

ORACLES OF ORAL SCIENCE

Dentists of Two States Discussing Professional Topics in Omaha.

EXPECT TO BE IN SESSION FOUR DAYS

Welcomed to the City by Mayor Bemis—Response by Dr. Abbott—List of Those Present—Papers to Be Read.

The joint annual meeting of Iowa and Nebraska state dental societies began in the city yesterday afternoon and will continue in session for four days.

The Iowa association held a short business meeting in Council Bluffs in the forenoon, but the Nebraska members did not meet. The meeting was called to order in the lodge room in the Barker block at 2 o'clock by President T. F. Skeede of Seward, who introduced President T. L. James of Fairfield, Ia., and he took charge of the arranged program.

Mayor Bemis was introduced and welcomed the visitors. He said that he considered it an honor to welcome so distinguished looking people, but he had always felt that about going before one dentist he felt some hesitancy about facing a couple of hundred of them. He hoped that all would make themselves perfectly at home, and if they did not see what they thought they should do for it. He thought that the advancement made in dentistry had been marvelous, and was pleased to note that this country was far ahead of the others in this science. He briefly reviewed the history of dentistry and the manufacture of false teeth, instruments, chairs, and other appliances used in the profession. He had met with some of the most noted dentists in the country, and was greatly interested in the advancement of their work. He would like to be able to predict the strides they would make in the next fifty years, and felt a desire to explore Saturn, Mars, Jupiter and other celestial planets and learn how they managed to pull the strings that they were pulling. He was undecided whether to class the dentists as gold bugs or Commonwealthers. He reviewed the budget of the city and the various departments, and the vast commercial, financial, manufacturing and social resources at the command of Omaha residents. He has no Hubert and Jackson in this city, and Mayor Bemis, "but we do have our Judge Scott and Frank Crane." This called forth a vigorous round of applause.

The mayor then turned to the army and the late "unpleasantness" in western Iowa and said that it was the railway officials who would not let the army stop at Omaha and the only thing that could be done was to feed the men and let them go on their way rejoicing. The people of Council Bluffs and Iowa were all right, but Omaha had been made a victim of the railway attorneys and the governor and would have a large sum taxed up against them for the acts of the city and no appeared to have any of the whole selfish principles. His cordial welcome greatly pleased the dentists. His remarks were responded to by Dr. J. T. Abbott of Manchester, Mo.

DR. ABBOTT'S RESPONSE. The doctor had been here before and had enjoyed Omaha's hospitality. He hoped that Omaha would treat the dentists as well as it did the Commonwealthers, feed them and pass them on their way rejoicing after they were through with their business in this city. He complimented the city and its mayor, and expressed the kindest feelings for the people of the enterprising western metropolis. Dr. Abbott said that he would relate a bit of unprinted history as to the way in which this city was named. He said: "A good many years ago a man and his family landed on the eastern banks of the Missouri river. The man used to hunt and trap, and began to base away out into the prairie country. His wife and son were later ferried over and with the woman driving an ox team and the boy walking behind. They had reached about the spot where the corner of Ninth and Farnam streets now, when the boy noticed that his mother was getting out of the trail. He shouted: 'Oh, ma, haw.'"

He said that when anything was to be used as a comparison Omaha must always be favorably excepted, and that they must avoid making the mistake which a servant did who had been instructed by his master to always except in everything. The servant had an experience with a skunk, and in relating it to his master the man said: "Massa, I see dun not de skinkestest in de world, but de skinkestest in de world." He said that Omaha would grow to be a greater city than it is because it had the right kind of men for citizens. They were full of push and energy. He thought the streets of this city were better paved than those of any other western city, and the city had the handsomest men, prettiest women and greatest number of well-natured babies in the world, except those of Iowa. Dr. Abbott then detailed the work of dental colleges and the advancement and use of scientific methods in dentistry. On motion of Dr. Kulp, visiting dentists, physicians, scientists and others interested in dentistry were invited to attend the meetings of the association and take part in the discussions.

PRESIDENT JAMES' ADDRESS. Dr. T. L. James, president of the Iowa association, then delivered his annual address.

After the opening remarks the president referred to the painful method of jerking out a tooth in the olden times. He had a machine which looked like a cross between a hand screw and a hand vice, and said: "I had my first experience in tooth pulling with this. It may not look well, but it is dead sure in its work. Just as you would put a yank on the crank and the jerker got 25 cents from the jerker, while a jagged hole in the jaw was left to heal up as it would."

He spoke of the new theory of treating the pulp canal with sodium potassium, as laid before the Columbian dental congress held in Chicago last year. The paper and views of the author brought out a great deal of discussion as to the best methods for preventing inflammation in the pulp canal and the new theory found favor with a great many of the members.

The convention was not called to order till the evening session until after 8 o'clock. The "History and Progress of Dentistry in Nebraska" were described in a paper prepared by W. F. Roseman of Fremont. The first effort at organizing dentists was in 1874, when the Missouri Dental society was formed. But there was no regular dentists in the interior of Nebraska before 1869. The Nebraska dental society was organized at Lincoln in 1877 with six members. The association increased to seventeen members inside of two years, but in 1880 the interest became so languid that membership began to grow, until in 1893 it had become a flourishing body of men, who sought the scientific and the scientific principles. The paper made the prediction that the Nebraska society would be the strongest in the country in a few years.

IS AGAINST ANAESTHETICS. J. A. Dieffenbacher of York, Neb., read a paper on anaesthetics—local and general. He expressed his opposition to the administration of anaesthetics, and the majority of the men in the belief that they were dangerous and likely to result in death. He had tried and stood ready to recommend Dr. Hayes' arrested hypnotic process for using anaesthetics as being a safe manner in which to administer gas to deaden the pain following diseased teeth. This paper caused quite a spirited discussion, and the majority of those who spoke on the subject expressed their opposition to the use of gas or anything else in dental work. Dr. Hunt of Iowa City said his spring and winter work and that of gas in any shape, and said that the mission of dentists should be to educate the people

how to save and protect their teeth, and not to pull them out on the slightest provocation. Pulling teeth should be the last resort, Mr. Hunt thought. Dr. Funck of Beatrice agreed with the speaker, and said that there was no such thing as a "good" anaesthetic. Dr. Gillette of Norfolk thought that the use of anaesthetics approached too close to producing death, and that dentists who used them with fatal results should be held liable by the law. The general opinion seemed to be that if one dentist or all the other dentists in a town would quit using gas, the remaining one would. None of them thought it a safe proceeding, but the people had been humbugged up to a certain extent, and it was hard to educate them differently. It was thought that dentistry had been so advanced through the aid of scientific appliances that thinking people would soon cease to ask for gas to alleviate their pains. Another point made against the use of gas was the evils of after effects upon the persons who used it. These results were often surprising and even alarming in their extent and many people seemed to suffer a permanent change in their mother and hair, and having been completely under the influence of an anaesthetic. Then again, 99 per cent of the deaths while under the influence of powerful narcotics occurred in persons who had not used them previously and were in apparently a healthy condition. The meeting adjourned until 8 o'clock this morning when clinical papers will be discussed.

LIST OF THOSE PRESENT. The attendance at this meeting was very good, and many more will arrive today. Those present from Iowa who have registered are: H. Kelso, Ames; W. S. Averill, Afton; E. S. Snyder, Keosauqua; G. E. Walker, McGregor; W. P. Archer, Des Moines; J. T. Abbott, Manchester; T. E. Devereaux, Fort Dodge; J. P. Wilson, Burlington; P. P. Weber, Cherokee; Mrs. P. J. Webber, Cherokee; E. P. Hart, Fort Madison; A. E. Begun, Des Moines; S. E. Rogers, Ottumwa; C. J. Peterson, Dubuque; G. W. Miller, Des Moines; L. M. Darling, Walnut; W. W. Spencer, Walnut; J. G. Groat, Rock Rapids; C. R. Baker, Davenport; W. A. Adams, Sioux Falls; J. S. Kulp, Muscatine; J. S. Taylor, Burlington; J. V. Priddy, Sheldon; M. T. Stever, Creston; A. O. Hunt, Iowa City; William O. Kulp, Davenport; J. G. Clark, Dubuque; J. A. Walton, McGregor; E. Daventry, and wife, Guthrie Center; S. C. Hatch, Sioux City; T. W. Garber, Denison; P. M. Shriver, Red Oak; P. T. Brown, Iowa City; T. S. James, Fairfield; J. B. Moutfort, Fairfield; A. A. Stryker, Jefferson; H. A. Woodbury, Council Bluffs; C. A. Palmer, Grinnell; P. D. Silvernail, Russell; L. E. Row, Council Bluffs; E. D. Brower, Lemars; M. F. Anderson, Dayton.

The members present from Nebraska are: T. F. Skeede, Seward; J. A. Dieffenbacher, York; J. M. McKee, York; H. C. York, Norfolk; I. W. Funck, Beatrice; H. M. Connor, A. W. Nason, George Nason, H. W. Shriver, Omaha; F. J. Shriver, Edgar; H. J. Halstead, York; J. E. King, Fremont; J. Roseman, Fremont; A. S. Billings, Kearney; Rufus Elmer, Osceola; W. W. Vance, Kearney; J. E. King, Fremont; W. W. Bailey, Omaha; E. A. Gillette, Norfolk.

A number of new appliances for dental work are on exhibition in the hall, among them being a new machine which is attracting considerable attention. WHAT WILL BE DISCUSSED. The following papers will be read and discussed this forenoon: "The Preparation of Cavities," S. C. Hatch, York; "Gold Inlay," G. W. Miller, Des Moines; "New Method of Setting Logan Crown With Cement," J. W. Williams, Fremont; "Contour Gold Filling," T. E. Devereaux, Fort Dodge; "Kalam Natrium for Treating Infected Root Canals," W. A. Nason, Omaha; "Gold Crown," George Mann, Omaha; "Gold Filling," A. P. Johnson, Omaha; "Bridge Case and Open-Faced Crown," H. C. York, Norfolk; "The Mechanical Preparation of Teeth by Use of Arotated Hypnotic," J. A. Dieffenbacher, York; "Painless Removal of Live Pulp," J. B. Lincoln, Omaha; "The Mechanical Preparation of Teeth and Root for Filling," E. D. Brower, Lemars; "Odds and Ends of the Laboratory," P. Weber, Cherokee; "Extraction of Live Pulp from One of the Anterior Teeth," E. S. Billings, Omaha; "Gold Filling, Doing My Own Malleting," G. H. Belding, Climax; "Contour Gold Filling, Using Hand Pressure," S. D. D. S. Chicago; "Treatment Pyorrhea Alveolaris," J. W. Funck, Beatrice; "Root Filling," W. N. Doward, Omaha; "Filling Lower Molar with Gold," J. E. King, Fremont; "Use of the Saliva Injector," F. D. Shriver, Edgar; "Painless Extraction of Teeth by Use of Arotated Hypnotic," J. A. Dieffenbacher, York; "Painless Removal of Live Pulp," J. B. Lincoln, Omaha; "Gold Inlay," E. E. Hughes, Des Moines; "Correction of Cleft Palate," S. H. King, Lincoln.

WEDNESDAY AFTERNOON. Essays and discussion. Report of supervisors of clinics.

THURSDAY MORNING. "The Mechanical Preparation of Teeth and Root for Filling," E. D. Brower, Lemars; "Odds and Ends of the Laboratory," P. Weber, Cherokee; "Extraction of Live Pulp from One of the Anterior Teeth," E. S. Billings, Omaha; "Gold Filling, Doing My Own Malleting," G. H. Belding, Climax; "Contour Gold Filling, Using Hand Pressure," S. D. D. S. Chicago; "Treatment Pyorrhea Alveolaris," J. W. Funck, Beatrice; "Root Filling," W. N. Doward, Omaha; "Filling Lower Molar with Gold," J. E. King, Fremont; "Use of the Saliva Injector," F. D. Shriver, Edgar; "Painless Extraction of Teeth by Use of Arotated Hypnotic," J. A. Dieffenbacher, York; "Painless Removal of Live Pulp," J. B. Lincoln, Omaha; "Gold Inlay," E. E. Hughes, Des Moines; "Correction of Cleft Palate," S. H. King, Lincoln.

FRIDAY MORNING. Reports of committees, election of officers, election of next place of meeting.

FRIDAY AFTERNOON. Essays and discussions, miscellaneous business, installation of officers.

The following papers will be read during the evening session: "The History and Progress of Dentistry in Nebraska," A. S. Billings, Omaha; "Articulation of Artificial Teeth and Restoration of the Natural Appearance of the Mouth and Face," Rufus Elmer, Osceola; "Diseases Incident to the Teeth of Children and Their Treatment," W. W. Vance, Kearney; "Electricity as Applied to Dentistry," F. D. Shriver, Edgar; "Dental Chemistry," D. P. Silvernail, Russell; "The Use of Ethical with Comment on Professional Ethics in General," T. F. Skeede, Seward; "Retiring President's Address," C. N. Johnson, A. D. D. S. Chicago; "Method of Study, Read and Write Dental Literature," A. O. Hunt, D. D. S. Iowa City; "A Paper on Oral Surgery," William O. Kulp, D. D. S. Davenport; "The Dental Character of the Oral Cavity Local in Its Character, or Indicative of Constitutional Disturbances," J. J. Groat, D. D. S. Rock Rapids, Ia.; "The History and Progress of Dentistry in Nebraska," W. F. Roseman, Fremont; "Why Don't We Try?" William H. Steele, Forest City; "Useful Hints," I. P. Wilson, A. D. D. S. Chicago; "Material Thought," C. F. Besore, D. D. S. Ida Grove; "The Use of Cocaine in Dental Practice," A. W. Harlan, D. D. S. Chicago; "Therapeutics of Water," Dr. T. E. Miller, Cedar Rapids, Ia., and Dr. A. A. Harris, Leola, Ia., will give papers touching upon the same subject as Dr. William O. Kulp's paper.

On Friday the election and installation of new officers will take place just before adjournment.

A World's Fair Honor. The attention of The Bee readers is called to the full page advertisement of the Price Baking Powder, which appears in this issue. This well known company may well feel proud of its success, for it carried away from the World's fair the highest award for being never keeping quality and general excellence of its baking powder.

A. F. S. A. M. A special meeting of St. John's lodge No. 25, A. F. and A. M., will be called at 10 o'clock on Wednesday, May 2, 1891, to attend the funeral of Brother Irvine H. Dwell, a member of Minnehadka lodge No. 122 of Valentine, Neb. All Master Masons who can make it convenient to do so are earnestly requested to be present.

FRANK S. HAYES, Master. Four Trains a Day. Leave Omaha for Lincoln via the Burlington route. The first departs at 8:15 a. m.; the others at 10:15 a. m., 4:30 p. m. and 6:30 p. m. The Burlington is the shortest line to the capital city. Its trains are the fastest and its service the most complete. Get your tickets to Lincoln via the Burlington City ticket office, 1324 Farnam street.

Frank J. Rampe wishes to announce that the difficulties with his tailors have been settled and invites his customers and all good dressers to examine his spring and winter wools and that he is able to fill orders more promptly than heretofore.

CAVE THEM THE BUCK FEVER

Omaha Elks Produced a Paralytic that Paralyzed Their Being Shot At.

DID ALL THE HITTING THEMSELVES

Minstrel Entertainment Last Evening Applauded, Encored and Laughed at from Start to Finish—Some of the Favorite Features.

Shades of Christie, Luke Schoolcraft, Emerson, Morton and countless other artists in black face! How envious these shades would have been could they have sat in front during the Elks minstrel's first part last night at Boyd's! It was an old time Haverly minstrel night, with swells in the boxes, the leaders of social light and life in the stalls, and a thoroughly metropolitan audience crowding the theater as far back in the top gallery as there were seats.

The trouble began promptly at 8:15 with half a hundred Elks in black face, perched in pyramidal style, the last tier coming in contact with a magnificent specimen of the animal from which the order takes its name, standing majestically, almost touching the border lights, while round and about his Elks were palms and other topical plants, a beautiful floral emblem with the letters "B. P. O. E." being suspended from the third border. John Eyer is included in the list of performers, and he is universally applauded. Elks benefits and Press club entertainments, as having captured his Elks in a steel trap in the wilds of Oregon, but visitors to Burlington headquarters will recall it has done service in the large hall of the building for years, principally as a hat rack and an object lesson to traffic who expect to find bison roaming about the streets of Omaha.

This only by way of an introduction. But the minstrel of the past were not the only numbers who would have been surprised could they have watched the birth of genius last night, as they were, in the name, and his contemporaries, to say nothing of the semi-moderns, would have marvelled much at the heaviest tragedian on the stage. J. Edgar Brown, appearing as the middle man of a black face show, and he didn't do anything but give cards and spades to the best interlocutor in the business. After his first entrance, he was the life and soul of the entertainment, which had the rare merit of being largely original and the additional delight of lots of snuff and vinegar.

ON HER FINAL TRIAL TRIP. New Cruiser Marblehead Starts on a Forty-Eight Hour Run. NEW YORK, May 1.—The newly built cruiser Marblehead, Commander Charles O'Neill, left her anchorage in the Hudson river today for sea on her final trial trip of forty-eight hours. She has already been tested for speed and provisionally accepted by the government, and the greater part of her contract price paid over. This sea trip is not expected to develop any defects and is really a matter of form.

The trial board, which accompanies her, consists of Commodore T. O. Selfridge, Captain P. H. Cooper, Commander R. B. Bradford, Chief Engineer J. M. Zim, and Naval Constructor Baxter and Lieutenant Commander Seaton Schroeder. Under their supervision her engines will be run for full speed with natural draft for four hours and at a lesser speed for the rest of the trip. Each gun on board will be fired once. She will return Thursday to New York. The Marblehead was built at Boston and had her speed trial on Long Island sound this spring, developing an apparent speed of 18.94 knots. The government had ordered her to make a speed trial of 18 knots, and making all the necessary additions and deductions, decided that her true average speed was 18.44 knots. As her contract price was \$1,200,000, she will be paid a bonus of \$125,000, being \$25,000 for each quarter knot above 17. The average revolutions on this trip were 176 and 174 per minute, and the temperature of the boiler engine. The temperature in the fire room was between 145 and 155 and the air pressure from eight-tenths to one and one-half inches during the greater part of the trial, reaching two inches during the last part.

She proved steadily with little vibration and compared favorably with other vessels of her class. Her engines are of the triple-expansion vertical, inverted cylinder, direct-acting type. The boiler is of the water-tube type, and the four-bladed manganese-bronze propeller. Her indicated horse-power is 5,400. The Marblehead is a sister ship to the Detroit and Montgomery, but has her height trimmed so as to give her greater stability.

DeWitt's Witch Hazel Salve cures piles. CITY COUNCIL PROCEEDINGS. Stephenson Wants Certain Streets Cleaned Before Paving His Streets. On the regular meeting of the city council was out short last evening, as most of the members wished to attend the Elks' entertainment.

The only business transacted was the passage of the regular appropriation ordinance and consideration of a communication from James Stephenson relative to street sweeping. Mr. Stephenson presented a list of streets which were either newly paved or had not been cleaned for some time, and he asked that they be cleaned. It was impossible to keep them until they were cleaned. The matter was referred to a committee and on its recommendation the chief, and of the list some of the streets were cleaned. A search warrant was issued by the police judge and was given to Chief Detective Hunt to serve. This officer was accompanied by Detectives Savage and Dempsey and Mr. Hunt. They kept the locality of their search a profound secret. In the course of an hour and a half they returned and reported having found nothing, so it is supposed that they are on the wrong trail. The numbers of the orders still missing have been furnished at all of the express offices in this section of the country and should they be presented for payment the holder will promptly be arrested. If each order had been made out and passed for the full amount the express company would lose about \$1,000, but fortunately the officials caught on to the little game before it had gone very far and will lose very little cash. Local detectives and officers of the express company have an idea that the thief is stopping in the city at the present time and several parties are under surveillance with good chances of running the right man to cover.

We could not improve the quality if we paid double the price. DeWitt's Witch Hazel Salve is the best salve that experience can produce, or that money can buy.

Frank J. Sattelle, stenographer, has moved to 232 Bee building, telephone 527.

Going East Today? Your choice of four daily trains from the Chicago & Northwestern railway. The first train, at 4:05 p. m. and 6:30 p. m., are vestibule and limited, arriving in Chicago early next morning.

These trains are being cars and the latest reclining chair cars. Call at the city office, 1401 Farnam street. The Northwestern checks your trunk at your home.

Another Case of Smallpox. Health Commissioner Saville made a personal examination of the case of Christine Chladek, the latest addition to the number of smallpox patients yesterday. He found that the disease was unquestionably smallpox, but the symptoms indicate the less serious form of the disease. The woman was at once transferred to a room on the poor farm and a female friend of the patient who had had the disease was taken along as nurse. The report of an additional case had the effect of causing greater care to be taken in the health department yesterday to be vaccinated. The Chladek woman has no relatives in this country.

Fell Off the Ladder. Samuel Ralls, a guest of the Midland hotel, met with a serious accident Monday. He was standing on the platform of the freight car at the end of the building, and making a mistake fell through the opening in the ladder. He sustained a severe fracture of his right ankle. Friends at once conveyed the injured man to St. Joseph's hospital, where the broken bones were set. Mr. Ralls is well known in the city, having worked for a long time at Forrest & Bell's cafe on Farnam street.

May Be Here Friday. City Attorney Connell has received a reply to his letter to Judge Cornish, in which the judge says he will try to be in Omaha on Friday. The elevator street viaduct board has also received a reply from the city for an order from the court directing the receivers of the Union Pacific railroad to repair the viaduct.

Awarded Highest Honors World's Fair. The attention of The Bee readers is called to the full page advertisement of the Price Baking Powder, which appears in this issue. This well known company may well feel proud of its success, for it carried away from the World's fair the highest award for being never keeping quality and general excellence of its baking powder.

DeWitt's Witch Hazel Salve cures piles. Not in the Roasting Business. Chief Levey is used to receiving all kinds of letters and from all parts of the globe, but one that came yesterday from W. Jones, special agent of the St. Louis & Southwestern railway, at New Potosi, Mo., takes the prize, so far this year. Mr. Jones says that there is a man in his town by the name of F. E. Cross, who claims to hail from Omaha and is also passing as such. Mr. Jones has asked the chief of police to look up Cross' record and send it down in

HAS MUCH NEW EVIDENCE

Irvine Divorce Case Will Be Reopened at SALT LAKE, May 1.—(Special to The Bee.)—As the time draws near for the hearing of the motion for a new trial in the divorce case of William H. Irvine against Adalain M. Irvine, the universal interest in the action, which has remained dormant for several months past, has sprung into new life, and numerous conjectures are being made as to the result of the trial.

Mr. Merritt, who has succeeded Chief Justice Zane, and before whom the motion will be argued, will overrule or sustain it. Many persons believe that the motion will be granted, in view of the fact that Chief Justice Zane's judgments have been reversed, and in view of his bitter denunciation of Irvine in the rendition of his opinion granting Mrs. Irvine a decree upon her cross-complaint.

Upon the motion for a new trial the entire record will be used, and it comprises 2,000 pages of typewritten matter. The affidavits in support of and in opposition to the motion are about eighty in number, the most important being substantially as follows: J. M. Murdoch testifies that in 1889, during the trial of the divorce case, he occupied a room on the third floor of the Montgomery block just across the hall from the rooms then occupied by G. Montgomery and his family. He often saw Mrs. Irvine enter Montgomery's rooms. He had also seen Mrs. Irvine enter the Montgomery's rooms with a key of her own.

E. Hunter of Lincoln testifies that he is well acquainted with E. L. Simon, who testified for Irvine on the divorce case in this case, and that Simon told him during the summer of 1889 that he had seen Montgomery and Mrs. Irvine in a compromising position in the west coast of the peninsula.

Mrs. L. G. M. Baldwin of Lincoln swears that she is acquainted with E. L. Simon, who testified for Irvine on the divorce case in this case, and that Simon told him during the summer of 1889 that he had seen Montgomery and Mrs. Irvine in a compromising position in the west coast of the peninsula.

The affidavits are attached to the application for a new trial, and they are all sworn to by the parties to the case, and they are all sworn to by the parties to the case, and they are all sworn to by the parties to the case.

Wool, Challie. Who ever heard of such a price, but we have them in our store at this price. Prepare for warm weather by getting first choice of these, the only correct summer fabric.

Linen Department. Wednesday we will have one of our old-fashioned towel sales, all in one lot; towels of the best quality, made in our mill, and some 35c, 30c, and 50c; all in one lot, 15c each, or 32.25 dozen; only one dozen to each customer.

Compare them in all we ask. In mind that with each purchase you get coupons, no matter how low the prices quoted.

Hayden Bros. Where the big sale is. 4-4 size, 45c each. 5-4 size, 75c each. 6-4 size, \$2.50 each. 10-4 size, \$3.98 each.

ON HER FINAL TRIAL TRIP. New Cruiser Marblehead Starts on a Forty-Eight Hour Run. NEW YORK, May 1.—The newly built cruiser Marblehead, Commander Charles O'Neill, left her anchorage in the Hudson river today for sea on her final trial trip of forty-eight hours. She has already been tested for speed and provisionally accepted by the government, and the greater part of her contract price paid over. This sea trip is not expected to develop any defects and is really a matter of form.

The trial board, which accompanies her, consists of Commodore T. O. Selfridge, Captain P. H. Cooper, Commander R. B. Bradford, Chief Engineer J. M. Zim, and Naval Constructor Baxter and Lieutenant Commander Seaton Schroeder.

Under their supervision her engines will be run for full speed with natural draft for four hours and at a lesser speed for the rest of the trip. Each gun on board will be fired once. She will return Thursday to New York. The Marblehead was built at Boston and had her speed trial on Long Island sound this spring, developing an apparent speed of 18.94 knots. The government had ordered her to make a speed trial of 18 knots, and making all the necessary additions and deductions, decided that her true average speed was 18.44 knots.

As her contract price was \$1,200,000, she will be paid a bonus of \$125,000, being \$25,000 for each quarter knot above 17. The average revolutions on this trip were 176 and 174 per minute, and the temperature of the boiler engine. Friends at once conveyed the injured man to St. Joseph's hospital, where the broken bones were set. Mr. Ralls is well known in the city, having worked for a long time at Forrest & Bell's cafe on Farnam street.

May Be Here Friday. City Attorney Connell has received a reply to his letter to Judge Cornish, in which the judge says he will try to be in Omaha on Friday. The elevator street viaduct board has also received a reply from the city for an order from the court directing the receivers of the Union Pacific railroad to repair the viaduct.

Awarded Highest Honors World's Fair. The attention of The Bee readers is called to the full page advertisement of the Price Baking Powder, which appears in this issue. This well known company may well feel proud of its success, for it carried away from the World's fair the highest award for being never keeping quality and general excellence of its baking powder.

DeWitt's Witch Hazel Salve cures piles. Not in the Roasting Business. Chief Levey is used to receiving all kinds of letters and from all parts of the globe, but one that came yesterday from W. Jones, special agent of the St. Louis & Southwestern railway, at New Potosi, Mo., takes the prize, so far this year. Mr. Jones says that there is a man in his town by the name of F. E. Cross, who claims to hail from Omaha and is also passing as such. Mr. Jones has asked the chief of police to look up Cross' record and send it down in

HAS MUCH NEW EVIDENCE

Irvine Divorce Case Will Be Reopened at SALT LAKE, May 1.—(Special to The Bee.)—As the time draws near for the hearing of the motion for a new trial in the divorce case of William H. Irvine against Adalain M. Irvine, the universal interest in the action, which has remained dormant for several months past, has sprung into new life, and numerous conjectures are being made as to the result of the trial.

Mr. Merritt, who has succeeded Chief Justice Zane, and before whom the motion will be argued, will overrule or sustain it. Many persons believe that the motion will be granted, in view of the fact that Chief Justice Zane's judgments have been reversed, and in view of his bitter denunciation of Irvine in the rendition of his opinion granting Mrs. Irvine a decree upon her cross-complaint.

Upon the motion for a new trial the entire record will be used, and it comprises 2,000 pages of typewritten matter. The affidavits in support of and in opposition to the motion are about eighty in number, the most important being substantially as follows: J. M. Murdoch testifies that in 1889, during the trial of the divorce case, he occupied a room on the third floor of the Montgomery block just across the hall from the rooms then occupied by G. Montgomery and his family. He often saw Mrs. Irvine enter Montgomery's rooms. He had also seen Mrs. Irvine enter the Montgomery's rooms with a key of her own.

E. Hunter of Lincoln testifies that he is well acquainted with E. L. Simon, who testified for Irvine on the divorce case in this case, and that Simon told him during the summer of 1889 that he had seen Montgomery and Mrs. Irvine in a compromising position in the west coast of the peninsula.

Mrs. L. G. M. Baldwin of Lincoln swears that she is acquainted with E. L. Simon, who testified for Irvine on the divorce case in this case, and that Simon told him during the summer of 1889 that he had seen Montgomery and Mrs. Irvine in a compromising position in the west coast of the peninsula.

The affidavits are attached to the application for a new trial, and they are all sworn to by the parties to the case, and they are all sworn to by the parties to the case, and they are all sworn to by the parties to the case.

Wool, Challie. Who ever heard of such a price, but we have them in our store at this price. Prepare for warm weather by getting first choice of these, the only correct summer fabric.

Linen Department. Wednesday we will have one of our old-fashioned towel sales, all in one lot; towels of the best quality, made in our mill, and some 35c, 30c, and 50c; all in one lot, 15c each, or 32.25 dozen; only one dozen to each customer.

Compare them in all we ask. In mind that with each purchase you get coupons, no matter how low the prices quoted.

Hayden Bros. Where the big sale is. 4-4 size, 45c each. 5-4 size, 75c each. 6-4 size, \$2.50 each. 10-4 size, \$3.98 each.

ON HER FINAL TRIAL TRIP. New Cruiser Marblehead Starts on a Forty-Eight Hour Run. NEW YORK, May 1.—The newly built cruiser Marblehead, Commander Charles O'Neill, left her anchorage in the Hudson river today for sea on her final trial trip of forty-eight hours. She has already been tested for speed and provisionally accepted by the government, and the greater part of her contract price paid over. This sea trip is not expected to develop any defects and is really a matter of form.

The trial board, which accompanies her, consists of Commodore T. O. Selfridge, Captain P. H. Cooper, Commander R. B. Bradford, Chief Engineer J. M. Zim, and Naval Constructor Baxter and Lieutenant Commander Seaton Schroeder.

Under their supervision her engines will be run for full speed with natural draft for four hours and at a lesser speed for the rest of the trip. Each gun on board will be fired once. She will return Thursday to New York. The Marblehead was built at Boston and had her speed trial on Long Island sound this spring, developing an apparent speed of 18.94 knots. The government had ordered her to make a speed trial of 18 knots, and making all the necessary additions and deductions, decided that her true average speed was 18.44 knots.

As her contract price was \$1
