In the basement, which is not fully fitted up as yet, there will be crockery, groceries, and a large stock of meats.

The store will be managed by Joseph Goldgraber, who has been a partner in the New York store for eight years and is associated with Singer Bros. of New York in the ownership of the magnificent new emporium.

SOMEBODY'LL GET TANNED

A Chance for Old Fellows, Little Fellows Ladies and Children.

ALL SORTS OF SHADES OF TAN

Though the Sun Has Nothing to Do with the Case, at the Same Time It Has All to Do with It.

"How under the sun am I going to get tanned if I don't get out in the sun, or if I carry a sunshade when I do?"

Easiest thing in the world, but of course it will cost you a little something—all good things do—but what of that.

In the first place, to get artistically tanned, you'll have to go to the trouble of coming down town Tuesday morning—not till Tuesday—and be with the crowd that's sure to be at 1419 Farnam street, where the Drexel Shoe company is going to almost give away tan shoes.

They have to charge you a little something—but not much. If they don't tan a thousand men, before the night Tuesday'll be because there isn't that many dollars in town, for he it understood that the first, this sale is for cash. You can't expect people to wait for you as they will unless they are paid for it at once.

Of course, there's method in this seeming madness. Hereafter it has always been the rule to cut the season's tan shoes in the latter part of July, because then the season is nearly over, and as a general thing you don't want a pair of tan shoes then.

HAVE FOUND THE LOST WILL. Filed in County Court with Petition for Re-opening Matter Estate Case.

The long lost will of Maria Mader has been discovered, and Leopold Guggenburger of Germany, nephew of the deceased woman, has filed a petition in probate court, asking the judge to revoke the decree which established another and proper testament as the will of her aunt and allow him to come into court and have the more recent will offered for probate.

The lately discovered will of Mrs. Mader places an entirely different complexion on the affairs of her estate. It cuts out Mrs. Rosa Schmidt, until now, but remember, she is the only standing claimant of the estate of the deceased woman, the balance, after being thus distributed, going to make glad the heart of Ella Stung, as residuary legatee. But what is of the greatest moment, the newly discovered will sets at rest the hitherto undecided question, which has long troubled the public mind, in probate court, concerning the monument which is to adorn the grave of Mrs. Mader. The will provides for the erection of a suitable monument over Mrs. Mader's grave, just as her friends have from the start contended for the erection of a monument over the grave of Mrs. Mader.

TODAY'S ATTRACTIONS AT COURTLAND

Phillon and His Spiral Tower with the Royal Mameluk Arabs.

This afternoon at 4 o'clock the big attractions at Courtland beach open for the first time. They are, without doubt, the two greatest drawing cards that Manager Arthur could possibly have obtained, and such a variety of gladiators has never before appeared at one performance.

These two mammoth aggregations consist of Achille Phillon, the only real equestrian the world has ever known, and the Beni Zoug Arab, the royal Moorish troupe of Arabs under the personal management of She Hassan Ben Ali, who controls and manages every Arabian athlete and acrobat in this country. The six consolidated in this troupe comprise the best athletes from four distinct troupes and today these Arabs give a performance that was never equaled, even in Buffalo Bill's Wild West, of which these Arabian jugglers, tumblers and acrobats were one of the principal features.

Phillon's performance consists of standing erect upon a hollow wooden globe only twenty-eight inches in diameter, which he rolls up a runway that is perfectly flat, not being concaved in the least, to the top of the tower. This runway is only eighteen inches wide and circles around the tower from base to dome. On arriving at the top of the tower Phillon continues across an imitation cable stretched a distance of seventy feet and over his head the ground. He then crosses his cable, and at the night performance will descend the tower enveloped in a brilliancy of pyrotechnics, which for the first time in the history of the world has been witnessed. It is almost impossible to thoroughly describe this great performance, as Phillon works his globe in every conceivable way, downward, backward, sideways, turning and pirouetting, constantly propelling the globe with his feet. Admission to the grounds as usual, 10c; amphitheater, 15c.

THE BRIDEGROOM CAME NOT. Augusta Johnson's Dream of Wedded Bliss Has a Rude Awakening.

Miss Augusta Johnson's feelings have been trifled with. Miss Johnson, recently employed at the Reed hotel at Valley, this county, in the dual capacity of dining room girl and cashier, and among the steady boarders at the house where Miss Johnson presided, was Prof. G. W. Dale, principal of the Valley schools, who divided his time between teaching the Valley archery reading, writing and arithmetic and making love to Gust. The professor is wearing the fourth mile stone on his journey through this vale of tears, but that cut no ice with Gust. She was ready to quit working out long ago, and when the man of letters suggested that they last undertake the ineluctable task of raising a family, she acquiesced very willingly.

A few weeks prior to the close of her betrothed's school, she resigned her position at the hotel and commenced work on her wedding trousseau. The last day of school finally arrived, and as the wedding day was set to follow that event, just as soon as the professor could get to Omaha and have a suit of wedding clothes built, the bride expectant, was captured.

On the completion of the professor's wedding clothes the two candidates for matrimonial honors did a lot of billing and cooing, and a certain tailoring establishment in this city, for not getting the clothes out on time was roundly scolded by Dale. Finally he concluded to come to the city to stay until the clothes were finished, and then return to the scene of his conquest and do the proper thing. A whole week has elapsed and Gust is patiently waiting and watching for her lover's return, but he comes not, and it is not likely that he will appear at Valley again soon, for a prominent business man of that town met him here on the great one day last week and the school teacher announced his intention of going to Denver, where he would attend an educational convention, and then, after consulting with the bride, he would assemble, he thought he would go to Minnesota.

Miss Johnson is almost distracted over the turn things have taken, for she fully realizes that her fair name is stigmatized by a designing man's perfidy.
