## COMMERCIAL AND FINANCIAL

Wheat Was Dizzy Yesterday as a Result of the Great Rise.

BOTTOM VERY SUDDENLY FELL OUT

Corn Was Fairly Active and Strong in the Face of Receipts of Nearly One Thousand Cars and Absence of Shipment Demand,

CHICAGO, May 21.-Wheat was dizzy today as a result of the great rise which it has experienced within the past few days. The news was nearly all bullish, and higher prices were logically to be looked for, but trade has become accustomed to declines, Consequently, when the market showed a tendency to waver at the top today there was a rush of longs and shorts to sell and a tumble of 2%c. Fluctuations were very frequent throughout the session, but the close showed an advance of 1/20 over yester-day. Corn, though advanced by wheat to some extent, was more directly influenced by the frosts and inclined to greater steadi-ness than wheat, closing the higher than yesterday, Oats are 'ie lower; pork 17the lower; lard, 12c, and ribs, 15c lower.

Wheat opened weak, with sellers at from 73c to 72% for July, but there were numer-ous buyers for a matter of half an hour or so who evidently looked for a repetition of the sequences to all the recent breaks in the price. They were not disappointed.

Wheat recovered to 74%c, but what occurred Condition of Trade and Quotations on in the next half hour rather upset the calculations of the crowd. After hanging be-tween 73%c and 73%c for about twenty minutes succeeding the bulge to 74%c, it took a sudden dip to 73%c, recovered to 73%c, broke again to 73%c, but guickly dropped so a sudden dip to 73½c, recovered to 73¾c, took a sudden dip to 73½c, but quickly dropped so far that the last named figurer appeared to be away up on the top of an inacessible mountain. It went down to 71½c. It took about thirty minutes to tumble ¾c. The volatile character of the market was well maintained throughout the session, for by 12 o'clock the price had again climbed to 73¾c. The great strength of July wheat at St. Louis, where the traders are in close touch with the crop conditions in the best part of the winter wheat country, did much to keep up the courage of the buils. There was nothing, in fact, in receipts or shipments, foreign advices or domestic crop conditions which could be construed unfavorably to holders of wheat. On the contrary, the general tenor of the news favored still higher prices. The only thing that was advanced against the price was that it had grown too rapidly, and that after a 25c rise it should react 5c at once. The scalpers, big and little, were of the latter opinion, and hence the early and subsequent breaks. Liverpool, London, Paris and Berlin all quoted higher prices. The Minneapolis and Duluth receipts were 215 cars, compared with 326 a year ago. The exports of wheat and flour from the Atlantic ports were equal to 420,000 bu., of which 200,000 bu. was in the form of flour. The only matter of a bearish character which was brought to the notice of the trade was the week's movement from the exporting countries of the world, which amounted to 8,900,000 bu., including the 2,400,000 bu, sent from this country and Canada. The estimated weekly requirements of the importing nations amount to 6,700,000 bu. The reports of crop damage and the professional selling fought each other foot to foot throughout the entire session, and as the end approached the market developed most extreme nervolances. It rushed on down between 7%c and 73½c, taking only a few minutes to go from one extreme to the other, and finally closed at 73%c.

treme to the other, and finally closed at 73%c.

Corn was fairly active and strong in the face of receipts of 917 cars and absence of demand for round lots for shipment. It was a local scalping trade, principally in the pit, with the fluctuations over a range of 1%c, and those for the most part following in the wake of the price changes in wheat. July, from 53%c and 53%c near the opening, rose to 54%c, dropped to 53c, rose in the afternoon to 54%c, and closed at 5ic, or ½c higher than it did yesterday.

Outs were active. Longs were again selling and shorts buying. Orders from the country to buy were also numerous. Bad crop reports were influential in causing the urgent country demand for outs. While the market experienced lower values throughout, and closed from ½c to %c under yesterday's last quotations, fluctuations were ruled entirely by wheat and corn. The cash market for oats was very weak, prices being about le lower and the failing averaging.

market for oats was very weak, prices being about Ic lower, and the feeling extended into the speculative crowd. Consequently the lower prices and a comparatively firm tone. July sold from 29½c to 25½c and rested at 29½c.

Provisions were moderately active, but weaker. The start was at a decline compared with vesterday's closing prices of 29c in pork and about 10c in lard and ribs. The estimated run of hogs for tomorrow being 35,000, tended to produce the easier feeling, but the receipts this morning were only 21,000, and they were quoted firm at 5c advance. Pork, after a temporary rally of 7½c, dropped 22½c, then recovered a little and closed for July at \$12.55 sellers, compared with \$12.82½ on the day before. Lard at the close had lost 12½c and ribs from 12½c to 15c.

STOCKS AND BONDS.

Strong Yesterday. NEW YORK, May 21.—The share speculation on the Stock exchange today was quiet at the opening, and the first prices made were a shade lower than the closing figures of yesterday. The depression was largely due to the selling for foreign account and the heaviness of Americans on the London Stock exchange. Trading, howmovement was inaugurated, under the influ movement was inaugurated, under the influence of which New Jersey Central sold up 1% per cent, Sugar 1% per cent, Tennessee Coal 1 per cent, Sugar 1% per cent, Tennessee Coal 1 per cent and the rest of the list a fraction. The higher prices induced realizations, which, together with a small bear trade, brought about a reaction of from 1% per cent to 2 per cent, the latter in Northern Paisthe preferred; 1% in Eric Telegraph and Cotton Oil preferred; 1% in Eric Telegraph and Cotton Oil preferred; 1 in New Jersey Central, and % per cent in Sugar. Laclede Gas was an exception and rose 3 per cent to 33. About noon the latter stack advanced 1% per cent for the common and 2% per cent for the preferred, the latter closing ½ per cent for the preferred, the latter closing ½ per cent for the preferred, the latter closing ½ per cent of the best. A general improvement set in also in the seneral market, which continued to the close, when the best prices were current. The appreciation in values ranged up to 2 per cent. Great Northern preferred, and 1 of clock there was a recession of 2% per cent in Pullman. 1% in Long Island and Laclede Gas and 1 in Convolidated Gas. At the close the market was strong in tone and on the day prices were in the main from % per cent to 2 per cent higher, the latter in Great Northern. Honds generally ruled lower throughout the morning, but in the subsequent trading prices stiffened all around. The sales were \$1.52.565.

The Evening Post's London cablegram says. The stock markets were dull again today because of the settlement and on the slump in Kaffirs. Where enormously stiff rates are being charged. Americans opened dull in sympathy with the New York side and there was no material rally. Some heavy selling was done by some of the Kaffir dealers who were first in on the rise. The selling was induced by fears of a rise in exchange and marming reports collect here of damage to crops by cold. Germany is not selling. The rates on Americans tomorrow will not be stiff unless more stock has arrived by

Speculation in Securities Was Quiet and BEEF TRADE FULES-ACT.VE AND FIRM

Good Request for Die Unusually Large
Number of Fed Steers—Feeders Little
Wanted—Hogs Active at Strong
Figures—Sheep Steady.

TUESDAY, May 21.

There was a run of 131 cars today, a very respectable supply of cattle, the heaviest run of hogs in nearly three months, and a fair supply of sheep.

There were twice as many cattle on sale as were here a week ago, and fair to pretty good cornfed natives constituted the bulk of the offerings. The market had more life and a decidedly better feeling pervasied the trade, although prices were hardly quotably higher than Monday for any particular grade of cattle. Dressed beef men were partial to the handy weight steers, and readily paid good, firm figures for such as suited them, while, on the other hand, there was a general disposition to neglect the heavier grades, shippers especially being somewhat backward, owing to the doubtful tone to eastern advices. Choice 1,300-lb, beeves sold around \$5 to \$5.15, and the bulk of the fair to good be stock sold at from \$4.55 to \$4.99.

Good, fat cows and heifers sold at strong prices, but buyers are discriminating more Good, fat cows and helfers sold at strong

prices, but buyers are discriminating more

and more against the thin grassy stock, and

prices for such ruled lower. The market for yeal calves was active and strong, with no particular change in the trade in bulls, stags and rough stock, Stock and feeding cattle were more or Stock and feeding cattle were more or less of a drug on the market, owing to the very limited country demand, occasioned by the long dry spell, which has hurt pasture some. Prices are all of 10c to 15c lower than last week. Good to choice feeders are quotable at \$3.4002.80; fair to good. \$3.0003.40, and common grades from \$3 down. Representative sales:

SMALL GRAIN SUFFERING FROM DROUTH

with the United States Weather bureau, issued from the central office at University of Nebraska, Lincoln, under direction of G. D. Swezey, meteorologist of the Nebraska experiment station, director, for week ending May 20, 1885, reports received from 184 reporters in seventy-three counties:

less than 1 none or a trace nch inches 2

The week has been cold and dry and very unfavorable for the growth of vegetables.

The temperature has been steadily below the normal throughout the week, ranging from 5 degrees below the normal in the western portion of the state to 8 degrees below in the eastern. There have been severe frosts on several rights, doing more or less damage to fruit and vegetables, and even to field crops.

The rainfall has been very deficient, amounting to only a trace over much of the state and nowhere sufficient to do much good.

The rainfall has been very deficient, amounting to only a trace over much of the state and nowhere sufficient to do much good.

The rainfall has been very deficient, amounting to only a trace over much of the state and nowhere sufficient to do much good.

for want of rain. Fruit not injured much by the frost.

Dawson-Very cold and dry and rye badly damaged. Wheat, oats and grass have made no headway.

Greeley-Cold and windy. Crops all suffering for water. Over one-half of the fruit killed by the recent frosts. Planting finished and corn coming up nicely.

Hall-Spring grain badly damaged. Fall grain mearly ruined. Corn about all planted, but not growing any and some will not come up until it rains. rains. Howard-Dry all the week. Small grain is still SMALL GRAIN SUFFERING FROM DROUTH

Howard—Dry all the week. Small grain is still redeemable, but we need rain badly. Grain well. Corn has Made Little or no Growth Owing to the Cold — Potatess Show Signs of Recovery from the Frosts.

Weekly weather crop bulletin, No. 6, of the Nebraska weather service, co-operating with the United States Weather bureau, and the Cold — States Weather bureau, and the Cold — Potates Show the Frosts.

Howard—Dry all the week. Small grain is still redeemable, but we need rain to still redeemable, but we need rain betweemable, but we werking some working some werking some. Corn planted and cutworms are working some working some werking some. Corn planted and cutworms are working some. Corn plan

grain looking fairly well.

SOUTHWESTERN SECTION.

Adams—No rain this week. Crops suffering very much. A good deat of wheat plowed up and put in corn.

Chase—Corn looks well, but a small acreage. Crops under irrigation not doing well owing to civil weather.

Dundy—Drouth still unbroken. All farm work suspended. Buffallo grass beginning to dry up. Franklin—Cool weather the past week has improved the appearance of small grain. Corn all planted and looks fair, but needs thin badly. Frontier—Cool and tather too dry for growth of crops. Wheat and oats nearly ruined. Garden stuff mostly killed by the frest.

Furnas—Cool and dry. Crops making poor progress. Rye heading out low. In the southwestern part of the county grain in good condition, but generally the fall grain much damaged and all crops needing rain.

Gosper—All crops needing rain, but will hang on for a while, and seem to be doing well, in spite of the drauth.

Huthan—Frest has done a little damage. Too dry for oats and wheat, they cannot make more than half a crop. Corn coming poorly. Pofatatoes coming again after the frost. Too dry to list. man half a crop. Corn coming poorly. Potatatoes coming again after the frost. Too dry to
list.

Hitchcock—Ground so dry that most farmers
have quit work. Early planted corn up. Late
planted lying in dry soil.

Keurney—No improvement in crop conditions.
Two dry for small grain and too cold for corn.
Frost did considerable damage. Cherries killed.
Some anoles and plums left.

Lincoln—Week to celd and dry for crops.
Rain needed. Wheat and corn cannot stand the
drouth much longer. Corn planting well along.
Some have quit for want of rain.

Perkins—No rain except local showers at Madrid Farm work stopped except in castern third
of county. Wheat at a standstill.

Phelps—No serious damage from frost. Corn
mostly planted and conduct up good. Pastures
peor. Small grain needs rain.

Red Willow—Farmers programs base casted a

NORTHWESTERN SECTION.

Box Butte-High whols during the week and frest on the 16th, but no damage resulting. Cherry-The hard frest of last week sections in finited all vegetation, including young leaves on ash trees. Wheat and outs will come out sgain, but a good deal of the vegetation is ruined.

Cheyenne-Very dry. Crops doing no good. Wheat leaves curling. Grass on upland all dry. Prost on the 15th did considerable damage to gardens. Wheat leaves curling. Grass on upland all dry. Frost on the 15th did considerable damage to gardens.

Dawes—Week cool, with some light frosts and with local showers. Crops growing nicely, although in some places needing more rain. More prairie being broken than for three years past.

Keya Paha—The past week has been coid and dry. Late sown grain does not look as well as late sown. The frost did not do as much damage as at first sarposed. Wild fruit was not killed, but badly damaged. Corn and millet need rain in order to germinate.

Logan—Nearly half the corn planted and much of it up. A half inch of rain the last of last week has made crop prospects better than at this season for the past three years.

Rock—Week dry and rold. No headway made by any kind of crop. Heavy frost on the night of the 18th doing serious damage to fruit.

Seatts Bluff—Farmers under trigation busy putting in corn and sowing alfatfa. Wheat and oats doing well. Old affalfa looking fine Late potatoes being planted.

Sheridan—All kinds of grain needing rain, Several frosts have kept vegetation out down.

Julesburg, Colo.—The unfavorable conditions previously reported are not changed for the better.

WEATHER CONDITIONS UNITAVOUABLE Damages by Frost and Lack of Moisture During the Past Week.
