AMUSEMENTS.

There is a swing, a go, about a vaudeville entertainment that appeals irresistibly to the 5 o'clock sharp this Monday evening at Hay great heart of the American public, and if den Bros. music room, fourth floor. the show is well balanced, the company excellent, it fills that "long felt want" which arises in the very desire of theater-goers to get away from the treadmill of life and forget for the nonce the daily grind incident to an existence in these closing century days. A company, which in the main quite fills the requirements as laid down in the prelude to this article, is now appearing at the Fifteenth Street theater, playing yesterday to two large and thoroughly well satisfied audiences. Coming, as Albini's Empire Entertainers did, entirely unknown to the great mass of theater-goers, the success which the company won yesterday is all the more pro-nounced, and shows with what care the specialty artists have been selected. Throughout the performance is clean, the people stand among the best of their class, and the "turns" succeed one another with rapidity, absolutely essential characteristics to the success of any latter day popular plays or at the Dellione. amusements. The star of the company is Albini, whose tricks with cards have not been excelled by any of the present day sleight of hand performers. He is dextrous to a remarkable degree, and his palming is quite as marvelous as that of Hermann. The show is opened by a sketch team, Byron and Bianch, who put on a very bright act, which never falls to catch the fancy of the crowd. John E. Carroll follows in a number of de-acriptive songs, which were well received yesterday. The juggling of Kinzo Kanko is one of the strong features of the performance. He is a young Jap, with a great deal of self-possession, and everything he does is light and graceful, strong factors to the success of the modern manipulator of plates, sticks, umbrellas and other features of the juggler's art.

The Conway brothers, somewhat reminiscent of Ward and Vokes, are truly won-derful high kickers, their work in this line never having been excelled on the local stage. Mile. Raye gave an interesting exhibition of artistic dancing, while her contortionist act was a by no means small part of her few minutes on the stage. She is an exceedingly graceful woman, and won a hearty round of pplause for her clever work. Max Millian

ANNOUNCEMENTS.

Neil Burgess' Comedy company will be the attraction at the Boyd for three nights, commencing Friday, with the usual Saturday matinee. The story of its success is so well known that it is not necessary to comment upon it. The public has evidently de-termined that "The County Fair" is a good thing, and the more they see it, the more they like it. This is proven by the remarkable run it had in New York of four years, and one year in Boston. There will be a real morrow, and with the exception of a few full and continuous view of the audience, cases Judge Bates will preside. Saturday making one of the most realistic scenes ever

FORTY CARLOADS OF WOOL.

Nearly Three-Quarters of a Million Pounds

of Graded Wool in One Pile Very rarely, if ever, has there been se arge a lot of wool exhibited in one open pile in Boston as it has been our privilege to examine this week in the warehouse of Messrs, Denny, Rice & Co. in Boston, Certainly it may be truthfully said that never has a line of Oregon weel of such magnitude been on sale in any one exhibit before, and this great quantity of wool-nearly 750,000 pounds-arranged and displayed upon a single floor of a warehouse designed exclusively for wool, constitutes a sight which probably could not be witnessed ton, says the last issue of the Wool and Cot

This wool is most remarkable for its su perfor condition, its length of staple and strength of fibre, and is an example of what may be done under proper and favoring con-ditions in our great sister state of the north-west. Much of it is combing wool, not to be surpassed by the best grown Australian. For all characteristics which manufacturers appreciate, except, of course, extreme fineness of fibre, we do not see how this wool can be excelled by the product of any wool-growing section. Perhaps we have been too apt to regard the wools of eastern Oregon as lacking in "blooded qualities" (which term those will understand who are familiar with wool), but an examination of this line will dissipate any prejudice one may have had

in this respect.

This shipment of wool belongs to J. H. Sherar, esq., of Sherar Bridge, Wasco county, Oregon, one of the pioneers of that section, who went there in early days when Indians held almost exclusive possession, who by his energy and enterprise has done much to develop the country and to forward the wool-growing industry of the porthwest. Mr. Sherar's own clip of nearly 100,000 pounds forms a portion of the above de-scribed line. Following the shipments each season (this year comprising some forty cars) Mr. Sherar makes the trip to Boston, where he gives personal and most careful attention to the different clips as they are opened.

Not a bag passes the graders' hands that he does not see, and in this way he is able to report intelligently to his constituents as to the merits or demerits of their respective shipments, and give them the best information to be obtained as to how to make their ol most acceptable to the manufacturer. This lot of wool is the product of considerably more than 100,000 sheep. Previous to the recent tariff agitation this wool would have recent tariff agitation this wool would have brought, in a scoured condition, 62½c to 65c for fine; 60c to 62c for No. 1, and 55c to 57c for No. 2. Today these grades range at an average of 35c per scoured pound. As this represents an average decline of about 25 cents per scoured pound, and 800,000 pounds or more in the grease represent about 300,-000 scoured pounds, it follows that the growers must accept \$75,000 less for this lot of wool than they would have received before

the late decline in prices. The section of Oregon from which this wool came is unsuited for miscellaneous agriculture and is a normal habitat for sheep. Hence Mr. Sherar is naturally a republican and protectionist and not friendly to the doctrine of free raw materials, and sees in in free wool only destruction to wool growing industries in the United States. Nevertheless, in the hope of a speedy return to the protective policy, he will stand by his sheep and will increase his flock by raising all of his lambs the present year. Mr. Sherar leave, next week with his wife

After John took the ring he pawned it, and with the proceeds got gloriously drunk and remained so. He took care to stay away from home, but he figured it out that his wife's anger would be appeased by his absence of a week, and he therefore went home last night. But his wife telephoned to the police and John is now behind the bars. John didn't have a very good time while on his tear. Several hundred people were on the Taylor street wharf and 150 more standing on a broad stairway leading down to the wharf. The worm eaten timbers of the old structure gave way in the midst of the wholesale bap-tism, precipitating the people from twelve to twenty feet, according to their location. Forfalling into the water, the spectators tumbled into the slimy mud. No one was killed, but as the people were piled five deep there were many serious bruises and several broken limbs. The patrol wagon was rung up and three loads of injured taken to the receiving hospital. The accident caused no cessation of the service, and six revivalists continued to assist Mr. Allen in immersing converts.

BIG CONTRACTS WITH JAPAN.

American Merchants Will Supply that Country with Corned Beef and Iron. TACOMA, Nov. 11.-William G. Norris. who went to Japan a year ago to represent a syndicate of Chicago merchants, has secured two of the largest contracts ever awarded to American firms. One goes to Armour & Co., and is for canned corned beef to be supplied the Japanese army. The other is \$360,000 contract for east iron pips to be used in extending the Tokio watsrworks. The pipe will be made in Alabama and sent here for shipment, the American firm having met the competition of English and Belgian bidders. The Chicago syndicate which Mr. Norris represented was organized just after the World's fair, as a result of the expressed desire of the Japanese committee to stimulate trade with America. The United States imports goods worth \$25,000. 000 from Japan yearly, and exports to the country only \$5,000,000. It is believed by those interested that this trade can be evened up.

FOGS AND SUNSHINE.

Their Sudden Alternation, and its Effect Upon the Human Body.—A Bit of Easy Latin,

Divide the familiar word malaria by cut ting loose the first syllable and you have "mal," bad; and "aria," air. Anybody with the least smattering of Latin can guess what the word means. Wherever men live and work in communities the air is full of he realizes that anything alls him.

In the late autumn when chills and fogs alternate with treacherous sunshine, the health-destroying principles in the air are especially active, and their effect is seen in the morning headaches, feelings of lassitude

the morning headaches, feelings of lassitude and stiffness in the back and shoulders.

"A little cold," you say.
That's all, and it will never live to be a big one if you drive it out with a pure, gentle, stimulant. A public sentiment that is practically unanimous recommends Duffy's Dure Malt Whiskey for this purpose. This standard article diffuses among the organs of the body an influence which equalizes circulation and so prevents those congestions that develop into pneumonia, pleurisy and other serious diseases.

A stimulant to do this must be prepared with the greatest care, by trained experts who have its medicinal character constantly in view. I main, every-day whiskey is worse than useless as a medicine, but Duffy's Pure Malt has proven its worth in fending off the debility so common as winter is coming on. Those who use it say that its beneficial effects are not only immediate, but lasting.

WOOLEN MISTAKES LIKE POLITICAL MISTAKES

Are getting more frequent as the years roll 'round, and Yankee genius suggests other things to mix besides ice cream soda with a "wink in it"-cocktails and politics. Many a clothing store sells goods today for a'l wool that are not "all wool." Some of 'em do it through ignorance, and some upon an idea that every man who wants to buy clothing is a sucker and can be caught with a "catch line" of display advertising.

We never guess at it when we tell you a thing is all wool-you can bank on it. - We are selling overcoats-just now-at \$2.75, that are not wool all through, and we say so, too, but they're cheap at \$5.00, and in fact better than any \$5.00 overcoat you'll get in Omaha.

And here is that full length Kersey overcoat at \$6.75, all wool. Now the man who wrote tathis ad. knows that they're all wool, for he took a small piece of cloth from one of these coats and "chewed the rag" because they were ordered sold so cheap. This overcoat is the best value this remarkable store ever offered to you.

Other overcoats and ulsters are perhaps in proportion as cheap as the ones we already spoke of. We have 'em in all styles, and all of the rule of this season. Long overcoats, whether they're of a cheap, medium or fine grade, whether \$2.75 or the finest swell kersey silk lined at \$21.50 -- they're all of the new school of styles, and above all, new cloth and not old shop worn, gathered up auction stuff, that won't wear long enough to tell of it's birthplace, See our clothes line.

THE DESIGN'S THE THING.

Design is to furniture what seasoning is salad. It makes or mars its perfection and

This chair fairly bristles with design. It is a study in outline. The picture gives no conception of the size; it is not a large, ungainly "Comforter," but one of those light frames that lift so easily, roll so readily and are the delight of every visitor.

The covering, as shown on our floor, is merely a figured muslic, so that you make your choice for the upholstering from our magnificent line of coverings. There is no finish in the way of gimp or fringe, but the edges are bordered with solid mahogany mouldings, giving rich and beautiful finish. The frame is old mahogany.

Such a chair is an indispensable in the arrangement of any drawing room. It com bines beauty with a high degree of comfort
