VANNER AND JIG COMBINED

Peculiar Machine Invented by a Colorado Man to Catch Fine Gold.

SUCCESSFULLY TRIED ON OLD TAILINGS

All the Virtues of a Concentrator, Amalgamating Plates and Sluicebox Centered in One-Record of Progress in the Great Northwest.

The other day a Denver Times man was privileged to witness a new invention that promises to revolutionize placer mining. In company with a number of prominent gentlemen in mining circles, he made the trip to a spot near Idaho Springs, where the patent device is being tested. The investigation, so far as it went, was attended by wonderfully successful results. The device is called the 'graphomatic amalgamator and extractor,' and was invented by a Denver man, who has been operating in Colorado mining for six years. He is an expert chemist besides peing a rare inventive genius.

The machine is something the shape of billiard table, a little longer, however, for its width. The bottom is of copper electroplated. The name graphomatic is drawn from the motion the table undergoes, first a little jerk forward and then backward, covering a space of from half to one and one-half inches, and making a minimum of about ten of those compounded movements per minute, by means of a water

Near the head of the table are five riflies extending the entire width. A little below is a pocket or cavity about three inches wide and deep, also extending the width of the table. There are three sets of these rifles and pockets, equidistant, and in each pocket a gate to keep the sand that collects stirred up. The pockets are stored with mercury, which is also scattered over the face of the table.

As the dirt is being fed onto the table it is moistened with a chemical mixture that makes the rusty gold obedient to the embrace of the mercury. The double action tends to keep the gold on the bottom, where

the quicksilver can lay hold of it. The machine is being tested on the tailings of a dump that was worked and abandoned by sluiceboxes. There were no nuggets, all was fine gold, but a magnifying glass showed the colors in thick profusion. The inventor contended that the maching catches 99 per cent of the values, allowing practically nothing to escape worth saving. The visitors suggested that a claim of 75 per cent would be large enough to clothe the machine with

revolutionary powers.

Added to the rest, the cost of the machine is not its least attraction. For \$250 it is handed over complete, while the cost of working is avowed to be slight. If the article is as represented and guaranteed it will put placer mining in the reach of men of ordinary means.

Cyanic Extraction in the Hills,

"Much interest is being taken in the cyanide process, which is being introduced into the Hills," said a well known miner and prospector from Bald mountain to a Deadwood Pioneer man. "The people of my section have been waiting for years for a process that would treat our rebelilous ores cheaply. In the cyanide process, according to all reports, they see a solution of 'high prices' and a chance to have a fair margin, or at least a margin above milling, min-ing and transportation charges. There's nothing the matter with the process now in vogue here but the charges for its treat ment of ore. There would be a big differ ment of ore. There would be a big difference to the mine owner's pockets if he had to pay but \$5 per ton, against \$0 for chlorination and \$15 for smelting, especially upon ore that ranged in value from but \$16 to \$25 per ton, and this is the class of ore that is predominant in my country. Of course there are tons and tons of higher grade ore, but of the lower grade class the deposits are grade of ore that we want a process, one that is cheap and economical, and that does not eat up all there is in it to handle it. In the cyanide process we think we see a solution of the low grade problem. The successful operation and demonstration of this process to handle \$15 ore at a fair profit to the mine owner means a boom to the low grade mining in the Hills, and our guiches will be lined with cyanide plants." Dr. Franklin R. Carpenter long ago demon strated the feasibility of the cyanide pro-cess as applied to the refractory ores of the Black Hills. While dean of the School of Mines at Rapid City he made extensive ex-periments in search of a profitable method of treating the arsenious pyritical ores of that region, and announced to a BES man at the time that the cyanide process was a success. His objection at that time was the danger that arises from poisonous gas, cyanic acid being a most deadly poison.

A prospector named Wright, one of the original owners of the Whale group of mines in the Yankee Hill gold district of Colorado, reports the discovery of rich gold ore in Elk park, north and west of James Peak and within easy reach of the Yankee Hil camp. The veins were located by Gilpin county miners, who have been prospecting in the park for several weeks past. Tests made at Central and Black Hawk return as in several instances eighteen ounces were returned. The Elk park ore strongly re sembles that found in the Whale and other partially developed mines in the Yankee Hill district. The new finds are believed to be a continuation of the Gilpin county gold

Discovered an Ice-Paved Cavern. About fifteen miles north of Lewiston, Mont., and two miles from the Gilt Edge mine, there has been discovered a cave simi-The discovery was made by Charles Kelly, a prospector. About a week later a party of six, equipped with miners' lamps, axes, picks, ropes and overcosts, visited the curious cave for the purpose of exploration. The party reached the entrance of the cave about 10 o'clock in the morning and immedi

The mouth is an irregular crevice in the sloping ledge. For a distance of about 100 feet the bottom is almost level, and the crevice widens gradually to a width of nearly fifty feet. Then there is an incline of about twenty degrees for a distance of fifty yards. Here, instead of a rocky door, a solid body of ice was found. Fifteen minutes of hard work with the axes and picks

The party continued their journey for about three-quarters of a mile from the entrance, till the winding avenues and rooms made it hazardous to proceed farther, the danger of losing their way back to daylight being imminent, owing to the fact that a compass carried by one of the party had become useless on saccount of being affected by vast deposits of iron in the walls of the cave. Much difficulty would have been experienced in returning only for the forethought of a member of the party, who marked the route taken by strokes of an ax.

The width of the cave varies at different points from twenty-five to 300 or 400 feet, and the roof at some points reaches within four feet of the ice and in many places so

high that it could not be seen by the light given out by the lamps carried by the explorers. At no point in the cave was any water found, only an occasional dripping from the roof. In places draughts of air were encountered that almost extinguished the lamps carried. William Armeaux has located a mineral claim at the entrance of the cave and in this way intends to secure it from the government.

it from the government.

Ed Johnson's Hideons Discovery. Ed Johnson, who has returned to Dead wood from a thirty days hunt in the Bear Lodge mountains, tells of finding the skeleton of a man who, evidently, perished severa years ago. Indications point to death from a gunshot, but whether from his own hand or that of another will never be known. The bones of the unfortunate man were intact, excepting the right leg and one of the arms. which were probably carried away by wolves. When found the remains were leaning against a tree, the bleached bones, with the grinning skull, tipped to one side, presenting a horribly leering expression to the startled Johnson, who came upon it un-awares. By the remains lay a trusty rifle, and still encireling the bony form was a cartridge belt of ammunition, and upon the remaining foot were the remanuts of a boot. In the skull was a hole, evidently made by a builet. There are no papers or anything else by which to tell who the unfortunate man could have been. Johnson has the gun, which he will keep as a souvenir.

Big Mica Crystals. A prospector brought some specimens of mica, of both the rhomoic and hexagonal systems of crystalization, into Saratoga last week that astonished every one who saw them, says the Saratoga Sun. The rhombic specimens are as clear as any in the market and measure 5x10 inches. The hexagonal crystals are smaller and of a stightly wine colored tings. There can be no doubt about the importance of this find and we regret that we are unable to name both the finder and the locality. Other supposed finds in this county having been pronounced of no value, the finder in this case will not allow the matter to be exploited. We are at liberty to say that there is a great quantity of the crystals and that every effort will be made to interest capital in the matter, to the end that the mineral may be mined and placed on the market.

Fortune in Black Sand.

Mr. J. F. Elliott, who has been prospecting about the head waters of the South Ump-qua, in the vicinity of Canyonville for the past two years, came to the city the other day, says the Portland Oregonian, with samples of cinnabar from a mine which he has discovered, to have an assay made. It is found that the ore is rich in quicksilver, but an analysis will be required to ascertain the percentage it yields. Mr. Elliott discovered a tin mine some time ago, and sent samples from a cropping to San Francisco, which yielded only 7 per cent of tin, so a shaft will be sunk on the lead for a further

test. He also brought samples of coal which have been pronounced anthracite, and some specimens of black marble which have been declared of superior quality, region.

Five locations have been made on the Cin nabar ledge, and Mr. Elliot and his partners. one of whom is General Compson, are taking The most wonderful discovery made by Mr. Elliot is an immense deposit of black sand on a creek which was taken up for gold

mining twenty years ago, but was aband-oned on account of this sand, which was so heavy that the gold could not be separated from it. He brought down with him a quantity of the sand, which has been con-centrated by washing in a pan, and this was found to consist largely of rusty or oxidized gold. An assay showed that it yielded 450 ounces of gold to the ton. Allowing for the concentration, Mr. Elliot says this would make about \$200 to the ton of sand. The sand is the same as is found on the beaches in this state, but is much richer in gold. He leaves to go direct to the black sand deposit, and proposes to secure all the ground pos-sible, and then obtain one of the Metzger machines and give it a trial, in hope of mak ing a fortune in a short time.

The Dakotas. Sioux Falls boasts of a new tannery. The directors of the corn beit exposition at Mitchell have a snug balance left after settling alt claims.

For a mile or more west of Custer, French creek is dotted with men who are hauling out the gold.

A prominent and wealthy farmer of Wheatland was killed by a boar pig's tusk cutting an artery in his right leg above the knee, from which he bled to death. In sinking a well on the club house prop erty at Deadwood, a blind ledge of pyritic ore was encountered at a distance of twentyfive feat from the surface. The ledge dips

lowaward and into the nill and the deposit is apparently an extensive one. The Lady of the Hills mine at Silver City, situated a short distance from the Caliboga group, was sold, so it is reported, to a New Jersey capitalist for the sum of \$70,000. The ore carries a big percentage of antimony with a streak of telluride ore rich in gold and silver.

Mr. Pratt from Potatoe gulch, in the about fifteen to twenty-five feet above the lower quartzite, called by some "lime shale," color brown and greenish, that carries gold in considerable quantity, in fact the samples that he has tested himself ran about \$20 per ton.

Colorado.

The Buena at Jamestown has struck ore running fifty ounces gold to the ton. The Whiting mine, near the Gunnell, in Gilpin county, is in copper-iron ore worth \$1,000 a ton.

Creek, this week showed 92 per cent of the The Duncan-Bloomer property, on Left Hand creek, Boulder county, is yielding ore

worth \$300 per ton. A strike of rich gold ore is reported in James peak. It is believed to be a continua-tion of Gilpin county.

The best ore for years is being taken out of the Golden Age, Boulder county. Two carloads sold for \$1.200, Mill stuff worth \$32 a ton has been struck in the Gold Dirt at a depth of 200 feet. The vein is three feet thick.

A rich strike of wire silver, pure quill, has been made at the Moss Rose mine, ad-joining the Sylvanite, Crested Butte. The Barbara Gold Mine company, capitalized at \$1,000,000 to operate in Gippin and Clear Creek counties, has been incorporated.

The Pine Shade, Boulder county, is about to resume operations. The vein is fifty feet between the walls and yields from \$10 to \$25 in gold per ton. The Anaconda is sending three carloads of low grade ore to the smelters and if there is a margin of profit in this shipment this mine can send fifty tons of the same kind of ore

per day to Denver and Pueblo.

The Brott Bros., owners of the World's Fair mine in East Argentine, extracted about eignteen pounds of quartz from one of their workings a few days ago, which they crushed, panned and retorted. It gave a result of twenty-two pennyweights in gold.

Assayer J. A. Curtis of the Columbus mine says the 200-foot vein of decomposed porphyry recently discovered in the La Gold district can be treated for \$4 a ton. It runs from a quarter of an ounce to four ounces in gold. It promises to rival the Homestake and Treadwell.

J. B. Swan has completed the digging of the seventy-two rows of potatoes, each of a different variety, which he has cultivated this year as a test. The average for all was 506 bushels per acre. Nearly a half yielded at a rate in excess of 500 bushels. Seven exceeded 550 bushels. The greatest results were as followshels. bushels. The greatest results were as fol-lows: Munroe Champion, 715; Rochester Rose, 685; White Elephant, 592, and St. Pat-rick, 598. The land was an average patch for this valley.

for this valley.

It is understood that the owners of the Overton rairoad are now ready to purchase the right of way, and a surveying party has been engaged for several days establishing the line. Instead of running the new road to Pueblo as was first intended, the plan now proposed is to connect with the Denver & Rio Grande at Edea. This makes the entire length of the new road but two miles. The Rocky Mountain Oil company will be the owner of the road, and the object is to facilitate the shipping of its products from its refinery direct throughout the west. from its refinery direct throughout the west.

WORLD'S FAIR PRICES TO BE MAINTAINED

Reductions that Will Remain in Effect for an Indefinite Period-Passengers Will Benefit by the Misunderstanding of the Roads.

CHICAGO, Oct. 26.-The transmissouri lines have agreed that they will not abolish the cheap World's fair rates west of the Missouri river until the transcontinental lines agree to a restoration of rates to the Pacific coast. The following reduced rates will remain in effect for an indefinite period: From Missouri river points between Kansas City and Council Bluffs, inclusive, to Denver, Colorado Springs and Pueblo, in both directions, \$10.75; Sioux City and the same points, both directions, \$12; lower Missouri river points and Trinidad, both directions, \$12: Council Bluffs and Trinicad, both directions, \$15.15. Sioux City and Trinidad, \$16.25; Colorado common points and Utah common points, both ways, \$16; Missouri river and Utah common points both ways, \$25 first and \$18 second class; Missouri river and Portland, Spokane, Helena and Butte, \$25 first and \$18 second ciass. All these rates will be used by these lines east of the Missouri river as basing rates. From the Missouri river to Califorspin common points the selling rate will be \$50 and the basing rate \$44.30.

The Cincinnati and St. Louis Passenger association has agreed to make the following rates from Cincinnati for selling and basing purposes: Kansas City, Leavenworth, Atchison and St. Joseph, \$12; Denver, Colo-rado Springs and Pueblo, \$19.50. These rates will be in effect from October 27 to November 15.

The report that the Union Pacific had agreed to a conference with a committee of the Western Passenger association on the immigrant question is incorrect. The committee has not received a reply of any sort to its communication, and there is, there-fore, no immediate prospect of a conference being heid.

UTT IS A STAYER.

Walting in Chicago to Hear the Decision of a Railway Official.

Commissioner Utt of the Commercial club is a good deal of a fighter. That much has been developed in his conduct of the case against the Rock Island and other roads maintaining the bridge arbitrary to the detriment of Omaha and the benefit of Council Bluffs. For ten years Omaha has borne the incubus of the 5 cent arbitrary with as much grace as it could consistently, recognizing the unjust discrimination which has been maintained against a city doing three times the business that Council three times Bluffs does. With Commissioner Utt's advent came a

determination to change this condition and put the two cities on an equality, but President Cable of the Rock Island and Traffic Manager Sage were bombproof, and after they had decided to absorb the arbi-trary gave the Council Bluffs jobbers to understand that there would be no change in derstand that there would be no change in the situation that has obtained for a decade. Although temporarily disabled in his fight for a principle Mr. Utt decided to try the interstate commission, with the result that they declined to interfere unless complaint was filed in the ordinary manner.

Then as a last resort the commissioner

asked for an interview with President Cable and Mr. Sage, but was put off until last Monday, when Messrs Utt, John S. Brady and Euclid Martin, a committee from the Commercial club, had a task with Mr. Cable and Mr. Sage regarding the situation, going over the history of the arbitrary and its unjust discrimination. What the result of the interview will be is problematical, but Mr. Cable evidently is giving the matter serious consideration as Mr. Utt.instead of re turning from Chicago yesterday, as expected will wait to receive Mr. Cable's decision on Saturday, the president of the Rock Island having intimated that he would be ready to

render an opinion on that day. tive committee received a letter from Mr. Utt vesterday morning which, white entirely nor committal, Mr. Gibbon thought might be regarded as hopeful. "One can't tell which way the cat is going to jump," said Mr. Gibbon, "and it is best to keep silent until the matter is finally settled."

RAILROADS IN COURT.

Judge Shiras Will Hear the Sloux City In-junction Case at Des Molnes Today. DES MOINES, Oct. 26.—[Special Telegram to THE BEE.]-In the federal court here today J. Kennedy Tod & Co. of New York moved the dissolution of the injunction restraining the selling of \$3,000,000 worth of bonds of the Sioux City & Northern and the Pacific Short Line roads. Judge Shiras set

the hearing for tomorrow. In the case of C. H. Pierce against the Juion Pacine Railway company Judge Shiras directed a verdict for defendant com-pany. The suit was for \$20,000 damages for the death of a son of C. H. Pierce, who, while in the employ of the company, was ill in the railway hospital at Ogden, U. T., and

escaped and was drowned. The court held the railway company was not negligent. In the district court here today the Na-tional Park bank of New York began suit against Frank H. Peavy to recover \$42,000 loaned on eight notes from the Stoux City Street Railway company. Peavy represented that he owned \$274,000 of stock in the company, but plaintiff alleges it was watered and valueless, defendant not having paid anything for it.

Refused to Carry Liquor in Kansas. Topeka, Oct. 26.—The first instance of a railroad refusing to convey intoxicating liquors was reported to the Board of Railroad Commissioners today. The Kansas City Importing company sent a half barrel of wine over the Union Pacific, which at St. Mary's was to be transferred to the St. Joseph & Grand Island road. The agent of the Grand Island at St. Joseph refused to accept the wine for shipment, saying the state prohibitory law provides that any common carrier shall be guilty of a misde-meanor who transports liquor which is sold in violation of the law. The Board of Kail-road Commissioners is unable to force the Grand Island to carry the wine and it will be returned to Kansas City.

PHILADELDHIA, Oct. 26 .- The earnings of the Pennsylvania road on all lines east and west of Pittsburg for September, 1893, as compared with the same period last year, shows a decrease of \$105,404, and for the nine mouths to date a decrease of \$404.923. The earnings of the lines west of Pittsburg for the same period show a decrease of \$55,931, and for the nine months a decrease of \$223,306. On the lines cast of Pittsburg the gross earn-ings show a decrease for the month of \$703. 514 and a decrease in expenses of \$508,110. The gross earnings of the western system fell off \$411,637 during the mouth, while the

expenses decreased \$655,284. St. Louis, Oct. 26.—The St. Louis & San Francisco railroad announces a cut in rates from St. Louis to all stations in Texas, taking Texas common point rates on the Santa Fe system. The new rates are effective October 30 and include agricultural implements, liquors, baking powder, furniture, molasses, iron structural material, machinery, packing house products, rails, wagons and numerous other articles. Rates from points in St. Louis territory and from points in the defined territories will be made the sum of locals through St. Louis or East St. Louis. The Missouri Pacific Iron Mountain lines and the Cotton Belt, St. Louis Southwestern

line, will probably meet these rates at once. Washington, Oct. 26.—The Interstate Commerce commission today, in an opinion by Mr. Knapp, announced its decision in the case of Phelps against the Texas & Pacific company in favor of the complainants.
