County Commissioners and Company Wide Apart on Several Points.

AGREEMENT IS NOW NOT EXPECTED

Promoters of the Enterprise Seem Likely Not to Make Any of the Concessions that Are Asked For -- What the Differences Are.

The canal proposition came before the county commissioners yesterday afternoon for a final round and the results, according to the best information obtainable, were somewhat unsatisfactory. Shortly after 1 o'clock the commissioners and the members of the citizens' committee retired to the seclusion of the room devoted to the executive session and several hours were spent in a fruitless discussion. The commissioners submitted several propositions, which failed entirely to meet the approval of the promoters of the enterprise.

First, the commissioners declared that the capacity of the canal should be increased from 750 cubic feet per second to 1,000 cubic feet. This proposal met with a cold reception. The promoters stated that it would materially increase the cost of the work and require a large subsidy in the shape of ad-

Then the commissioners stated their de sire to incorporate in the contract between the canal company and the people of Douglas county a provision fixing a maximum rate of charges for power to be furnished. The commissioners seemed to think that \$30 The commissioners seemed to think that \$30 per horse power per annum would meet the requirements of the people. This the promoters did not wish to concede. They preferred to stand by their original proposal to assess "reasonable" rates. The promoters came back at the commissioners with a counter proposition to turn into the county treasury 49 per cent of the dividends paid on the capital stock of the company after all fixed charges had been paid out of the gross receipts. This proposal fell like a wet blanket upon the commissioners, some of them arguing that it was a palpable evasion of the demand of the people of the county for a low fixed charge per horse power per annum. It was also argued that there was no law by which the county could subsidize ticipate in the profits.

The commissioners also desired to estab-lish a maximum charge of \$1 per 1,000,000 gallons of water furnished by the canal company to municipal corporations. This proposal received but little commendation

from the promoters.

Another obstacle in the way to an adjustment of the differences between the commis-sioners and the canal people was the matter of the expenses of the election which is to decide the bond proposition to be submitted to the people of the county. The commissioners insisted upon this point, but the canal people intimate most emphatically that they were not in the business of conducting elections at their own expense.

This closed the final conference between the commissioners and the promoters of the big enterprise. Within a few days, and as soon as all points can be agreed upon by the commissioners themselves, a proposition in the nature of an ultimatum to the canal people will be submitted. This proposition will fix a maximum rate for the use of the power furnished to consumers, will fix the amount of guaranteed horse power at the turbines, fix the percentage of loss by transmission, for which the company will be given credit, fix a maximum rate of charge for the use of water furnished to municipal corporations and provide emphatically that the canal company shall pay all expenses of

conducting the special election.

It is given out in advance by parties who are closely associated with the commissioners that the proposition will not likely be accepted by the canal people, inasmuch as it will substantially include every pro-posal which the promoters of the enterprise

have so far refused to concede. President Herman Kountze was present yesterday afternoon for a few moments, but Dr. George L. Miller had resigned his place on the conference com mittee, his resignation being made neces-pary by a trip which he will take almost ediately to Costa Rica. He has been succeeded on the committee by Guy C.

Talked Macadam Once More.

When the county commissioners met for business yesterday afternoon the committee on roads reported on the macadam question In his report Chairman Williams expressed the opinion that a good road could be secured if the contractor worked in accordance that was needed was for the county to see that the contract was enforced. The report

Mr. Jenkins urged that there had been no test to show what kind of road the macadam would make. He thought that the board should have legal advice upon the subject, not leaving everything in the hands of the county surveyor.

The adoption of the report was for the purpose of placing the bond on record, that the contractor might be compelled to comply with the terms of his contract. Lindsey knew that the road could b built by following the plans and specifica-tions, and it was folly to hire an attoreny

to look into paving matters. Don't Delay.

Popular music at Courtland Beach. Met on the Corner. On the corner of 16th and Dodge streets

On the corner of 18th and Dodge streets yesterday two ladies met.

They were evidently pleased to see each other, and after a few introductory remarks, launched out on that subject so dear to the feminine heart—shopping and where to shop.

"Where have you been shopping this morning, Elien? I can tell by that pleased expression on your country." pression on your countenace that you must have run across something very good in the bargain line?"

"Indeed I have," was the ready answer.
"I have just come from Hayden Bros., where they are now having a sale previous to in wolce taking. Things are going awful cheap, so I made quite a few purchases."
"Hayden Bros. give away coupons with all purchases, I understand?" asked the first

Yes, a coupen goes with everything you even with sugar, and all staple articles and if you want anything either for yourself or your household, buy this week from the biggest and busiest store in Omaha." The first lady thanked Ellen and was soon seen with the crowd that seems to invariably throng the big establishment of Hayden Bros. This firm's announcement may be seen on another page.

Y. M. C. A. CAMPING PARTIES. They Will Pick Nebraska Resorts for Their Summer Outings.

The secretary of the Young Men's Chris-

tian association is busy with plans for the pleasure of the members of the association for their summer outing. It is proposed to establish a Young Men's Christian association camp at lakes near West Point or Fremont, Neb., adjacent to the Elkhorn river, and where there is good swimming fishing, boating and ground for athletic sports. The plan is to secure several tents, a good cook and a complete outfit for rough camping, together with boats and all needful equipments. Three parties will be arranged for, the first for the junior members to go into camp from July 17 to July 27 the second and third for senior members from July 27 to August 7 and from August 7 to August 17. Memebers of the association from Omaha, Lincoln and Fremont, and possibly some others in the state, will be privileged to join these parties. The secretaries and physical directors of these associations will be in charge. The first party of juniors will be under the direction of Secretary Ober and Secretary Doane of Lincoln. Mr. Ober has spent several summers with similar parties of boys and young men in the Adirondacks and on Lake Champlain, and will make every provision for the care and healthful enjoyment of the members. Every member joining the party does so with the express stipulation that he will fully obey the leader of the In place of the usual summer conference

for bible study the associations of the state will hold a midsummer meet at the Chau-tauqua grounds at Fremont, Neb., August 21 to 30. The mornings will be spent in bible study and conference on different phases of association work. These conferences will be under the direction of Mr. C. N. Cope-land, state secretary, the secretaries of the associations of the state and Mr. W. W. associations of the state and Mr. W. W. White of Chicago, who has been invited to give a course of instruction at this gathering. The afternoons will be given to athletic sports of various kinds. A fine field is provided at the grounds for all sorts of sports, base ball diamond, track, etc. A series of contests in which the best teams A series of contests in which the best teams of the associations of the state will engage will take place in the afternoons. The Omaha association base ball team will cross Omaha association base ball years be put bats with the best team that can be put up by the state on one of the days. Anup by the state on one of the days. An-other day will be given to bleycle contests, another to tennis, another to the Pen-tathleon games, which consist of five athletic events scored by a definite rule of points. The evenings will be spent in ad-dresses and meetings of various character. This will be one of the most interesting gatherings that the associations of the state ever arranged.

Another outing, and one that will be of especial interest to bicycle men, is proposed to come off in September, or possibly at an earlier date. All the bloycle men of all the associations in the state will be invited to meet at Omaha and start from here to ride to Lake Okibiji, a distance of 200 miles over some of the best roads that there are in this section. Plenty of time will be taken, and it will be in no sense in the nature of a race. A camp will be provided near the lake, which, by the way, is the most beautiful and picture que body of water in this section of the country, clear, well wooded and with good fishing in seasoncamp to be kept open five or six days. The return will be made on wheel also. The expense for these trips will be made the ery lowest, and probably \$10 will cover the total expense for any of them. Parties are now being made up, and any information lesired can be obtained at the association

WILL TURN ON THE POWER

Eastern Capitalists and Business Men to

Participate in an Excursion to a Boom-

ing South Dakota Town on July

4-Program Prepared.

The business men of Omaha, and es-

pecially the large wholesale interests, are in

a position to look upon the rapid growth of

the great northwest with a great deal of

complacency. The increase in wealth, pop-

ulation and commercial importance of all the

great northwestern states means a corre-

sponding increase in wealth, population and

commercial importance of the city of

Omaha. Consequently every effort put

forth to build up the empire of territory in

the northwest, to develop the inexhaustible

mineral resources and to encourage the im-

mense agricultural and grazing interests,

will be watched with no little interest by

every man who hopes to see Omaha a city

For this reason the coming celebration at

Edgement, S. D., is an event of unusual im-

portance. The celebration referred to will

mark the completion and successful opera-

canal, which has been in process of con-

struction for the past two years. The canal is but fourteen miles long, the water supply

being obtained from Beaver creek, fourteen miles northwest of Edgemont, and the big

litch terminates at that city, furnishing an

immense water power capable of furnishing operative force to fifty large factories. In-

identally the canal will irrigate 10,000 acres f choice agricultural lands in the vicinity

f Edgement, furnishing homes for at least 00 farmers and their families. The canal

is almost an Omaha enterprise, its chief pro-

noters being Mr. F. C. Grable of this city,

a gentleman who interested the eastern cap-

ital necessary for its construction and who has labored for two years to make the en-

terprise a commercial success.

As a result of the construction of the

canal a large woolen mill will be erected im-

mediately, eight carloads of the necessary

machinery having already arrived at Edge-

mont. The capital necessary for the erec-tion of a number of large factories, including

another woolen mill, a paper factory, two wool washeries, packing house, tannery, hemp and twine factory and a smelter, has been interested and these industries are ex-pected to become fixed facts within a few

In order to inaugurate the canal enterorise and to emphasize its successful com-

oletion, Mr. Grable has organized an excur-

sion, which will leave Chicago on Monday evening, July 2, and arrive in Omaha the next morning. The party will be made up of about sixty distinguished guests from the

in the Coney Maind grand steeple chare, died today, after suffering greatly. OUTSIDER'S PIEN OF THE CANAL.

Event of Especial Importance to Commercial OMAHA, June 24 .- To the Editor of The Bee: I have no special interest in Omaha Interests of Northwest. save & general interest for all communities. I read an article in Saturday's Bee so lacking in public espirit and with views so pessimistic that although a sojourner of a day I ask permission to respond.

I have had opportunity to visit in a busi-EDGEMONT PLANS A BIG DEMONSTRATION

ness way the power towns of Amsterdam, Cohoes, Holyoke, etc., and am personally acquainted with a number of their manufac turers. Personal conversation with these has developed that they look to the west for their markets. Their raw material (cotton) comes from the south, and not wholly by water transportation, but must be transferred and carried part of the distance by rail to the factories. The product must

then be carried by rall back to the south and west to market. If cotton goods were manufactured in Omaha the manufacturer would have cheap water trasportation to get raw material here, and his goods would be in the center of the market as soon as manufactured.

I do not believe in the wholesale way in which your correspondent has utilized the 20,000 horse power in one possible industry sible and growing industry (in the east) namely, knit goods manufacture.
This industry gives employment and good wages to both men and women, wages vary-ing from \$6 to \$25 per week, for each em-

ploye, according to skill, etc. The manufacture of knit goods requires about four hands per horse power; 20,000 horse power would give employment to about 80,000 employes, making a possible increase in inhabitants, according to your correspond-

The 80,000 employes receiving a very low average of \$350 a year per head would make an increase of \$28,000,000 earned and spent in Omaha by laborers alone. Now add to this the army of jobbers and salesmen to dispose of the manufactured product and Omaha will have two and a half times its present population and \$50,000,000 additional carned and spent within its limits each year. This is on an industry which Omaha has superior advantages over any eastern city if the power were here. I will put the ques-tion: Can Omaha afford to spend \$4,000,000 to increase its population two and a half to one and put \$50,000,000 more in its channels of trade each year for all time?
The above reasoning, although based or

facts, is just as wild as that of your correspondent of Saturday, and is strictly his line of argument. But let us take a common sense view of it, one that is not rang-ing in probable possibilities. Omaha is now paying \$100,000 each year for coal for its present power. This money is going out to build up other towns and communities. Ac cording to your correspondent's figures, th proposed 20,000-horse power will cost \$3,000 000, and will be a permanent investmen The \$100,000 paid out for coal will pay 33 per cent interest on this investment, and will leave the city still 15,000-horse power for other possible purposes. The city can certainly earn something out of the remain-ing 15,000-horse power. If nothing else it would do for a better and cheaper system

Your city engineer, Mr. Andrew Rose-water, has very faithfully and correctly gathered the facts that show the actual cost and value of power in Omaha in his report ending December 31, 1893. The average cost of power to the corpora-

or about sixty distinguished guests from the extreme eastern cities, all of whom are the guests of Mr. Grable for the trip. The party will travel in a special train of Pullmans with dining car attached, and from Alliance tions and manufacturers is above \$50 per horse power per year. The cheapest possible power, where the finest triple expansion en gines were used, is \$21.16 per horse power per year. Let us now value the water power at \$20 per horse power (cheaper than the cheapest), 20,000-horse power at above price is worth \$400,000 per year to Omaha \$3,000,000 will build a highway that nature will use, to carry and empty into the lap of Omaha a commodity that in its cheapest possible form is worth \$400,000 a year, and at the present rate paid by Omaha \$1,000,000 per year. Can Omaha afford this? Let us assume that Omaha failed to get any booms on account of its water power. It is only natural to suppose that in time the city would use 20,000-horse power for its actual needs in the way of power, lighting and heating. The city, through its citizens, will pay not less than \$500,000 for coal, and this money would build up other places. money would build up other places. If the water power were used for the same purposes as it can be, this half million of dollars Please note that it wou a saving to the city of $16\frac{n}{3}$ per cent of the \$3,000,000 investment each year. This is a pessimistic view of it because it is furnishing the power, light and heat for one-half what most of the citizens now pay for it of what most of the citizens now pay for it if the proposed canal terminated at Seymour park, a municipal power and lighting plant can be established there. The city can furnish its citizens the power, light and heat, electrically, to any and all points within its limits at cheaper rates than they now pay for the same If a manufacturer is induced to come, his factory may be established at the river

wharves, or at the place best suited to him. In the early days of the development of water power it was necessary to establish the factory in obscure and out of the way places, so as to accommodate the power, but with the newer electrical transmission the factory is put in the most convenient place. I am astounded by the correspondent's reflection that water power is becoming obso-lete and has never been a paying investment on a large scale. It is a fact that the investment for short periods has not paid as large dividends as the same amount invested some of the gold mines, but it is sure and vastly more permanent than any gold mine, averaging better.

We will also state that all the available water power at Amsterdam, Little Falls, Cohoes, Lowell, Fall River, Holyoke, Manchester, Lewiston, Paterson, Trenton, etc. is used to the very best advantage. Steam is only added when the water power cannot be secured. I may add that the capitalists vho developed the power do not figure among the poverty stricken.

Nearly all the water powers referred to were developed for the obsolete and very expensive overshot waterwheel and were in arly every case changed to turbine power Omaha will not need to experiment, but can have the best at the smallest expense. The location of the city makes it a natural portal for the Missouri valley, and it is destined to be a commercial center provid-ing the manufacturing spirit keeps pace with that of other cities equally endowed.

I have noticed that nearly all of the avail-

able water power privileges in the east have been picked up by capitalists in the past few years. The harnessing of Niagara is not child's play. The capital invested there could have purchased a coal mine and built its own steam engines much closes to great power using centers, but it did not. Electrical transmission is giving to water. power an impetus that will prove in a very few years that a steam plant is only a temporary plant. We have only to look over the water to our little cousin, Switzerland, to get some practical lessons in regara to the true value of water power. energy of a mountain torrent is confined and carried by wire over the peaks and down to the villages, where it furnishes heat and light for inhabitants, also power to manufacture articles that go to all parts

f the civilized world. In conclusion il firmly believe that while the distance is very great and the cost of the canal will be great the power if secured will be a good and permanent investment for Omaha and will give to its citizens i constant and never failing source of wealth that New York or Chicago would covet. The money expended would give employment to your labor and find its way into your legitimate channels of trade, making you a prosperous city while your neighbors are waiting for the financial storm to subside. MARK At REPLOGLE, Engineer. Cedar Falls, 1a.

HAVE A FOURTH WITH US.

Have a glorious day-Have a barrel of fun-or a barrel of beer-Shoot your firecrackers-shoot crabs-shoot a snipe-shoot your mouth off-if you are big enough-Do anything your conscience bids you-just so you celebrate the glorious 4th of July as a patriot should. Cost you nothing-

THE NEBRASKA FOOTS THE BILL.

We've arranged a code of special values-in our furnishing department | whereby you are getting your 4th of July fixin's with a good sized rebate-enough saved to buy you a good day of fun.

You need a Cool Shirt.

White with linen bosom are 50c; the \$1.00 kind we sell at 65c. Negligee shirts are 35c, 45c, 60c, and double that price don't buy any bet ter ones-laundered percale ones we almost give away-we have a load of 50c ones that are precisely the same others get \$1.00 for-and finer ones we get 75c to \$1.25 for are as fine as they make 'em.

You need Other Fixin's.

Come right along-you'll not be disappointed. We carry everything and at any price-Neckwear, wash. able or silk-5c, 10c, 15c, 20c, 25c for washable ties--silk ones are 15c, 25c, 35c, 45c, 05c-Hose-a pile of 'em -Fast black are 10c, others all the way from 5c up to the silk. We carry the creme of fancy vests, both silk and pique-and don't charge you 100 per cent profit just because hey're pretty, either. Our prices are as cheap as we buy-and that we buy cheap is an old established

You need Cool Underwear,

Here are some of our 4th of July values; Balbriggan are 25c-worth at least 50c. 2-thread balbriggan are 35c. Blue clouded balbriggan are 40c-others get 75c for 'em. The genuine jersy rib in either white or drab are but poor 75c's-can't touch same elsewhere at less than \$1.25. Lisle thread-the aristocratic underwena-is \$1.00-would not be disappointed if you paid as high as \$5 a suit for the very same kind.

SAPOLIO

Occasional Table. RUPTURE

The name tells the whole story. "Occasional"-to be used only on occasion as needed. The difference between an ordinary table and an Occasional Table is that one is always a table, while the other is only a table at such times as you wish. Elsewise it is a compact seven- NATIONAL BANK inch shelf against the wall.

This is one of the best Occasional Tables ever devised. It is very compact when folded, and very rigid when open. It is low to the floor and fitted with light castors. In Oak we price it a only \$9.00.

Think of the number of uses for such a convenient felding table. For a woman when sewing or "laying out" work; for a man when examining papers or plans for the children's study or for games; in sickness as a convenient receptable by the bed, or in the dining room as a serv-
