Music Department. A NEW MUSICAL INVENTION.
All the objections to the parlor organ are at last done away with by the NEW INVENTION. It has seven full octaves, and in appearance is exactly like a handsome UP-RIGHT PIANO. There are no stops in view, nor any unsightly bellows pedals, but the instrument is worked by two pedals exactly like those on a piano, and a 6-year-old child can work them with ease. The delicacy and variety of its tones are wonderful and the touch is so light and quick that the most difficult piano music can be executed thereon without difficulty. THE PRICE is not higher than that of an ordinary organ. Come and see or write for catalogues.
