WILL NOT BE HELD FOR CRIMINAL LIBEL

After Five Days of Trial the Action Has Been Dismissed—An Appeal Will Be Taken to the Ecclesiastical Courts.

LINCOLN, Feb. 10.—(Special to The Bee.)—The Bonacum trial is ended and the distinguished bishop of the Lincoln diocese is again a free man and no longer in imminent danger of being bound over to the district court for criminal libel.

The defendant moves the court to be discharged for the following reasons: 1. There is no evidence showing that the alleged libel was ever published in Lancaster county, Nebraska.

The motion to dismiss was argued by Mr. Stout for the defense. Messrs. Strode and Colons and Father Phelan followed for the defense in opposition, and Mr. Sawyer closed for the state. The arguments lasted the entire forenoon and the court adjourned subject pretty thoroughly.

AFTER TWENTY-FIVE YEARS

Ideas of Early Nebraskans Immortalized in a Great State Institution.

GROWTH OF THE STATE UNIVERSITY

Its Erection the Result of a Steadily Pressing Sentiment—How it Was Established and What it Has Accomplished.

Twenty-five years is a comparatively short period for the development of a great institution of learning. The universities of the old world have passed through the centuries from mediæval times to the present, and with them the history of twenty-five years would be but an incident.

On personal of the legislative journals of territorial Nebraska one is irresistibly led to conclude that the men who came to build the new commonwealth came solely for the purpose of advancing the cause of education.

The earlier years in the history of the university were devoted to the colleges of literature, languages and the sciences. But as early as 1874 and 1875 petitions for the establishment of a medical college were begun to pour in upon the regents.

THE MILITARY DEPARTMENT WAS ESTABLISHED IN 1874. It is made a part of university work for the primary reason that in the original grant of 50,000 acres to the agricultural college it was stipulated that training in military science and tactics should be a part of the university work.
