Another silver congress is now in session in Salt Lake City threshing over old straw.

Now prepare for another flood of free silver 16 to 1 resolutions from the neighborhood of the Great Salt lake.

South Carolina does not take much 1895 than she did to United States troops in 1861.

It costs the taxpayers of Omaha \$20,000 a year to run the city treasurer's office. Is there any rational excuse for such reckless extravagance?

If the reported impending consolidation of the Northern Pacific with the Great Northern proves true and goes Into effect within thirty days there will be a small army of railroad officials looking for jobs.

Several prominent democrats have been recently mentioned as possible cabinet officers in case of possible resignations or deaths in the official family of President Cleveland. In this, however, history will repeat itself. Few die and none resign.

And now it is proposed to do a little more tinkering with the Eleventh street vinduct and spend \$5,000 in bracing up the stilts on which it is posing. Would it not be better to raise enough money to reconstruct the viaduct so as to make it permanently safe for traffic?

The United States supreme court is expected to render a final decision on the Income tax cases next Monday. A good many of the Wall street star gazers are looking toward Washington for a sure sign that will enable them to turn a trick or two on the stock exchange on the result.

The Great Northern railroad, otherwise known as the Jim Hill line, is about to swallow the Northern Pacific, receivers, general managers and all. This is only a repetition of the experience of the days when the father of all blacklegs, Pharaoh, dreamt a dream that he saw his herd of fat cows literally absorbed by a herd of lean ones.

The general conference of the Methodist denomination in session here ruled, after a protracted debate, that women were not eligible to seats in that body. Now the Catholic Knights, assembled here, take similar action. The burning question is, Can Omaha be a hoodoo to the wave-tossed cause of woman's rights? Perish the thought

We are told by grapevine telegraph that the bombastic General J. S. Clarkson has held a meeting with himself at Washington recently, preparatory to the opening of the quadrennial bi-metallic harvest which he expects to reap in 1896. For a man who has no visible means of delivering anything at the next election except his own vote Clarkson is doing a very heavy political option business on very small capital.

THE AGE OF CONSENT.

Nebraska is not the only state which has recently by law raised the legal age of consent. The legislature of New York has just passed an act making the age of consent of girls in that state rect. He ought to have known that 18 years instead of 16 years, as at prescable telegrams will outrun a Pacific ent. The New York law will not go into effect until September next, but owing to one peculiar provision it has called forth from one of the judges of reform is, break up the sinecures and the superior court a warning to clergyretire the taxeaters. This would an men and magistrates that would not swer as well for Omaha as it does for be amiss elsewhere. The section to which reference is made provides that any person who shall take a female under the age of 18 without the consent the grand jury to indict the city hall of her father, mother, guardian, or other thieves. Who does that refer to? This person having charge of her person, for is altogether too general. The grand the purpose of marriage, is guilty of abduction and punishable by fine and imprisonment.

The law does not declare in terms such marriage void, yet, being in violation of law, it may be voidable. The judge, therefore, announces that no magistrate or clergyman should after held the stock, after reimbursing them-September 1 perform the marriage ceremony where the female is under 18 without the consent of her parents or be called a gigantic swindling scheme, guardian. If he does he may unconsciously become accessory to a criminal offense. He furthermore learnedly declares that the age of a female is always problematical. The polite way to determine it is to let the woman speak for herself and to accept her statement, but this will not satisfy legal requirements, and no official will be safe in performing the ceremony under the new law without first consulting the bride's parents or guardian unless age has made its impress in such a manner

as to defy deception. The new Nebraska age of consent law is materially different from that of New York, yet a timely caution to clergymen acting in this state is not out of order. It is a question still to be de ermined how far the rena ties therein prescribed will apply to a person who marries a minor female without the consent of her parents or guardian. The marriage laws of Nebraska permit the marriage of females over 16, but require, to make the contract perfectly valid in the case of minors, that the persons legally responsible for them signify their approval of the union. Should marriage with a minor without the necessary consent be adjudged under the new law to be a crime, the magistrate or clergyman negligently aiding in the ceremony without reasonable inquiry to ascertain the ages of the parties may have rendered himself liable as an accessory. Clergymen cannot be too careful in exercising their authority to solemnize marriages.

A MOST PROMISING MOVEMENT. The sound money movement in the south appears to be making vigorous progress. The convention to be held at Memphis next week, to give expression to the sentiment of the business interests of that section in favor of a sound currency, promises to be very largely attended. The commercial organizations of nearly every southern city will send delegates to the convention and the fact that Secretary Carlisle is to deliver the principal address will attract a popular attendance which cannot fail isterial. If the sureties are good for to make the occasion a notable one of its kind. Representative Patterson of Tennessee, one of the very few members of congress from the south who took a firm stand against free silver coinage, has been speaking in a number of cities to large audiences and doing excellent service in the cause of sound money. The most influential southern newspapers, such as the Louisville Courier-Journal, the Atlanta Journal, the New Orleans Picayune and the Charleston News and Courier, are zealdismissed to give a place to anybody's ously and ably championing sound money and showing up the fallacies of coupled with the general declaration the advocates of free coinage. To prohib!! feeding of the cattle would largely cluce the revenues and profits of the dis-lleries, and Walter Barker, manager of he Peorla distilleries of the Distilling and Cattlefeeding company, said this morning it would drive the distilling business out of the state. He stated that slop feeding had been hammered at now for five years, and in his opinion somebody wanted to make some money, but within his knewledge no one had attempted to get any money from distillers. Another distiller was asked if he knew of

that he did not. "But in former years," he said, "we were able to fix the things."

Mr. Barker voiced general opinion in Peorla when he said that the meat from distillery fed cattle is considered the choicest and finest there is, and it commands the highest price paid. It is sold in the east and abroad, but not around here, because it costs too much. He said he would like to feed on it every day in the year.

Peter Morrissey's Prayerless Funeral. ST. LOUIS, May 16.-The funeral of State Senator Peter R. Morrissey, who was shot and killed Monday morning by his mistress, took place today from the family residence. Interment was in Calvary cemetery. There were no prayers over the remains and no services of any kind at either the house or cemetery, owing to the refusal of the Roman Catholic clergy to conduct the same. His family are heartbroken at the action of the church. A large crowd of the friends of the dead politician and saloon keeper were present at the funeral, among whom were the senate committee appointed to attend it. While the r mains of Morrissey were b ing borne from the home Maud Lewis, his slayer, was being removed from the holdover to the fail on a warrant charging her and killed Monday morning by his mistress over to the jail on a warrant charging her with murder in the first degree. The process was somewhat more expeditious than usual, as the authorities were desirous of removing the woman to the jail as speedily as pos-sible for fear of trouble.
