WHAT WAS ACCOMPLIENED LAST EVENING

Full Attendance and Free Discussion of the Matter-Question of Authority Settled -Stenographers Employed to Report the Trial-Rules Adopted.

A meeting of the committee appointed by the Board of Education to investigate the official acts of Samuel Macleod, superintendent of buildings, was held last evening. Messrs. Akin, Duryen, Pierson and Thomas of the committee, Messrs. Morrison and Elgutter representing the committee of the poard on buildings and property and Mr. Burgess of the board were present.

Bids were opened for doing the stenographic work that would be required, and the job given to Boyles & Babb, the lowest bidders.

A long discussion then followed as to how the committee should proceed. It was the general opinion of the members that under the statute they were a court and should sit as a court, but Mr. Eigutter desired that something more specific be laid down. He said that the committee on buildings and property had certain charges to make against the official conduct of the superintendent, but before those charges were filed it wanted to know under what rules the investigation would be conducted, how testimony would be introduced, how witnesses would be examined, and whether each side would be allowed counsel.

Dr. Duryea said that inasmuch as the committee would sit as a court, the rules of evidence as followed in a court of law should be adhered to. The attorney of the board should act as a legal assistant of the investigating committee and should crossexamine witnesses, and the superintendent of buildings should request the aid of counel and the committee should give it to

This was not entirely satisfactory to Mr. Morrison, who stated that a criminal pro-ceeding was not contemplated. The members of the committee should sit as business men to determine whether or not an em-ploye of the board had performed his duty properly. He believed that if strict legal rules were adopted much important testimony might be ruled out on technicalities. He thought the com-mittee would not go amiss in adopting the method of procedure employed by the city council in conducting the Furay investiga-

Mr. Thomas said" it would be the aim of the committee to go to the bottom of the matter, and rules would be adopted that would be fair to all parties and would not exclude evidence that the committee should have. Dr. Duryen's Idea.

Dr. Duryea said that the committee on buildings and property might have presented to the Board of Education in ex-ceptive session any facts in its possession seeming to reflect on the superintendent of buildings. The superintendent might then have been called in and results reached that would determine the action of the board; but now charges had been made public in the newspapers, and Mr. Macleod, brought into this plight, had asked an investigation. Now if the committee did not proceed in the regular way people might say in the end that Macleod was not properly acquitted or properly convicted, as the case might be. It had also been charged that the committee had been made up by the president in par-tiality to Macleod, and had, indeed, been denounced as a committee pre-determined to whitewash. Therefore he thought that the committee should put itself in such a position that its verdict when found should have all the value and weight of a verdict of a legal court. If the charges had been made in executive session he would agree with Morrison as to the kind he would agree with Morrison as to the kind of rules that should be adopted for the admission of evidence, but now it was a more serious matter. While not partial to Macleod and while he might in the opinion of some people be justified indeed in striking back at Macleod for certain zealous work that he did in the ranks of a certain secret society to the end of defeating Dr. Durvea as a candidate for membership Dr. Durvea as a candidate for membership on the school board, still the doctor contended that Macleod's case should not be tried in the newspapers nor made a case of whitewash. Therefore, strict rules should be adopted. At first Dr. Duryea was not in favor of drawing up rules for the conduct of the investigation until charges had been pre-

Question of Authority Discussed.

At this point a remark made by somebody raised the question whether the committee under its instructions from the board was empowered to render a verdict. Mr. Elgutter stated that it was to make a finding only respecting the facts, leaving the board to determine the verdict. He was reminded by Mr. Thomas that this was voted down by the board and that the committee was empowered to render a verdict. Mr. Akin said that he was not certain

what rules would be adopted. He expected to have the attorney of the board at his right hand during the taking of testimony, but who should act as prosecuting attorney had not entered his mind.

Mr. Morrison then wanted to know whether the charges would be considered as coming from the committee on buildings and property or from the board through that committee, or whether the attorney of the board would act on behalf of the board. If they should be considered as coming from the committee how would it get an attorney?

These inquiries brought into prominence a question that had been overlooked and conerning which the committee was for a time in great doubt, and that was what attitude those making charges were in and what attitude the committee was in respecting both Macleod and those making charges against him. A reference to the request of Macleod for an investigation showed that it called for an investigation of his official acts, not of any specific charges that had been made. This, as interpreted by Dr. Duryea, meant that at Macleod's own invitation the board had become his prosecutor, though the prosecution should be an amicable one, and now the committee acting for the board might invite any members of the board pres-ent to furnish it with information respecting alleged improper conduct on Macleod's

part. Mr. Akin suggested the question whether Macieod by asking voluntarily for an inves-tigation did not throw himself on the board for protection, which it was bound to extend, so that it was not a prosecutor, but those were prosecutors who made charges. Dr. Duryea thought not. If Macleod had

kept still, then those pressing charges against him would be in the attitude of presecutors, but by asking for an investiga tion he had relieved the committee on build-ings and property of responsibility for the charges and its members could now be called as the assistants of the board in getting at the facts.

As Members and Not as Individuals.

Mr. Et and Mr. Morrison gave the committee expressly to understand at this point that they had as individuals no charges to make against Macleod. As members of the committee on buildings and property they were ready to submit some facts tending to show that Macleod was an unfaithful servant of the board—facts not to be urged by them personally, but to be investi-gated by the board and in the name of the

Dr. Duryea then moved that, in view of the duty laid on the committee by the board, it invite the committee on buildings and to furnish any facts in its sion, so that the committee might get at them and report to the board.

Mr. Figutier said that the committee, be-fore charges were preferred, wanted to know der what rules the investigation would be

Mr. Thomas thought that had been talked over sufficiently for Mr. Elgutter to get the

air. Elgutter then submitted a set of rules Air. Elightfer then submitted a set of rules similar to those used at the city conneil investigation. They stipulated that the investigation should be in the name of the Board of Education regarding the official acts of Macleou; that charges should be made and then a reply, and then twenty-four hours be given for those complaining to make amended charges. Then evidence on both sides should be introduced, either side

having the right to question and cross-

Adopted the En es. Mr. Thomas was opposed to the adoption of these rules. He believed charges should be preferred before rules were adopted. Another objection was that the attorney for Macleod had not had an opportunity to see the rules. He further contented that the investigation should not run in the name of the heart was allowed and the beart was allowed. the board regarding the acts of Macleod and he declared that it was not fair for the com-nittee to adopt rules drawn up by those

making the charges.

Mr. Pierson was inclined to take Thomas Mr. Pierson was juclined to take Thomas' view of the matter, but when both Mr. Elgutter and Mr. Morrison said that unless rules were adopted no charges would be made nor would they be unless the proceedings against Macheod ran in the name of the board. Dr. Duryea, who had from the first considered the rules fair, urged that every reasonable concession should be made to those ready to furnish information, and Mr. Pierson said that with a little reluctance he would vote to adopt the rules. Mr. Akin found no fault with the rules, believing them to be in conformity with the instructions given the committee by the board, and they were at length adopted, Mr. Thomas alone voting no for the reasons before given.

Then Messrs, Elgutter and Morrison filed the charges, which are practically identical

the charges, which are practically identical with those read by the committee on buildings and property at a late meeting of the board and published in The Bee. A copy of them will be handed to Mr. Macleod today and his reply will be in the hands of the committee next Monday night. The next day the taking of testimony will begin.

STATE LABOR CONGRESS.

Preparations Completed for a Federation of Nebraska Industrial Organizations. In compliance with the call issued by President Willard the executive council of the Nebraska State Labor congress met yesterday evening at the southeast corner of Twelfth and Farnam streets. Every member was present. Considerable business was transacted. After disposing of the routine business, bills, etc., new business was considered. Mr. J. M. Thompson was selected to attend the meeting of the state alliance which convenes in Hastings January 2. Invitations have been extended to all alliances in this state to send representatives to the

congress.

The following address was issued to organized labor of Nebraska:

ganized labor of Nebraska:

Headquarters of the Executive Council of the Nebraska State Labor Congress—
To Organized Labor, Greeting: It is the intention of the Nebraska State Labor congress to unite all the legitimate labor organizations in the state into one bady. To this end we call upon all industrial organizations of farm and factory workers, all trades unions, farmers alliances, and Knights of Labor assemblies and all thoughtful men and women who love liberty better than class privileges and who see in the present unequal system of distribution and rapid concentration of wealth into the hands of a few, a fearful menace to human rights, therefore we call on all industrial organizations to join us in our crusade for right and justice. The objects of the state congress are the encouragement and formation of local and central labor organizations in every city and town in the state; to assist in establishing national and international labor organizations, to encourage the labor press of our state and to help organizations generally. The next meeting of the congress will be held in Omaha the scond Sanday in January.

Each local organization is entitled to one delegate and one delegate to each 100 members or major fraction thereof, and each central labor union, and district assembly or county organization to three delegates.

We call upon you to send representatives to the Nebraska State Labor congress. Concentration is the order of the times and in order for labor to make its power felt it must be united.

with a complete organization in this state
the industrial classes can easily take care of
themselves, while without organization laboring people are more or less at the mercy of an
unjust system. This fact should tend to promote consolidation such as the State Labor
congress promises, with a view of strengthening all classes of labor. We hope to soon complete trade and mixed organizations in every
town in the state and have them all represented in the congress. With such success the
present unjust system will be easily overcome.
As we never take up a fight except it be for

Their Cast-Off Clothing Furnished the Officers a Clew-Serious Charge of a Coroner's Jury Against a Lincoln Physician.

LINCOLN, Nov. 27 .- [Special to THE BEE.] -The amateur burglars who raided the country stores in Malcolm and Waverly in this county last Wednesday and Thursday nights have come to grief. John Cox was arrested Saturday afternoon and some of the stolen goods found in his house. Today Deputy Sheriff Slonecker of Seward county arrived in Lincoln with two more of the fellows whom he had captured in that county under circumstances which preclude a possible doubt of their guilt. They gave their names as William Walters and Larsh Fender. Both men live in Seward and both seemed to spring from poverty to comparative affluence within a day or so after arrest. Deputy Sheriff Slonecker found two suits of cast-off clothing in a deserted house in the suburbs of Seward and in looking through the pockets found some letters which proved that they had formerly been worn by the men under arrest. He also found out that the new clotning worn by the men corresponded with some that had been stolen from the store at Marcolm. He accordingly placed them under arrest. Both admitted their guilt to him, but when they were arraigned in county court today both followed the advice of an attorney and entered a plea of not guilty.

The rollow also presided word from Terrors. The police also received word from Te-cumseh today that two men named Hamer-scott and Adams were under arrest there for the burglary of Loder & Son's store last Thursday night. They were captured with some of the stolen goods in their possession. Mr. Loder this afternoon failed to inden-tify the goods as those taken from his store, but was of the opinion the men were con-nected with the same gang and the probable ones that robbed the store at Malcolm the

THE BEE. |- For some time past residents of this county have been advocating irrigation as a method by which to secure good crops in this county regularly. Accordingly several taxpayers requested County Clerk Butler a week ago to issue a call for an irrigation convention to assemble in this city. The convention was called for today and in re-sponse about seventy-five farmers assembled in the court house in this city this after

The meeting was called to order and Peter Greely was elected temporary chairman. Upon motion J. P. Mullen was made permanent chairman and T. V. Golden secretary. Several speeches were made upon the subject of irrigation and the benefits to be derived therefrom. The convention adjourned to meet December 9, when it is expected that there will be a much larger attendance, and several parties who have been studying the question for some time will submit their theories. Some definite action will be taken upon the subject at the next meeting.

Machinery of the Grand Island Factory Being Cleaned Preparatory to Concluding the Season's Work-Reports from Norfolk.

GRAND ISLAND, Nov. 27 .- [Special to THE Beg 1-In about two weeks, or perhaps less, the wheels in the Oxnard sugar factory at this point will cease to go around and men will be put to work cleaning up the machinery and putting it in shape for a long rest. The last beets entered the west end of the factory this morning and the last sugar will come out of the cast end in about two weeks. Not that it takes so long to manufacture the sugar from the time the beet enters and is ground up, but a lot of syrup remaining over from last year will yet be made into sugar.

The decrease in manufacture is owing to the fact that the farmers raised less beets this year than in any previous year. Only 225 acres were furnished by farmers this season. Mr. Leavitt, who is to all intents and purposes a farmer, but who devotes nearly all his time to beet culture, raised 482 acres and the Oxnard company raised 1,185 acres.

The Norfolk factory, on the other hand, will not stop its wheels until some time in February. The farmers in that vicinity, it is said, take hold of the new industry with much greater vim, and where Hall county's agriculturists raise 225 acres the farmers doing business near Norfolk raise 1,300 acres.

Mr. Howe, however, believes that a turning point in the matter has come. The Ban correspondent was shown a table of contracts for 1804 in which are found the names of some who have in the past been crying the industry down and ridiculing it. Some of Hall county's influential German farmers are also interesting themselves in the matter and it is confidently believed that next season the factory will be able to make a much longer run.

The Steppans process of extracting sugar from syrup will be put in if the farmers take hold of the matter and this will enable the manufacture of much more of the remaining syrup than is now possible. The factory at Norfolk has this process in vogue and is for that reason, combined with the greater interest the farmers there have in the culture of beets, en abled to put out more than twice the amount of sugar that the Grand Island factors yields. The latter has been running day and night since October 11.

Unffield's Record Elsewhere. A banker named Post from Arkansas City arrived in the city yesterday, tooking after Bank Buncoer Coffield. He identified the man as being the person who swindled the man as being the person who swindled the banks in Arkana'sa City out of several hundred dollars. Coffield has also been identified as the man who swindled the Kansas City bankers and it is believed that other swindles which he prepared will soon come to light. Since his incarceration, Coffield has kept his mouth closed and will talk to no one. The officers all over the country are sending letters of inquiry to Chief Scavey about the prisoner. The Omaha police believe they have captured one of the coolest and inost expert bank swindlers who has ever operated in the western country.

ORIGINAL DESIGN BEEN TURNER NOVEMBER DE

Brings comfort and improvement and tends to personal enjoyment when rightly used. The many, who live better than others and enjoy life mere, with less expenditure, by more promptly adapting the world's best products to the needs of physical being, will attest the value to health of the pure liquid laxative principles embraced in the remedy, Syrup of Figs.

Its excellence is due to its presenting

in the form most acceptable and pleasant to the taste, the refreshing and truly beneficial properties of a perfect lax-ative, effectually cleansing the system, dispelling colds, headaches and fevers and permanently curing constipation. It has given satisfaction to millions and met with the approval of the medical profession, because it acts on the Kidneys, Liver and Bowels without weakening them and it is perfectly free from every objectionable substance.

Syrup of Figs is for sale by all druggists in 50c and \$1 bottles, but it is manufactured by the California Fig Syrup Co. only, whose name is printed on every package, also the name, Syrup of Figs, and being well informed, you will not accent any substitute if offered.

You'd Holler

If your wife traded with a grocer who threw a few handfuls of sugar into a bag and "guessed she had a pound." You'd talk scales to her.

Why not talk scales to yourself? Aren't YOU "guessing" about the circulation of some of the papers you use.

> CAUTION-There's no guess work in dealing with this paper. Our circulation's printed on the editorial page. You know what you're buying and you get what you pay for.
