Shorts Yesterday Helped Strengthen the Wheat Market.

WIDE FLUCTUATIONS IN THAT CEREAL

In Corn There Was Just a Fair Business and that Principally Local-At the Upturn Offerings Were Considerable.

CHICAGO, Nov. 2 .- Shorts today helped the wheat market to pick up when it was apparently going to pieces, and on good exports wheat closed %c higher than on Tuesday. Corn improved on light receipts and closed Me higher than on Tuesday. Provisions

were very dull, but prices were higher. Wheat started about the same as Tuesday's close to lac lower, then rallied from He to he, which was followed by a decline of ic, again became strong and advanced ic, eased off and the closing was about 1/4c from the top figures. The strong opening was attributed partially to the final ending of the silver fight and to rather liberal buying on the part of the speculators. Some of the buying was presumably on long account, but the short interest covered freely. The advance brought rather free selling later and with lower cables, heavy receipts in the northwest and comparatively small clearances prices were forced back to the lowest point of the day. This was fol-lowed later by another sharp advance, at-tributed to good export buying at the sea-board, some twenty-one loads being reported taken, of which 100,000 bu, it was rumored, were for Lisbon. At the same time Minneapolis houses sent messages saying re-ceipts there will surely fall off after the

In corn there was just a fair business, and In corn there was just a fair business, and that principally local. The feeling was strong early. Opening trades were at from let to he advance and after selling down a fraction, sold up from he to he more. At the upturn the offerings were considerably increased, being led by one of the larger whitmens and prices broke from he to he shippors, and prices broke from %c to %c, rallied from %c to %c, ruled steady and closed from %c to 4c from the top.
Oats experienced a fair trade early, but later quictness prevailed. The feeling was stronger and prices advanced from lac to %c

from Tuesday's close and finished with a gain ot 14C.
On the opening strength of wheat provisions started firm, but with very little trading. Later, when wheat had its midday slump, there was an easier feeling, but business remained dull whether the tone was firm or weak. Compared with last night pork closed 2215c higher; lard, 5c and

FLOUR OUTPUT.

Last Week's Work of the Minneapolis Mills -Condition of the Market. MINNEAPOLIS, Nov. 2.—The Northwestern Miller says: There was a slight increase in the flour output last week, owing to an additional mill being in operation: 229,740 bbls, were ground, averaging 25,257 bbls, daily, against 225,340 bbls, the week before and 226,025 bbls, for the corresponding time in 1892, and 208,930 bbls, in 1891. Last week the sales of flour nearly coualed the output. Prices were advanced to meet the increased cost of wheat, but are back at the former point. Foreigners were not influenced by the strength in wheat, and with millers temporarily asking more for flour, the selling for export was reduced to very small limits. The heavy break in wheat yesterday stopped what orders were coming in and left the market very flat. flour output last week, owing to an additional

Minneapolis Wheat Market.

Minneapolis. Nov. 2.—The market was temporarily strong in the morning, with a moderate rise in sympathy with other exchanges. The local situation was weak, as the wheat arrivals here were large and also in the interior. It is claimed the cause of the

present large receipts is that the farmers have notes to pay November I, and that this sourt is to meet that requirement. On the other hand, it is said that now that the weather has turned cold so that the farmers cannot plow, they will haul grain to market more freely than before. In some places in the northwest the wheat is well marketed; in others the movement is just fairly begun. There is an necumulation in the country elevators this week despite the large marketings, that promises to reach about 300,000 bu. December wheat opened at 58%c and closed at 58%c; May opened at 64%c and closed the same; in store closed at 60%c for hard, 58%c for No. 1 northern; on track, 61e; 50c and 57e for hard, Nos. 1 and 2.

New York, Nov. 2.—The Post's London special says: The Bank of England's reserve decreased this week £840,000, of which £717,000 was gold exported, £317,000 of which £717,000 the continent, £200,000 of Egypt, and £200,000 presumably to America. There were no gold operations today. The price of bar gold declined to 77s 114a. Silver recovered to 32d on China and India buying. Runee paper is £554d. American securities were dull, with Louisville & Nashville flat and closing at the lowest. Leading English holders are disgusted with the action of the directors in acquiring the Chicago Southwestern line. There was generally a good feeling in consequence of the African success, but speculation was still restricted.

New York, Nov. 2.—The practical abandonment of all talk of a recess by congress has renewed apprehensions regarding tariff legislation, and while there has followed the passage of the silver repeal bill a marked improvement in the dry goods market there is now considerable hesitation seen, and the return of widespread prosperity has become once more a matter of doubt. Prints and printed fabrics are in fair demand. Ginghams and woven fabrics are fairly active and steady. There is a fair Jobing trade at firmer prices. New York Dry Goods Market.

STOCKS AND BONDS.

Speculation Yesterday Was Largely in the Hands of Professionals. New York, Nov. 2 .- The speculation today

was largely in the hands of professional traders and the bear contingent was in control during the greater part of the day. Inasmuch as the general conditions are generally favorable, operators for a decline resisted stoutly the efforts to depress prices, but as there was no very strong buying at any time the sellers gained the mastery and as a result of dealings in the active stocks the specialties, with but few excepstocks the specialties, with but few exceptions, recorded declines extending to 27% per cent in the general list. The heaviest depreciation was in National Cordage preferred, which sold down 111% per cent to 52, the last previous recorded sale having been made at 631% October 17. The depression in these shares was due to the announcement that a majority of the first mortgage bondholders having agreed to accept 5 per cent guaranteed preferred stock in exchange for their bonds, the projected issue of this class of stock would be made, thus making the existing preferred stock a less desirable se-

American Cotton Oil common dropped 51, per cent and the preferred 2 per cent on the publication of the company's annual state-ment showing a large decrease in the net ment showing a large decrease in the net profits of the fiscal year. Rumors to the effect that the earnings of the Burlington would not justify the declaration of the usual quarterly dividend at the meeting next week, were used with the effect of depreciating the shares 2% per cent. Louisville & Nashville was hammered down 3% per cent on reports that a considerable number of stockholders, foreign and American, were opposed to the proposed action of the directors in the purchase of the Chesapeake, Ohiz & Southwestern. New Jersey Central directors in the purchase of the Chesapeake. Ohio & Southwestern. New Jersey Central declined 2% per cent; Sugar, 2% per cent; Chicago tias, 2% per cent; Pittsburg & Western preferred, 2 per cent; Reading and General Electric, 1% per cent; Distilling, St. Paul, Union Pacific and Western Union, 1% per cent; Rock Island and Missouri Pacific, 1% per cent; Northwestern, 1% per cent.

In exception to the general depression American Tobacco rose 21, per cent; Toledo & Ohio Central preferred, 3 per cent, and Toledo & Ohio Central preferred, 3 per cent, and Toledo & Ohio Central common, 5 per cent. The Post says: The prices on the Stock exchange went down again today pretty nearly to the extent of yesterday's raily. Professional sellers were active all day, basing their sales on the belief in liquidation by needy outside shareholders now that the silver controversy is settled. The decline began with Louisville stock, in which the early break in London market bore plain enough ear marks of New York nanipulation. Nothing, indeed, could well be more untrustworthy as an indication of the foreigners' attitude of the speculative London market. The close was irregular.

No doubt it will strike many observers as a fresh market inconsistency that on the day when our government's silver purchases have at least been stopped the price of silver should advance 2c per ounce. Such, at In exception to the general depression

have at least been stopped the price of silver should advance 2c per ounce. Such, at any rate, was the result of today's transactions. The recovery, indeed, was actually rather larger.

Yet today's movement in the silver market is neither more inconsistent nor more mysterious than Tuesday's movement in

stocks. In both the CGange of prices immediately preceding it not actually over done, had been at least decidedly too rapid. the decline will compare to the London stock materially, as was thought to be probable it is hardly thought the decline will compare to the London bullon dealers have learned a lesson since that time and are now aware that with a constant and heavy oriental demand for silver it is not safe to let their bullon stock run low without a supply of bullion stock run low-without a supply of forward contracts. OMARA LIVE STOCK MARKETS. Cattle Trade firm Under Light Receipts-

Hogs Open Active and Close Weak. THURSDAY, Nov. 1. Receipts so far this week compared with last show a decrease of 3,000 cattle, 4,000 hogs and 1,500 sheep.

The fresh supply of cattle was considerably heavier than a week ago, but the offerings of really desirable beef grades were decidedly limited. A better tone to eastern advices and some demand from outside butchers in addition to the usual good local demand caused a general strengthening of values and sellers with anything that buyers wanted found the market a very satisfactory one. One bunch choice 1633-1b. beeves found a ready purchaser at \$5.10, but aside from these there were scarcely any cornfed cattle in the yards. Buyers paid from \$3 to \$3.35 for fair range beeves, but the generally common quality of the offerings made the trade anyquality of the offerings made the trade anything but brisk. Everything at all useful,
however, changed hands before the close.

The cow market was in very fair shape.
Offerings were not overly liberal and with a
good general demand it did not take very

Hoos—There was only a moderate run of hogs, and no material change in the general quality of the offerings. With eastern markets higher, and only a limited supply on sale, sellers were melined to ask higher prices at the opening. Fresh meat men were active buyers, and there was a limited inquiry from packers, although Cudahy was rather indifferent, having received ten loads from Sioux City, which he bought there Weanesday, and bought cheap. There was a limited prices here were too high in comparison with other western markets. Early trading was quite brisk and at prices all of 10c higher than Wednesday. Good to prime heavy and buther weight hogs sold at \$5.85 and \$5.95. Less favorable reports from the east and the filling of urgent orders c, used a rather weaker feeling to obtain as the morning advanced, and the late trading was dull with the early advance about all lost. Packers had the field to themselves and bid from \$5.90 to \$6 for good hogs. Sellers were stubborn and at the close there were several loads still in first hands. The advance was not so marked as if ills. The advance was not so marked as if there had been no prospect for unusually large receipts tomorrow. There was a good demand for eastern account and such offerings as were fit for such use were promptly turned over at prices from 10c to 15c above Wednesday. Extra 1,500 to 1,700 lb. steers are again quoted up to from \$5.65 to \$5.95, which is as high as prices have reached since last spring. There were a number of trades around \$5.50 and the bulk of native steers sold above \$4.25. Native cartle comprised less than half of the supply, there being about 4,500 westerns and 2,500 to 3,000 Texans. The market for westerns was not much more than stendy. Texans were firm. There was an active demand for feeders and there was a stronger market for useful sorts. Good to choice yeal calves also showed increased strength.

The firmness developed toward Wednesday's close in hogs was continued. Purchasers
