Mrs. Mary C. Frainey, Council Bluffs, 25

A nice, cool swim at Manhattan beach, Lake Manawa, is the proper thing to take these hot days.

Hammocks cheap, Davis the druggist.

Domestic soap outpats cheap soap.

At the next meeting of the city council the matter of hiring an expert to make an electrical survey of the city will again come up, and a committee from the Economic League will be present to urge the council to take affirmative action.

The representatives of the Economic League claim not to have any particular prejudice against the Council Bluffs Gas and Electric Light company, but to be merely insisting that the rates for light should be brought down to somewhere within reasonable figures.

The work of an expert, they claim, is necessary to determine just what is a reasonable figure. The council at its last meeting voted down the question of engaging an expert, because it was represented to them that they would have to pay for the four days' work it would take to make the survey and the plans.

Those who have been investigating the subject say that it is possible for good gas to be furnished at a cost not to exceed 50 cents per 1,000 for heating and \$1 per 1,000 for lighting public buildings.

The work of an expert, they claim, is necessary to determine just what is a reasonable figure. EDGEMONT, S. D., July 16.—(Special Correspondence).—None of the symptoms of business depression, financial stringency or commercial lethargy prevailing to a greater or less extent throughout the country are to be detected in this thriving republic city in this exceedingly democratic summer of 1894.

The tent, a large affair, which has splendid acoustic properties, will comfortably seat nearly 1,500 people, and as Dr. Tracy is an excellent talker and an able and eloquent speaker, his talks are thrown upon the canvas, there seems to be no reason why he should not meet with the most successful results in the foundation of a live and prosperous city has been well laid.

Situated as it is at the edge of the Black Hills, with the marvellously rich peaks and foothills of that wonderful region stretching away 100 miles to the northward, and tens of thousands of acres of river valley and bench lands rolling far to the west, east and south, offering unequalled inducements for agriculture and grazing, Edgemont possesses natural advantages that cannot be exceeded and it is upon these and their intelligent development that her citizens have so firmly and happily pinned their faith.

The initial move was made by the railroad, and under the auspices of that progressive organization the foundation of a live and prosperous city has been well laid.
