

PULSE OF THE WESTERN PROGRESS

Section of Montana Where Land is Still Open to Settlers.

RICH SOIL AND GOOD LOCAL MARKETS

Passage Cut Three Straight Miles Into the Mountain—North Dakota Farmers Abandoning Wheat for Other Crops

UHEIT, Mont., March 1.—To the Editor of The Bee: Thinking that a few lines from this part of the country might be interesting and perhaps beneficial to some readers of The Bee, I concluded to drop you a line, for at this time of the year, when warm weather begins and green grass commences to grow, many people get the spring fever and want to migrate westward...

While men continue to crowd the steamers to Alaska, attracted by the low rates produced by the rate war, says a writer in this issue of the summer and there is much enthusiasm among the citizens of this city and vicinity.

Now, if any of our readers contemplate coming to this part of the country and would like any information as to where they can secure fine lands or how they can obtain them and what they will receive in return, I am thoroughly acquainted with the country. I have been living here for many years, and in hunting, trapping and prospecting have become familiar with nearly every part of the Rocky mountains.

THE 5,000 inhabitants of Park City, Utah, are still joyful to a man over the completion not long ago of the great drain tunnel of the Ontario mine, an achievement that has cost the company nearly a million dollars.

Work at the black sand mines near Randolph, Ore., is now progressing in a very satisfactory manner, says the Coast Mail. After a prolonged series of experiments, the apparatus is working with every promise of success, and fifty pounds of the amalgam was cleaned up.

The numerous tunnel enterprises on foot in this camp are a surprise to every visitor, says an Idaho Springs special to the Denver News. They are not mere holes in the ground and run down to the bottom of the earth.

Idaho Springs has a vast area to draw from in any direction and find good producing mines. There is surely great activity shown in every hand, and the output will be greatly increased over that of last year for many reasons.

Another great boon to the camp is in the Denver, Leadwood and Golden, which undoubtedly will be built within the year. Sam Newhouse is now in England and has raised enough money to extend the road to the mines in the region.

Wheelmen at Norfolk are taking steps toward organization. The Dunbar Elevator company has swayed to the Dunbar Alliance Elevator company.

ated west of the promontory, has been found to be a very valuable piece of property, for upon it are deposits of guano, a great fertilizing agent, worth in the neighborhood of \$2,000,000, should the tests about to be made of the material give the anticipated results.

On an estimate of the guano deposits on the island by experts has demonstrated the fact that there are from six to twelve feet of the fertilizer covering the entire tract and it is estimated that there are about 100,000 tons of the commercial guano in the deposits. In Philadelphia the material is worth \$60 per ton, and on board cars at Syracuse it would be cheap at \$15 per ton.

While men continue to crowd the steamers to Alaska, attracted by the low rates produced by the rate war, says a writer in this issue of the summer and there is much enthusiasm among the citizens of this city and vicinity.

When the company officials asked him whether he knew that he was mining on company property he told them it did not make any difference to him. He had been to the mine anywhere. It is now understood that the Denver smelters may contract with the gentleman for 50,000 tons.

There have been more or less talk about the discovery of oil by H. L. Brenning while boring his irrigating tunnel, and a few samples having been taken and analyzed.

On arriving at the ranch Mr. Brenning kindly escorted us over to the tunnel, and lighting a couple of candles we proceeded to explore the tunnel. It is a very simple piece of work and a man of average height can walk upright within it.

Five wolves and a number of jack rabbits were killed during a recent hunt in Antelope county.

When the company officials asked him whether he knew that he was mining on company property he told them it did not make any difference to him.

plans for erecting mills at the mouth of the channel to be used for the purpose of generating electricity.

The owners of the Iowa mine, San Juan county, are to be congratulated upon their new and great discoveries. This property, says the Silverton Standard, has undergone a vast amount of development work the past year, and the owners are now ready to begin the main tunnel is now completed the entire length of the claim, 1,500 feet, showing gold ore throughout.

It is estimated that 55 per cent of the farmers of Adams county will need aid in the shape of seed and feed this spring.

The old United States land office at O'Neill has been rented by the officers of the Episcopal church for the use of a religious service.
