

PULSE OF WESTERN PROGRESS

Claim Jumpers Causing Great Excitement at the Hahn's Peak Placers.

MILLIONS SUPPOSED TO BE AT STAKE

Rich Strikes in Arizona—Deadly Creatures of the Arid Region—Call for a National Irrigation Congress—News of the Northwest.

The slowly brewing trouble over placer ground at Hahn's Peak was at last consummated and what promises to be a war to the knife has been started. For twenty years the property in and about the peak has been in the control and presumed ownership of what is now the Hahn's Peak and Elk River Placer Mining company, but of late considerable jumping has been going on, the property thus acquired passing into the control of a party of Aspen capitalists, consisting in the main of Messrs. Shear, Gillette, Dow, Miller and Blackburn.

To a correspondent of the Denver News Mr. Wells B. McClelland, a member of the new company of Steamboat Springs, said: "All this trouble really amounts to nothing. Our acts are simply those of going on to land and taking it up as placer ground under the existing laws. The Elk River company could show no title to the land they have claimed, and as the property secured is worth in the neighborhood of \$2,000,000 we naturally find and put men to work. Miller, Johnston and myself have acquired about 600 acres of the land which the Mackey or Elk River company, as it is now called, claimed. In all there is a slice of exceedingly rich ground, and we are going in extent which is now in the hands of the Aspen companies, all of which has been presumed to be patented ground in the possession of the Mackey company.

"Some of the company are trying to intimidate our men and have threatened to resort to the Cripple Creek way of getting a man out of camp, but they are not strong enough for anything of that sort now. The directors of the company are falling out and jumping has been going on for some time. The new work going on is the result of the victory gained by the Aspen company in an injunction suit in which it was sought to restrain them from operating on the property by shutting off their water. The latter company now owns and controls the land surrounding the Mackey company's property, thus cornering the water supply of the old company. The camp is well crowded with prospectors and great excitement prevails.

ARIZONA GOLD MINES.

Two important discoveries of rich lodes are reported from the Santa Maria district, says a special to the Denver News. Fred Bonner and Harry Ashton found a lode near the old Hays mine which is a splendid prospect on the surface. The lode is a strong one and prospects well in free gold. Mark Joubert and Harry Ashton found a lode near the Sultan claim that is unusually rich. It is supposed to be the lode from which rich float was found years ago and for which people have prospected at different times for several years past.

Ex-Governor R. C. Powers will ship a 20-horse power boiler and engine to his Elmer mine, on which extensive development work is being pushed.

Thomas Roach and partners have struck a flow of water in the Cumberlidge mine. They have shaft down 142 feet, with three feet of good ore exposed.

George Meek and three partners went prospecting for gold in the mountains and nearly died of thirst before reaching water. They lost the first and left one of their companions far in the desert. They discovered water on returning to their companion twenty-four hours later, found him nearly dead, and it is feared that his mind is permanently deranged.

Superintendent Stantman of the Congress mine reports that a new water supply has been developed at the mill and the forty shafts are running night and day.

Twelve miles of the grading on the Jerome camp branch road has been contracted to R. Tooley, who will start work at once. He expects to have his contract completed in sixty days.

There are about 100 men at the San Domingo placer. Contractors for the gravel is worked by the dry washer process.

Senator Tabor will ship pipe from Denver for the pipe line from the Hassayampa to the Vulture mine. Work will soon begin at this old camp.

Joseph Morrow and partner have made what appears to be a bonanza gold strike in government placer ground near the town of Prescott. The vein is two and a half feet wide at the surface and gives an assay of \$190 per ton.

NATIONAL IRRIGATION CONGRESS.

By the authority of the national executive committee the third national irrigation congress has been called to meet in the city of Denver, Colorado, for seven days beginning September 1, 1914.

To the people of the western half of the United States this congress presents both an urgent duty and a grand opportunity. Irrigation commissions in seventeen states and territories, created by the last irrigation congress, will render reports to the convention at Denver. Upon these reports existing conditions and future needs in all parts of the arid region it is proposed to construct a national policy and code of local laws to be submitted to the next congress and the legislatures of western states.

In accordance with a resolution adopted by the international irrigation congress at Los Angeles, Cal., during the Colorado national irrigation congress will be composed as follows:

- 1. All members of the national executive committee.
2. All members of state and territorial irrigation commissions.
3. Two delegates at large and as many additional delegates as they have congress districts, to be appointed by their respective governors for the following states and territories: Arizona, Colorado, California, Idaho, Kansas, Montana, Nebraska, Nevada, New Mexico, North Dakota, Oklahoma, Oregon, South Dakota, Texas, Utah, Washington and Wyoming.

4. Two delegates at large for each state and territory not heretofore enumerated, to be appointed by the governors of said states or territories.

5. Fully accredited representatives of any foreign nation or colony, each member of the United States, each member of the national executive committee, each member of a state or territory, of agriculture, horticulture, of chambers of commerce, of boards of trade, together with a delegate appointed by the mayor of each incorporated city of the seventeen states and territories named as being directly interested in irrigation, will be admitted as honorary members.

TARANTULA AND CENTIPEDES.

"It's sure death to be bitten by a tarantula. Such is the general impression among people who have a limited acquaintance with them," said the campaigner from the southwest to the New York Sun. "But I think that my experience in Arizona, covering a period of five years I will not substantiate the silly notion."

"I had my largest experience with tarantulas while on the Geronimo campaign during 1885-86, and one night while in camp at a mountain camp I was awakened by the Mahoney was bitten on the arm by a tarantula whose body was as large as a walnut. The only evil effect was the swelling of the arm, which was down in a few days without any recourse to medicines or drugs of any kind.

I never knew of a man, woman or child in Arizona dying through being bitten. "Drift" of H. used to catch tarantulas with him, and catching them in the same way that a boy would catch a bee, by grasping him firmly around the center of his body, where the joint is.

"Centipedes are the worst thing in Arizona next to the rattler, and right here I want to say that I was much interested in reading a story I think was in the Sun, of a hot-up where a centipede crawled up a man's leg, and all the terror he felt because he dare not move through fear of being bitten and he expected to feel the centipede sink its feet in him at any moment, and that would have been the end of it. So far as his being near death's door and all that, if he never dies until he is struck by lightning, I think he has a swallow one, and then get it in his death trap.

"But they are nasty things, sure enough, although they are not dangerous unless they leave a red mark, which burns and itches like sin for a few hours."

STRUCK IT RICH.

Charles Williams is out from Dixie and reports great activity in quartz and placer mining that he has discovered in the Grand Canyon, Idaho, Reser, Flak and W. M. Clark are mining a bar on this side of Salmon river, which is paying \$100 per day. They get their water from gulches, which is now nearly dry, and will soon commence packing gravel to the river and continue washing. The gold found is of the ordinary river gold, but a coarser and highly oxidized variety, which evidently came from some quartz ledge near at hand, as it was found in the wash.

Charles Williams has discovered several claims on the old Dillinger placers Mr. Mailton is running three pipes and stripping a lot of new ground which promises richly. Mr. Williams has a gold bottom, the proceeds of five pounds of ore from Dillinger's Samsponian ledge, and which is said to have a two-foot ore streak.

TO REPLENISH THEIR HERDS. The cattle ranges of eastern Washington are being invaded by the stock raisers of Montana this season to reorganize the depleted herds. Heavy shipments to eastern markets has wrought. For three months, commencing with October, says the Tacoma West Coast Herald, it has been the custom to load train loads of cattle with stock for eastern consumption, and while Washington, Oregon and Idaho have contributed to the supply, the cattle from that state have awakened to a realization that they were destroying the young stock from their herds, and have very sensibly taken a new tack.

NEVADA STRIKES. The mining industry of the southern portion of Lincoln county is coming to the front, says the Placerville (Nev.) Record. New strikes are being made and old properties are looking more promising.

An important strike has been made in the Forster mountains, situated in the southwest of El Dorado canyon, on some old claims that were located some eight years ago and abandoned. About the latter part of April John Housa was prospecting in the canyon and discovered a ledge of ore from them, which they had assayed for gold and which went very high. Other samples were assayed, the running from \$200 to \$250 in gold to the ton.

There are four parallel ledges and all well defined. The belt is small, being about one mile wide and one mile long. On the Capital mine two shafts have been sunk, one twenty feet and the other of three feet, and the ore is several feet apart. The vein is from two to two and a half feet wide and averages the same in both shafts, \$11 in gold to the ton.

A RICH PROSPECT. In conversation with Major Simmons of the Keystone, the geologist, a wonderfully rich prospect found in the vicinity of the Keystone was entirely true. The ground is about 400 feet long and 100 feet wide. It is a former prospect of Blair and Franklin, but had been allowed to go back on account of not doing assessment work. It is a rich prospect, and is a pure accidental, says the Rapid City Journal. About a week ago William Franklin and his daughter were out talking in the system of a Colorado mining which Mr. Franklin was carelessly driving his pick in the ground. His daughter picked up a piece of rock and immediately discovered that it contained a quantity of considerable quantities. The report of the richness of the rock could hardly be credited all day long, and were pondering up the rock, thereby satisfying themselves on the subject. Charles Upman brought over \$100 of gold that was pounded out by hand during the night, and during the next few days. Work of developing this prospect will be at once commenced in order to find the ledge, which cannot fail of being exceedingly rich.

NEBRASKA. Clay Center's new flouring mill has begun operations. The Lincoln Reporter is now advocating a bounty on babies.

Rev. A. C. Gearhart has resigned as pastor of the Lutheran church at Auburn. The Nebraska's bank examiners have gone on a month's fishing trip to Utah.

The Loup Valley District Sunday School convention will be held August 2 at North Platte.

An effort is being made to force the business houses of Falls City to close on Sunday by ordinance.

Hartington, Randolph, Wayne and Norfolk are talking of holding a tennis tournament soon at Norfolk.

Mennonite brethren in Christ have begun a series of revival meetings at Holbrook and will erect a tabernacle.

A horse fair association has been organized at Falls City and a meeting will be held August 2 and 3, with purses of \$1,500.

HAYDEN BROTHERS Fair Dealing AND Low Prices.

SILK DEPARTMENT 3,000 Yards of Printed China Silks

In Navy, Brown and Black ground AT 19c a yard.

Only one dress pattern sold to a customer and none to other merchants. No samples of these goods cut. If you want a silk dress for half its value, come early, because they won't last all day.

19 Cts A YARD for good quality PRINTED CHINA SILKS SATURDAY MORNING

A SWEEPING PRICE Men's Summer Suits

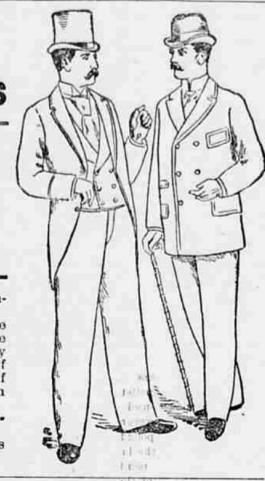

YOUR CHOICE OF ANY Light Summer Suit IN THE HOUSE FOR \$9.75

They sold right along from \$13.50 to \$18.

These suits are light, airy and fashionable—in sacks and cutaways. The cutaways are extra long and in the regular cut of this season's style. There are all varieties of cloths and colors, in fancy chevrons, cashmere, clay worsted, etc. If you need a light summer suit, buy now if you already have a suit, buy another, as such a price (\$9.75) is rare and valuable.

Money refunded if goods are unsatisfactory. Come and see our line of summer coats and vests.

WE CANNOT EMPHASIZE THIS FACT TOO STRONGLY Before buying a Piano, an Organ, a Violin, a Guitar, a Mandolin or some Sheet Music, look through our stock. Lookers on invariably become purchasers.

Groceries.

The list of prices given below refer to choice selections from our stock. When you order from us you can depend on receiving full value every time. Large pails jelly, 25c. Choice sugar corn, 5 1/2c can. Early June peas, 8 1/2c can. Choice solid packed tomatoes, 9 1/2c can. Very fine preserved blackberries only 10c can. Choice cuts steak salmon, 8 1/2c can. Oil sardines only 3 1/2c can. Mince and apples only 7 1/2c can. Fibrous coconut only 7 1/2c can. Corn starch, 3 1/2c. Bakers' chocolate, 17 1/2c package. Sweet chocolate only 3 1/2c package. Tomato catsup only 15c pint bottle. Pure condensed milk, 10c can. Good rice from 3c up. Rolled wheat flour, some call it California brand, only 5c. Finest imported queen olives, 35c quart. Saville olive only 25c quart. Arabian olives only 15c quart. Mixed pickles, 5c bottle. Chow chow, 5c bottle. French mustard only 2 1/2c bottle. Oysters crackers only 3 1/2c pound. 3-pound can golden pumpkin only 10c.

Flour.

To introduce Haydens' best 5X flour, we will for a short time put an every sack one of the following articles. The flour is warranted to be the best you ever used or money refunded. One diamond ring. One gold watch. One \$5.00 bill. One set solid silver plated teaspoons. One ladies' rolled gold watch chain. One ladies' cluster diamond lace pin. We carry the leading brands of flour, such as Haydens' Bros' 6X Superlative (Rex patent) hard wheat flour, \$1.10 sack. Valley Lily flour, \$1.00 sack. Central Mills' Best Superlative, 95c sack. Snowflake flour, 65c sack. A very good flour for 50c. Good rye flour 85c sack. Choice rye flour \$1.00. Best rye flour \$1.15 sack.

Haydens' Eye Openers on

Meats.

Read these prices: Sugar cured No. 1 hams, large size, 10 1/2c; sugar cured No. 1 hams, 14 to 16 pounds each, 11 1/2c, and hams from 8 to 12 pounds each, 12c; boneless ham, 5 1/2c; salt pork, 8c; pickle pork, 7 1/2c; corned beef, 4c per pound; sugar cured bacon, 10c, 12 1/2c and finest made for 14c; corned beef, 5c; summer sausage, 17 1/2c. With such prices as these on meats who can say that Haydens' is not in line.

Dress Trimmings and Button Dept.

Big special bargains in jet trimmings, 25c and 30c. Jet at 10c per yard. Gimp at 10c and 20c per yard. Finest quality braids in black and white, in all the different widths, from 2c, 3c, 5c, 8c, 10c, 12c. Dress buttons at 6c per set. Odd lot of nice dress buttons at 2c per doz. Buttons in all styles and sizes, and cheap ones, too.

BLACK GOODS

To do this department justice we would need the entire space of The Bee. 40-inch all wool henrietta, worth 59c, before-invoicing price, 39c. 40-inch storm serge, worth 59c, before-invoicing price, 35c. 46-inch Frederick Arnold's best German henrietta, worth 98c, before-invoicing price, 59c. A magnificent line of black goods. A complete line of black goods.

HAYDEN BROS. STRIKE THE RIGHT CHORD IN OFFERING Fine Music and Musical Instrument AT VERY LOW PRICES.

SHEET MUSIC, comprising such popular titles as "Over the Waves," "Fifth Nocturne," by Leybuhl; "Minute," by Raderewski, etc., such as are regularly sold for 50c, 75c and \$1.00, NOW 6c PER COPY. Catalogue upon application. 5,000 copies of all grades of Vocal Music, folio, 25c, 35c and 50c. A full and complete assortment. MUSICIANS AND OTHERS are invited to look over our assortment of pianos, organs, violins, guitars, mandolins, etc. We offer as a leader, an elegant guitar at \$3.75. Mandolins from \$3.75 upwards. Stewart banjos from \$10 up. We are agents for the celebrated Washburn mandolins and guitars. If you contemplate getting a piano, get our prices on "The Chickering," the standard piano of the world, and for which we are sole Omaha agents. We can make a very material saving for our customers, as we undersell regular music dealers. New pianos always on hand for rent. Prompt attention given to piano tuning orders. Our piano case organ is the latest novelty in organs, in appearance resembling a handsome, upright piano with seven full octave keys.

SOME MATTRESS TALK. ALFRED THE GREAT, in his famous sub division of time, gave 8 hours to sleep.

SANDOW, the Strong Man, says he sleeps at least 9 or 10 hours out of the 24. GLADSTONE attributes his wonderfully prolonged powers in a measure to long sleeps.

Even the average man—he be a professional or business man, mechanic or laborer—spends at least one-third of his time in bed. Considering this, why not get the best mattress to sleep upon, and we can let you have the best at a very moderate figure.

Our mattresses are made by the Omaha Mattress Co. and Billow & Doup. Our figures cannot be undersold. Here are some samples: Cotton mattress, \$2.00. Combinations, \$2.50. Wool, \$3.25, \$4.25, 4.75. Hair, \$8.00, \$10.00, \$12.00.

We can make over any moss or hair mattress in whatever size you desire. Feathers and pillows of the very best grades at the lowest possible prices. DON'T FORGET OUR FURNITURE PRICES.

Come, See and Be convinced. HAYDEN BROTHERS

It is the oldest frame structure in Frontier county. The Table Rock Herald has changed hands just because the editor wore a Coxy badge on the Fourth of July. The business man boycotted him and the Herald was sold down on Sunday and the Globe and Argosy soon after. One thousand men are now employed.

Work is being rushed on the big plant for the Omaha & Grant smelter will be shut down on Sunday and the Globe and Argosy soon after. One thousand men are now employed.

The new gold saving device, called the Beam process, starts in at Telluride with an assured supply of ore. Parties interested in the mill, Messrs. Beck, Chapin and Whitehead, have taken a bond and lease on the top Johnson group of mines in Prospect basin, at \$150,000. The first payment will be made in six days, which gives time to test the mill. The bond expires in one year, and the mill will be ready to start in the group, and it is said that a large force of men will be set to work to develop the vein and get the ore to the mill.

WYOMING. The state penitentiary at Rawlins is fast nearing completion. Laramie merchants came near having a sugar and flour famine. Casper lubricating oil has a range of 358 degrees—standing a fire test of 326 and a cold test of 22.

The sources of the coming Casper water system are living springs, situated 1,200 feet up the side of Casper mountain. The cattlemen of Evanston are negotiating with the Union Pacific company for the leasing of about 200 sections of land around Evanston and to the north. If they do it will settle the foreign sheep nuisance very satisfactorily for the settlers around the town, who are being eaten out of house and home, and will revive the cattle industry in that section.

In excess of 220,000 sheep have been sheared at and near Casper this season, giving a wool clip of over 2,000,000 pounds. Of this 20,000 bales were shorn by machinery, Casper having the first steam shearing plant established in the United States. Wool rearing and knitting works are soon to be established at Casper. Manufacturers of woolen cloths is also being agitated.

OREGON. The grain aphid has appeared in Wasco county. An oatmeal factory is being projected at Albany. Hop fields near Harrisburg promise tremendous yields. The Hamersley mine turned out \$350 from a short run.

Three large hop houses are going up in the vicinity of Gervais. Grant's Pass has cut its saloon license down from \$500 to \$400. About 200,000 dozen of eggs are shipped from Albany each year.

In Lane county the new aphid is appearing on oats and timothy. An association is about to start up a co-operative butcher shop at Tillamook. The Union Pacific has over 1,000 men at work between Bonneville and The Willows.

It is estimated that \$60,000 in gold dust was taken out in the Medford district last year. It is worth 50 cents a day to pick wild blackberries on the premises of Linn county farmers. The Canyon City will have to spend \$23,000 in replacing and repairing bridges affected by the freshets.

McKune & Co. will erect a stamp mill this summer on their ore vein in the Blue river mining district, fifty miles from Eugene. While cleaning up at his placer claim in Kerby district Guy Morrison found several nuggets, the largest weighing 10, 160 and 32 respectively.

Quite a number of late inspections of aphid-infested grain up the valley show that the kernels seem plump and unshrivelled, and fears are being allayed. D. W. Long and Thomas Nicely of Juniper precinct, Umattila county, are two of the largest and most successful farmers of that section. This year they have in 4,700 acres of wheat, which they report to be in splendid condition, with prospects of be-

ing ready for harvest in three weeks. They trace that this grain will average fifty twenty-five bushels to the acre—a total product of 17,000 bushels.

The curfew law is being enforced in Albany. A 16-year-old boy was put in jail, where he remained three days, for being on the streets after 9 p. m.

There is talk of forming a company and starting a pulp mill on the upper Necanicum company on the bluff north of Florence. Chlorination, amalgamation and roasting will all be used.
