The tabulation showed that Jacob North & Co. were the lowest bidy ders and the records show that the firm was awarded the contract, the firm agreeing to furnish 500 copies of each bill at \$1.67 page, extra copies to be paid for at the rate of 8 cents per page. A glance at the bids of the several printing houses will reveal a surprising fact. The

figures were so nearly alike that they sug-gest, if they do not prove, a perfect under standing between the alleged competitors, Two years ago the same printers competed for the same work. Then the figures proved bona fide competition. The following tabula-tion shows the bids of 1893 and 1895 side by side:

The printing houses are the same, the style of firm name alone being chauged. In 1893 but 300 copies were printed, but this year the contract calls for 500.

A reference to the tabulated statement shows that two years ago the bids of the several competitors ranged from 81 cents to

\$1.52 per page. This year the lowest bid was \$1.67 per page, and the highest \$1.69.
