"At Spokane Falls we had a conference with the new receiver of the union depot property, which is included in the foreclosure proceedings, and from there we went to Portland to see Mr. McNeill, receiver of the gation company. Our conference with him was long, but after several days' session we finally agreed upon a division of passenger rates from Huntington west, which we are to pay to the Navigation company, and which basis of 271/2 per cent is a compromise be-tween the demands of the Navigation company and the blanket proportion the Union Pacific would agree to. This proportion only applies to certain parts of the business, the general division being greatly in-volved, too much so for a clear and intelligent understanding by the readers of newspapers. The freight divisions

we agreed to some time ago, so with the settlement of our differences on passenger traffic, it removed from the field of contro-versy all annoyances of every sort, and the receivers were in a position to shake hands with themselves that their mission to the northwest had been accomplished.

"From Portland we went via the Northern Pacific to Seattle, east over the Great Northern to Spokane, thence over the Northern Pacific to Butte and Anaconda, to Billings and Sheridan, via the new Burlington line, that we might form some estimate of the tous experience in the matter: "All right. don't think you can do me any harm." orber, with a great ourisi of a competitor, and down to Grand Island, where we struck our own road, and then to Omaha. AS TO FORECLOSURE SUITS.

Asked if he thought the numerous fore-closure suits would be pushed to their legitimate end, Mr. Mink said: "I do not believe it is the intention of the complainants and plaintiffs in these cases to force anyone to the wall. The general feeling seems to that the suits were brought to protect certain interests and to permit the control revenues under receivers, rather than allow the revenues to go into channels other than those represented by the mort-gage holders. With receivers favorable to

Mink expressed himself as favorable to some such scheme as outlined by the government receivers. "I do not understand that the government directors are pledged to the neveral allotments made, but they were advanced only to develop the reorganization feature of their report and show by actual figures now some such scheme could b brought about. The allotment of the government security is a very generous one in opinion, being something like \$70,000,-or dollar for dollar. This amount under the plan proposed, would become part of the blanket mortgage proposed to be placed on the estire property, and become a share-holder of the first mortgage instead of holding its lien nature or second mortgage tien, as under existing conditions. With the government debt settled and out of the I have no doubt but that the other in terests could harmonize quite readily. Another one has 220 blades, all exquisitely etched with portraits, landscapes and other subjects, still another contains 1,840 blades, all provided with hinges and springs and closing into the handle. GEORGETOWN, S. C., Nov. 24 .- The tug W. P. Congdon, picked up off the bar Captain

P. T. Bennington and twelve men of the steamer Ozama, bound from Philadelphia to Charleston in ballast. Captain Bennington reports that on November 15 his steamer struck on Cape Romain shoals and stove a hole in the engine room compartment. The water quickly filled the fire room compartment. The water quickly filled the fire rooms, rendering the engines useless. The steamer floated off the shoals soon after striking, and at 2 a. m. sank in six and a half fathoms of water The crew took to the boats, saving only part

plates on the vessel, which amounts to a considerable sum. Some of the plates weigh twenty-five tons and are worth nearly

\$14,000 apiece. It is probable that when the guns and equipment are supplied and the premiums paid for increased speed, the cost one of these battle ships will reach a grand total of nearly \$5,000,000.

While the guardians of our coast may seem to be expensive precautions in times of peace, their cost cannot be compared questions. Ten such ships at a cost of \$5,000,000, only one-third of what we spend annually for pensions, will protect all of our principal scaports from an inveding foe, and save property the value of which would be difficult to calculate, besides the lives of

thousands of our citizens. Taking everything into consideration, there are but few more worthy means of spending \$4,000,000 or \$5,000,000 of the people's money than in building a battleship to help protect our citizens' lives and property.

Some of the soldiers at Pietermaritzburg were recently informed by a party of neigh boring Zulus of the whereabouts of a huge python that had been destroying their oxen. The soldiers, with 200 natives, started off to capture the snake, and, having located it, the forest was fired for about a mile round about, an enormous pit having been pre-viously dug in toward the center of the inclosed space. What with the burning brush and the shouts of the excited Kaffirs they soon drove the reptile toward the pit, where,

closing in upon him, they forced him into it. The python proved to be of enormous size, thirty-two feet long and fortyinches in circumference. It appeared to be

There are a great many people who canno admit that any actor is as good as an oldtime favorite. Eddie Foy has a warm place in the hearts of a great many people of this class, and they failed to find any merit in the work of John J. Burke, who is doing Foy's former part as Crambo in "Aladdin Jr.," which closed its engagement at the Boyd last night. The facts in the case are that Burke is as good a comedian as Foy that Burke is as good a comedian as Foy ever was, and his work is just as clever to the unprejudiced.
