

FLESH OF WESTERN FORTUNE

Montana Kootenai Claims to Have Been Re-territorial by Adverse Silver Legislation.

IT WILL MERRILY BOOM IN THE SPRING

Busk Tunnel Completed—Rich Field of Precious Stones—A Natural Bridge—Tremendous Cree Indians—Western Fisheries Supply the World.

Although the Montana Kootenai is one of the most promising mining sections in the northwest, it has had a serious drawback this summer on account of silver legislation.

During the spring and summer not less than 400 men were in the hills. They all outfitted here, and daily caravans to the mountains was a usual sight.

Busk Tunnel and Its Cost. In running from Chicago to the Pacific coast the Atchafalaya and Santa Fe railroads cross the continental divide of the Rocky mountains at Ingersoll pass, in the Saguache range.

The tunnel is 2,983 feet in length, with fifty-foot approaches, is twenty feet high and fifteen feet in the clear. It will be ready for service about December 1, less than three and one-half years from the first blast.

Glittering Amazon Stones. The other day L. B. Harrison and N. H. Brown found quite a curiosity on Elk creek, near Golden, Colo.

To Feed the Hungry Earth. The Southern California Improvement company has made extensive water developments on the Mojave river near Colton.

Nature's Architecture. There is a wonderful natural bridge in Montana, situated in the vicinity of the National park, on the east side of the snowy range of the Rocky mountains.

Money in Cod. "Cod can be caught in Bering sea, brought to the Sound and dried or cured for one cent a pound less than on the New England coast.

Attacks on Washing-Powders. don't affect Pearlina. Pearlina is a washing-compound, in powder form, to be used, but quite a different thing.
