ECHOES OF THE SILVER DEBATE.

A correspondent addresses a lengthy letter to THE BEE requesting consideration of several questions bearing upon the recent silver discussion and confessing that notwithstanding the prolix speeches, articles, debates and so forth which have appeared in the daily and periodical press during the entire summer...

In the first place we are asked whether, granting that the government should not bind itself to purchase the product of any person, community or state, suddenly abolishing such a policy would not have been inflicting an unwarrantable hardship upon the industries which had been led to look upon that patronage as a sort of vested right.

DEATH OF EX-SECRETARY RUSK.

Although it has been known for some time that ex-Secretary Rusk was suffering from a serious illness at his home in Wisconsin, the encouraging reports that have been daily given out makes the announcement of his death seem sudden and almost startling in its effect.

This much can be said of the dead ex-secretary of agriculture, that he did not succumb to the inevitable until after he had completed a fairly well-rounded career. Born in Ohio, but from early manhood a resident and citizen of Wisconsin, he devoted the best years of his life to the interests of his fellow and the public service of his state and nation.

MEDICINE MEN OF THE APACHE.

The ninth annual report of the bureau of ethnology rendered to the secretary of the Smithsonian Institution, contains a monograph of 180 quarto pages by Captain John G. Bourke, Third United States Cavalry, on the Medicine Men of the Apache.

One by one additional defects in the city hall building are coming to light and each one goes to support the position of Mayor Bemis in relation to the contracts with the architect and builder.

CONGRESS WILL NOT SUPPORT CLEVELAND.

Policy of the Administration in regard to Hawaii leads the Illinois Statesman to make some statements concerning the future.

It is understood that the administration of President Harrison was responsible for the deposing of the queen, and the publication of Blount's report only adds emphasis to the deplorable part this administration has attempted to play.

SHELBY M. CULLOM ON GROVER.

Senior Senator from the Sucker State Promises the President a Rebuke.

When THE BEE correspondent today informed Shelby M. Cullom, who is one of the oldest and most influential of the republican senators, that it was the purpose of the president to send all of the correspondence and reports which had been made upon the Hawaiian question to congress and await authority for an extreme step, the distinguished Illinois statesman said:

PATENTS FOR WESTERN INVENTORS.

Patents were today issued to Nebraska and Iowa inventors as follows: Orlan A. Farley, Craig, windmill governor; Burton A. Carr and C. H. Bradricks, assignors to National Railway Signal company, Omaha, automatic railway electric signal; Henry O. Thomas, Kimball, assignor of seven-tenths to L. Meas, Chicago, Ill., hand truck; George W. DeLoe, Des Moines, assignor to Diamond Car Company, Chicago, Ill., car coupler; Emil Einfield, Davenport, wheel cultivator; Elias E. Peaching, assignor of one-half to J. A. Leclair and A. W. Vanderveer, Davenport, sliding door lock; George W. French and E. Einfield, Davenport, cultivator; Caspar Guikel, Jefferson, Iowa's measure; John L. Hancock, Sioux City, surgical needle holder; Joel D. Harvey and H. D. McNeil, Des Moines, traction wheel; Squire Heberling, Des Moines, jewel sizer; W. Vanderveer, Davenport, sliding door lock; station; Isidor Metzger, near Winfield, journal boxing and bearing for thrasher.

Senator and Mrs. Manderson are visiting Mr. and Mrs. Dike, friends in Brookline, N. Y. E. Shorter, New York, arrived on Sunday from next Sunday. They will return to Washington just in time for the opening of congress on December 4.

WHITELASH seems to be the order of the day for all public officials who are delinquent in their duties.

To suit the whims of some of his critics the president ought to go over to Hawaii at once and assure himself personally of the truth or falsity of his commissioner's report.

The republicans of Lancaster county have a perfect right to jubilate. They omitted, however, to recognize the efforts of the B. & M. road in behalf of that decisive republican plurality in Lancaster.

An international petroleum trust is the next thing on the slate. Without an international tribunal to interfere with its operations an international trust would probably be free to squeeze its patrons to the utmost limit.

REPORTS continue to come in from many of the interior cities of Nebraska to the effect that business in all lines is increasing in spite of the unfavorable conditions brought about by a short crop and depressed prices for all lines of farm products.

FOR A state that been absolutely ruined by populist supremacy Kansas makes a pretty good showing. Reports to the comptroller of the currency indicate that the banking indebtedness of the state has decreased \$13,000,000 since January 1.

ENGLAND, already the greatest naval power in the world, has ten new battle-ships nearly ready for commission. Like the other continental powers England is forced by circumstances to maintain a war footing. The dream of universal peace lacks a great deal of realization in Europe.

The people of Plattsburgh demonstrated their adherence to the principles of law and order by their quiet demeanor during the brief space of time in which they held the Weeping Water murderers in their keeping. Judge Lynch holds no session in Cass county at present.

The little republic of Guatemala has raised herself in the esteem of the greater powers of the earth by abolishing a last relic of slavery. The emancipation goes into effect next March, and another step looking to the dedication of the American continents to perpetual freedom has been taken.

DENVER is just now engaged in a conflict with franchised corporations. The council there is standing up for the interests of the taxpayers. In Omaha the council is in league with the corporations. The time will come when no franchise can be granted by the city of Omaha until ratified by a vote of the people.

THERE is nothing at all creditable to the Lehigh managers if the report be true that they have employed detectives to mingle among the strikers in an effort to induce them to commit acts of lawlessness against the company's property. Such tactics will only create a stronger public sentiment favorable to the strikers.

The National grange is out with a resolution in favor of granting to women the same privileges at the polls which are granted to men. This, together with the success of the woman suffrage constitutional amendment in Colorado, ought to re-sensitize the attack in Kansas and infuse new life into the waning movement for equal political rights in New York.

COMPARE the make-up of the Board of Education investigating committee with the record of eyes and nose on the various motions made in relation to the charges preferred against Superintendent of Buildings Macleod in the board meeting and you will have no difficulty in learning the attitude of the majority of that committee toward the questions it is to investigate.

The melancholy intelligence drifts this way from Washington that the advocates of free silver coinage are preparing for another terrific onslaught upon the prosperity of the country in the coming session of congress. These people do not seem to realize that the country has rejected their ideas as not in accord with the favorable development of commercial prosperity.

The people of the United States will naturally commend the action of the administration in ordering the release of the Russian exiles who escaped from the mines of Siberia only to fall into the hands of the authorities of this country. There is unquestionably a strong sentiment in this country against the imprisonment of men for their political opinions and the administration has emphasized this idea in the strongest possible manner.

FOR AN OPEN INVESTIGATION.

The property and buildings committed of the Board of Education, composed of Messrs. Eglington, Smythe and Morrison, has proferred formal charges against Sam Macleod, superintendent of buildings. These charges allege irregularities, mismanagement, incompetency and abuse of authority.

LET us have open sessions of the Macleod investigating committee. If the superintendent of buildings is as guiltless as he contends he is the light of day upon the testimony to be brought before the committee will not be able to besmirch his spotless record.

THE interstate republican jubilee down at Lincoln jubilated without the interstate feature that had been so extensively advertised. The fiery enthusiasm proved harmless, however, since a downfall of rain prevented the spreading of the sparks.

GOTHAM exports are unable to say which was the greater attraction at last week's horse show—the horses or the people who attended. The management is said to be seriously thinking of having a horse show next year with the horses left out.

Information Wanted. Globe-Democrat. The country would like to know whether Mr. Olney's action with regard to the affairs of the Union Pacific railway is being taken in his capacity as attorney general of the United States or as consulting counsel of the Chicago, Burlington & Quincy railroad.

On the Defense. Rocky Mountain News. THE OMAHA BEE grimly remarks that by the election of a railroad corporation ticket a year the republican party has decided to fight a defensive campaign in 1894. It will have to defend the record and shortcomings of the Lincoln state house ring.

How It Came About. Denver News. When the returns are all in it will be interesting to make comparisons with the vote cast in 1892. There will be little old party jubilation when the enormous falling off in the vote is estimated. It was not the increase in the republican vote which gave republican majorities, but it was the disgruntled silver democrats who stayed at home rather than vote to endorse Cleveland.

The Great Unsettling. St. Paul Pioneer Press. The country breathes a sigh of disappointment mingled with relief as it learns from Mr. Clarkson's own lips that he is not a candidate for senator from Iowa at the coming election. He has decided to decline to accept the nomination of the republican national committee after President Harrison had intimated that he would not be acceptable in that capacity. It was a short time ago, we believe, that Mr. Clarkson told the country that the next senator from his state ought to be a young man and represent that element of the party. Nobody seems to have discovered the drift of the remark, and rather than not to have anything said about it at all, Mr. Clarkson voluntarily thrusts aside the senatorship that has not been offered. He has probably refused more honors, which never came within his reach than any other politician in the country; and he will not be forgotten as long as there is anything to decline, and a press news item next by into whose ready ear he may pour the tale of his unassailable sacrifices.

THE BEE appeals to the special committee of the board for a fair, open investigation.

The assistant attorney general affirms the ruling that excludes the bogus bond investment companies from the use of the United States mails in the furtherance of their fraudulent schemes. This, however, will not drive the bond swindlers out of business. As long as there are dupes to be had they will find other means to operate, provided the state courts do not put an end to their existence. That they are constantly violating state laws is the opinion of every member of the State Banking Board. Are they to be left undisturbed to prey upon the weak and the unwary?

IN ORDERING a row trial of the suit which William R. Laidlow brought against Russell Sage for \$50,000 damages for serving the millionaire as a shield against the deadly effects of the bomb thrown at him by the crank Norcross last winter, the court of appeals of New York says down some interesting rules for the guidance of inferior tribunals in cases of this kind. It says that if the defendant as much

PEOPLE AND THINGS.

Heredit counts. George Gould trapped a bear. France has materially modified its bear movement. It is difficult to convince the average clubhouse boarder that "all fish is grass." The amount of kicking going on accounts for the alarming increase of oedycal abscesses. So far as known Willis' mission was boosted. The boots were reserved for the administration. The Hawaiian national dish is "poi." That fact throws an electric light on democratic banking.

Among the exhibits at the horse show in New York local papers note and picture "the fine action" of horse girls. Admiral Melio is in a position to console with Cleveland. Both uttered monarchical sentiments, but neither materialized. The antagonizing industry in Chicago has not made known its position on the tariff question. That's one of the secrets of the business.

Among the unperfected down east Bill Wilson is developing into a Moses. Bill sports a large, jelly bar! in addition to other qualifications. Ex-President Harrison will be the guest of the longest and most important dinner of the evening of December 1. It is the purpose of the league to make the reception a brilliant affair.

Prof. Garmer went into the bowels of the earth for a practical demonstration of monkey talk. The mission was wholly unnecessary. Congress had an extra session. The operations of the sisters of the Midnight Band of Cat Killers has created no little apprehension in musical circles in New York. The tenderloin district is sorely afflicted.

The Chicago crank arrested in Boston, who has been writing poetry to Helen Gould, thought his literary genius would be applauded at the Hub. Thus does Boston's Browning cut out a shadow far and wide. Governor McKinley has accepted an invitation to be present at the dinner of the Home Market club of Boston, November 24. Ex-Senator Reed is Governor's client in the case of Iowa and Greenhalge of Massachusetts are also expected.

Astley much affected by the younger members of congress, particularly those from the south, is to wear low-cut vests with expansive shirt-fronts, Prince Albert coats, broad-brimmed soft hats and smooth-shaven faces. Bailed up the most and goodliest of them are conspicuous examples of these statesmen who have adopted this kind of garb.

An athletic club has been organized by the young men of Gorin. The Carman Baptists of Culbertson have dedicated their new church. There were fifty-seven cars of stock shipped from Burwell during the month of October. Rev. O. G. Brande has accepted a call as pastor of the Pierce Congregational church for another year.

Two Crete young men have applied for a patent on an automatic horse feeder, which they claim to have invented. The 14-year-old son of H. A. Van Housen, residing near Gretnah, had his leg broken in two places by a horse falling on him. Horses now propel the street cars between Norfolk and the Omaha factory, because of a breakdown in the electrical machinery.

An educational convention for northwest Nebraska will be held at Chadron, December 2 and 3, and many prominent educators will be present. A campfire entertainment is to be given by the Valentine Grand Army post and the Women's Relief corps Thanksgiving night to raise funds to care for the poor and needy. Blood poisoning, resulting from a "ring around" on her thumb, necessitated the amputation of the right arm of Miss Foster, teacher of chemistry in the Beatrice high school.

A young man named Wilke, living a few miles east of Crete, climbed a tree to drive out some chickens that were nesting there, near a limb broken and he fell to the ground, breaking both bones of his right forearm. According to the Rushville News the telegraph operator at the Elkhorn station had been so intoxicated while on duty that it was necessary to hold two passenger trains for some time until a man could be found to take the necessary orders.

The Lincoln Journal Sunday made a great effort to reach the Grand Island people and get a chance to preach the railroad gospel to them. A lot of hired boys early in the morning cried out its Sunday edition and proved the liberal mind of the Journal by distributing hundreds of copies of the paper free of charge. The Journal has in former time made repeated efforts to get a foothold in Grand Island, but never succeeded.

Highest of all in Leavening Power.—Latest U. S. Gov't Report.

Pay to get in. And, as a usual thing, you won't have to pay to get out. We won't charge you a cent to get in our store, though it may cost you something, but not very much, to get out. We won't bleed you—we don't do that kind of business. The best suits made, for \$10. Tailors don't make any better clothes than our \$20 to \$25 suits or overcoats. They certainly don't make them fit any better, and everybody says they don't wear any longer. Saves from \$15 to \$25. What a whole lot of circuses you could go to, or better still, what a lot of underwear you can buy—our \$1 kind is 75c now, for a few days. Save enough on underwear to get a pretty good hat of us. We're the best hatters in town.

BROWNING, KING & CO., Largest Manufacturers and Retailers of Clothing in the World.

BROWNING, KING & CO., Largest Manufacturers and Retailers of Clothing in the World.

Pay to get in. And, as a usual thing, you won't have to pay to get out. We won't charge you a cent to get in our store, though it may cost you something, but not very much, to get out. We won't bleed you—we don't do that kind of business. The best suits made, for \$10. Tailors don't make any better clothes than our \$20 to \$25 suits or overcoats. They certainly don't make them fit any better, and everybody says they don't wear any longer. Saves from \$15 to \$25. What a whole lot of circuses you could go to, or better still, what a lot of underwear you can buy—our \$1 kind is 75c now, for a few days. Save enough on underwear to get a pretty good hat of us. We're the best hatters in town.
