## YORK'S MUSICAL FESTIVAL

Never before has such interest been displayed in home work as this, and, although the festival will last two evenings, it is a conceded fact that many will not be able to secure admittance to the same.

The Dilentiante club will hold its regular monthly meeting Monday at the home of Miss Mable Cobb.

Rev. H. A. Lemon of Lincoln preached at this place today in Bell's hall with a good audience in attendance. Rev. Lemon's subject was "Why the Christian Church Ex-

A challenge has been issued by the doctors and druggists of York to the lawyers and bankers to play a game of base ball in the near future. The same will be accepted and will come off soon.

Mr. and Mrs. A. C. Mason of Bradshaw are in the city, the guests of H. E. Vandruff and will be accepted.

The Woman's Christian Temperance union delegates appointed to attend the county convention, which is to be held in Benedict on May 23 and 24, are Mrs. Miller, Mrs. Boson May 23, and 24, are sirs, sinter, arts, Bos-ton, Mrs. Medler and Mrs. George R. Reed. Word has just been received at this place announcing the death of W. A. Reed, a plo-neer settler of York, who died in southern Missouri. Mr. Reed was for a number of years a resident of York and run a drug store at this place. His death was caused paralysis. Many of his old friends regret

to hear of his death.

The picule given by the Philomathean and Amphictyon Literary societies of the United Brothren college of this city was a complete success, many attending the same. It was held about ten miles south of this city. District court convenes at this place on the 27th inst. There are about 100 cases of equity and jury work and seven criminal

Mr. and Mrs. Alton Hull of Red Ooak, Ia., who have for some time past been visiting with Mr. and Mrs. P. S. Hull of this city. returned to their home yesterday,

Frank Flanagan, Walter Bouton, Will Devenney, and Ed Flanagan have spent the past week fishing near Langdon, Mo.

Harry Ingersoll is visiting at Fremont.
Gorge Lewis has returned to his home in
Green Bay, Wis., after a visit with Tecumseh relatives.

Crop Prospects at Nehawka.

NEHAWKA, Neb., May 19 .- (Special.)-Last evening Mr. and Mrs. L. C. Pollard threw open the doors of their elegant home to the pleasantest social event of the season, a musical recital by Mrs. J. D. McBride and Miss Charrie Butler. The guests were treated to vocal selections by local an? Weeping Water talent, and to instrumental music on the plane, guitar, zither and violin.

Dr. Butler chaperoned a gay party from Weeping Water.
A great many fields of winter wheat are being plowed up and put in corn, being win-ter killed. Spring wheat and oats look fine, although the hard wind of last week whipped he ends of the leaves and killed them. is a very fine stand, but is yellow, owing to the cold weather, but will come out with a few hot days. There is prospect for a fair-plum and apple crop; the outlook for cherries is fine; small fruits and berries are suffering for rain. There is a general complaint that grape vines are dying with some disease that ooks like rust. The gardens on the lowlands will be late, as the first planting of vegetables was mostly killed by the frost of last week.

FREMONT, May 19.-(Special.)-A telegram was received here last evening announcing the death at Seattle, Wash., yesterday of John Gunkrantz, who was for twenty years a resident of this city. Mr. Gunkrantz was at one time cashier of the Frement National bank. He was identified with the demo-cratic party and took an active part in polities. He served one term as deputy county treasurer and two terms as treasurer. For

letpate in the exercises. The Ladies' Cor-net band of this city will furnish the mu-Frost to Boyd County.

New York Evening Post, notoriously unamerican, the most rabid of mugwump
dailies, a blind follower of Mr. Cleveland, is
of itself sufficient to cause one to accept all
news emanating from such a source com
grano salis.

WHEN THE RISE CAME.

When The RISE CAME. grano salis.

True, the Post may have periods of politi-cal sanity on New York City affairs, but memory doesn't recall when it has not been memory doesn't recall when it has not been wrong on national affairs, and especially our relations with foreign nations. The republic of Hawaii is passing through a crisis. It is not uncommon with young nations, who, infant-like, waddle about in their swaddling clothes, yet healthy adults in time come from puny babes, and great nations spring from small beginnings. The history of the United States shows this, and the historians of the next century may truthfully relate how one of the greatest of all great nations passed through such a crisis, from 1892 to 1896, because her people in a moment of political frenzy, made it possible by electing a party representing nothing but a desire to disorganize and break down that which time, brains, labor and money had built up, during a long period covering many years past. That the Hawaiians, i. e., the blood and sinew, the

set the close of 1886 was the states proposed to disorgantze and break down that which time, brains, labor and money had built up, during a long period common and the monarchy restored, is about, notwithstanding Mr. Paramount illount and his prototype, the post's corperation of the monarchy restored. The second of the seco and equally true, it may be delayed and equally true, it may never happen, but if it does never come about, it will not be because of the lack of patriotism of our countrymen in Hawaii, but from the cowardice of an unamerican administration. Such misfortunes are possible with nations as with individual, and especially so when the brain capacity is measured at the waist band. As to Colonel Ashford, if memory does not fail me, he is not the present attorney general of Hawaii, but of the deposed queen, and of course he can find no virtue in his present conditions. The Hawaiian republic under the able guldance of President Dole and his equally able cabinet, has made rapid progress. His government has been that of peace, and, although he quickly suppressed the late rebellion, he did not cut off the heads of his enemies as our president's "dear friend" would have done. President Dole is easily master of the situation. He will have difficulties That may be agreeded to the come and may see them reach several points higher than they are at president. easily master of the situation. He will have difficulties. That may be expected. But if he can only hold out until we elect an American administration his difficulties will soon disappear, in the sheltering arms of the United States, who will take her off-spring and embryo state, and hold it against any opponent, be it Britain or Japan. Is it surprising that Admiral Meade in righteous indignation, although in violation of the naval regulations, said: "I am an American and a union man, two things that this administration cannot stand." It is a long time to wait until March, 1896, and we may well sigh and say Oh, Lord! How long? How long? Yet it is not believed that pa-TECUMSEH, Neb., May 19.—(Special.)— disappear, in the sheltering arms of the graduating exercises of the Tecumseh the United States, who will take her offhouse Tuesday evening, May 28. C. C.
Lasby, D.D., of Lincoln, will address the class. The graduates, four in number, will be Gall K. True, Arthur D. Harman, Nelson
M. Davidson and Cory A. Philipott.

Miss Lucy White has been adjudged in the control of the class. The graduates four in number, will address the surprising that Admiral Meade in righteous indignation, although in violation of the naval regulations, said: "I am an American and a union man, two things that this administration cannot stand." It is a long How long? Yet it is not believed that pa-triotic Americans will allow Hawaii either

NEBRASKA CITY. May 19.—(Special.)—
Theodore Beyschlag, secretary of the Nebraska City Cereal Mills company, died this morning, aged 29. The deceased was well morning, aged 29. The deceased was well with the mills.

MR. DICKINSON AND HAWAIL.

SOUTH OMAHA, May 18.—To the Editor of The Bee: I hope that no patriotic American, no well wisher of the infant republic of Hawaii, will be misied by the press dispatch from San Francisco giving the views of a correspondent of the New York Evening Post on Hawaiian affairs. Were there no other reasons to doubt the accuracy of his pinduous, the fact that he represents the New York Evening Post, notoriously unamerican, the most rabid of mugwamp dalles, a blind follower of Mr. Cleveland, is of itself sufficient to cause one to accept all news emanating from such a source com

combination for putting up the price of hides. It is a well known fact in the trade that the packers and hide dealers were the most surprised people of any for a consider-able time after hides began to advance, and many times they remarked: "We are going

SOLD TO TAKE UP THE PROFITS.

Bealization Occasions a Slight Fall in Prices on Wall Street. NEW YORK, May 19.—Henry Clews, head of the banking firm of Henry Clews & Co., vrites of the situation in Wall street;

During the past we k. Wall street has had another spurt of realizing, in which London also has joined, and with the effect of a general decline in prices, especially in the lower priced stocks. And yet the effect has not been dispiriting, nor such as to cause any lack of confidence in the future. The past realizings seem to have followed the mere idea that, when prices show a considerable advance, it is the safest policy to pocket profits. And yet, after these successive sellings-out, there has each time been a renewal of eager buying; nor does it seem likely that the sales of the past week will prove to be an exception to that rule.

The market has some remarkable features.

week will prove to be an exception to that rule.

The market has some remarkable features which do not seem to be generally understood. Few of those who have been buyers have had any very decided idea why prices should have risen as much as they have; and to most it has been a matter of surprise that quotations should so promptly take a higher bound after each turn of realizing. Judging from mere ordinary reasonings, some are now disposed to think that a resting point has been reached, at which the market should be tested and observations prudently taken of the coming financial weather. And yet it is more than likely that, in spite of themselves, these same cautious observers will soon find themselves again buying.

same cautious observers will soon find themselves again buying.

There are unseen forces behind the market, which few understand, and the force
of which still fewer appreciate. Those
forces started the movement when it was
little expected; they have carried it forward
with unexpected momentum; they have
scarcely been suspected by the most sanguine "bulls;" and I venture to predict it
will be found that they have not yet exhausted their energy. These influences began to show their effects three months ago,
and were ushered in by the operations of
the loan syndicate. They are not, however,
to be attributed wholly, nor even principaily, to that negotiation. The syndicate
really did little more than prepaire the
way for the working out of tendencies previously existing, but which had been held
in restraint by the deranged condition of the
treasury finances and the consequent misgivings about the currency.

DUE TO OVERPRODUCTION.

DUE TO OVERPRODUCTION. Nor has this remarkable revival been so largely attributable, as many have supposed, to the abatement of doubts about our ability to ward off the silver dangers. That has had an important influence un-

doubtedly; and yet its effect has been but secondary. The real chuses he deeper. To find those causes, we must go back to the conditions that produced the great commercial depression, which has existed since 1882 in this country, with since 1880 in Europe.

BUYING FOR INVESTMENT.

The foreign demand for our securities has shown no abatement during the past week. About \$10,000,000 have been placed in London and Germany, including \$5,000,000 of the treasury stock of the New York Central railroad. In all, and including the United States loan, the amount of our securities taken in Europe since the middle of February last, is close upon \$120,000,000.

CONDITION OF THE IRON TRADE. Report of Expert Berkenbine on the Min-

eral Resources.
WASHINGTON, May 19.—John Berkenbine, the iron ore expert of Philadelphia, has prepared for the division of mineral resources of the United States geological

survey an exhaustive report of the iron ore resources of the world, in which the production of iron ore in 1893 is estimated at about 52,500,0.0 long tons. The portion of this report relating to the United States shows the total production of iron ore in this country in 1894 was 11.879,679 long tons

shows the total production of iron ore in this country in 1894 was 11.878.879 long tons of 2.248 pounds, as compared with 11.887.829 long tons in 1893.

This is an increase of about 2½ per cent. This production is only 73 per cent of the maximum production of the United States, namely, 16.296.696 long tons, which was the output in 1892, but is flightly greater than that of 1893, the proportion in that year being 71 per cent of 1892, showing a remarkable falling off. The falling off is further shown by the statement that the average production for the years from 1889 to 1892, inclusive, was 15.250.482 long tons, while for the last two years it has been but 11.733.664 long tons, a difference of 3.526.828 tons.

Of the classes of iron ogs mined, the red hematite continues to be the leading variety, being 79 per cent of the total production, the brown hematite, magnetic and carbonite following in the order named, the last being only about three-fourths of 1 per cent of the total product. The number of blast furnaces in operation also shows an increase over 1893. The number in blast at the close of 1893 was 127, at the close of 1894, ranging in amount from 4.418, 174 tons in Michigan to 7.915 tons from Mary-

Salvation Army barracks last night, and when the tambourine was passed around for the collection by the Salvation Army for the collection by the Salvation Army lassic Cohen determined to contribute. He found \$1\$ in his clothes and dropped this in the tambourine, taking out, however, \$8\$ cents. Later in the evening the lassic went up to Cohen and claimed that he took out the dollar, too, but Cohen denied this. An officer was called and Cohen was taken to the station, but later six of his friends came around and bailed him out for \$10.

Reached Home Again.

GRAIN PRICES GOING HIGHER

Corn Led the Advance on Chicago Board Saturday.

COLD WAVE SCARE CAUSED THE RUSH

Wheat Followed Corn and Jumped Up and Down with Remarkable Rapidity-Frost Predicted Generally Throughout the West.

CHICAGO, May 18 .- Corn led the dance of the Board of Trade, jumping 4%c, and closed 1%c higher at 53%c for July. The cold wave scare caused the advance. July wheat gained 11gc, September outs 12gc and provisions closed at advances. Almost every commission man and spec

ulator of experience advised their customers and told their friends before the market opened that the inevitable break in the wheat market would be realized today. How much they were mistaken they began to realize when, after a decline of be per bu., as the result of all the efforts of the entire local talent bunched together on the selling side, the price was gamboling around 72 gc per bu, for July about half an hour from the close. That was quite a contrast with 6912c, although some few sales were of general business.

HIVNING FOR INVESTMENT.

These facts seem to mark out railroad securities as a form of investment destined to receive a special preference until prices have reached a point that will bring their yield to about a parity with that of the investments which are now suffering in proceeding the fact that Europe has, within the fact that Europe has, within the fact that Europe has, within the fact that face of an expert of shares previous to this week, has probably not exceeded \$6.00,000, the remainder having been new issues of railroad bonds. The fact of he fact that he amount of railroad securities prevailing there as well as here, and also to the fact that the amount of railroad securities prevailing there as well as here, and also to the fact that the amount of railroad securities prevailing there as well as here, and also to the fact that the amount of railroad contributions of which it is not easy to forecast, but which seems to have by no means reached the seems to have by no means reached the culmination. In view of these facts and indications, we conclude that the upward more many thanks and that 1885 is likely to prove an extraordinary year in railroad investments of an every conclude that the upward more many to the seems to have by no means reached its culmination. In view of these facts and indications, we conclude that the upward and callons, we conclude that the upward more many to the fact that the amount of railroad investments of a new and special nature, the magnitude of which it is not easy to forecast, but no except the fact that the amount of railroad callons are concluded that the upward more provided that the upward and callons, we conclude that the upward the provided that the upward the process of the callons of the callo made near the opining. July started with sellers at 70c, but no buyers until it had been offered down to 694c, and in some \$2.50 keVET POTATOES—Good stock, \$2; seed. wheat could no longer be controlled and jumped about for half an hour like a pea on a hot stove. It rose to 72½c, dropped in about ten minutes to 70½c, rose again to 72½c and closed with buyers at 71½c. The orizinary market news was not much heeded, apart from what referred to the reported damage to the growing crop. The northwestern receipts at Minneapolis and Duluth were 207 cars, against 285 cars a year ago. For this week the carloads received at Minneapolis and Duluth have been 600 less than on the corresponding week of last year. The week's clearances of wheat and flour from bith coasts were 2,327,000 bu., compared with 2,805,000 hu. on the week bifore. Corn started weak, but it did not stay in that condition very long. The prediction of frost sufficiently severe to make the replanting of corn necessary in the principal states of its production was the cause of an excitement such as is seen only at rare intervals in the corn pit. July opened at 51½c and sold from that down to 51½c near the beginning of the session, and for a time floundered in a lazy way at around 51½c. Soon that was changed entirely, and it went shooting about like the shuttle of a sewing machine. Up with a bound it jumped to 55½c, back again to 53½c and up once more to 55¾c, all in about ten minutes. The heavy local receipts, numbering 700 cars, caused the opening heaviness, and 550 more estimated for Monday did rot improve it. The reason for the bulge has been stated. The latest trading was at 53½c.

the bulge has been stated. The latest trading was at 53½c.
Oats were active and secured a heavy business. Frost scare, good buying by shorts and the influence of wheat and corn all assisted in advancing values. September attracted the greatest amount of attention. June started at 25%c, sold at from 25%c to 25%c, advanced to 25% and closed at 29%c, and closed at 28%c bid.
The provision market was steady near the beginning, owing to the hog receipts being moderate. It became quite strong when the corn market showed the way in such excited fashion, and to the advance in that article is to be ascribed a gain for the day of 32½c in pork, 12½e in lard and 15c in the

bs. Estimated receipts for Monday: Wheat, 26 cars; corn, 550 cars; cats, 325 cars; hogs,

LESS THAN 500 HEAD WERE ON SALE

Demand, Quality and Prices All Show Some Improvement-Hogs More Plentiful and Better Quality, with Prices 1 Little Lower.

SATURDAY, May 18.

While there has been a very substantial nerease in hog receipts the past week as compared with the week previous, and some gain in sheep supplies, the run of cattle has been unprecedentedly light, in fact, the smallest six days' receipts in several years, The official figures are as follows:

most discouraging feature of the trade, however, has been the apathy exhibited by all classes of buyers, even at the reduced prices.

The week closed, however, with a light run and a comparatively good market. Total receipts were 624 head, but, as there included five ears of Texas cattle bought by local packers at Kansas City yesterday and consigned to them direct, there were less than 580 sale cattle in the yards. The general quality of the receipts was very fair and three were a few loads offered better than any that have been offered lately. All classes of buyers exhibited more of a disposition to trade than they have recently and the result was a good, lively market, with prices strong to a shade firmer all around. Shippers paid \$5.30 for choice 1.342-pound cattle, and bid \$5.40 for a choice bunch averaging nearly 1,400 pounds. Local dressed beef houses bought fair to good \$900 to 1.300 pound beeves at for from \$1.29 to \$4.35. There was a tolerably healthy tone to the trade throughout, and a fairly satisfactory clearance was made.

Butchers and canners stock was in very limited supply and sold readily at fully steady and perhaps a shade stronger prices. The average was from \$1.90 to \$4.35 for poor to prime cows. Common calves ruled about steady around \$2.25 to \$3.50, with good to choice yeals strong at from \$4.50 to \$5.75. The market for bulls, stags and rough stock generally was not far from steady, with sales at from \$1.25 to \$5.50, with good to choice yeals strong at from \$4.50 to \$5.75. The market for bulls, stags and rough stock generally was not far from steady, with sales at from \$1.25 to \$5.50. with good to choice yeals strong at from \$4.50 to \$5.75. The market for bulls, stags and rough stock generally was not far from steady, with sales at from \$1.25 to \$5.50 with good to choice feeders are quotable at \$5.604.00; fair to good, \$5.005.50, and common grades from \$1.00 down.

HOGS-Receipts for the past six days show a very material increase on the week previous, but fail nearly 50 per cent short of a

Miss Delia Stavens, of Boston, Mass., writes: I have always suffered from hereditary Scrofula. I tried various remedies, and many reliable physicians, but hone relieved me. After taking six bottles of S. S. S. am now well. I am very grateful to you, as I feel that it saved me from a life of untold agony, and shall take pleasure in speaking only words of praise for your wonderful medicine, and in recommending it to all who are afflicted with this pairful disease.
