65%e for July, at which a few sales were made, to 66%e and it fluctuated for half an hour of the bouring was more general, and very soon it became almost universal until the price had been advanced with a whirl to 67%c, which figure it reached in little less than an hour from the opening. The weather was reassuring, the general temperature being low enough to suggest death to insects without being severe growth of vegetation. The foreign markets, while firm, showed a reluctance in following the course of other things here, but there were numerous reports of damage to a crops by frost, chinch bug and hessian files, and shorts were forced to cover. It was said that Pardridge covered a big line. The daily statistical report was not of an exceptional character. The northwestern receipts were smaller than a year ago, but the total of the primary receipts were larger. Minneapolis-Duluth receipts, 122 cars, compared with 272 on the corresponding day of the year before. Primary market receipts altogether were 280,000 bu., against only 162,000 bu. on the corresponding day of last week and 223,000 on the same day they ear before. Export clearances of wheat and flour from Atlantic ports amounted to 397,000 bu., 172,000 bu. of which was in the shape of wheat. One matter which may develop into something sensational, should it receive further confirmational, should it receive further confirmation, was perhaps not generally known in the pit during the session. Milmine, Bodman & Co. of New York wired their house here that they had received a dispatch from a reliable firm in London to a good New York house saying there were fears of damage from drouth being expressed from Odessa. Kansas City wired that wheat was bringing 75c per bu. there. The crowd here did not dare sell any wheat short and every time they bought it they had to advance their previous bids. July advanced to 69%c and 68%c was the trading price at the close.

Corn acted heavy, and but for the great strength in the wheat market it looked as if it might have declined. In consequence of the advance of 2c in wheat, however, corn gained from %c to %c. The receipts were much too heavy for bullish enthusiasm, 417 cars being the day's receipts. July opened at from 51%c to 51%c. The receipts were much too heavy for bullish enthusiasm, 417 cars being the day's receipts. July opened at from 51%c to 51%c, and rose to 51%c near the close, in sympathy with wheat, resting at from 51%c to 51%c, up to from 28%c to 28%c, and closed at 28%c bid. September sold at from 284 co 28%c, up to from 28%c to 28%c there were numerous reports of damage to crops by frost, chinch bug and hessian files,

25,000 head.

strong at the top. The Beom was simply the outcome of a general awakening of speculative energies all over the country. Cotten Oil and stocks have had their turn, and wheat is now coming in for its abare. Professional traders who scalp the market daily and know the ins and outs prefty thoroughly bowed before today's in the market trade stood stiff, for local operations realized the futility of trying to follow out. The hears ran like sheep in a storm. In fact, the speculative public may be said to have owned the wheat markets of the country follow, it is consolidated Gas. 144 Reading... Colo. Coal & Iron. There was a weaker feeling in the cash market and the same was extended into the speculative crowd. Towards the close prices were firmed up slightly, but it was all in sympathy with wheat and corn. June started at 28½c, sold at from 28±0 ct 28½c, and closed at 28½c bid. September sold at from 28½c to 28½c, and closed at 28½c. Provisions opened weak on the liberal run of hogs and equally large receipts expected tomorrow. The day's run was 32,000 head.

Provisions opened weak on the liberal run of hogs and equally large receipts expected tomorrow. The day's run was 32,000 head.

A preliminary decline of about 7½c was succeeded by an advance of 32½c from the lowest point in pork and at the close it was back to about 15c advance for the day. Lard shared in the better buying of pork only to the extent that there were buyers at the close at the final quotations of the day before. Ribs gained about 7½c.

Estimate of receipts for Friday: Wheat, 66 cars; corn, 632 cars; oats, 384 cars; hogs, 25,000 head.

OMAHA LIVE STUCK MARKET

Receipts of Cattle for the Day Barely Reach Five Hundred. NO DEMAND FOR THE FEW THIN STEERS

Canners and Butchers Active, but Beef Grades Neglected on All Sides-Ho;s thow Much Improvement in Quality and Close Strong.

THURSDAY, May 16, There was a light run of cattle today, a pretty good supply of hogs, and no sheep. In all ninety-seven cars of stock arrived, bringing the supply so far this week up to 3,015 cattle, 17,770 hogs and 1,729 sheep. This is a decrease of nearly 1,000 cattle as compared with last week, but an increase of over 8,000 hogs and 800 sheep.

The supply of cattle was light as to quantity and nothing extra as to quality. Exclusive of several loads of southwestern cattle that local killers bought at Kansas City Wednesday and received today, the offerings were not over 450 head. Instead of the light receipts stimulating the demand, buyers appeared, if possible, more indifferent and bearish than on Wednesday. Eastern reports were not particularly encouraging and sellers went up against a dull, mean trade It took considerable coaxing to get a bid, and, while the market could hardly called materially lower, the general tone was decidedly weak, and cattle sold anywhere from 25c to 50c lower than a week

where from 25c to 50c lower than a week ago.

The market for butchers' and canners' stock was all right. Possibly a third of the entire offerings came under this head, and with the usual active demand from local packers, trade was brisk and prices as a rule full strong. There was a good call for veal calves and the more desirable offerings in this line commanded stronger prices. Bulls, oxen and stags brought just about steady figures.

There was no increase in the supply of stock and feeding cattle today, and apparently no let up in the demand. Sellers found little difficulty in disposing of the right kind of cattle at good, strong prices, Good stockers are in particularly urgent demand and prices are comparatively high. Good to choice feeders are quotable at \$3.35@1.00; fair to good, \$3.00@3.35, and common grades from \$3.00 down. Representative sales;

CHICAGO LIVE STOCK. Heavy Cattle Were Slow of Sale at

Slight Decline. CHICAGO, May 16.—With receipts of about 10,000 cattle today, compared with 17,000 a year ago, there was a slow trade. Heavy cattle were slow of sale at an average decline of from 15c to 25c per 100 lbs. from last week's closing prices, but light and medium weights were \$5.75, with fancy beeves quiet around \$6; big cattle weighing 1,560 to 1,670 lbs. sell at \$5.75

per 100 lbs.

Receipts: Cattle, 10,000 head; calves, 900 head; hogs, 34,000 head; sheep, 11,000 head.

61.25 per cent, is now 64.34 per cent. The amount of builton withdrawn from the Bank of England on balance today was 199,000.

An Early Resident of Omaha Compliments The May Day Bee. LOS ANGELES, Cal., May 12 .- To the

Editor of The Bee: I was very much interested in your May day issue of The Omaha Daily Bee, which some one had the kindness to send me. Whilst reading it reminiscences of those early years in the history of Omaha came flocking in upon my memory like pigeons to their nesting place at evening time. Their names simply, even if they had not written such interesting letters, would have recalled most pleasant memories. But their letters gave us most vivid pictures of those early days. Mrs. Harriet E. Miller. Mrs. E. P. Evans, Mrs. A. J. Poppleton, Mrs. Clara Kellom Adams and Mrs. M. W. Gaylord take us back to the very earliest scene in the history of Omaha. What changes and improvements they have witnessed! Gaylord, the wife of the first Congregational minister of Omaha, is now, it seems, almost a neighbor (at Redlands), and Mrs. Clara Kellom Adams still nearer, both en-joying the mild and life-invigorating cli-mate of this world-unequaled southern California. Mrs. J. H. Kellom, the mother of Mrs. Adams, we hear from and see somewhat frequently. But Omaha is well represented in and about Los Angeles. I remember, Mr. Editor, when you and your brother first came almost in its natural state compared with the present. Your success in originating and building up The Omaha Bee has been quite steady; common to choice native steers weighing ber your old competitors, under the leadership 55.75, with farey beauty St. A. D. Balcombe, verily. What improvements time has wrought! One other name I saw in your May day issue which recalled a family of the earliest pioneers. This young lady and her sisters were little girls in the Sunday school in my Omaha days. She seems to be quite a traveler. I think it was only about a year ago that I saw her in Los At geles, and now from her interesting letter I see she has just been up to visit the Great Shoshone Falis in the far north. Judging from her attractive letter, I would affirm that the wonders of nature have a great fascination for Miss Ella Brackin.

I suppose Rev. Mr. Kuhns is still a resident of Omaha; at least I had heard that he came back from the south and was making your city his home. He was the first, or among the first of the Lutheran ministers in Omaha. The great majority of those early settlers are now gathered on the other shore. Only a few remain of those who were in Omaha from 1854 to 1864. They have answered to the great roll call beyond, and soon we shall all hear that call said may feed great that call hear that call, and may God grant that in our coming thither we may all receive a blessed salvation from the Great Captain.

deer, antelope, sage hens and rabbits abound and there are creeks in all directions.

There are about sixty men on Upper Green river, or what is called Beaver Creek falls, and a few farther up at Fell Direct falls, F. M. DIMMICK.

ONE MAN KILLED IN AN EXPLOSION Nancock Works at Houghton, Mich. Wrecked for a Second Time.

HOUGHTON, Mich., May 16.-This afternoon there was another big explosion at the Nancock chemical works at Dolly Bay, three miles from here. The explosion was near to the one which occurred at the same works March 15. Fred Shoper is known to have been killed, and several were injured. The office and several other buildings were blown up. The telephone to the works is disabled and the names of the injured cannot yet be

Train Robber Sentenced to Hang.

PULSE OF WESTERN PROGRESS

Western Wyoming Will Be Bocmed by the Euilding of a New Railroad.

BONDS ALREADY FLACED FOR \$3,000,000

Several Quarts of Big Gold Nuggets Picked Up on a Snake River Bar-Another Big Strike at Cripple Creck --News of the Northwest,

There is now a sure prospect that the

Wyoming & Great Northern railway will be built this summer from Grand Junction, Colo., to Green River, in this state, says the Cheyenne Tribune. President Carpenter has just arrived from the cast, and he is greatly confident of the success of the new line, which he says is progressing finely, and the funds will be secured to continue the work of construction this summer, for a distance of sixty miles at least. The bonds of the company have been placed at \$3,000,000, and the money large an amount of bonds of a far western railway is good evidence of returning confidence in western investments. It is a suggestion that money can be obtained for other enterprises. It is a promise of business and industrial revival. There has never been any real scarcity of money in the country. That grateful commodity has always existed in ample abundance. The trouble has been that amid the financial wreckage and uncertainty its holders have been afraid to risk it i business or in industrial enterprises. The times, for fear of sudden demands from ap-prehensive or alarmed depositors. As the holders of money regain the confidence to put it out again better times will come. Hence there is a peculiar meaning in every investment in railroads, in mines, in factures, or in trade that is made. It is

evidence of the improving conditions that bring back confidence. The building of the projected railroad in the western part of Wyoming will have a reassuring effect. It will improve the indus-trial and other business conditions. It will give employment to labor. It will create a market for material. It will start trade somewhat. It will put more money in circulation, and will make the securing of money for the next enterprise in that locality a little more easy. The construction of this road will also stimulate the development of FORTUNE IN NUGGETS.

The report of the finding of a large quantity of gold nuggets by a number of miners while at work on the Sturgill bar, Idaho, has aroused a great deal of enthusiasm among those who have always had unbounded faith in the richness of bars along the old course of Snake river, says the Portland Oregonian. Sturgill bar is located ten miles above the nouth of Powder river, on the Idaho side of the Snake, and was originally owned by a Sparta ditch, in Union county. The bar has been worked for years, and a large quantity of gold taken out, but not until the present season did the miners get into the river so

The finding of the nuggets has been fully confirmed by a letter received in Portland from Mr. J. A. Wright of Sparta, who writes that a peck or more of nuggets were picked up by the men at work. Only the nuggets were taken, and as much more coarse gold s said to be lying on the bedrock, which be taken out when a clean-up of the sluices is made.

From reliable information received by courier says the Sparta correspondent of the Baker City Democrat, "Sturgill bar" Snake river, has for more than a quarter of a century been an annual producer of gold in paying quantities, and the opinion has pre-vailed that some day some one would strike the coarse gold channel and take out gold by the hatful. The breast of the pay dirt, where two hydraulics have been working day and night, was ninety feet deep. The other day a large cave took place at the upper end of the diggings, where Captain Ed Robinett was in charge of the nozzle, and as soon as the dirt that had fallen was washed away. Captain Robinstt discovered that the rim of the hedrock rose up in front of him thirty feet high. As day was breaking be made an examination As day was breaking he made an example as doubtless buying back in some cases of the bedrock, and imagine his surprise as wheat which was shipped to Chicago from the saw at every point nuggets of all shapes their own localities last fall when wheat was he saw at every point nuggets of all shapes and sizes. He called the other men, and together they soon filled the two-quart dinner pail and proceeded to the house of Missrs. Reed and Beezley, the owners, Careful examination has been made of the channel exposed, and conservative estimates place the value of the coarse gold actually in many thousand dollars, and the gold already picked up at \$14,500. Everybody in this se-tion is now looking for high bars and coarse gold channels on Snake river.

IN BIG LUCK. Big strikes are chronicled almost every day in camp and occasionally a very big find is heralded to the world from the greatest gold camp on earth. Bull hill has its share of good things, but in the strike made on the Archer lease on the Lucky Guss, the famous hill has eclipsed itself. About four months ago four Pueblo tenderfeet secured a lease on the west end of the Lucky Guss, and as they had faith in the ground they went to work with a will and spent several thousand dollars delving in the ground for an ore chute, says the Cripple Creek Times. A roomy shaft house was built, which was equipped with a brand new hoisting plant. A vein was found, but the quartz was found to be barren, and after sinking to a depth of 153 feet, a drift was started along the vein to the north, and after going ten feet from the shaft the long-looked-for ore chute was found. It has been entered fifteen feet and a least twenty-five tons of pay ore is piled up in the ore bins ready for shipment. The vein is known to be at least seven feet wide as the hanging wall is nowhere in sight. Through the center of the chute there is a streak fourteen inches wide, and the lowes assay on it went \$400 and the highest \$3,600. It will easily run \$1,000 per ton in carload lots. The balance of the big vein assays from \$50 to \$120 per ton without sorting The fortunate lessees are Thomas Crow, T. J. Brown, W. D. Jones and John Thomas, all officials of the steel works of Pueblo. GREEN RIVER PLACERS.

B. A. Sparr, an old-timer and well knows mining operator of Utah, has just returned fro a month's trip to Upper Green river to inspect the gold deposits of that country, says the Salt Lake Tribune. He states that the whole country north from Green River City, on the Union Pacific railroad, is a great wash fifty miles wide and over 400 miles long, made

posits will be found farther up when the anow is off and the ground uncovered. It is a wild country, but is lovely during the months of July, August and September. The route from Evanston via Onel.

the San Francisco Call. Many new ollve the San Francisco Cail. Many new olive orchards are being planted. Ten years ago there was hardly any olive oil made in the state. Today it is being made in every fruit-growing country. Nearly all the oil at present is pressed by comparatively primitive methods and at places of production. Only a limited quantity is exported, as the home consumation has been seen to be supported. sumption has thus far been equal to the sup-ply. In fact, olive oil is not yet made here in

ommercial quantities.
L. P. Rixford, who has had considerable experience in cilve growing in Sonoma county, states that at the lowest estimate from \$50 to \$100 an acre can be made off an cilve orchard. A large quantity of so-called olive oil is imported into this country. It is pertioil is imported into this country. It is pertinent here to mention the fact that in Italy there is an enormous market for American cottonseed oil. This is mixed with olive oil and shipped back to this country as "genuine" ofive oil. No adulteration is practiced in California, and the olive oil made here can be depended on as the pure article.

Olive trees pay a profit in this country at the early age of four years, while in Europe the time is extended a couple of years. The olive tree will thrive wherever the temperature does not go as low as ten degrees above

It was the opinion of several orchardists spoken to on this subject that the final outcome of the olive oil industry will be that the olive growers will sell their pick to big manufacturers, who will engage exclusively in have been placed at \$3,000,000, and the money is in the treasury for immediate use. There is significance in this. The placing of so large an amount of bonds of a far western that he could find a market in England for the clive oil of California, no wealthy families would gracefully pay higher prices for the pure article, while it is notorious that the European clive oil is nearly all adulterates. TOO MANY HORSES. There are two or three men bunting for a

few first class work horses for use in hauling ore in the Trail creek and other mining dis-

ricts, writes a Colfax correspondent to the Spokane Spokesman-Review. As horses are plentiful and there is little or no competition, they are having no trouble in finding what they want, but are taking some time in order they want, but are taking some time in order to get them as cheaply as possible. Horses weighing from 1,300 to 1,450 seem to be the most desirable. They must be well built, unblemished, sound, well broken and good pullers. Horses of this description are being picked up at prices ranging from \$50 to \$75. few years ago such animals brought from \$125 to \$150 and were shipped to eastern markets from this country by the hundred. But for the last two years all outside mar-kets have been effectually closed. Prohably not more than 150 or 200 horses have been shipped from the county in the last eighteen months, and some of them have been brought back on account of not being able to find a market. Meanwhile the stock on hand has been rapidly increasing, until there are thousands of horses throughout the eastern part of the state that are not worth feeding.

Horses that are not worth feeding and taking care of, and few are worth that, can the great and various resources of western be purchased now for almost any price. Cayuses are so near worthless than even the assessor does not ask how many a man has, not deeming them worthy of assessment as property.

Horses weighing from 700 to 1,000 pounds

can be bought by the hundred at prices ranging from \$1 to \$5, and "broke" saddle horses are offered at from \$3 to \$10 and find no buyers.

A suggestion that is receiving considerable

attention here, as elsewhere, is the feeding of horseflesh to hogs. While it would reasonably seem that for human consumption horse meat would be much cleaner and more desirable in every way than hog meat, as long as the consumers retain their present ideas the transfer of the former into the latter will be the only means of fitting it

WHEAT GONE IN THE SOUTHWEST Kansas City Millers Compelled to Ship Grain from Chicago.

KANSAS CITY, May 16.-Wheat sold in Kansas City today at 75 cents a bushel, an advance of nearly 30 cents from the extremely ow price reached last fall. So scarce has wheat become in the southwest and so high have prices gotten that wheat was bought in Chicago today for shipment to this city. A special rate of 131/2 cents a hundred weight has been made for the purpose, and it is expected that a good deal of wheat will be brought here from Chicago. The wheat supply of the southwest has become almost wholly exhausted and crop prospects are so posed to hold to it. There is about 300,000 bushels in Kansas City elevators, but very little of it is for sale at any price. Chicago has over 20,000,000 bushels in store and mills all over the central west and southwest have een compelled to go to that city for supplies, doubtless buying back in some cases the very

from Chicago to Kansas City has been talked of for some time past. It has now become an actual occurrence and it is a thing which never before happened since Kansas began to raise wheat. Dug a Tunnel and Escaped.

cheap. The possibility of shipping wheat

LARAMIE, Wyo., May 16 .- Two prisoners escaped from the penitentiary through a tunnel which they dug. They placed dummies in their cell beds and thus successfully blinded the guard until the hole in the outside of the building was found by the outer guards. The escaped prisoners are Morrison, sent up from Carbon county last year for twenty-five years for the killing of "Jumbo" Peterson, and Charles Brown of Premont county, in for three years for horse stealings

MERCURIAL POISON

results from the usual treatment of blood troubles by which the system is filled with mercury and potash mixtures—more to be dreaded than the disease—and in a short while is in a worse condition than before.

RHEUMATISM soon takes possession of the frame and its shooting pains

and aching joints make life miscrable. S.S. is a reliable cure for mercurial rheumatism, and affords relief even after all else has failed. It is guaranteed purely vegetable, and absolutely harmless; take no substitute. Send for our creatias on blood and akin diseases malled free in the substitute. skin diseases, mailed free to any address.

whole country north from Green River City, on the Union Pacific railroad, is a great wash fifty miles wide and over 400 miles long, made by a glacier-flow years ago, as solid ice can be found at a depth of twenty feet on most of the placer ground. Gold can be found any where and everywhere in an't along this wash, are gold is fine, but clean and bright, and easily saved with proper machines. The ground is spotted, as by testing from Piney up the river from twenty to 300 colors to the pan could be obtained.

The country is covered with grass, and elk, deer, antelope, sage hens and rabbits abound. There are about sixty men on Upper Green river, or what is called Beaver Creek falls, and a few farther up at Fall River basin, Jackson Hole and on the rim of the Teton basin, prospecting. Good reports came from there when Mr. Spear left for home. He says there is no quartz in the bills, as the whole country on both sides of the great wash is sandstone and conglomerate, but in the wash can be found onyx, quartz, flint, granite and slate that are polished smooth and have come a long distance. The gold is found near and the esges of the creeks and rivers, close down to the water's edge. With the gold is black and ruby sand, and sometimes a green sand appears. No doubt some good paying deposits will be found farther up when the snow is off and the ground uncovered. It is an in the ground the edges of the creeks and rivers, close down to the water's edge. With the gold is black and country on the deges of the creeks and rivers, close down to the water's edge. With the gold is black and country of the case of the creeks and rivers, close down to the water's edge. With the gold is black and country of the district court of a country of the dis NOTICE OF RECEIVER'S SALE.

a wild country, but is lovely during the months of July, August and September. The route from Evanston via Opal, on the Oregon Short Line, up and through this country to the great National Park during the months of June, July and August, would be the finest trip a person could take.

PRODUCTION OF OLIVE OIL.

In the future of this state the olive oil industry bids fair to be an important means of profit to a very large number of people, says

M-H-HI m and e Receiver.

Notice.

The annual meeting of stockholders of the Fremont, Elkhorn & Missouri Valley Railford company will be held at the office of the company in Omaha, Nebraska, on Friday, May 17, 1896, at 20 clock p. m., for the election of directors and for the transaction of such other business as may come before the meeting.

B. REDFIELD, Secretary, Dated April 30, 1895.
