In Corn the Market Again Suffered from Heavy Receipts and Favorable Outlook for the Next General Crop.

CHICAGO, May 24.- The edge was taken off the buil movement on the Board of Trade today, and everything closed lower. In comparison with yesterday's final fig-ures, wheat finished 1%c off, corn, 1%c, oats

Mc, when imissed 19c on, corn, 19c, oats Mc, pork 50c, lard and ribs 21c each. The weakness in grain was owing to heavy realizing sales made in the face of the most gloomy crop reports yet received, and that in provisions was the result of the heavy receipts of hogs and the weakness in corn. A reaction was in order in the grain markets. The commission houses that for more than two weeks have been urging their customers who had good profits in wheat bought to take them succeeded at length in inducing a sufficient number to sell to cause a considerable setback in the price. Although the Liverpool wheat market opened lower than it closed, and it had rained in Kansas during the night, the market dropped, with some buyers willing to pay for July wheat. Not many, however, paid that; the great majority were willing at 78%c, or the same as it was worth at the close of yesterday's session, and some ever close of yestenday's session, and some even pressed some wheat for sule which had a good profit at 184c. A good deal of wheat was wanted from 75c to 784c, and before the early buying orders which succeeded the opening break enall be all filled the price rose again to 75c. For about fifteen or twenty minutes the price heaved up and down in irregular swells and depressions between 785c and 75c, and then came a crash.

down in irregular swells and depressions between 78% and 79c, and then came a crash.

Corn, which was showing heavitess on account of the liberal receipts of that article, commenced to tumble, and when it had broken be below the price it had closed at yesterday wheat had a sympathetic spasm and collapsed suddenly to 77%. The reviving influence of fee h buying orders was apain supplied and before many minutes it had again recovered to 79%. The first downward plunge was due to the lower cables, sales by longs and the execution of stop loos orders. On the next turn it declined to 78% and then kept wobbling lazily for an hour or more between 78% and 79c. The volume of trading was very much reduced, as compared with the tremendous bulk of business done every day for ten days back. There were considerable intervals during which there was actual duliness in the pit, but at no time was there an absence of nervous watchfulness that kept the pit filled with brokers, all alert for contingencies. The reports from the country concerning the crops of the states of Indiana and Illinois were woful in the mon thous relevants of destruction. In addition to these states, Ohio, Kentucky and Missouri joined the doleful chorus, and even the northwest had some complaints to send about unfavorable weather for spring wheat, but it was raining in South Dakota this morning, so that, as regards spring wheat, but it was raining in South Dakota this morning, so that, as regards spring wheat, but it was raining in South Dakota this morning, so that, as regards spring wheat, but it was raining in South Dakota this morning, so that, as regards spring wheat, but it was raining in South Dakota this morning, so that, as regards spring wheat, but it was raining in South Dakota this morning, so that, as regards spring wheat, the belief in a good prospect for it did not suffer. The market began to weak, a very much during the afternoon hour, and long wheat kept coming out in heavy chunks from that time up to the cloge. That resulted in a rapid and h

In corn the market again suffered from heavy receipts and favorable outlook for the next crop. A good demand from the scaboard, resulting in the sale for export of 250,000 hm, sustained the price early in the day, but the afternoon weakness of wheat and the fine weather were the most influential factors in the end, and a considerable decline resulted. The opening price for July was 50%c, or 1%c under the previous day's closing quotation. It was prevented from getting very weak while the cash business reported was under way, but gradually worked down to 53%c. It had a quick reaction to 53%c, which was the price at the close. ie close. Further and more discouraging reports of

repriner and more discouraging reports of crop damage by the weather started a com-paratively firm feeling in the oats market. It did not last long, however, weakening with wheat and corn. There was free sell-ing on the decline and at times difficulty ing on the decline and at times difficulty was experienced in finding buyers. Taken as a whole, however, business was active and sales heavy.

Provisions were weak from beginning to end. The hog receipts are proving more than the cash demand will absorb and corn is weak.

than the cash demand will absert and corn is weak.
Estimated receipts for tomorrow: Wheat, 75 cars; corn, 870 cars; oats, 450 cars; hogs, 12,000 head.

weeks is justified, the calamity will affect all business prospects. The markets do not believe it, for stocks do not collapse, iron, leather and hides still rise, and no holder of wheat would sell at 80 cents, a lower price than had been known at this season for thirty years prior to 1893, if current reports were credited. Some injury has undoubtedly been sustained, but our own dispatches do not show that it is really serious. The temper is to buy, regardless of visible requirements, in the faith that prices are sure to rise. Western receipts of wheat for three weeks have been larger than for three weeks have been larger than ast year, in spite of storms and frosts. But the rise has practically stopped buying for export, as all storms are stormed by stopped buying for export, as eliminar rise did in April, 1884, which was clowed by about the lowest prices then ever thawn. Whether grain has been greatly injured to not foreign markets will take early occasion of fortify themselves from other sources. The week's sales here have amounted to 155,000,000 aushels, and accounts of damage by trusts and sy injects indicate that some traders think the large must wear overcount. Corn 1996 24, ents. week's sales here have amounted to 155,000,000 is busiles, and accounts of damage by frosts and by insects indicate that some traders think the burs must wear overcoats. Corn rose 24, cents during the week though much of the corn killed may be replanted; bark rose 26 cents per barrel, lard 5 cents per larrel, lard 6 cents per larrel, lard 6 cents per larrel, lard 6 cents per larrel, l

Twenty-Two Prominent Products Score an Union Pacific. Advance. NEW YORK, May 24.—Bradstreet's tomorrow will say: The moderate reaction in the stock market last week and this week, caused pri-marily by repeated frosts and reports of severe

market list week and this week, caused primarily by repeated frosts and reports of severs damage to cereal crops, was followed only in part by a corresponding check to the movement in general trade. Not one of the large grain states confirms the reports of severe damage to wheat and corn with which the exchanges have abounded, and there is less reason to believe in the extent of it as currently reported. The most builtish feature of the wheat situation lies in the announced restriction of Argentine and Russian exports, reduced export ability of nearly all leading producers and shorter supplies of importing countries. Few believe wheat has touched its highest point on this wave, although it is 55 cents per bushel above the lowest since the panic. Exports of wheat from the United States, both coasts, and Montreal this week amount to 2.750,000 bushels, against 2.37,000 bushels hast week 2.10,000 bushels in the third week of May, 1883, 2.280,000 bushels in the third week of May, 1883, 2.280,000 bushels in the year before that, and as compared with 2.345,000 bushels exported in 1851.

This week's record of advances is as conspicuous as ever, and includes hides, shoes, leather. Bessemer pig iron, steel billets, natis, bar iron, copper, zinc, wheat, corn, oats, pork, lard, flour, coffee, cotton, naval stores, polatoes, poultry and butter—twenty-two in all. The tone of the iron and steel markets is the strongest since the depression of 1803-5. Woolen manufactures are working on old orders and some refuse to stock up with raw material, as prices at the interior are above a parity with those at the seaboard. Western views are that manufacturers may be short of supplies to meet fall contracts. The immense advance in petroleum prices has so far falled to induce any large increase in the well output, thus pointing to approaching exhaustion of subterinnean stores of this product in the Appalachian region. Consumption is still lighter than production.

STOCKS AND BONDS.

Improvement in Securities Continues and a Higher Eange Was Obtained.

NEW YORK, May 24.—The improvement in the stock market continues, and as a result of today's transactions a higher range of values was established. This speculation was mainly confined to the local traders, the foreigners being entirely out of the market. There were, however, a number of the market. wever, a number of orders from out of town on both sides of the account. The volume of business was moderate, At the opening the market was firm and an advance of lability per cent was recorded, the latter in Minneapolis & St. Louis. Distilling was an exception and under brisk selling receded I per cent. General Electric was also pressed for sale by a prominent bear operator, and selling orders came from the latter hear operator, and selling orders came from the following which hooke 1% per cent. A few other shares sympathized to the extent of fractional losses, but the general market was not affected and made gains, notably Minneapolis & St. Louis trus receipts, 1% per cent. Minneapolis & St. Louis trus preferred. 2% per cent. Tobacco, 2% per cent; Sugar, 1% per cent. General Electric and the grangers, is still, per cent. The market continued strong up to and beyond midday, the upward movement not being checked until about high past I o'clock, whim a bear demonstration was made against the grangers on the circulation of a regort that it was a settled conclusion that at the June meeting of the Northwestern directors the dividend would be made 1% per cent, making the rate for the year 4 per cent. The losses in this group ranged from 5 to 1½ per cent, and was most market in Northwestern the rest of the market fell off leadily per cent, the latter in Wheeling & Lake Eric preferred and I per cent in M belio & Ohlo, After delivery hour prices again took an upward turn and market was active and strong, with a wide distribution of trailing. The sales were \$3.22,000.

The Evening Post's Londen cablegram says: The stock markets toslay were quiet but firm. The week was satisfactorily concluded. Money is more plentiful than ever. Am ricans were firm, chiefly on bears' closing and German buying. There was a further spurt in the s reet, Louisvile and Milwaukee leading. Argentine stocks have risen in sympathy with wheat.

provement in the Markets.

TRADE IN EEEF STEERS IS STEADY

Demand Fair, but Dealers Hold Cautiously Back-Feeder Trade Demoralized-Hogs Open Weak and Close Lower Under Eastern Influence.

FRIDAY, May 24.

There was a general let up in receipts to-day, the total being 102 cars. So far this week, as compared with last, there has been an increase of 1,500 cattle, 8,300 hogs and

Stockers and feeders were a drug on the market at prices 40c to 50c lower than the first of the week. The dry weather and consequent short pasturage has had a endency to increase supplies, at the same time that it shut off the demand. The low prices proved somewhat attractive to specu DRESSED BEEF.

CHICAGO LIVE STOCK.

Cattle Active and Stronger, but flogs Ruled Lower Than Yesterday. CHICAGO, May M.-Caitle are siling about where they did one week ago. The best kinds are a little higher, while common lots are weaker. The demand has been chi fly for very desirable light and medium weight steers, and such descriptions are stendy. The receipts though smaller than a year ago, are sufficien though smaller than a year ago, are sufficient to meet the present moderate requirements of the trade, and the consumption of boot is not likely to undergo any important increase until the price is lowered. With receipts of only about 3,500 head today, cattle were arrive and stronger, with some sales at an advance of 5c. Choice lots were scarce, and good shipping steers sold chiefly at \$5.0015,50. About 1,50. Texans were offered and sales were active at \$4.004.75 for

an increase of 1,500 cattle, 8,200 hogs and 600 sheep.

The supply of cattle was 765 head, a few hundred less than arrived Thursday, but a few hundred heavier than a week ago. Trade opened out quiet, and the moderate offerings changed hands at just about steady prices. Light and medium weight steers, that suited the dressed beef men, sold readily at from \$4.40 to \$4.80, and shippers got a couple of bunches of very good 1.248 lbs and 1,331 lb. beeves at \$5. It was a good, steady market and that was about all.

The trade in butchers' and canners' stock was fairly brisk, with prices fully steady, fair to choice butchers' and beef cows selling at from \$2.50 to \$3.75. Common and canning cows ruled weak at \$1.60 to \$2.25. Veal calves were generally a shade ensier, selling largely at \$3 to \$4.59. Bulls were in fair request, and about steady at from \$2 to \$3.75. Stockers and feeders were a drug on the market at prices show the to be the prices of the weik.

Heading the \$1.500 to \$1.500. About 1,160 to \$2.000 head fed lots.

CATHOLIC SALVATION ARMY.

Romish Church Taking a Bint from General Booth's Organization.

CLEVELAND, May 24.—Roman Catholic missionary workers are about to start a move-ing but harley prospects are not so favornent of the greatest importance among the able. Copious warm rains have brought winmasser of population in this city. It might be called a Roman Catholic Salvation army field work and limiting the area of spring movement, except that some of the odd seedings. Russian reports are uniformly of features of the Salvat on : rany will be omitt d. The missionaries have the endorsement of

the missionaries have the endorsement of this diocese to the plan and Kief. The winter left the autumn-sown of street work, and meetings will soon be begun on the street corners and curbs. An or-ganization will be formed and as soon as practicable will be made national and exended to all of the great cities of the cour try. So enthusiastic are the local Roman Catholic clergy that several will resign from their parishes to engage in the street work

WEATHER FORECAST.

WHEAT AREA IS SMALLER

Agricultural Department Review of Conditions in This Country and Europe.

EUROPEAN PROSPECTS ARE DISCOURAGING

Drouth Has Been Felt in Many Places, but the Promise at Present is on

the Whole a Satisfactory One.

WASHINGTON, May 24.-The crop conditions of Europe and in the areas devoted to crops in this country are reviewed in a report prepared at the Agricultural department. Spring plowing throughout this country is shown to be rather more forward this season than usual at the beginning of May. The work, however, is not evenly balanced and there is a marked deficiency in the New E gland, Atlantic and southern tates, in New England and the Atlantic states, though backward from local drouth and cold weather and execusive rains, grains have set well and promise a fine crop, and in the south the outlook is favorable. Grazing lands on the Pacific coast, except in California, have been Injured by dry, cold weather, and pastures in mountain states generally have not developed well. Thermometers have generally fallen 19 degraces below normal.

A general decrease of land devoted to wheat throughout the entire wheat raising region is reported, due both to low prices and the winter killing of the crop. There is a material increase in the corn area and in the south-ern states the chaposition to reduce the estton area and to substitute corn is growing. A general increase of fruit and vegetable raising for the markets is reported from the south and expansion of the potato area is promised throughout New England, the southern and middle states, and all but the westernmost of the western. Oats and barley will supple ment in taking up the decreased wheat area, and the flax area shows a slight increase in Kentucky and some western states. Strawberries and peas are receiving more attention in the south and the raising of sweet corn and tomatoes for canning is to diminish on account of a reported depression in the indus-

DROUTH IN EUROPE.

Foreign reports show that throughout west-ern Europe the season is very backward and in northern Europe there has been little moisture. Cereals in Great Britain are promising and there is an excellent prespect of an unusual fruit season. Grasses there are all backward and clover rather thin over con-siderable areas. Potatoes are very high and choice seed potators are selling in the western counties at \$50 a ton. Sales of English wheat since harvest are estimated at 27,000,000 bushel and stocks in first hands at 13,000 bushels, a falling off of over 7,000,000 since the corresponding period last year. Imports of corn during the thirteen weeks of the harvest year ending April 13 aggregate 30,-000,000 bushels, a decided decrease, but prices have not advanced. In France spring sowing of wheat and oats has been completed, and both the wheat and sugar beet areas have been considerably reduced. The wheat crop will be heavily reduced, one estimate placing the product at 288,000,000 bushels.

Reports from Germany are unfavorable, as winter seedings have not advanced satisfac-torily. Coreals have suffered from lack of moisture and clover is thin. Complaints of considerable damage come from Saxony and Prussia. Ryg appears to be quite yellow and sometimes black. Over a large area it will be replaced by summer seed, From America 8.388 head of cattle were imported. In Beiglum and the Netherlands farmers have made up arrears, and a good harvest is expected. Spain has suffered from heavy rainfalls, though an average harvest is now expected.

More than any other European country, Italy has been favored by the weather, and ter scedings on the Roumania into good condition, though interfering somewhat with plants in Poland in bad condition, but in Caucasus prospects are excellent.

PROSPE TS FOR WHEAT ARE GOOD. Reports from All Over the Country Point to an Average Crop.

NEW YORK, May 24.-The World publishes telegraphic reports from nearly 300 points in the wheat belt, showing the exact condition of the crop. "These reports," the World says, "show that on the vast wheat farms of the northwest, in Minnesota and the Dakotas, the wheat crop is not only uninjured, but actually is in better shape than the average condition. 'Never better' is a significantly frequent expression of the correspondents from that section of the coun-

"From the southern section of the wheat belt there comes a different story. Kansas reports indicate less than half a crop. In Illinois Indiana and Ohio chinchbugs, rust and other ills have aided the frost in doing extensive damage to wheat. Missouri and Michigan also report heavy losses.
"On the Pacific slope, which is becoming one of the largest wheat producing sections

in the country, all reports agree that the crop is above the average.

"Taking the whole wheat belt together with the Pacific slope it seems clear from these reports that the present prospects for at least an average crop are favorable.
"Favorable conditions and an increased crop in the vast fields of the northwest will easily make up for the lessened crops in the diminished wheat area of the central states."

Wheat Operations Fell Off Some. NEW YORK, May 24.-Wheat operations up to noon today were just 5,230,000 bushels, or about 13,000,000 less than they were yesterday morning. Prices, however, danced about in a very lively way. July opened at from 81 to 81½ cents in various parts of the pit and dropped to 80½ cents. This looked like further realizing by the country and the bears were in great glee, predicting a great smash in prices. Their joy was shortlived, for with a quick rush prices shot up to 81% cents on fresh outside buying, then lost from

2 to I cent and the market was dull at mid-Norway Makes Her Rallways Pay. CHICAGO, May 24 .- The government is taking notes on the American railway systems in the person of its representative, C. L. Anderson, auditor general of the railroads of that country. Mr. Anderson is making Chicago his headquarters. He says: "If the government of the United States could manage the railroads of the United States with-out loss to it it ought to obtain central. The roads in Norway pay dividends as high as 7 per cent on some branches, and I think altoether there is a profit."
