Hogs—Prices on hogs took a sharp down turn today, with the largest run here for any day so far this week. Friday is an off day for shippers, and packers were not back-ward in taking advantage of the situation.

The market was very irregular and trading slow at an average decline of 10c, while

some sales were not over 5c lower, and on the other hand common heavy hogs sold fre-quently 15c lower. The close found condi-

tions practically the same as the opening, and a few loads were carried over. The extreme range of prices was from \$5.40 to \$5.70 with the bulk of the trading at \$5.50 to \$5.60 against \$5.50 to \$5.80 and \$5.60 to \$5.65

COMMERCIAL AND FINANCIAL

Corn Opened Strong, Advanced Quickly and Closed at a Fractional Gain.

WHEAT QUIET WITH PRICES FLUCTUATING

In Oats There Was a Steady Rise and Prices Closed at the Top-Provisions Continued Dull with an Advance in Ribs-Stocks and Bonds.

CHICAGO, Sept. 8 .- The activity in the corn pit today would have created the impression that there was a big market, but at no time was there a broad market on which much corn could be sold, except at a discount or bought except at a premium. The opening was very strong. The Kansas authorities made a statement that the condition had fallen off 10 points during August In the best corn section of the state. This was a pointer to what other states with even less rain might show. The government report is due next Monday at the latest, and on the theory that this may be very bullish, the trade bid prices up very quickly. Liverpool was %4 up on spot corn. Yesterday's shipments were 509,000 bu, and helped to offset the big receipts. Withdrawals were 283,000 bu. There was heavy privilege trading last night and Logan & Co. and others made a rush at buying early. presumably to make the calls good. On the advance? chwartz putout a further short line and he now, it is said, stands to lose on possibly 1,000,000 bu. The receipts continue very heavy, much to the surprise of the bulls. The receipts reached 703 cars, and the estimates for Saturday are still at 775 cars. The market opened with \$400 le advance, but soon afterward worked down \$4c, rallied later \$400.5c, ruled unsettled on rain threatening in the west, and at the close had gained \$600.5c.

Wheat was rather quiet. The market at

Wheat was rather quiet. The market at the opening was about 1/2c higher than yesterday's closing, advanced 1/3c or so more, then became weaker and prices declined 3/46/3c, advanced 1/3c, fluctuated frequently within 3/3c range, then advanced 1/3c, or to top figures, eased off, and the close was about 3/46/3c higher than yesterday. The firmness was attributed partially to the strength in corn, though the strong English cables, in the face of lower American market, had a favorable impression on the market. The Kansas state bureau, which estimated the crop at 19,000,000 bu, against an estimate of 21,000,000 bu. 000 bu., against an estimate of 21,000,000 bu, based on the government percentages of last month, and a 70,000,000 bu, crop of last year had some effect, as did also the fact that New York canceled some more bank certi

Oats opened 1/601/c higher, advanced 1/60 %c more and closed at about the top. There was another uninteresting, dull day added to the long list recorded, in the provision market. What little business was done was confined to ribs, which closed at an advance of 714c for September, 1714c for October and unchanged for January. Estimated receipts for tomorrow: Wheat, 130 cars; corn, 775 cars; oats, 290 cars; hogs,

The leading futures ranged as follows:

New York Dry Goods Market. New Youk, Sept. 8.—In the dry goods market the promises are all for improvement. Collections are picking up and commercial paper has become salable. The market is now full of purchasers and exporters are buying brown sheeting and drills on a larger scale. Shirtings are in fair demand at full prices

Printing cloths are quoted at 25c for 64x54, 28, inch goods, but it is understood that price is now refused in Pall River. Weelens and worsteds show increasing activity and upward tendencies.

IN A GENERAL WAY.

Omaha Continues to Share in the Return of Confidence and Activity. The effects of the improvement in the situation are making themselves evident in almost every department of banking, and the clearances are showing large increases over those reported any time last month. Currency is gaining in volume, and most banks are getting a little of it. As a result some capital which has been brought back into circulation is being distributed through investments and new business enterprises. Clearing house receipts are steadily increasing. The clearances of yes-

Ing distributed through investments and new business enterprises. Clearing house receipts are steadily increasing. The clearances of yesterday show an increase over those on the same day last week of more than \$100,000. People who withdrew their deposits from the savings banks in July and August have regained their confidence in the stability of these institutions and are putting their savings on deposit where they can derive interest. The indications are that this month will be a good one for speculators. Industrial, railway and mercantile stocks are all selling at bedrock prices, owing to the closeness of money, and these stocks are bound to increase in value as times grow better and money gets more plentiful. In recognition of Omaha's solidity, financially, among oastern men it is reported that two farge manufacturing concerns have been induced to locate here, and they will be in full operation within sixty days. As all the details have not been completed, the particulars cannot be given publicity at present.

Commercial agencies agree that the improvement in business circles began on the 1st of September and has been steadily gaining force since then. They note that the money markets throughout the country are more healthy, failures are less numerous, resumptions increasing and there is an increase in the volume of business as shown in distribution. More travelers are being sent out from western centers and there is increased activity in some manufacturing industries both at western a more cheerful to the market for some stapics, notably wheat, cotton and pork. Textile and iron industries show a larger proportion of shutdowns than of resumptions, but there is a distinct revival of confidence. There is a stronger tone to the market for some stapics, notably wheat, cotton and pork. Textile and iron industries show a larger proportion of shutdowns than of resumptions, but there is a more cheerful tone in iron and steel markets. There is more buying in cotton goods, though the market is still narrow. In rubber weeks.

The produce markets were rather quiet yesterday, but pork, lard and ribs are still advancing. Pork has advanced 50c during the

past two days.

St. Louis Markets.

Prices Were Depressed at the Opening, but

the Market Closed Strong. NEW YORK, Sept. S .- The depression which ruled on the Stock exchange yesterday was reflected this morning at the opening by the heaviness in the dealings, which was felt throughout the entire list with one exception, New York & New England, in which a strong buying movement was developed on the strength of a report that the company was about to gain an entrance into New York City.

Chicago Gas, which led the downward movement, was unfavorably affected by the announcement of the authorization of an issue of \$10,000,000 of bonds by the People's Gaslight and Coke company. The pressure to sell the stock of this company was so great at the opening that sales were made in the ring at 59 and 58 simultaneously, and 1,200 shares were sold before the quotaand 1,200 shares were sold before the quota-tions could be regularly recorded, and within the first ten minutes the price had dropped to 56%, a decline of 3% per cent from last night's closing. The break in this stock had an effect to weaken the other industrials and the railway list sympa-thized to no small extent. But while some of the bears were trying to lower prices, an-other section was endeavoring to cover at other section was endeavoring to cover at the lowest quotations ruling, and during the morning there were temporary railies which led up to a decidedly strong marke, in the afternoon. The change from weakness to strength was gradual and was largely owing to a very general belief that the natural re-action from an extraordinary buil market was but a precursor of a still further ad-

The situation was materially strengthened by reports that the bank statement to be is-said tomorrow would be most favorable and would show a large increase in cash, a good gain in reserve, which would give the banks once more a surplus instead of a deficiency. Reports that the cash receipts of the banks from out of town exceeded the shipments tended, too, to add to the feeling of confidence in the stability of the money market and was a factor on the bull side of the securities market. The lower range of values brought into play a good many orders to buy at certain stated figures and the bull element entered into the market again with vigor, the result being that before noon prices began to mount with even greater rapidity than they had pre-

viously descended. Chicago Gas, after the flurry of the morn-Chicago Gas, after the flurry of the morning, fluctuated upon much narrower quotations, but gained steadily and at 2 o'clock had advanced to a point 1 per cent above the opening, subsequently selling up 3 per cent higher, closing at a reaction of ½ per cent, making a gain on the day of 3 per cent. General Electric fell off 1 per cent, rose 4¼ and closed 2½ per cent higher than yesterday. Sugar was remarkably well held. The other stocks which made the

greatest advances in the day's business were: Laze Shore, 334; Western Union and New York & New England, 2; Delaware & Hudson and Buffalo, Rochester & Pittsburg, Manhattan Consolidated, 3%; Cordage, Tobacco, 2, and the rest of the active

314: Tobacco, 2, and the rest of the active list 15(0)134.

The Post says: As the reports come in of the net carnings of the rankways for July and the gross earnings for August a pretty clear idea may be obtained of the proportion in which the different sections of the country have suffered from the recent trade paralysis. The returns show clearly that the worst of the trouble was experienced in the districts lying between the Missouri river and the Kocky mountains. The granger country was the next heaviest sufferer, the southern interior states the next, while eastsouthern interior states the next, while east-ern traffic generally makes on the whole a very gratifying comparison. The sectional distribution of bank failures alone, of which the necessary consequence was a general check to trade, has led to the same conclusions. The recently computed table of bank exchanges during August showed the decrease from last year to be 26 per cent in the eastern and middle states, 38 in the northwest, 40 in the southwest and 47 in the far west. The news of the revival of business in these sections is of peculiar interest.

The following are the closing quotations of the leading stocks on the New York ex-

Cattle Continue Strong on Desirable Grades

-Hoge Sell a Trifle Cheaper. FRIDAY, Sept. 8. Values on desirable beef steers are holding up well, a firm, active trade prevailing again today, while the number coming is comparatively small. Choice cornfed steers are scarce, and are selling now as high as at any time of late. Good to choice 1,200 to 1,500-lb. beeves are quoted at from \$4.40 to \$4.75, 1.000 to 1,200-lb. at from \$3.75 to \$4.40. and light and common steers from \$3.75 down.

Cows and heifers of decent weight and quality were picked up freely at steady to strong prices, and in fact everything that could be used by killers sold fully steady. Good to choice cows and heifers are selling at from \$2.40 to \$2.90. Fair to good at from \$2 to \$2.40, and inferior stock from \$2 down. There is good dedmand for desirable feeders and prices today on best were stronger.

Anything except good stuff, however, is not

evenness, some lots selling 10c lower than others of a like quality, but the average was quite as high as for Thursday. The greater part of the 22,000 hogs on sale changed hands at from \$5.75 to \$5.90 for heavy and at \$6 to \$6.30 for light. There was merely a nominal supply of the latter and buyers were unable to fill their orders. A comparison of today's prices with those current last Friday shows there has been an advance of 30c to 40c per 100 lbs. There has been an active demand all the week and a pretty steady upward movement of prices. Receipts were about 20,000 head less than for last week and the accumulations from day to day were perhaps less than at any previous time this season. The close of business today found nothing remaining in first hands and only a few loads in the hands of speculators. Although a slight falling off in quality is noted the average is still remarkably good, and consequently no immediate decided shrinkage in receipts is probable.

The sheep and lamb markets were firm. There was no important variation in prices as compared with Thursday, but what little change there was occurred to the advantage of sellers. There was a good demand at \$1.25 to \$5.25 for yory thin to choice lambs. These quotations showed an advance for the week of about 25c in sheep and 25c to 50c in lambs. The major part of the week's supply soid at \$2 to \$3 for the former and at \$4 to \$5 for the latter. The shipping demand continues of the most limited proportions, and owing to the refusal of country banks to extend the usual accommodations to intending feeders, comparatively few sheep are going back to the country.

Receipts: Cattle, 8,000 head: calves, 500 head: hogs, 21,000 head: sheep, 10,000 head. selling very freely even at low prices. Good feeders sell at from \$1.25, fair to good at from \$2.40 to \$2.25, and lighter grades anywhere from \$1.78 to \$2.25. Representative No. Av. 20....1046 55...1363 23....1897 868 785 814 915 858 790 711 824 980 974 834 908 855 1017 982 966 1110

paratively few sheep are going back to the country.
Receipts: Cattle, 8,000 head; calves, 500 head; hogs, 21,000 head; sheep, 10,000 head.

Piles of people; have piles, but De Witt's Witch HazelSalvewill cure them.

TAX ASSESSMENTS. Reduction of Levies Under the Present

Councilmanic Finance Committee. Somewhere within the laws governing cities of the metropolitan class is a provision that in October the city council shall sit as a board of equalization for five days for the purpose of equalizing the valuations and assessments for the annual general levy of taxes. The councils have complied with this requirement each year and did so last

An observer of the proceedings of the present council, from the time D. H. Wheeler has been chairman of the committee on finance, might naturally infer that the fathers were weekly sitting as a board to approve of the equalizations suggested by that gentleman. Not in the history of previ ous councils has there been such a wholesale cancellation and reduction of levies, and there seems to be no indication that it is to end soon. The cancellations and reductions include assessments on both real and per sonal property, and the aggregate is growing to such proportions that it threatens to bankrupt the general fund of the city. Since the 1st day of January the council

has either canceled or reduced assessment valuations upon both real and personal property to the amount of nearly \$100,000. figures at hand show that such is the case, and that the amount will fall but a very few dollars short of that sum. This represents in taxes over \$4,000, upon a 44-mill levy. A majority of the taxes canceled or valuations reduced are for this year's assessment although some date back to 1889. Included in the list is the Driving Park

association, the valuation of which was \$6,745.20, the tax levy amounting to \$153.30; a reduction of the valuation of the Standard Oil company from \$20.-175 to \$10,375; United States Wind Engine and Pump company from \$12.820 to \$6,960; Carpenter Paper company for 1893 from \$10,560 to \$6,560; and for 1802 from \$10,475 to \$5,475; Omaha Tent and Awning company from \$4,192 to \$1,192; Byron Reed company from \$20,000 to \$5,100; Equitable Trust company cancellation of \$12,000; American Hand-Sewed Shoe company from \$10,000 to \$5,000, and a number of other in stances, the amounts being smaller.

The complaints regarding taxes come be-fore the council and are referred to the committee on finance, of which Wheeler is chairman. He investigates the complaints and makes his reports to the council, and a resolution signed by that gentleman generilly accompanies the same. There is never any debate over a reduction or cancellation of taxes, and what the chairman of the inance committee says goes without ques-

Some of the councilmen have had their eyes opened to the fact that as the council sits each year as a board of equalization, previ-ous to the time that the levy is made, that then and there is the time for all complaints to be entered, and that they are growing weary of several such grievances being acted upon at regular sessions of the council.

City Hall Cullings. The fact that the city has upon its ordisance books one aimed at abating the smoke nuisance has caused all of the makers of consumers to appear on the ground and investigate the probability of disposing of some of their inventions. Today a gentieman from Chicago, who is the inventor of water gas furnaces, is in town. He claims to have solved the question of how to consume the smoke and gases, and wants to provide the city hall boilers with one of his machines. Health Commissioner Somers is reported somewhat improved and hopes for his speedy recovery are now entertained.

Mayor Bemis and City Clerk Groves are engaged in signing the issue of \$100,000 sewer

bonds and coupons. Before the task is com-pleted each will write their names 4,920 times.

Pile of people have piles, but Dewitt's WitchHazel Salve will cure them.

MIDDAY BLAZES. Fires that Damaged a Second Hand Store

Chicago Live Stock Market.

Chicago, Sept. 8.4-fspecial Telegram to The Bee.1—The situation in cattle was much the same as on the preceding two days. There was a healthy activity in all branches of the trade and prices continued to show a tendency to go up. The receipts for the day were quite as large as is usual on Friday, but the total for the week falls far below the average for the time of year and there was a confident feeling among all classes of operators. Most descriptions of cattle sold a trifle higher than on yesterday and the average gain was from 5c to 10c. Not nearly half of the offerines were natives. They were too few to fill the orders in hand and sales were quite at the advance. Cows. helfers and buils sold principally at \$1.75 to \$2.85 and the prevailing prices for steers were from \$3.75 to \$4.90. There were a number of trades at better than \$5, and it was thought that something fancy would have found a buyer at as much as \$5,50. The average of prices for western and Texas-range cattle was higher than for Thursday, the former selling largely at from \$2.75 to \$3.60 and the latter principally at from \$2.25 to and the latter principally at from \$2.25 to \$2.85. Everything was out of sellers' hands long before the closing hour.

The hog market was stronger than at yesterday's close. It was as high as at any time yesterday, the best heavy grades, averages of over 250 lbs., selling around \$5.95, and choice assorted lightweights making from \$6.35 to \$6.40. Prices showed more than the usual unand a Dwelling. A gasoline stove and a parlor match was the cause of a fire in Philip Nathan's second hand store, 505 South Thirteenth street. Yesterday a hired hand was cleaning up some stoves in the pasement and was using gasoline. Unfortunately he stepped on a parlor match which had been dropped on the floor, and a good sized blaze was the result. By the time the fire department had arrived the flames streamed up through the iron grating in the sidewalk and had ignited the awning, which burned rapidly. The heat of the burning awning caused one of the plate glass windows to break. The loss on the stock was light, about \$100, while the loss to the building leading a leading will be glass and the awning will be glass and the glass and the awning will be glass and the glass and the glass and the awning will be glass and the glass and the glass are glass and the glass are glass and the glass and the glass and the glass are glass and the glass and the glass are glass and glass are glass are glass and glass are glass and glass are glass and glass are glass are glas

ing, locluding the glass and the awning, will amount to \$1,200 at least. Officer Cox turned in the siarm.

Piles of people nave piles, out De Witt's Witch Hazel Salve willcure them. Fine boating Courtland beac h. FLOUR OUTPUT.

What the Minneapolis Mills Have Been Doing for the Past Week. MINNEAPOLIS, Sept. 8.—The Northwestern Miller says: The flour output last week was 187,415 barrels, against 197,575 barrels the week before, and 186,150 barrels for the corresponding time in 1892. The output this

week will probably touch the 200,000 barrel mark. Under the stimulus of higher wheat mark. Under the stimulus of higher wheat there has seen an appreciable improvement in the demand for flour and millers are strongly hopeful of doing a better business from this on. Buyers feel that prices are at bedreck and are more inclined to take hold. Last week probably as much flour was sold as was ground. Wednesday and Thursday's prices were marked up and this at one checked trade. Yesterday and today some parties reported brisk buying again. Foreigners usually bid too low to promote trading. Low freight rates, both on land and ocean, have been helping the millers out and ocean, have been neplog the increasing cost of considerably, though the increasing cost of cash wheat is now largely swallowing up this advantage. The direct export ship-ments by the nulls last week were 71,235 barrels, against 92,505 barrels the preceding

Piles of people have piles, out Dewitt's Witch Hazel Salve will cure them. Douglas County Crops.

County Commissioner Williams has returned from the country where he has been for several days, looking after road and bridge matters. Mr. Williams states that harvest is in full blast on the large seed farms along the Platte and the Elkhorn rivers, and that the crop is the heaviest ever known. Hundreds of men are being given employment, but still there is a shortage o help, notwithstanding the fact that the work is easy and good wages are paid.

Mr. Williams states that this year a considerable amount of the harvesting is done by machinery, but that still there is work for more men than can be secured. The machine for harvesting cucumber seeds is the latest device that has been invented and part and latest device that has been invented and put in operation. Heretofore the cucumbers have been seeded by hand, but this year the firms operating the seed farms have put in some machines, any one of which will do the work of a dozen men. They operate upon the same principle as a corn sheller, the cu cumbers being thrown into a hopper, passion between a set of knives and crushers, afte which the pulp is carried off on an endless apron, with the seeds falling into a barrel placed under the machine

—upon you before you know it. It is sure to be in the air we breathe, the water we drink. The germ of consumption is everywhere present. The germ begins to grow as soon as it reaches a weak spot in the body. Catarrh, Bronehitis, and a scrofulous condition, furnish these weak spots. The way to fight these germs—begin early—render the liver active and purify the blood with Dr. Pierce's Golden Medical Discovery. Besides, it builds up healthy flesh.

It's guaranteed in all bronehial, throat and lung affections; every form of scrofula, even Consumption in its earlier stages. If the "Discovery" fails to benefit or cure, you have your money back.

Fortify yourself against disease by making the body germ proof, then you will save yourself from grip, malaria, and many of the passing diseases.
