EFFECT OF THE SCHEME ON THE SERVICE

Election of Senators by Direct Vote of the People Discussed-Gas as a Propelling Force for Street Cars-End of Kelly.

WASHINGTON BUREAU OF THE BEE. 1407 F Street, N. W. WASHINGTON, July 23.

The special committee made up of three senators and three representatives, created for the purpose of creating a systematic reorganization of the navy, has completed its work on the staff and line officers of the navy and the marine corps. It remains only to organize the enlisted branch of the service. The entire scheme of naval reorganization will be reported to congress next week. In the reorganizations of the staff and line it is provided there shall be eight military corps, designated as follows: Corps of the line; medical corps, pay corps, engineer corps, naval constructors, naval cadets, enlisted men. The list of commissioned line officers is divided into several grades, with the following limits; Sixteen rear admirals, six captains, 100 commanders, seventy-four lieutenant commanders, 250 lieutnants, 750 lieutenants of junior grade; ensigns sufficient to maintain the active list.

The grade of commodore on the active list of the navy is abolished and officers in the grade now in the active list shall be commissioned rear admirals. No increase is made in the pay of any corps. The status of each is fully defined and the contention of many officers as to relative rank of staff and line officers is remedled. The pay of staff officers is reduced to make it conform to that of the line officers of the same rank. One of the most important features is the creation of a "reserve list" to overcome the present congestion of the line. The reserve list is limited to 100, and is made up by tak-ing from the most congested branch of the service. Those entitled to enter the list must have entered the service between 1861 and 1867, inclusive. This "reserve" does not increase the number of officers, and the pur-pose is to assign officers of this list to work now performed by officers on active shore service. It is reported that rear admirals shall be appointed by the president from the list of admirals, and shall be confirmed by

ELECTING SENATORS BY DIRECT VOTE. Representative Tucker of Virginia, the author and champion of the resolution for a constitutional amendment to elect senators by direct vote of the people, which passed the house on Saturday, is sanguine that the senate will also pass the resolution and the necessary three-fourths of the states will give their assent necessary to make it

effective.
"There will be no difficulty in getting the a sent of the states," said Mr. Tucker, "as there is no limit within which the senators are to give their consent. When there-fore, congress submits the constitutional amendments, ten of them approve it and one objects. The ten affirmative votes count in its favor, but the one negative does not oount again t. That is, the state which has voted in the negative may try again the next year. Thus only affirmative votes are recorded at the State department, and then, after a series of years, if the affirmative votes reach three-fourths of all the states the constitution is amended. At present, with forty-four votes we should need the a sent of thirty-two. The assent of fourteen is of thirty-two. The assent of fourteen is assured in advance, as eleven state legislatures had formally resolved in favor of the change up to two years ago and three more since that time. California, Oregon, Indiana, Illinois, New York, Michigan, Kansas, Idaho, West Virginia, Louisiana and Ohio are among the states already committed.

"In the meantime, while the states are giving this as ent, the amendment is practically in force, as many states are nominat-ing their senators at state conventions. Illinois started the movement, Michigan has recently followed and the practice will so universal. Mitchell are particularly interested in the measure in the senate and I have no of its passage at this session or in the session opening in December."

GAS MOTORS FOR STREET CARS. One result of the publication a few months ago of the promising performance of gas motors as applied to street car propulsion in Germany has been to flood the author of the report, United States Consul Mason at Frankfort, with letters from engineers and other interested persons asking for more compliance with their requests the

consul has just submitted another report describing experiments made in England with the same motor, which show even bette results, the cost of operation being so far below that of electrical or horse railways as to mark a new departure in street railways as methods. The consul says the Liebrig patents have been acquired by an English syndicate and the motor has been vastly improved in one way especially, whereby it may readily be adjusted to cars already Sails for cable, electrical and horse power. The report gives in detail a description of th mechanism, showing how it operates with great economy under the vastly different conditions of heavy and light traffic, and says that the improvements made have largely reduced its cost. The car resembles any ordinary horse car, running quietly and easily, emitting neither smoke nor steam. and is easily controlled, stopping on a down grade of one to twenty-three in its own longth. Its weight, filled with passengers, is five and one-half tons and for gas it costs 2 cents per mile, against 7 cents per mile for fodder and bedding for horses. The first cost is about the same as a horse car with eleven horses required to draw it. A special car is being made in England for exhibition in the United States next October. KELLY IN HARD LINES.

Kelly's Commonwealers are camped near Washington in a starving condition. Being compelled to beg, some of them have been arrested for vagrancy. Judge Miller had a squad of them before him, and after reading them a vigorous lecture, let them go.
"You have been terribly misled," said Judge Miller, "and everybody sympathizes with you, and there is no one on earth who does not want to help you if you are really in earnest and want work. But the people won't help tramps and vagabonds.

"This is a terrible state of affairs. Her you are, several hundreds in number, penni-less and without food, and here because of some crazy idea in your head about what

Further questioning brought out the true condition of affairs. In the camp over the river, one prisoner said, there are several hundred men without tents, blankets, food or even spring water. At the time of this arrest, he said, he had been without food for more than twenty-four hours, but never until he joined the army had he experienced

He expressed a desire to return in the di-rection of his home in the west, and Judge Miller said he would certainly like to as sist him back home.

"I don't want to send you to the work house," the judge told him, "but if this begging keeps up that is just where you and your companions will have to go.

"I heartily sympathize with you poor, misled men, but have not a bit of sympathy with your leaders. They are keeping you here in idleness and starvation for their own purposes. If I let you go what will you

NONE BUT AMERICANS ON GUARD. Senator Allen today introduced a resolu-tion directing the secretaries of war and navy to inform the senate what percentage, if any, of the enlisted men, non-commissioned and commissioned officers of the navy o the United States are aliens, and what per by birth or naturalization. The senator also introduced a bill providing that hereafter no person shall be enlisted into the army, military or naval service of the United States who is not at the time of his collistment a time of his enlistment a citizen of the United States.

A favorable report was today made from he senate committee on the judiciary on a bill providing that hereafter terms of the

circuit and district courts of the United States within and for the state of Nebraska shall be held at times and places as follows: At Omaha, on the first Monday in May and the second Monday in November of each year; at Lincoln, on the third Mon-day in January and the first Monday in October; at Hastings, on the third Monday

in April, and at Norfolk, on the fourth Mon-day in April in each year.

Federal Government Must Foot Big Bills for Transporting Troops by Rail.

WASHINGTON, July 23 .- While residents f Cook county, Illinois, will undoubtedly suffer an enormous loss resulting from the disorder and lawlessness attending the great strike the taxpayers of the United States at large will also have a considerable bill to oot to meet the expenses incurred by the national government. That this will be considerable there will be no doubt, but at present it is not possible for the accounting officers to reach even an approximate estimate of the total.

July 14 the attorney general sent to congress a communication asking for a deficiency appropriation of \$250,000 to defray the expenses of retaining United States marshals and deputies for service during the Commonweal movement and the strike. Now he is satisfied all this money and perhaps more will be required to meet expenses. A large number of deputies were employed and in many instances it was necessary to feed and shelter them at the government's expense. Arms and ammunition were purchased, car-riages and horses were hired and railway fares were paid.

The War department also has been put to

great expense, but just how much will not be known until the quarterly and special returns come to Washington. The troops carried with them the rations they would other-wise have caten at their posts, so there is no additional expense on that score. The principal item of expenditure will be under

the head of transportation.
In some cases the railroad companies will probably present no bills, especially where the troops were employed in the protection of their own lines, but in others, where the troops were hauled half way across the con-tinent, the bills will be heavy. The limited annual appropriation for the transportation of troops was at a low ebb when the strike occurred and in consequence of these extra-ordinary war expenses the War department has had to forego altogether its usual prac-tice of transferring troops from one place to another, so much hardship will result to the troops stationed at posts in the ex-treme south and in the Indian country who had reasonably expected to be transferred to less arduous service after serving their turn.

SENATORS TALKING IT OVER. emocratic Steering Committee Has a Lit-

tle Consultation After Adjournment, WASHINGTON, July 23.-Immediately after the adjournment of the senate today there was a conference of democratic leaders of that body in the room of the committee on appropriations. Among those present nators Corman Brice Carbrell ris, Ransom and Blackburn, comprising most of the democratic steering committee. The senators had a long talk, and when they departed no conclusion had been reached as to the best way out of the present delicate position in which the majority found them-selves. The proposition for a caucus was discussed, and some of the senators thought it would be wise to have a general conference of democratic senators before any step was taken. The matter of calling a caucus was left for further consideration and wil no doubt be discussed among other senators and their views ascertained as to the ad risability of taking such action. Senator Vilas will insist upon his motion striking out the one-eighth of a cent differential on sugar and several senators will hold that it is incompetent to instruct the conferees to recede from any portion of an amendment as though it were an entire amendment. point will be made that the conferees can be instructed on any item by the senate.

Land Office Cases Decided.

WASHINGTON, July 23 .- Secretary Smith today affirmed the action of the general land office in rejecting the applications in the cases of Ferdinand Garbarro, Theodore Barlan, Isaac N. Williams, Serafin Wunderle, Lou Wark, James Brown, John Anderson and Timothy Healy, to enter lands near Oregon City, Ore. The ground of rejection was previous patent of the land to the Oregon & California ratiroad.

The appeal of the Southern Pacific railroad

in its case against James L. Brady, involving lands near San Francisco, has been withdrawn. In the case of E. D. Childs against George

Ayres et al, Secretary Smith holds that while an entry under the timber culture law segregates the land from the public domain in protecting it from subsequent entries, yet it cannot be said that the entryman is the owner or proprietor of the land, having only

Horace Chapon and Fourteen-Year-Old Ida Tibbetts Missing.

MOTHER OF THE GIRL CAUSING TROUBLE

Young People Left the Parental Roof While Mrs. Tibbets Was Attending Divine Service-Police Asked to Arrest Them.

LINCOLN, July 23 .- (Special to The Bee.) -Mrs. Betsey C. Tibbetts, who resides in the northern part of the city, came into the police court in a very flurried state of mind this morning and asked the police force to go immediately in search of her daughter. who she says has eloped with Horace Chapon, a 19-year-old boy.

It appears that young Chapon has been paying attentions to Miss Ida for some time past, but his visits to the house were discouraged by her mother, who thought her daughter too young to be made the object of the affections of any young man, as she is only 14 years of age. It was while the mother was at church yesterday that the young couple planned their presumable elope ment. Not much attention was paid to he absence from home yesterday, but when she did not return at night an investigation showed that a wedding wardrobe, consisting of two dresses, had been taken, while the father of the young man says that he had only \$1.50 to his knowledge.

The mother is much angered over the act of her daughter and says that some one is of her daughter and says that some one is going to have trouble on his hands, as Ida is under the age of consent and her marriage would be invalid. She has furnished the police a complete description of her daughter and it is thought that she will soon be returned to her mother's protection.

To Extend the Mitchell Canal. GERING, Neb., July 23 .- (Special to The Bee.)-A plan is proposed here now which if carried out will increase the irrigated area of this section by the addition of 15,000 acres. It is the extension of the Mitchell canal for a distance of about fifteen miles and comprehends the enlargement of that canal to a sufficient size to carry much more water. The canal will have to cross the bad lands. This has been the obstacle which has heretofore prevented the irrigation of one of the finest valleys along the river. A pre liminary survey was made this week, how ever, which shows that the object can uplished at a cost of probably \$75,000 and as a large proportion of this estimate is provided for in the labor which will be performed by the land owners, it is being very strongly agitated. The extension will make the Mitchell canal almost fifty miles in length.
