Wheat Early Presented a Fairly Active Appearance but Became Dull Later.

CORN WAS WELL SUPPORTED IN PRICES

About All the Corn in Chicago is Held by One Individual and Shorts Are Not a Little Concerned and Discussed to Cover.

CHICAGO, July 12.—Wheat early presented a fairly active appearance, but before the close the interest died out to a good extent. Opening traders were at from 1/4 to 1/2 cent advance and gradually sold up 1/2 cent, worked back 1/2 cent, changed some and closed 1/2 cent net decline. The feeling was chiefly due to northwestern news, there being some talk in that section of drought. The cash business of yesterday no doubt proved a factor, as did the advance at New York and reported rains in France. On the other hand, cables were lower, the Price Current news was very bearish and offers of cash wheat were said to be increasing in the country. The advance seemed to exhaust the immediate supply of anxious shorts, and a good reaction occurred.

Corn was quiet, but well supported in prices, the close showing a gain of 1/2 cent to 3/4 cent. About all the corn here is held by one individual, and shorts are not a little concerned, and are discussed to cover. Offerings of July are very moderate and demand at times was quite urgent, but there was a liberal trade in oats and an irregular movement in prices. July was well supported, and the advance seemed to exhaust the immediate supply of anxious shorts, and a good reaction occurred.

THE OMAHA DAILY NEWS, FRIDAY, JULY 13, 1891.

The opening and close of the market were quiet and the market was subsequently quiet. An early decline of 1/2 cent was effected, with a subsequent recovery to 1/2 cent. The reaction of 1/2 cent, Denver & Rio Grande and United States Leather are each up 1/2 cent, Kansas & Texas 1/2 cent. The other changes are fractional.

The bond market was firm to strong on a limited volume of business.

The Evening Post says: Changes in prices throughout today's transactions were very few and the general price level was hardly altered. Now and then the outbreak in the west, the tendency is manifest to wait final action at Washington and to wait also for the final revival of Wall street at all events before a final settlement will bring.

The following were the closing quotations on the leading stocks of the New York exchange today:

CATTLE TRADE SLOW AND UNCERTAIN

Chicago Excess for Unfavorable Influence Over Dealers Here, Hogs Brings Up and Sell Active and Higher. Closing Strong.

There was a great change in the matter of receipts as compared with yesterday. Only 400 cattle were received, an amount 2,153 yesterday. Thus at this work there has been received today these 13,700 cattle, which is a gain of over 5,000, as compared with the same period last week. The receipts of hogs today totaled up 5,800, as against 16,866 yesterday. Thus far this week 37,900 hogs have been received.

CATTLE—While the fresh receipts of cattle were very light, there were enough held over to bring the total offerings up to from 3,000 to 3,500, so that there was no scarcity. The market did not show any very great change in any particular. The heavy fat cattle that were in the best request among the buyers brought strong yesterday's prices, and were pretty well cleaned up before the close. The heavy cattle were not in quite so good request, and holders of such did not find it much easy work to unload. The market as a whole was rather slow. The reports from Chicago to the effect that the butchers were going out on a strike served to make the situation a little more unfavorable. Neither packers nor shippers seemed very anxious to buy, and the market was slow. The market on butchers' stock was steady at about yesterday's prices, and was without important feature.

STOCKS AND FEEDERS. The market on butchers' stock was steady at about yesterday's prices, and was without important feature. The market on feeders' stock was steady at about yesterday's prices, and was without important feature.
