

NO LIMIT TO ITS SPHERE

Electricity Rapidly Penetrating All Departments of Activity.

DEVELOPMENTS IN ALL DIRECTIONS

Future Possibilities Pictured in Roseate Colors—Cost of Water Driven Power—Underground Trolleys and Heat.

The editor of the Electrical Age makes the prediction that by the year 1930 our homes will be heated by electricity supplied from large central stations and distributed through street mains.

As it looks on paper the underground trolley electric railway is near perfection. Madison Maginn and H. Brandenburg of Chicago have invented an ingenious arrangement for their claim they have applied for a patent.

It is satisfactory to know that the use of electric heat for street cars propelled by electricity is steadily extending, and is likely to soon be the rule rather than the exception.

It is satisfactory to know that the use of electric heat for street cars propelled by electricity is steadily extending, and is likely to soon be the rule rather than the exception.

It is satisfactory to know that the use of electric heat for street cars propelled by electricity is steadily extending, and is likely to soon be the rule rather than the exception.

Water, Captain Lina Beecher of Buffalo, says the Express claims that the advantage of elevated roads are many. The cost of operation is cheaper, there are no dangerous grades, crossings, and no grading, ditching and fencing are necessary, and a high rate of speed can be maintained in city and suburban districts.

Power is being contracted for at Niagara at \$3 to \$20 per horse-power per year of 365 days, counting twenty-four hours a day.

It is doubtful whether in five years hence any of the great water-powers in this country will be longer running to waste.

A bill is before congress authorizing the construction of an elevated bicycle road between New York and Washington, to be run by electricity.

The state of Ohio has 500 miles of electric railways and 700 motor cars. This, an Ohio contemporary remarks, makes this state in the union except Massachusetts in the number of cars, and every state in the union except New York in the number of miles of track.

Although the past winter has in most places been of exceptional mildness, it has developed a new cure for frost-bites. Dr. Hebling has been successful in Germany in twenty cases in healing people of the frozen nose.

During the debate on the pension appropriation bill last week Congressman Meredith of Virginia and Congressman Funk of Illinois almost came to blows.

As they faced each other the afflicted man began to tremble from head to foot, while his pistol described an arc with varying up and down strokes.

One word describes it, "perfection." We refer to Dewitt's Witch Hazel salve, cures piles.

It is satisfactory to know that the use of electric heat for street cars propelled by electricity is steadily extending, and is likely to soon be the rule rather than the exception.

DEPRESSION DUE TO CONGRESS

Check in the Revival of Business the Result of Legislative Delay.

UNCERTAINTY AS TO TARIFF POTENTIAL

Manufacturers, Importers and Jobbers Kept in Suspense by the Doubt Which the Senate Has Fostered—Effect of the Bank Tax Repeal.

NEW YORK, April 15.—Henry Clews, head of the banking house of Henry Clews & Co., writes of the situation on Wall street thus: "During the past week Wall street has lapsed into a state of comparative dullness."

In the absence of any important outside support and with the market in a state of comparative dullness, the market has lapsed into a state of comparative dullness.

"The causes of this lull in speculative operations lie plainly on the surface. The most obvious one is that the gross earnings of the railroads continue below those of a year ago."

It is quite uncertain whether the senate will accept the bill of the Protection of Copyrights, and it is equally doubtful whether the house would consent to the elimination of that feature.

There is no longer any sufficient basis of probability to warrant the undertaking of extensive operations for the fall trade, and the business in manufactured goods must be continued upon the hand-to-mouth scale.

There was only a small business done in oats. The feeling was in sympathy with wheat, but there was not enough doing to create any independent feeling.

The provision market was strong, with sellers scarce and for the most part confined to those who had a profit in previous contracts.

CHICAGO CREAM MARKETS

Dealings and Closing Prices on the Board of Trade Saturday.

CHICAGO, April 14.—Rain in Kansas broke both the drought and the wheat market. Compared with yesterday's closing prices the latter is 1/4¢ lower.

The drought in the wheat pit, which caused the heavy tolling, was broken today. Kansas got general rains, apparently covering the entire state, and the whole area of the Missouri valley reported a generous downpour.

The drought in the wheat pit, which caused the heavy tolling, was broken today. Kansas got general rains, apparently covering the entire state, and the whole area of the Missouri valley reported a generous downpour.

ated considerably. Starting out active and strong Monday and Tuesday, the export market liberal offerings of Wednesday and Thursday caused a moderate decline, which in turn was more than regained on account of irregularly limited supplies on Friday and Saturday.

Today's receipts were lighter than they have been for nearly two months, and as a rule the general quality of the offerings was nothing extra. Speculators and eastern butchers went right after the cattle on receipt of bullish news from eastern markets.

It was pretty much the same way with cows. There were only between 300 and 400 on sale, and the few grades changed hands readily at from 5c to 10c advance.
