COMMERCIAL AND FINANCIAL

Fullish Crop Reports Scared Shorts in Corn Very Much Yesterday.

WHEAT BECAME ACTIVE FOR THE DAY

Corn Was Active and Again Excited and Unsettled, with the Market Broad and Volume of Business Unusually Heavy.

CHICAGO, Aug. 1 .- Bullish crop reports scared shorts in corn today and the market went up with a rush, closing 214c higher. Corn carried the other markets with it, wheat closing 1/2c higher, oats 1/4c higher and provisions at an advance for the week

Wheat became active for the day, the range being ic. The feeling developed was steady, and the general market was in clined to follow corn. Local professionals and New York led in the buying, and the northwest sent a good share of the selling orders, while advices from the spring wheat territory were very favorable. Cables were weaker in tone and receipts liberal, both of which were inclined to depress the market after the opening, but the bulge in corn checked the downward course and values advanced. The sharp advance shortly before the close was due to the strength in corn here. Shorts covered rather freely, September opened 14c lower at 5314c, advanced

%c, lost %c, advanced ic and closed at 53%c Corn was active and again excited and unsettled, with the market broad and volume of business heavy. Initial transaction were at from 16c to 76c advance. Septem-ber opened at 4614c and gradually sold up from 14c to 1%c, with an advance of 1c fo May, eased off from 11/2c to 11/2c, advanced from 7/2c to 11/2c, changed some, ruled firm and closed with September at 47/3c. The country was buying freely again and offerings were meagre at times, which was quite a feature. The various state reports were bullish and the government weekly weather bulletin was also of the same tenor, which increased the buying orders from the out-side, as receivers and commission houses all had orders to purchase at the opening. weather map showed no general rains. The state report of Iowa was very bullish, as also was Nebraska's, but Missouri, Illinois and Kansas reported the crop in much better condition. September was relatively firmer than the rest of the list, the comparatively light stocks and moderate re-ceipts, together with a good demand for the Cash article, making shorts rather nervous. Oats were higher in sympathy with corn.

The range for September was %c.
Provisions were dull but firm on the atrength in corn. Compared with last night September pork is 12½c higher, and September lard and ribs unchanged. Freights-Corn to Buffalo at %c; charters

The production was about \$2.000 bbls. for the twenty-four hours; shipments, \$2.656 bbls.

OMAHA GENERAL MARKETS.

Condition of Tride and Quotations on

Staple and Faucy Produce. The egg market has been the most interesting feature of the produce trade during the past few days. As already noted the advance has been due to the light receipts and the better outlook due to the light receipts and the better outlook at eastern points. The quality of the eggs coming to market at the present time is so poor and there are so many different grades being soid on the market that it is no easy matter to quote the market in a way that will not be misleading in the country.

The butter market does not show much change prices remaining in about the same notch, with the exception of creamery, which is working upward.

The poultry market was steady yesterday but prices are low and the demand stow.

The hay market is booming, and higher quotations will be noted below. The advance appears to be due to a combination of light receipts and a short crop of new hay.

VEGETABLES.

A great many of the cantaloupes that have come to this market this year have been of very little value. There are, however, some very closes fittle lems arriving.

The Goorgia growers of watermelons suffered severely from the railroad strikes by reason of inability to reach the western markets and because of nundrois of cass of melons rotting in the railway yards, or sold for less than the code of freight at points already overstocked.

It has been a bad year for melon growers, Pirst, the late freeze destroyed their fine prospects by killing out the entire erop. The second crop had good prospects until the prospects by killing out the entire erop. The second crop had good prospects until the prospected drouth cut it short and caused if to come into the market later than would have been the care otherwise. The growers would hardly have made more than expenses anyway, and the closing of the western markets by the strike means a net loss to almost every grower in the business.

FRUITS.

At the auction sale yesterday afternoon a car of California pears and plums was disposed of. Prices were not materially changed. The other cars expected did not arrive in time.

Although it is a little early yet, fruit men areommencing to talk about the grane crop. Last season a good many eastern grapes found their way west, and the trade has come to be quite an important feature in the fruit business. This year there is every indication of one of the heaviest grape yields ever known in the EricChautauqua county (New York) grape belt. Reports from Dunkirk are that while last year the yield was much larger than that of any preceding year, conservative estimates place the present season's crop fully one-fifth greater than that of last year. The grape union is confident that the prices will be a little better than last year, as new markets are constantly being opened up for P is season's product. Many of the individual shippers secured better prices last year than did those who seld their product through the union, but the expense of shipping was greater, and on the whole the members of the union came out of the deal in better shape than those who depended upon their own resources.

Big Boom in the Market for that Cereal Attricts Attention. NEW YORK, Aug. 1.—There was a big boom in the corn market on the Produce exchange today, which imparted itself to the other grain markets and caused a strong closing all around. The corn ring was transferred at times into a The corn ring was transferred at times into a howling crowd of operators with a hubbub which rivalled the dealings in wheat. Corn had been advanced on dry weather news for some days, but late yesterday was weakened considerably by weather predictions of rains through the corn beit last night. They failed to materialize and as a result the market today was a regular "fireworks" affair and closed from ½c to 2c above last night, with a change of about 2c during the day. No hope is given of any rain and crop dispatches are growing worse every day. Already the price of corn is within 1½c of the price of wheat. A month ago it looked as if this year's crop would be a phenomenally large one.

STOCKS AND BONDS.

Another Dull Day Marked the Speculative

Deatings Yesterday. NEW YORK, Aug. 1.-This was another dull day on the Stock exchange, and the general trend of speculation was in the direction of lower figures. The chief operators in the market were the bears, and the conditions favored them. The seeming irreconcilable differences between the senate and house on the tariff bill, giving promise of an extended session of congress and thereby keeping the financial and commercial community in a state of uncertainty, cannot be regarded as an inducement to stocks for a rise. The condition of the corn crop is not such, according to the most favorable advices, as to lead to the opinion that the granger roads will be tested severely to their carrying capacity to bring it to market. Gold shipments are still being made, and the treasury gold reserve is declining with a steadiness which is looked upon with disfavor, to say the least, by the finan-ciers of the country and the financial officers of the government. But with all these un-favorable elements the stock market gives no evidence of inherent weakness. Particular stocks give way under influences affecting them alone, and under the manipulation of cliques groups of stock depreciate in value, only to recover when the manufac-

tured pressure to sell is removed. But no general liquidation is in progress, there is no apparent desire on the part of the bolders of stocks to sacrifice them in the fear that the bottom is about to drop out of the market. On the centrary, while lower values have been established, the declines have been largely manipulated, and it has respect to the contraction of the contr quired heavy short sales to bring out a small amount of long stock. It is a fact that many of the leading shares are now heavily oversold, and in some of them the short interest is unyielding. For the past few days Sugar and the granger stocks have been the only ones in which there has been any active trading, and as a rule they have moved in opposite directions, Sugar going down while the grangers were moving up, and vice versa. This stock broke 1% per cent and vice versa. This stock broke 1% per cent to 71%, and closed within ¼ per cent of the lowest point touched. The grangers were weak on a selling movement which was directed from Chicago and principally against Burlington & Quincy. This stock broke 1% per cent to 71% and closed within ¼ per cent of the lowest point touched. Rock Island was also offered down, receding 1¼ per cent to 63%, and recovering ¼ per cent. Northwestern lost ½ per cent, closing at the lowest. St. Paul was held well until the attack, giving way only % per cent and regaining ¼ per cent. The transcent cent and regaining 1/2 per cent. The trans-actions were large in Sugar, which in the actions were large in Sugar, which in the opening dealings declined ½ per cent, but quickly recovered and on good buying advanced 1½ per cent to 104%, closing ¼ per cent from the highest. Oregon Improvement declined 1 per cent. In the rest of the shares traded in the movement was merely fractional. The market, which was irregular throughout the day, closed fairly steady at a partial recovery from the bottom figures. The bond market was heavy during the day and closed weak.

The Evening Post says: The speculative situation—for the markets are nothing at the moment but a mirrior of professional movements—may be summed up as follows:

movements—may be summed up as follows:
A strong and aggressive clique of operators
has gone to work breaking down stocks and
advancing corn. In stocks they cannot count on selling from investors, but on the other hand they do not fear investment buying. With sentiment in its present shape a sud-den breaking of the senate deadlock would check their venture instantly, but they take this chance, and have not yet misreckened.

OMAHA LIVE STOCK MARKET

Feccipts at the Legal Yards Suddenly Checked for Fome Reason.

CATTLE TRADE IS STILL STAGNATED

Strike of the Butchers Prevents Packers from Doing Business and Poor Quality Does Not Entice Shippers-Hogs Show Little Change.

WEDNESDAY, Aug. 1. The report that the packing house men were striking evidently had the effect of cutting down the receipts, as only about 900 cattle, 9,900 hogs and 34 sheep were received today. This was a heavy falling off as compared with yesterday, when 2,040 cattle, 20,-684 hogs and 859 sheep were received. The total receipts for the first three days of the present week are 5,650 cattle, 42,750 hogs and 1,183 sheep, as against 5,184 cattle, 27,-784 hogs and 1,166 sheep for the corresponding days of last week. CATTLE-There was really no market on

dressed beef steers. The offerings were light and neither shippers nor packers were inclined to buy anything, the latter being in poor shape to operate while their butchers are on a strike. A few head were reported as sold, but they were light, half-fat stuff and yould not ordinarily be classed as dressed beef steers. There was a little more doing in buichers stock, but the market was ex-tremely dull and the demand very light. There were very few really desirable cattle and the market on such might be called about steady, but the more common grades and rough stock was weak to 10c lower. There was some inquiry for stockers and feeders from the country, and there was some trad-ing in this class of cattle. The general mar-ket was about steady. In a general way it may be said that the market is very dull and it is hardly to be expected that there will be much improvement until the outcome of the labor troubles is better understood. HOGS-Some of the local houses were no in the market today owing to the strike of the butchers, while others were afraid to buy very freely owing to the uncertainty as to what the next day or two may bring forth.

There was, however, a fair shipping demand, which helped out very materially. The market as a whole did not show much change as compared with yesterday. If anything the best hogs sold a little stronger, while the common, trashy stuff was weak. The quality of the hogs arriving at the present time averages very low and by some it is claimed that the proportion of poor hogs was never so large at these yards, not even in 1890, the time of the last crop failure. The bulk of the offerings went at \$4.50 to \$4.65, which included the fair to good loads. with a few top loads at \$4.85. Representative sales: Av. CHICAGO LIVE STOCK MARKET.

Enormous Receipts of Cattle Continued to Burden the Market Yesterday.

CHICAGO, Aug. 1.—Already this week almost is many cattle have arrived as came in during all of last week, and if the prevailing tone of the market was one of extreme heaviness this the market was one of extreme heaviness this state of things was not unexpected. There was no important change in prices of good to choice corn failed steers, that class continuing somewhat scarce, but in the other descriptions there was a further shrinkage of anywhere from the to be. Common grass steers are selling stockingly low. There were sales today at from \$2.50 to \$2.50, and very decent \$1,000 \$1.100-10. attempts the seem of the states of the seem of the state of things was not unexpected. There was no

ceipts combined made a supply close to 20,000 head a good many remained in sellers' lands at the close.

The demand for sheep and lambs was fair and the supply continuing light the market was firm. Local slaughterers were free buyers and were willing to pay from \$3 to \$3.20 for good to choice mattons. Paor grades sold down to from \$1 to \$1.25. Most of the business was at from \$2 to \$3. Lambs were strong at from \$2.30 to \$4.50 for poor to choice, with extra quoted at higher figures.

Receipts: Cattle, \$1.000 head; calves, 500 head; hags, \$2.000 head; sheep, \$1.000 head; afficial yesterday, \$1.2120 head; shipments yesterday, \$1.500 head; left over yesterday, about \$2.001 head; untilly only fair. Market slow and work, with prices \$6100 lower; sales ranged at \$4.8565.20 for ights; \$4.8005.15 for heavy packing and shipping lass.

Totals 24.769 60,149 10,454 COTTON MARKET.

Another New Low Price Record Made for that Staple Yesterday. NEW YORK, Aug 1.-There was considerable excitement on 'change today as the result of a further liquidation of long cotton, which resulted in another new low price record. August contracts selling off to \$6.49. The weakness of the market was due to a break in prices at the market was due to a break in prices at Liverpool and to generally favorable crop reports. A new large crop record predicted with new cotton showing up at Houston, Galvesten and other far south sections at a rate not prepared for by the bulls. At the close of the market sentiment was very bearish.

FOR THIS WEEK.

Every day from 7 a. m. till 6:30 p. m., and on Saturday till 10 p. m. Figures don't lie, unless a liar makes the figures. The best music always draws crowds in Omaha. and here are some melodies adapted to the times which distance Thomas and lead any band in the city an entire lap.

WORK OF MINNEAPOLIS MILLS. Shortage of Water Power is Badly Handicapping Mills at that Point.

MINNEAPOLIS, Aug. 1.—The Northwest-ern Miller says: Minneapolis mills last week ground 171,120 barrels of flour, against 153,000 the week before. Shortage of water power is badly handicapping them. There appears to have been more life to the flour market last week, and though very low prices had to be accepted, the sales reported approximated 220,000 barrels. There was quite free selling for export. The domestic trade still consists in the main of small orders that are to be quickly turned over again. Export shipments were 40,000 barrels, against 34,000 barrels the week the year before. The Superior-Duluth mills made 95,624 barrels, against 62,481 barrels the previous week. Seven mills are this week producing at the rate of 16,000 barrels daily. Flour sales were moderate last week. The export market is duli; stock of flour at the mills and in transit is 21,300 barrels. The Milwaukee mills ground 28,207 barrels, against 29,628 barrels the week before. They are drawing wheat from Chicago by lake to grind. Foreign trade seems disposed to make low prices on the basis of 17s 6d for patents, London. The market in the east is unfavorable, as a rule. ported approximated 220,000 barrels. There

Coffee Market.
