Minneapolis Wheat Market.

MinnEaPollis, Nov. 9.—Wheat was higher on larger demand for flour and very much larger sales, higher cables and more foreign buying of wheat reported in the country. Primary receipts were also smaller and talk of wheat feeding was also brisk. Later cables brought buying orders for flour and wheat. The low stocks abroad and the fact that country millers are troubled to get supplies this early in the season were also strong factors of the advance of the day. Prices closed near the top for the day and averaged like higher than the close of the previous day. Receipts, 224.29 bu.; shipments, 17,500 bu. Close: November, 58: December, 57%; May 594,5294; on track No. 1 hard, 594e; No. 1 northern, 585e; no. 2 northern, 57c. London Sheepskin Market. London Sheepskin Market.

LONDON, Nov. 5.—At the sheepskin auction sales today 155,090 Cape of Good Hope and Natal skins were offered and 169,090 were sold. Home trade bought freely and prices were unchanged. Short woolen skins were especially firm in consequence of the better demand for pelts. Prices ranged from 234d to 435d.

The exports of raw wool to the United States during September amounted to 1,033,599 lbs., against 212,590 lbs. last year, the value of which was f28,598, against 65,184 last year. READ THE (FFICIAL TEST Official R port on "E tate Oaks."

E. & L. Kann & Ruos.:

Gentlemen — This is to certify that I have made a series of tests with "F Series" Estate Oak Heating stoves, to determine, First, how long the stove would hold fire; Second, how the several parts of the stove act under a high red heat I fired the stoves repea edit until they were red het all over. I heated them to the highest possible temperature and cooled them off as rapidly as possible. Under those most sovere tests the expansion and contraction did not affect the plates in the least particular. I charged one of them with one and contraction did not affect the plates in the least particular, and contraction did not affect the plates in the least particular, and one-half small bucketfuls of coal slaces on Tuesday evening, June 30, 1891, at 5 o'clock.

Until the following Thursday afternoon at I o'clock the body of the store continued to be so warm that a hand could not comfortably be laid upon it. After that time it began to cool off. The live voals rem the original charges of stack above referred to were visible until 10 o'clock and 15 minutes of the evening of that day.

It will therefore be seen that this store actually held five continuous.
