AN ALARMING STATEMENT CONCERNING WOMEN.

HOW BAD HABITS ARE FORMED.

The New York Tribune says: "The habit of taking 'headache powders' is increasing to an alarming extent among a great number of women throughout the country. These powders as their name indicates, are claimed by the manufacturers to be a positive and speedy cure for any form of headache. In many cases their chief ingredient is morphine, opium, cocaine or some other equally injurious drug having a tendency to deaden pain. The habit of taking them is easily formed, but almost impossible to shake of. Women usually begin taking them to relieve a raging headache and soon resort to the powder to alleviate any little pain or ache they may be subjected to, and finally like the morphine or opium fiend, get into the habit of taking them regularly, imagining that they are in pain it, they happen to miss their regular dose."

> Toe Nerves are Porrly Fed and all od Locks in Red O rpure es.

O, my boys are never nervous. couldn't stand that. But with girls, you know doctor, it is different. Too many mothers reason like that,

They do not like to hear their girls called tomboys, and they hasten to make them 'ladylike," to keep them from running and climbing and from vigorous games, while the boys are laying in a stock of health that will last them far into middle age. The least sign of physical failure on the part of girls at the critical times in their lives should ring a grave alarm. Pale lips, nervous habits, retard growth, a lack of high,

youthful spirits and a poor condition of the skin, urgently demand a better and a more plete nutrition. In all cases, whether it be a young child or an aged person, Paine's celery compound adds vigor and increased weight by strengthening the very foundation of health, by feed-ing blood and nerves richly and promptly. It is only when the nerve centers are healthy that the other bodily functions can be

healthy.

If anxious mothers will only follow the advice of the most careful physicians and make sure that their children are getting sufficient material to meet the big demands made by their growing nerves and tissues, there will be an end to the weakly condition, the continual headaches, the "blue days," and the general ill health that so few young girls escape.

The best ally against nervousness and irritability is that remarkable nerve Paine's celery compound, first prescribed by Dartmouth's greatest educator. Day by day, when taken with the regularity and care that physicians say is indispensable for ex cellent results, comes invariably a steady gain in weight, which can mean thing, a gain in quantity and the quality of the blood. Trifles begin to worry them less, sleep comes naturally and refreshing, appetite increases, and their frames grow plump with solid fiesh, because all the delicate parts of their nervous system, upon which the nutrition and well being of the body directly depends, are beginning to be fully nourished and to work without friction.

A body thus fed by Paine's celery com-pound makes those joys and little innocent pleasures possible, without which childhood and girlhood is sad to look upon.
