UNITED STATES AS PEACEMAKER. The United States has undertaken to play the part of peacemaker between Mexico and Guatemala, to prevent war if possible. A felegram has been received here from Secre tary Gresham expressing the hope that Guat-emala and Mexico would agree between themselves upon some method of setting the dis-pute over the boundary, but that if this should not be possible the United States trusted the two countries would agree to sub-mit their differences to the arbitration of some friendly nation. This communication from a nation with which Mexico enjoys such intimate and friendly relations has caused a profound impression upon the government and undoubtedly accounts in part for the decision of the minister of foreign affairs to with-hold for five or six days, at least, the ulti-matum, which he was about to dispatch in much less time, in answer to a note from Guatemala. It is learned that if the president of the United States made such an ap peal it would be received in good spirit before sending it by first communicating in

an official manner with Minister Romero at Washington. ON THE EVE OF WAR.

That the situation has been regarded as critical is evidenced by the fact that in the Mexican arsenal at the citadel there are being manufactured weekly from 40,000 to 50.000 Remington cartridges, by orders from the War department. They are also engaged night and day upon other work, in order that all of the artillery shall be completed and ready at a moment's notice, with full complements of all kinds of ammunition. In the argenal is noted the extreme activ

ity of the operatives, who do not rest for moment, in order that all armament may be ready and in first-class order and in proper condition for the use of an army about enter-ing into a campaign. The War department thinks of sending the Fourth battalion of inthe marching orders. It is also rumored two battalions of artillery, completely equipped, will also leave within a few days, with full batteries of steel cannon. It is also assumed the government has purchased two steamers which navigate in the Gulf of Mexico, which they will arm with necessary artillery for use as transports.

There is an extraordinary activity notable in every department of the War department, but as yet nothing has transpired for publicity, although it is easy to understand the question of Guatemala is what orig-inated the extraordinary activity. The mobilization of troops to strategic

points for an invasion of Guatemala contin-ues daily. Up to date it is known 18,000 troops have been sent, and the mobilization continues incessantly. It is also known that telegraph orders have been sent for additional rations for the troops on the Guate-mala frontier, and it is also well known here that the government has sent Hon Mathias Romero, the representative in Washington, D. C., secret and delicate in in structions relative to the question of Guate-mala. The Mexican congress is in secret session tonight.
