TALKS ON HIS ORDER.

Governor Lewelling Gives the Reasons Which Prompted Him to Issue It. TOPEKA, Dec. 5.—Governor Lewelling's circular of executive elemency to tramps is attributed by many to be instigated if not actually written by G. C. Clemens, a local attorney with an anarchistic sentiment, who attends the anniversaries of Chicago haymarket participants. The governor, however, today said: "I have been deeply impressed with the poverty and distress prevalent. Ingalls, you know, says there are 3,000,000 men tramping. Kansas has her share. I know something of the suf-ferings of this unfortunate but deserving class. Many a night have I wandered up and down the streets of the city which a quarter of a century afterward, gave us the World's fair. I was without money for food or work to get it, subject to arrest. A short time since, I learned that many unfortunates of this class were in jail at Wichita, Newton' and other towns in Kansas, and determined to issue this order to police boards.

"My circular applies to men whose only sin is their enforced idleness and to them only. For that class the rock pile shall be abolished in Kansas so long as I am gover-nor. Men who commit offenses against society are not protected by the circular. There is no anarchy in the sentiment or in the spirit of the circular, and no fairor in the spirit of the circular, and no fair-minded man will so construe it. Many Kan-sus cities have their jails full of "tramps." and my action was intended to stop the practice of arresting men on the ground of being without visible means of support. Of course the circular affects only five cities—Topeka, Wichita, Leavenworth, Atchison and Fort Scott, but I hope the po-lice authorities of other cities will recognize its fairness and exercise the same spirit of humanity in the discharge of their duties." humanity in the discharge of their duties.

BURLINGTON EXTENSION COMPLETED

Wonderful Country Opened Up by a New Road-To Discuss the Pass Question-Rate Cutting Stopped by a Clever

Ruse-Rau Notes.

The scenic route of the northwest, as the Spearpish extension of the Burlington will undoubtedly be known, has been completed, the last foot of track being laid Monday On Thursday, a glorious day for Spearfish, the golden spike which John A. Clark bas been treasuring for seven long years was driven home by the fair hands of half a dozen representative women of Spearfish. who saw in this act a new world opening to them, hedged about as they have been by the frowning peaks of the codar-covered Black

There was a big celebration last Friday when the track entered Spearfish at the rate of thirty-three feet every five minutes, bands played, fair women assisted in the celebration, the mayor of Spearfish was prominent and everything about the place was in a state of wild excitement over the advent of a connecting line with the world beyond.

The Burlington people had expected to be

m Spearfish by September, but one difficulty after another had to be overcome, right-ofway matters had to be settled, causing ex-asperating delays. However, all the obstacles have been overcome, the road is into Spearfish and freight traffic will probably be commenced some time next week, by which time the track will be ballasted and in running order.

ning order.

Much can and will be said of this new line touching southwest Dakota. It traverses the most rugged portions of the Black Hills, passing through magnificent gorges and canyons, the scenery is full of grandeur and the feats of engineering skill will compare favorably with any in the mountains of Colorado. In some places, the mountains of Colorado. In some places the grade is 5 per cent, which to the railroad man means a world of difficulties to be overcome. At one place on the road, as the track winds about the ledge of the canon, it is very easy to drop a stone from the upper to the lower track, 1,500 feet below.

The new line extends from Englewood which is the junction point on the main line of the Burlington, to Spearfish, a distance of some twenty-five miles. The names of the

Information Sought Denied by the Railway Managers as Impossible to Give. Des Moines, Dec. 5.—[Special Telegram to THE BEE. |- The sixteenth annual report of the Iowa Railway commission was filed today. It is not as large as usual, on account of the separate report of each company being omitted. Much of the information that the board is required by law to obtain is impossible to secure in any way. The railway managers say they are not in possession of it themseives. In reply to the commissioners' questions, the railway managers have said that they could not separate the cost of transportation per mile. equipment, capital stock, debt, bonds, interest paid and many other items pertaining to Iowa from the whole, as these cover the whole, and cannot by any means be exactly apportioned to the lowa lines. Neither can they give the actual cash

value of the Iowa lines, because there is no way to measure it. The railway managers seem to regard many of these questions as superfluous and impossible to answer.

The report shows an increase in the mile age during the year. In 1802 it was 8,407.34 miles, and this year it is 8,506,22. There is an increase of 29.72 per cent in the tonnage year over the previous year. The total to nage of freight shows an increase of 21.12 per cent in total amount on all the lives reporting. The number of employes has also increased considerably and there has been a large increase in the total amount of wages. Besides these statistics the report gives ex have been before the board during the year against the railway companies, though scarcely any of these amount to much. All the board's litigation before the supreme court is also reviewed by the attorney eral, and the decision in the joint rate case

A Boston Paper Proposes a Plan to Reor-ganize the Union Pacific. Boston, Dec. 5.—The Boston News Bareau

suggests the following reorganization plan of the Union Pacific: "It is submitted that if an attempt to rearrange the \$238,000,000 of Union Pacific indebtedness and give full payment to the government while earnings are decreasing, it can best be done for all interests-the creditors, the government and the public generally -upon some such comprehensive plan as the following The Union Pacific stockholders to surrender as at present, a majority control of propert, to the government, which can be represented by seven directors out of twelve, one director to be appointed teach year, or to hold life positions subject to removal for cause, to have a liberal salary and no other occupation, the government to issue \$300.000.000 3 per cent bonds at par, take up all Union Pacific stock at the average market value of the three years ending January 14, 1894, pay the government debt which the United States treasury will soon be called to pay, in full and leave from \$50,000,000 to \$100,000,000 of these bonds in the treasury of the Union Pacific, one-half of which could be used for the raising of the property to the proper standard for a government ernment road and one-half to remain in the treasury for future development. To make these bonds perpetual at 3 per cent would permit them to be used at par as a basis for bank circulation."

Some rate cutting has been going on by two well known roads and a well known general passenger agent imagined that his competitors were playing "horse." With his usual ability to encompass all matters affecting the situation here the aforesaid general passenger agent sat down and wrote letters to the representatives of the lines alleged to be engaged in the "shady" trans-actions. He also intimated that the letters would be notices of the fling of a formal complaint against the roads for butchering the business. Of course he didn't have any evidence, nor did the representatives of the roads charged with violation of the agreement think anything about the statute of

limitations running, against said violations.

The letter had its effect however, for about 10 o'clock one night two violently wrought up individuals called at the home of the general passenger agent and be-seeched to withheld the complaint. They asked him how much he knew, and taking out a yirgin memorandum book the genera passenger agent proceeded to read a lot of figures, wherein the rallroad men had per-mitted their zeal for the roads they represent to get the better of their discretion.

They threw up their hands. One man said his head would be chopped off if the complaint was filed, while the other said it would seriously embroil him on the spit. The general passenger agent finally decided to drop the matter, which he did.

General Manager Dickinson of the Union Pacific left for Chicago Monday to attend a meeting of the general managers yesterday upon the question of issuing passes to certain interests. LAND CONDEMNED FOR PARKS

Damages Must Not Be Paid Until Benefited Property is Assessed.

RESOLUTION TO THE CONTRARY IS VETOED

Position of the Mayor Sustained by the City Council-Other Business Done at the City Hall Last Night.

The city council held a short session last night. Another meeting, the third consecutive one of the week, will be held this evening, when it is thought the accumulation of business will be cleared up.

The mayor sent in a veto of the concurrent resolution directing the city treasurer to make tender and pay awards made by the appraisers to acquire land for a park in the southwestern part of the city. His reason was that under the charler as amended no money should be taken out of the park bond fund for the payment of such damages until the special benefits to abutting and adjacent property have been assessed, and this has not been done. A further reason was that most of the property owners whose land was appropriated for the southwest park have appealed to the district court from the award of damages made by the appraisers, and the cases are now pending and undetermined in the dis-

triot court. Mr. Elsasser believed the position of the mayor was not right and he did not think

the veto should be sustained.

Mr. Munro maintained that the mayor's position was right and the veto should be sustained. Mr. Howell and Mr. Edwards desired the opinion of Mr. Connell on the

subject.

The city attorney said all questions of benefits should be considered by the council as a board of equization. He thought, however, that the benefits should be determined by the council before money is drawn from the park fund to pay damages. Whatever amounts in benefits are determined will re-duce that much the sum required to be taken from the park fund, leaving a palance to be used in beautifying the tract. He thought no time would be lost if a tender of damages

were not immediately made, as the dissatis-fied parties had gone into court. Mr. Specht wanted the matter left to the

Mr. Specht wanted the matter left to the councilmen from the First and Second wards and the city engineer.
