierola, exdictator of Peru, has gone to Iquique, where he was met by a large crowd of friends, who were headed by a band. It is reported that Pierola will establish recruiting headquarters in Iquique, and a number of ex-officeholders of Peru will go there to hold a conference with him.
