PECULIAR PROPERTIES OF PARALDEHYDE

Much Expert Evidence Offered as to the Composition, Administration and Effects of this Drug - Governor Holcomb Will Decide Today.

LINCOLN, May 15.—(Special.)—The investigation of Dr. Hay, superintendent of the Lincoln Insane Hospital, was concluded this morning before Governor Holcomb. Dr. Manary was first called to the stand to testify regarding the matter.

Witness was present at the time of the death of Parrotte. The patient was suffering from paresis, an incurable disease, and had died in a convulsion. What he had to say was that it had been stated on the stand that Parrotte had died from an overdose of paraldehyde. Witness said that this was not true.

Parrotte had died September 20, 1893. Witness had written up the records from which the facts were taken. He had not, however, to the knowledge of witness been given very much paraldehyde. At the time Parrotte had been transferred to the third ward, January 21, 1893, he had been given 100 grains of paraldehyde.

KIRK

A NOTABLE EVENT

Was When This Great Preparation Was Introduced into Nebraska.

RAIN WATER MAKER

Absolute Proof of its Worth.

It was a truly notable event when Kirk's Rain Water Maker was first introduced into the state of Iowa. It has already become necessary for the good and simple reason that it is an economizer, saving half the soap that is used in laundry work, as well as for toilet purposes, while it prevents colors in printed goods from running or fading, and is most essential for washing of all kinds. Its great worth is attested from the fact that it fills a long felt want of the people, for it is something that will minimize the household expenses and yet be perfectly harmless. It contains no combination of offensive greases and strong, ruinous lye, found in ordinary washing compounds, which affects the hands and ruins fabrics of all textures. This valuable preparation has dumbfounded those that have used it, for its merits become apparent on the first trial. The question has been asked by medical men if Rain Water Maker was injurious to health. We answer, "No," as it is used for public purposes where the water is heavily impregnated with lime with the most satisfactory results.
