WHY CORINTO WAS OCCUPIED

British Intended to Overthrow Nicaragua's Government in the Interest of Friends.

HOW THEY REGARD MONROE D. CIRINE

Officers of Stephenson's Fleet Alleged to Have Declared that the United States Feared to Attempt to Maintain the Policy.

(Coprighted, 1895, by the Associated Press.) MANAGUA, Nicaragua, May 18.—(Special Correspondence of the Associated Press.)-

If the British had occupied Corinto a little longer than they did they would have been able to capture a British steamer, the Debay, which arrived there two days ago, loaded with a full supply of modern, improved field artillery, rifles, equipments and ammunition for about 5,000 officers and soldiers of the Nicaraguan army, and Admiral Stephenson would thus have been able to collect the £15,500 claimed by Great Britain as an indemnity from Nicaragus without any difficulty. But the British warships sailed away on May 5, and this most valuable cargo arrived at Corinto on May 16, under the British flag, to the great delight of the Nicaraguan authorities, who feared that this supply of war materials would fall into the hands of the British. It is considered more than likely that the admiral would have seized and detained the Debay until the indemnity was paid, and there is great rejoicing here at its escape, for it would have made an admirable substitute for the port and custom duties of Corinto, which the British admiral was prevented from collecting by the fact that the Nicaraguan government declared the port closed shortly after it was occupied by

MOTIVE OF THE BRITISH. Nobody here doubts that had the British Stephenson could have taken possession of the Debay's cargo, in spite of the fact that the steamer was under the British flag, as the war material was purchased in Germany in 1893 by the present government.

Then, again, people here insist that Great Britain was desirous of obtaining a coaling station on the island of Corinto, and another coaling station on Corn island, near the Atlantic entrance to the proposed incanal.* It is also believed that it was the intention of Great Britain to cause the overthrow of the present government of Nicaragua and to place in power native Nicaraguans of her own choosing, and there are some prominent natives of this country who are very fond of Great Britain.

MENACED THE MONROE DOCTRINE. It is claimed by the irritated people here hat Admiral Stephenson and several of his officers when at Corinto on April 25, just be-fore they actually took armed possession of that port and island, publicly declared to many persons, among whom was W. T. Tisdale, a United States citizen and the agent for the Pacific Mail Steamship company, that the Monroe doctrine so often referred the United States press by that people is a myth, that the United States would not and could not, if it desired, enforce it, and it is added that the British officers asserted that the occupation of Corinto was intended to test the question. It should be said in conclu-British officers made such statements.

The export of the coffee crop of 1894 from this country is not so nearly completed that a fair estimate can be made of the aggregate but it is believed that it will amount to 16,000,000 pounds, against about 13,000,000 pounds last year. The season for gathering coffee and preparing it for the market has been very favorable and the quality is un-The price in Europe and in the United States for good to best qualities is from 18c to 22c gold per pound. HOW COFFEE IS EXPORTED.

The export tax is 2 cents, Nicaragua currency, per pound, if exported from San Juan del Sur, or via San Juan del Norte River, This 1/2 cent per pound difference in favor of Corinto, although seriously against the interests of many of the coffee estates in the departments of Choutals, Granda and Riva, is for the purpose of influencing shipments to be made over the National railroad, extending from Granada to the port of Corinto. The aggregate of this tax to the government of Nicaragua this year, will be about \$265,-600, or at the present rate of exchange about \$132,000 gold. This money is usually advanced to the government by a bank and exporters go to that bank for their tax certifi-cates and permission to ship. Mercantile and all other kinds of business in Nicaragua appear to have revived to their former activ-ity since the evacuation of the island of Corinto by the British, and many of the soldiers, who volunteered for defense against a British advance into Nicaragua's territory. have returned to their usual occupations The government, however, is actively paring to submit to arbitration all ques at issue between Nicaragua and Great Brit ain that have arisen out of Nicaragua's suc-cessful efforts in 1893 and 1894 to maintain her sovereignty over the Mosquito reserva-

SMALL CONEMAUGH IN FRONTIER C UNTY

Swollen by Recent Rains the Reservoir Waters Sweep Away the Dams and Carry Destruction Over the Town and Farms.

There is a section of southwestern Nebraska as large as some eastern states that s just now enjoying the greatest rainfall white man ever experienced there. And this section was among the worst burned out by the drouth of last summer.

In this area, which is about 120 miles square, are Dundy, Hitchcock, Red Willow, Furnas, Harlan, Phelps, Frontier, Lincoln and Dawson counties. There the rain of the last four days has amounted to a deluge. Streams that were dry now run as raging

torrents. Much miner damage has resulted. and some serious. In Frontier county, along the valley of Medicine river, the poured down yesterday as the result of portion of the dam gave way yesterday and much damage was the result. Only meager reports could be obtained last night from

In Furnas and Harlan countles several bad washouts on the B. & M. rallroad are reported, and one work train has been ditched. No one was killed, but several were injured. At Lincoln the Burlington people positively refuse to give any information

concerning the affair. That the rainfall was general will be seen from the fact that the telegrams printed this morning cover the state from Box Butte county in the northwest and Dundy county in the southwest to the Missouri river.

One of the encouraging features of the telegrams this morning is the statements that many fields of grain that were thought to have been dead have again turned green and now promise a bountiful yield. It is indeed an encouraging prospect the

Nebraska farmer views this morning. RESERVOIR AT CURTIS BURSTS. CURTIS, Neb., June 2 .- (Special Telegram.)-Curtis lake has burst its banks, the railroad grade is torn up, freight cars are strewn across the Medicine bottom, the fine roller mills are ruined, Curtis lake is nearly empty, and a flood of water is run-

destruction in its mad rush. Four of the fine yard tracks, besides the main line, are torn up and gone, while a train of freight cars reach over the bank

ning down the Medicine valley, carrying

and are swinging in the rushing flood. Twenty thousand dollars' damage has already been done here, and all other points to hear from.

The fine alfalfa meadows just below the

city are ruined and homes all along the valley destroyed. News from above and below is coming in, and only one story is told-of dire de

struction and loss of property and live tock swept away.

HEAVY RAINS CAUSED IT. M'COOK, Neb., June 2 .- (Special Telegram.)-As a result of yesterday afternoon's heavy rain Curtis lake burst its banks about 6 o'clock this morning at the place where the Burlington railroad tracks cross the embankment of the lake, and a heavy body of water is now rushing down the Medicine valley to

ward the Republican river. A number of freight cars on the track were precipitated into the Medicine valley below and the fine Curtis roller mill is in

danger of being destroyed. The Burlington's loss will alone reach \$3,000. The loss to stock above and below

the dam is large. It has been raining all day and the water has been rising in the lake, so much apprehension is still felt, not only for the mill, but for other property. With the continued rain and the immense volume of water now rushing down the Medicine valley the dam and Burlington railroad bridge at Cambridge are sure to go out between midnight and 2 or 3

o'clock in the morning. Word has just been received here that the train sent out from here this morning to crib up washouts east of McCook has gone into a washout between Edison and Oxford, and a number of men are injured. A wrecking train and crew has just left for the scene of the accident. There are no particulars obtainable tonight.

RIVERS OUT OF THEIR BANKS. OXFORD, Neb., June 2 .- (Special Telegram.)-As a result of heavy rains the Republican river is over its banks. Railroad bridges have also been washed out, delaying trains. Eight inches of water has fallen the past five days. BEAVER CITY, Neb., June 2 .- (Special Telegram.)-Over seven inches of rain has

fallen here since Thursday. The Beaver and Sappa rivers are out of their banks, and the bottom lands are flooded, the water being higher than ever before. The B. & M. bridge west of town has gone out with a considerable stretch of track. Stock has perished in some instances and many bridges and fences have been washed away. It is still raining. HOLDREGE, Neb., June 2 .- (Special Telegram.)-One and one-half inches of rain fell here this afternoon, two and a half inches fell last night, and three inches the day before, making seven inches of rain in the

all full of water and the ground is thoroughly soaked. The prospect for corn is very good. HENDLEY, Ncb., June 2 .- (Special Telegram.)-Heavy rain last nightt and another this afternoon, which is almost equal to a cloud-burst. The town is almost covered with water and cellars are full. Two washouts occurred on the railroad near town. Some fields are covered from one-half to

past three days. The lagoons and ponds are

two feet deep with water. ASHLAND, Neb., June 2 .- (Special Telegram.)-A light rain commenced to fall here at noon today and continued for nearly two hours. About 8:30 p. m. dark clouds began to bank up in the northwest, the lightning being so strong the electric light company was compelled to stut off the lights for the safety of the plant. At 9 o'clock it commenced to rain with a gentle downfull, increasing until within a few moments water was falling in torrents, which continued till 10 o'clock. The B. & M. water gauge showed a fall of one and one-fourth inches in one hour. This rain will put crops in a most advanced state and fruit will be greatly benefited. Crops

present are looking as well as they have for years, and especially for having faced the discouraging outlook they did up to a week ago. Implement dealers testify that the Decoration day rain made a rush in their business. Farmers say the trouble to keep corn clean this year seems at least 20 per cent less than in '92 or '94, due
