

Chamber of Deputies upon having adopted the advice of M. Dupuy, adding: 'The Chamber has its duty and the government will do the same.' [Loud cheering.]

When the cheering had subsided M. Castelnau said: 'The Chamber has its duty and the government will do the same.' [Loud cheering.]

M. Dupuy associated himself with M. Castelnau's words, and said: 'The Chamber has its duty and the government will do the same.' [Loud cheering.]

The public left the galleries very slowly, many of the spectators carrying away with them small pieces of iron plates of wood or other souvenirs of the explosion.

After the Chamber had adjourned M. Dupuy was the object of a manifestation of sympathy so considerable that he brought tears to the eyes of all present.

The newspaper men threw themselves before the president of the Chamber in order to congratulate him upon his courage and his devotion to duty.

The courageous president of the Chamber, who was deeply moved by this manifestation of sympathy and appreciation of his courage, retired from the Chamber as quickly as he could after the adjournment.

Might Have Caused Many Deaths. The prefect of police, the prosecutor of the republic and the general manager of the Chamber of Deputies as soon as notified of the outrage, and at 7 p. m. all the entrances to the Palais Bourbon were guarded by policemen, but few spectators remaining in the vicinity.

The police now admit that the contents of the bomb exploded at over the tribune of the Chamber, and had it exploded on the floor instead of in the gallery, or more correctly speaking, as it was falling from the gallery, number of victims would have been very large.

The most extreme estimate of the people injured by the explosion, an estimate which is not confirmed by the official report, places the number of persons injured at fifty more or less.

The crowd outside the building kept constantly increasing in number and the public excitement was greater than that which had been witnessed in any previous explosion.

Just at this time the door of the Palais Bourbon opened suddenly and two gentlemen appeared, conducting between them a man in a commotion. He was being refused admittance to the Chamber by the Deputies.

The door was opened by two armed soldiers, and the man, who was wearing a military uniform, was admitted to the Chamber.

At 8 p. m. all strangers present at today's sitting of the Chamber of Deputies were still being detained at the Palais Bourbon. They were being searched and their names were being taken.

The report of the outrage spread like wildfire through the city, and many persons collected in all the main thoroughfares reading by the lights from shop windows the special editions of newspapers.

Two deputies, MM. La Farinacci and Samary, who were present at the time of the explosion, volunteered the following statement: 'The bomb was thrown from the gallery above the right benches into which the public is admitted without the formality of presenting a card.'

While the Chamber was in session, a bomb was thrown from the gallery above the right benches into which the public is admitted without the formality of presenting a card.

ber of Deputies, after experiencing considerable difficulty, the members of the Chamber were dispersed. The president of the Chamber, M. Dupuy, who had obtained, as an extreme favor, permission to leave the building.

Then, entering a carriage, the due drove off, exclaiming: 'Atrocious, atrocious!' The two senators, who were in the gallery, were turning a deaf ear to their entreaties.

Another group of the well known journalists and wit, Grosclaude, was advising the Deputies to leave the Chamber.

A greatly excited woman rushed up to the gates, frantically exclaiming: 'Mon Dieu, mon Dieu!' She was being refused admittance to the Chamber by the Deputies.

FAIR, FAVORABLE FORECAST

Industrial Situation Not Thought to Be at All Discouraging. Declared to Have Been a Very Unusual Affair in the History of a Period When the Conditions Were Unfavorable.

New York, Dec. 9.—[Special Telegram to The Bee.]—Except for bear attacks, not much activity has appeared in the stock market during the past week. The bear forces were active in the early part of the week, but they were not so active as they were in the early part of the week.

Each side has been made over tariff schedules coming before congress, and some eastern trust managers have made themselves ridiculous by proclamations declaring that only ruin is ahead.

It is the bear reliance that the industrialists will have to put on a poor mouth to get relief from tariff tinkering excursions, and official suggestions of poverty that are counted on to make the country more willing to believe that the professional poverty business has already been amply discounted in recent days.

As to the effect of tariff talk upon the general public, it is not to be expected that any professional speculators for a full are doing any worrying. Business interests have been asserting themselves to effect a change in tariff schedules.

Enforced liquidation is over. There is no more of it to do about this. The bears say that there is nothing to fear. It is always true following a panic, they contend, that people try to catch a second breath and do not go on to the next thing.

his class wanted to get a grip on some new property, or perpetuate their control of an old one, the regulation custom was to send canvassers around the street, and by getting the voters to buy a certain number of shares (stocks) carry annual elections. There grew up a regular traffic in proxies, in fact, and in more than one instance led to scandal.

A good deal of noise has been made during the week over the affairs of the Atchison and Pacific. The fact that the President Reinhart and a number of his associates have been on the other side of the ocean hard at work on plans has not been very generally known.

The announcement is made at the close of the week that there is to be a substantial shipment of gold abroad. This has been considered a pronounced good factor as a matter of fact it is not.

Not Afraid of Gold Shipments. New York, Dec. 9.—Some doubt is expressed today as to whether there shall be any gold shipped abroad next Tuesday, owing to the fact that at the current rate of exchange it is difficult to see any profit in sending it to Europe.

General Joshua J. Cuddy. MILWAUKEE, Dec. 9.—A special from Portland, Wis., says General Joshua J. Cuddy died today, aged 73. He was breveted a brigadier general of volunteers in 1865 for gallantry in the war of the rebellion.

Rev. J. B. Moore. CHARLOTTE, Dec. 9.—Rev. J. B. Moore, D.D., senior bishop of the African Methodist Episcopal church, died at Greensboro this afternoon. He was the oldest member of the denomination in America, being 90 years old.

Wounded Passengers. MUST TAKE THE MEDICINE

Kansas City Grain Men Cannot Escape the New Rate. SCHEDULE WILL GO INTO EFFECT TODAY. Vice President Harris of the Burlington Has Been Appointed To, but is Not Expected to Leave—News From the Tracks.

Although the Kansas City grain men are laying the soothing unctuous to their souls that any bona fide contracts made for future shipment of grain in December will not be subject to the advanced rates of 4 cents per bushel effective today, there is little in the situation to warrant any extended jubilation. The rate goes into effect today, and so far as the Burlington people are concerned they know nothing of the concession telegraphed from Kansas City to the Bee that Howard Elliott, general freight agent of the Kansas City, St. Joseph & Council Bluffs railway, is reported to have made.

It is on the Pacific coast and is not expected to interfere with the work done by the general freight agents of the lines composing the Burlington system, although he has been appointed to take final upon the rate. The Kansas City grain men might as well take their medicine. They have been enjoying the difference for years and naturally do not want to give it up. It is hard to see it vanish in this air. While the rate does not benefit Omaha one way or the other, there is considerable ground for local belief in the differential rate. The Burlington cannot always discriminate against the Nebraska metropolis, even if so inclined.

Will Restore Rates. Transcontinental Roads Have at Last Reached an Agreement. The conference of the Union Pacific, the Northern Pacific and the Great Northern, which has been in progress all the week in St. Paul, has ended. These roads have agreed to restore all transcontinental passenger rates, January 1. The Canadian Pacific, which has been in agreement. It was not represented at the conference, but it is hoped that it will come hereafter, to prepare the way for its participation in the rate. The Burlington declared its boycott against it and authorized all its connections to sell tickets over the Burlington to San Francisco and other points. The only other matter in connection with the Canadian Pacific that remains to be settled is the differential rate. It is declared a way will be found of amounting this difficulty.

Must Pay Its Taxes. TORONTO, Dec. 9.—E. T. Cartledge, the general tax commissioner, says that no class of property in the state is valued so highly as railroad property, and, in proof of unfair discrimination, asserts that the Santa Fe property is valued 20 per cent higher than any other railroad in the state, and 14 per cent higher than some of them. The total assessment of the Santa Fe's property is \$24,000,000, which, taxes amounting to \$85,478 have been assessed for the current year, or \$129,351 more than the company paid last year.

There Will Not Be a Conference. LOUISVILLE, Ky., Dec. 9.—There will be no conference between the Louisville & Nashville officials and its employees today, as was announced some days since. A conference with one or two branches may take place Sunday morning, but even this is problematic. General Manager Metcalf is in charge of the engineers committee, says that he had not called his committee together. He says the engineers are satisfied with the present conditions and recognize the impracticality of restoring the scale of wages in operation before the reduction of three months ago. From what could be learned the men in all departments are satisfied. The road can do nothing at present to restore wages.

Secretary of State Osborn, a member of the state board of railroad assessors, said that the value of the property is lower than that of any other road, and if it refused to pay its taxes its engines would be attached and tied up by the state.
