But, they further say: 'If the assembly should still be of the opinion that such an amendment shall be obtained, the boards will endeavor to secure such action as will insure to the general assembly the right to be represented in the courts and to enforce its proper control over the seminary and its property." The committee recommends the assembly to reply to Princeton's offer that, while respecting the judgment of the boards and not prepared to say that it is incorrect, the assembly is of the opinion that in order to put the matter beyond all possible ques-tion it would be well for the boards to do what they express their willingness to do, viz. San Francisco, being under synodical care, has deemed it best to defer achose on the recommendation until after the next meeting of the synod. Regarding the sem-inaries which have simply answered that action is not expedient or that the pro-posed amendments would be of doubtful validity, or the way is not clear to act, as at present informed, no opinion is expressed, inasmuch as these seminaries assigned no specific reasons for their action. That it is the sense of this assembly the the assembly of S8i did not attempt to prepare the way for any change in the tenure or management of the groperty of the seminaries of to do anything which can affect the autonomy of the seminaries are instended to have the meaning and effect as recided in this committee's report. This assembly, in reaffirming the resolution of the assembly of 189i, does so with the avowed purpose of leaving the tenure and title to all property of the seminaries ex-nety where they now are, in the hauds of the various boards of trustees, and with the further purpose of securing the veto power to the assembly, as an effective force by charter provision, and of safe-marding by charter provision, and of safe-marding by charter deciarations the trusts held and to be held by boards of trustees against perversion or misuse. The U.S. Government Tests Show the Absolute Superiority of **Royal Baking Powder.**

(Data from the latest Official U.S. Government Report on Baking Powders, Department of Agriculture, Bulletin 13, page 599.)

DOYAL is placed first of the cream of tartar Dowders; actual strength, 160.6 cubic inches of leavening gas per ounce of powder.

"Every other powder tested exhibited a much lower strength than the Royal, the average being 33 per cent. less.

Every other powder likewise showed the presence of alum or sulphuric acid.

The claim that this report shows any other powder of superior strength or purity has been denounced as a falsehood by the Government officers who made the tests.
