

PULSE OF WESTERN PROGRESS

Discovery of Rich Placers at Jackson's Hole, Wyoming.

MANIT MINES NOT SO RICH AS SUPPOSED

Big Mining Boom Expected After Opening of the Utah and Uncompahgre Reservations—Next National Irrigation Congress—General Western News.

Jackson's Hole is just now having a mining boom that surprised the "oldest inhabitants."

A district has been formed with United States Commissioner Pettigrew recorder, and many claims have been and are being taken daily.

A district has been formed with United States Commissioner Pettigrew recorder, and many claims have been and are being taken daily.

There are old miners here from everywhere, and all unite in predicting this country becoming a great placer region.

So far as tested the country yields from 10 to 100 cents to \$2 and \$3 per yard, and the entire surface of the earth, regardless of material, seems to yield pay.

William Quinn, an old Black Hills miner, says that from the wide distribution of gold he expected to see hundreds of machines at work in Jackson's Hole within a few days.

Several of our old residents have ordered machines for placer work, many of whom have claims to the placer.

The herd of buffalo has arrived, which makes our collection of animals fairly complete.

After considerable delay work has been resumed on the new gold fields of Salina canyon.

The Red Creek Mining company, with headquarters at Manit, has a man working in the black sand.

The first assay gave \$14.24 per ton and was made from a shot sack full of sand taken from different places.

The sand will have to be hauled down hill for a few hundred feet.

Prospecting the ground a peculiar thing was discovered. Almost the entire ground seems to have been covered by a thin layer of sand.

This placer ground, it is said, was located several years ago by some of the Utah pioneers.

They passed through Manit at night in order to find the spot.

After considerable delay work has been resumed on the new gold fields of Salina canyon.

With regard to the Uncompahgre reservation placer mines on Green river, it runs principally to asphalt.

The following brief address in the interest of the west in Colorado will be given those who attend the congress.

Active preparations are being made for the next National Irrigation congress, which meets in Denver September 3-10.

Practical illustration of the results of irrigation in Colorado will be given those who attend the congress, by means of a number of excursions, which will be run to the agricultural centers of the state.

In a short time Custer county will be producing copious quantities of gold.
